Investigate Before You Buy a Gas Station

Because of the fact that many gasoline stations have been reduced in size, it is said that thousands of stations are operating at a profit. Many are not. Therefore, the following warning has been issued to those who may be thinking of buying a gasoline station.

"Another as gasoline retailers is reassured you should check and make certain that the present owner is not trying to sell the station because of unreplaceable inventory losses, also remembering that the present owner has closed his accounts with his local board. You may then apply at the board for your opening inventory."

American casualties now average more than 570 for every day of war. As the conquest of Japan advances, losses will probably be higher.

The conquest of Japan will probably be the costliest war in history. Distances are enormous. The enemy is tough and fanatical. We have no reserves of supply within thousands of miles—everything must be transported. And war in the Pacific requires special equipment, not used elsewhere.

Loaning money is the easiest part of the war effort; but it is no less important than fighting. One B-29 Superfortress to bomb Tokyo costs $600,000. To train the pilot costs $27,000. Each torpedo costs $12,000. Because of the vast distances, it takes four to six ships, constantly in motion, to deliver one shipload per month.

The Japs think our home-front is soft. They think we'll get tired of the war and quit. Well— it's up to you. Our fighting men aren't quitters; the Japs know that. It's you they are counting on.

Let's give them the answer—in the 6th War Loan! Let's show Tokyo we can "take it," too! Buy BIGGER Bonds, and we'll finish the big job faster.
