MARKS ARTIFICIAL LIMBS

WITH RUBBER HANDS AND FEET

The Most Comfortable, Durable and Natural.

Although a man may lose both legs, he is not necessarily helpless. By using artificial legs with Marks' patent rubber feet attached, he can be restored to usefulness. One of these engravings is from an instantaneous photograph of a man ascending a ladder. He has two artificial legs substituting his natural ones which were crushed in a railroad accident and amputated. With his rubber feet he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can work at a bench and earn a good day's wages. He can walk and mingle with persons without betraying his loss; in fact he is restored to his former self for all practical purposes.

With the old method of complicated ankle joints, these results could not be so thoroughly attained.

Over 33,000 in use, scattered in all parts of the world. Many of these have been supplied without the wearers presenting themselves to us, simply sending measurements on a measuring sheet which any one can easily fill out.

Received 44 Highest Awards.

Purchased by the United States Government and many Foreign Governments.

A MANUAL of Artificial Limbs and illustrated measuring sheets sent free upon application.

Say?—If a fellow appropriates another's ideas, and sells them at "Cut rate prices," would we be justified in dubbing him a thief or only a "Bunch of Gall."

Apes are great imitators, "Which is why I enquire" if all imitators are apes. There is scarcely an improvement in trowels in the past 25 years no matter who presents them, but what is the product of my brain, but the theft is the other fellows product.

Sincerely yours,
JAMES E. BILLINGS.
