A NEW DEPARTURE! BEST PLOW IN THE WORLD!

THE SYRACUSE CHILLED PLOW CO. of Syracuse, N. Y. Are now putting on the market a Plow that is as much superior to any Plow heretofere made as the Plows of the past few years have been superior to those made half a century It combines all the excellencies of any Plow

It obviates all the objections made to any In addition it embraces several new features of the greatest value, for which we have obtained exclusive Patents. Its Beam, Clevis, Jointer Standard and Wheet Standard will be STEEL, and its mold board under a process for which we have also obtained an exclusive Pittent. It will be

The wheel will run under the beam or one side of it as desired, and always kept in line. The beam is adjustable for Spring or Fall

Plowing, and also for two or three horses. The handles can be adjusted to accommodate a man or boy, on the same Plow. It is a perfect Plow. Wooden beams are going out of use because they shrink, swell and warp, and never run two seasons allke. Iron beams are too heavy.
Malleable beams become demoralized and

bend, which is much works than to break.

A Steel beam is the necessity of the day. It is three times as strong and very much lighter than any other style.

When we say a Mold board is chilled, the armers know it is so. We do not palm off on them a composition of various metals and call it chilled metal. We want agents for this new Plow in every We can give but a very small discount to them, but we will pay the Railroad Freight. We propose to place this Plow in the hands It will be the best Agricultural Implement

It shall also be the cheepest. Persons therefore who are not willing to act as agents on the principle that "a nimble sixpence is better than a slow shilling," need not apply for an agency.

No Plows on commission. All sales absolute. This is the only Steel Chilled Play in But this Plow, full rigged, by giving small discounts, can be sold for Seventeen Dollars. Compare this price with that of any Iron Plow It is cheaper than no other Plow now made would be at five dollars and a half, Where there are no agents we will, on recelpt of Seventeen Dollars, send a Plow to any

political party in a free government. They believe that the alarming promise of a "Solid South" means an attempt to fulfill it by threatening the blacks with physical and the whiter with social death in the event of resistance. A "Solid South," therefore, teaches us there will be an chormous accession to the Republicans in every State where there is a free ballot, and thus a Solid North will be created, not as a sectional, but as a defensive measure. The only sectional party in this country is that which will not permit the other party chudi freedom at the ballot-box.

Another gratifying lesson is that the peo-

B. J. KENDALL & Co.-Gents: In reply to your

MRS. LYDIA E. PINKHAM, letter I will say that my experience with Kendall's Spavin Cure has been very satisfactory indeed. Three or four years ago I cocured a bottle of your agent, and with it, cured a horse of lameness caused agent, and with it cured a horse of lameness caused by a spavin. Last season my horse became very lame and I turned him out for a few weeks when he became better, but when I put him on the road he grew worse, when I discovered that a ring-bone was forming. I procured a bottle of Hendall's Spavin Cure and with less than a bottle qured him so that e is not lame, neither can the builch be found.

Respectfully yours.

KENDALL & Co.—Gents: In justice to you not myself, I think I ought to let you know that I ave removed two BONE SPAYINS with "Kendall's Sparin Cure," one very large one; Don't know how long the spavin had been there. I have owned the horse eight months. It took me four months to take the large one off, and two for the small one. I have pred 10 bottles. The horse is entirely well, not at all stiff, and no bunch to be seen or felt. This is a wonderful medicine. It is a new thing here but if it does for all what it has done for me here, but if it does for all what it has done for me

In addition it embraces several new features of the greatest value, for which we have co-Its Beam, Clevis, Jointer Standard and Wheel Standard will be STEEL, and its mold beant will be a composition of Steel and Iron chilled under a process for which we have also obtained an exclusive Patent. It will be

THE SYRACUSE **CHILLED STEEL PLOW** Its weight will be eighteen pounds less than our present styles. A first-class Steel Plow, made in the or-

dinary way, full ricced, retails for twenty-two teen to nineteen dollars. The price of our new Plow will be but Seventeen Dollars, and it will be the cheapest Agricultural Implement ever sold. Its mold board will outwear three of the very best kinds of the ordinary steel mold It will scour in soils where all steel plows

With this Plow will be introduced a corrugated Plow Point and Jointer Point, on which rehave also obtained a Patent, and which is also a great improvement, both as regards strength and wear. The Jointer can be shifted so as to take ore or less land, and also more or less pitch. and it can always be kept on a line with the The wheel will run under the beam or one side of it as desired, and always kept in line. The beam is adjustable for Spring or Fall Plowing, and also for two or three horses. The handles can be adjusted to accommodate a man or boy, on the same Plow.

It is a perfect Plow. Wooden beams are going out of use because they shrink, swell and warp, and never run two seasons allke. Iron beams are too beavy. Malleable beams become demoralized and bend, which is much worse than to break. A Steel beam is the necessity of the day. It is three times as strong and very much lighter When we say a Mold board is chilled, the farmers know it is so. We do not palm off on them a composition

of various metals and call it chilled metal. We want agents for this new Plow in every town in this State. We can give but a very small discount to them, but we will pay the Railroad Freight. We propose to place this Plow in the hands of Farmers as near the cost of manufacture as possible. It will be the best Agricultural Implement ever sold. It shall also be the cheapest.

Persons therefore who are not willing to act as agents on the principle that "a nimble sixpence is better than a slow shilling," need no apply for an agency.
No Plows on commission. All sales absolute. This is the only Steel Chilled Plow in the World Steel costs several times more than Iron. But this Plow, full rigged, by giving small discounts, can be sold for Seventeen Dollars.
