A NEW DEPARTURE!

BEST PLOW IN THE WORLD

THE SYRACUSE CHILLED PLOW CO. of Syrapuse, N. Y. Are now putting on the market a Plew that is as much superior to any Plow heretofore made as the Plows of the past few years have been superior to these made half a century It combines all the excellencies of any Plow

It obviates all the objections made to any other Plow.
In addition it embraces several new features of the greatest value for which we have obtained exclusive Patents
Its Beam, Clevis, Jointer Standard and Wheel
Standard Will-be STEEL and its mold board
will be a composition of Steel and Iron chilled under a process for which we have also obtained an exclusive Patent. It will be

THE SYRACUSE CHILLED STEEL PLOW

Its weight will be dightben pounds less than

our present styles. A first-class Steel Plow, made in the or-dinary way, full rigged, retails for twenty-two dollars. Interior Steel Plows rotall from sixteen to nineteen dollars.
The price of our per Plow will be but
Seventeen Dollars, and it will be the
cheapest Agricultural Implement over sold. Its mold board will outwear three of the very best kinds of the ordinary steel mold

It will scour in soils where all steel plows and all other plows have hitherto proved a With this Plow will be introduced a corrugated Plow Point and Jointer Point, on which we have also obtained a Fatent, and which is also a great improvement, both as regards strength and wear.

The Jointer can possifted so as to take

more or less land, and also more or less pitch, and it can always lie kept on a line with the The wheel will run under the beam or one side of it as desired, and always kept in line. The beam is adjustable for Spring or Fall Plowing, and also for two or three horses. The handles can be adjusted to accommo date a man or boy, on the same Plow.

Wooden beams are going out of uso because they shrink, swell and warp, and never run two seasons alike. Iron beams are too heavy. Malleable beams become demoralized and bend, which is much worse than to break. A Steel beam is the necessity of the day. It s three times as strong and very much lighter

than any other styles When we say a Mold board is chilled, the farmers know it is so We do not palm of an them a composition of various metals and call it chilled metal. We want agents for this new Plow in every town in this State. We can give but a very small discount to

We propose to place this Plow in the hands of Farmers as near the cost of manufacture It will be the best Agricultural Implement It shall also be the chapest.

Persons therefore it he are not willing to act as agents on the principle that "a nimble sixpence is better than a slow shilling, need not apply for an agency.
No Plows on commission. All sales absolute.
This is the only steel Chilled Plow in the World.

Steel costs several lines more than Iron. But this Plow, full regged, by giving small Compare this price with that of any Iron Plow ever made.

It is cheaper than any other Plow now made would be at the dollars and a half. Where there are no agents we will, on re-

celpt of Seventeen Dollars, send a Plow to any Railroad station in the State and pay the SYRACUSE CHILLED PLOW CO.

HAPPY ENDING.
