AGENTS:

HENRY TAFFEN,

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which the body becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease in any part of it. No organ is free from its attacks. None is sound when it is once tainted. The scrofulous taint is variously developed by mechanical disease, low living, the use of mercury, unhealthy food, impure air, filth, and dirty habits, the depressing vices, and other causes. But the original cause is the same in all. Whether it be struck in by the removal infection, or whether it be contracted in the womb, from parents to children, even to the third and fourth generation; whether it seems to be the soil of Rum who sows it, or it will vent the iniquities of the fathers upon their children.

Its effects commence by deposition from the blood of a corrupt or ulcerous matter, which is in the lungs, issues and internal organs, is named tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which ponders on the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently one-half the numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which destroys the human family has its origin directly in the scrofulous contamination; and many other scrofulous diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One-quarter of all our people are scrofulous; hence persons are pro[duced] by this taint in a degree, and their health is undermined by it. To thrust it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this purpose. Where prevailing and fatal maladies. It is compounded from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affections which arise from it, such as Eruptive and Tetter Diseases, St. Anthony's Fire, Rose or Erysipelas, Ringworm, Pimples, Blotches, Boils, Tumors, Ulcers and Sores, Tetter, Pustules, Blains, Blotches, Salt-Rheum, Scald-Head, Sore Eyes, Mercurial Diseases, Dropsy, Dyspepsia, Debility, and Prostration, and Female Complaints. Many a one has an Ulcer in the system, when the surface is fair. The popular belief is to the contrary, but the fact is a truth, and it is on a deep seated taint in the blood. The Compound Extract of Sarsaparilla is a powerful purifier and tonic. It expels the corrupt matter from the blood, and thereby cures the disease it originates. Such cures as these are effected by it are the best evidence of its virtues. Many of them are publicly known, and so palpable that all can see and understand them. Hence it supplies the public with a reliable antidote for the scrofulous poison which is preying upon their vitals. Under its benign influence the foul corruption is thrown off, and the blood purified, enriched, and vitalized, so that it will impart health and vigor to every part of the body. Scrofula, however far developed, however deeply seated, however obstinate and malignant, however complicated with other diseases, and however it may have baffled the skill of physicians, yields to the power of this remedy. It is mild and harmless in its operation, and may be taken by the most delicate child with perfect confidence. For minor complaints, as a blood purifier for the season, or for the relief and cure of more obstinate disorders, no preparation should be wanting in any family.

PREPARED BY

DR. J. C. AYER & CO., Lowell, Mass.

AYER'S

Ague Cure,

FOR THE SPEEDY CURE OF

Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Bilious Remittent Fever, Periodical or Bilious Headache, and Bilious Diarrhœa. Prepared from the most powerful antidotes known to the vegetable kingdom, it is the most perfect remedy for the Fever and Ague and Fever of Malarious Countries.

We are enabled to offer to the afflicted a remedy which, while it cures the above complaints with certainty, is entirely free from any injurious quality. Such a remedy is invaluable in districts where these complaints prevail, and where the best remedy has hitherto been considered dangerous. Its power to cure has also astonished the people. Cases of the most obstinate character, which have baffled the skill of physicians, and resisted all other remedies, have been speedily cured by it. Even those cases which have become chronic, and in which the system seems saturated with disease, are completely driven out of the system by the use of this antidote. Not only this, but all other diseases arising from a bad state of the blood, are cured by it. Liver Complaints, Rheumatism, Neuralgia, Gout, Headache, Blindness, Toothache, Earache, Colicky Pains, Palpitation, Painful Affection of the Spleen, Hysterics, Nervousness, Sleeplessness, Lowness of Spirits, and Pains in the Region of the Stomach, all of which, when originating in this disease, or attended by it in any degree, or because periodical, are cured by this Ague Cure, and the patient and consequently cures them all alike. In the Spring of the year, one dose is generally sufficient to expel the disease from those who are traveling or temporarily residing in districts where Fever and Ague prevails. Malaria is not generally or daily while exposed to the infection, if he will be convinced that a dose of this remedy is

PRIZE DRESS MAKING.—The Lovell Silk Cleaner has described in strange terms for drying fruit which must be quite convenient for the purpose. It is a house with a roof and sides of lattice work, and, by means of a steam pipe, any about four and a half feet high and about three and a half feet wide, can be dried in about three hours. In her absence two fellers drawers, and two bedding has a bushel of fruit. A apparatus covers 16 by about two feet in height between. Two sets of trays, and two shelves in succession, in each of which is placed a tray of fruit, are placed in the upper part of the house, and the heated air, rising through the lattice work, passes through the trays of fruit, and escapes at the top.

CANNING MEAT.—Scarcely a month passes in Paris, the famous gastronomic capital, but some new method of preserving meat is announced. Dr. Gaultier, the "Liebig" of Paris, has just invented a process for the Hospital de la Charité, which is said to be really economical as well as excellent. The meat is cooked in a vacuum, and then hermetically sealed. All boasting the same merits, but each inventor claims that his process is the best.
