them off their feet in the summer and and not freeze them a particle, and very much preferred to believe that the little thermometer told a fit or at least was badly mistaken. They said they knew i seemed colder when the wind blew, but

> at those times than others, and not simply because it seemed so, and here they stood firm.

The thermometer stood at -71° Fahrenheit, the unclouded sky in the vicinity of the sun, hanging low in the southern horizon, assumed a dull leaden hue. tinged near the sun's rim with a faint. brownish red. At night time the stars glitter like diamonds under the electric light, and fairly seem on fire with their brilliant radiance. Should you pour water-cold water taken from the well dug through the ice of the lake near which you are camped-upon the surface of the ice, it greets you with an astonish ing crackling noise like fire running through cedar brush, or like a dozer bunches of miniature fire-orackers, and

only the face from the eyebrows to the chin and about half of the cheeks. We turned our backs toward it as much a possible, and especially after we had gotten into camp and got to work build ing our snow houses and digging throug the thick ice of the lake for fresh water It is not so much the intensity of the cold, expressed in degrees on the thermometer, that determines the disagree

four or five humans in harness looks like a starting locomotive enveloped in its esthe force and relative direction of the

Arctic temperatures, when the snow is like sand if loose and like granite rock if in mass. Another fallacious idea ex. ploded by my Esquimau, at least to a great extent, was the use of snow to quench thirst, which every Arctic writer has been so unanimous in condemning. as hurtful. My Esquimaus used it at all temperatures to alleviate their thirst, first breathing on the piece of snow a few times before putting it in the month. I have often seen Esquimau boys places the ice that was so clear before that you steel snow knife to their tongue and let almost felt timid about putting your foot it freeze fast and then swing it backwar on it for fear that it really was not there. and forward until it fell, and try and make it stick upratht in the snow. instrument could be arrived at by the number of stops—but that Beef, Mutton, Lamb and Veal, HUPTURE RELIEE. Simple, and, reliable and a perfect retainer. It is not a Truck. Wen Day and Night and its presence forgetten. Send for cincular with testi-monials from whiteful sufferers cured by this ap-lingtion. Aldress Gentral Medical and Burgical Bkillful treatment given all kinds of surgical and medical cuses. Weakening diseases and pri-vate frombles in male and female our speciality. Be consultation free and invited. to twenty "stops" on, while, for all practical purposes, s single stop, or, perhaps, none at all, would do just as well-if the instrument is provided with a knee-swell.

> the musical powers of the organ, and not the stops ; but even this has become deceptive; formerly a "set of reeds" was understood to mean a full five octaves of reeds extending all the way across the organ; now some makers divide the one set of reeds into five sections, and call each octave a "set of reeds"or "five sets of reeds" when there is but one set in the whole ${f R}$

know about organs" after considerable experience with various kinds.

As we stated above, we can sell the OHEAP Pianos and Or gans, but we CAN'T recommend to purchasers that it is to their interest to buy them in the end.

every day at his own Slaughter House. Corned Beef, Tongues and Pork.

Also, Smoked Ham, Bacon and Tongue. It is the number of genuine "sets of reeds" that adds to keep better and taste sweeter than that brought from New York or Chicago. As the warm weather approaches you will find Fresh Killed Meat will SEFA
