Gentlemen: The sample of 'Ivory' Soap which you sent to me for analysis has been received, and you will find analysis herewith, As a result, the "Ivory" Soap while strongly cleansing, leaves the skin soft and pleasant to the touch instead of harsh, uncomfortable, and liable to chap, as results from the use of many common laundry soaps, in which the ratio of uncombined to combined alkali is large The percentage of uncombined fat in the "Ivory" is very small hence the lather is clean, white and abundant, with entire absence of oil or grease. There are no injurious substances. The above considerations show the "Ivory" to be a pure soap

and excellent for laundry use. Very Respectfully Yours, LABORATORY OF CHEMISTRY.
