

National Democrat.

RAHWAY, N. J., Sept. 6, 1889.

Democratic State Convention.

The Democratic men of New Jersey are called to meet at such times and places as may be designated by their local committees, to elect delegates to the Democratic State Convention, to be held at Taylor Opera House, in Trenton, on

Tuesday, September 10th, 1889, at 10 o'clock A.M. for the purpose of nominating a candidate for Governor of the State of New Jersey.

The basis of representation will be one delegate for each two hundred Democratic voters cast at the gubernatorial election of 1888.

The names of the delegates, and the district which ward and township shall be entitled to at least one delegate.

WILLIAM L. MODERNOTT, Chairman.

General Managers—Joseph W. Baldwin,

James Ingall, John H. Jones, John M. Jones,

John R. Jones, John Stebbins, Daniel F. Green,

John C. Moore, Democratic State Committee.

A WESTERN TRIP.

Not many years ago a trip as far west as Milwaukee, Wisconsin, would have been considered by people of this section a big undertaking. But now, with such facilities of rapid transit as are afforded by the Pennsylvania Railroad, a visit there can be made in a short time with but little trouble or preparation. At least that has just been our experience. Having friends living in Milwaukee, we had been thinking of making them a visit, and the annual encampment of the G. A. R. which occurred there last week, seemed a favorable opportunity. But it was not until near noon on Monday, the 30th, that we fully decided to make the trip. We left after seven o'clock that evening with (that is, the son, wife and son)—we were staying at the popular No. 9 Western Express, arriving in Pittsburgh at 7:45 Tuesday morning.

We passed through Johnstown and the Conemaugh Valley, 78 miles east of Pittsburgh, the scene of the late floods and destruction of life and property, and could still discern the evidences of the disaster. On the early morning fog in the valley prevented a clear view at that time. (On our return we had a better view as we passed between 10 and 11 o'clock in the day.)

After passing Pittsburgh, we arrived on the Pittsburg, Fort Wayne and Chicago, a road of considerable length, which is fast becoming the chief line of travel from the West to the East. We passed through Pennsylvania, across Ohio and Indiana, we reached Chicago, Ill., at 9:30 in the evening. Here we change cars and at 10:30 took the Chicago and Northwestern Railway for our destination, 85 miles distant. Arriving about 1:30 Wednesday morning, we find the principal streets still animated, many of the stores being in full blast, and the bands and soldiers parading. We ascertain that our friends reside some distance from the depot, but securing an accomodating hackman, we reach their house shortly after 3 o'clock, and have them all aroused and sitting about, as usual, surprised, but evidently merrily singing and up-to-date.

We do not tarry for lengthy conversation, preferring to seek a place for dressing ourselves of some of the soft coal grime and dust, for the traveling west of Fort Wayne is not so free from dirt, comfort as upon the well-habited road, and behind the hard coal engines of the Pennsylvania main lines.

After a refreshing sleep and a good breakfast, we are in for "holly" the city and vicinity, in which we have no difficulty, thanks to the untiring attention of our friends and their families, Mr. and Mrs. Robert L. Jones, and Mr. and Mrs. T. W. VanCleef, who several years ago went from the east to that city and have prospered in business; also Mr. Frank R. Ellsworth, who came from Freehold recently and has a position in one of the largest dry goods stores.

On account of the annual national encampment of the G. A. R., Milwaukee, (known as the "Cream City" from the color of its soil and cream brick buildings), presented a holiday appearance, nearly everything, from the largest public building to the little boys' velocipedes being profusely trimmed with the national colors—and almost every individual decorated with a badge or some other evidence that something more than ordinary was going on.

As the G. A. R. encampment was not the prime object of our visit, we will not undertake to "write up" that event, the full particulars of which no doubt have long before this been reported in all the reading material that interested us.

The programs which attracted the most attention was the naval battle on Lake Michigan, which came off in grand style. That evening, through the courtesy of our friends we obtained an excellent position to view it from sea-coast on the shore, as almost every one having property adjacent to the lake went into the speculation of erecting and selling seats for the occasion the rialing price being one dollar per seat. There were "shore batteries," "bomb boats" with the whistling bombs, representation of the blowing up of the "Merrimac," burning of a boat, etc. and "the rockets red glare, bombs bursting in air" made a very realistic display.

Representations made by some persons who had transiently visited Milwaukee had given us the impression that it was not a very inviting home, but those persons did not have the opportunity of seeing the best portions of it as we did, through the kindness of our friend Mr. R. L. Jones, who, with his fine team and carriage, took us to the various points of interest, which included the following:

National Soldier's Home, the most extensive and handsomely laid out one in the country, the grounds covering four hundred acres with fine lawns and all comfortable buildings.

National Park, (large enclosure where Wednesdays are held military review, and an exhibition drill by the celebrated Chicago Zouaves) took place, and where we obtained a glance at Gen. Sherman, General Grant, and others.

The convention for the nomination of the G. A. R. was held at the Hotel Royal, on Tuesday, and was drawn by the result of the vote of the members, and the election of the new president.

Union County is to be honored in the Democratic convention next Tuesday in the selection by the state committee of H. Fred. O. Marsh, of Elizabeth, our temporary chairman, we understand.

Dr. J. T. Daly, of this city, has been appointed by Commissioner Tanner, as one of the Board of Pension Examiner for this district.

His secretary, Mr. C. B. Willis, by while VanCleef as every body called him when we first met the last as a little lad, but who is now grown up and is an able member of the American Legion, is very well known, and has been fitted up with large equipment in the way of innocent amusement and exercise, including a swimming bath and shower baths. The rooms were given up to the visiting G. A. R. during the week as were most of the halls and public places, including some of the churches.

We were also afforded an opportunity of visiting the large Exposition Building, covering an entire block, conducted on the plan of the American Institute of New York.

On Wednesday night we sat in one of the newspaper men's, both local and visiting, and read the latest news and general information concerning the city.

A noticeable feature in Milwaukee is the large and handsomely laid out lawns and grounds about the residences generally, there being an absence of crowding usual in large cities. The site of the city is hilly, and many of the streets are terraced, with the residences set well back, giving them a fine appearance. The dwellings are largely of the western style—one story, the cellar mostly above ground, high ceiling, large and commodious—and we could find in love with this style of house in the convenience of everything. A fair-sized dwelling of the kind would almost cover an ordinary eastern city lot.

Milwaukee now has over 200,000 inhabitants, and its business is extensive and varied. Probably the largest is from the brewery, the Pabst Brewery is known to be the largest in the world, and its products are various. Various kinds of leather goods are put up, and the popular No. 9 Western Express, arriving in Pittsburgh at 7:45 Tuesday morning.

We passed through Johnstown and the Conemaugh Valley, 78 miles east of Pittsburgh, the scene of the late floods and destruction of life and property, and could still discern the evidences of the disaster.
