Another School Flag.—The patriotic patrons of Franklin school have procured enough funds and secured a handsome large flag which will be floated to the breeze from a fine new staff on Friday afternoon. Appropriate exercises will be held at 2 o'clock at the school house, and the board of education and other city officials will be invited to attend. This school, however, will not withdraw from the contest for Demograt's prize flag, elsewhere referred to—and if they succeed in curing it they will keep it in federve for lists when the other wears out.

chickens \$25.

The merchant stated a proposition that

ppeared correct by taking an uneven num-

ber of one hind; for had he taken an even

number of each kind, no matter what part of the whole number, the proposition would have remained the same and the

as he paid \$2 for the first five he has not

changed it a particle, and \$25 is the amount psid for the chickens. If the chickens were sold by the statement of the merchant he would not have sold 80 of each kind, but 86 at 33\frac{1}{35}c each and 24 at 50c each, for 5 divides 60, 12 times, and 8

times 12 is 86 and twice 12 is 24. No,
