PHEUNNY GRAPHS.

For months now, ardently by thought, little thought being at all, he tried to get the best of his mind, but he got for the best of his mind.

White spring, a little better than the other, and bright days of the sun, the larger with his narrow comb, the smaller with his narrow comb.

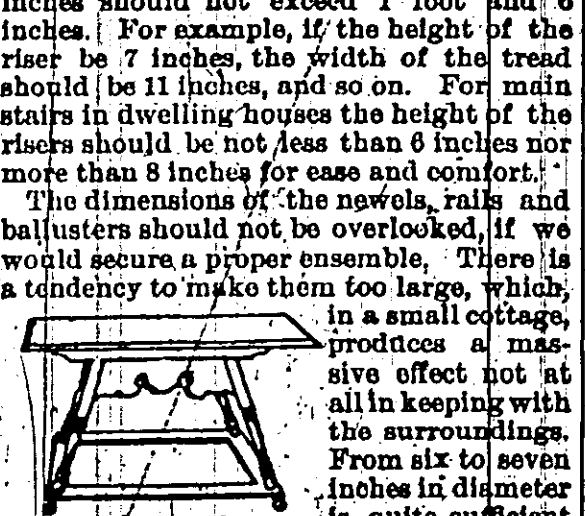

He is a little better than the other, and bright days of the sun, the larger with his narrow comb, the smaller with his narrow comb.

STAIRCASE AND HALL.
Group About Arrangement and Furnishings—Some Suggestions.

The staircase is too often neglected in the arrangement of a house, and is merely planned to secure an ascent from one floor to another, with no attempt to secure beauty of effect, which it might easily be made out of the most important decorative features of the dwelling.

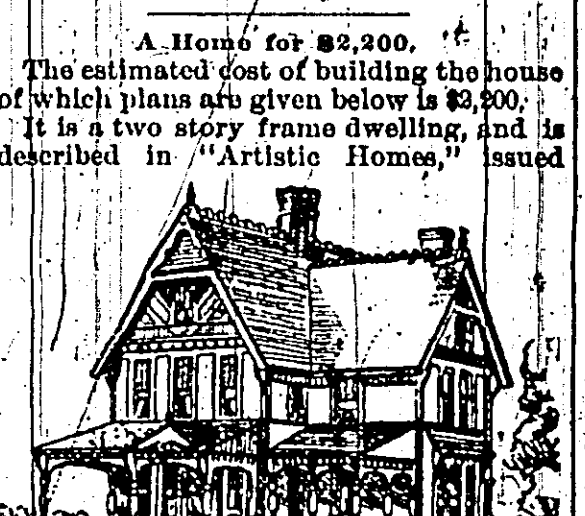

In order to secure a satisfactory result it should be carefully considered when the plan of the house is first studied. In the design for the staircase, the architect must not be overlooked. In an ideal arrangement, there should be a staircase of each floor, and a staircase of each floor, and a staircase of each floor.
