Selling a house as soon as the cellar is started is not a frequent occurrence ind indicates the confidence of the public in the integrity of the dealer. This unusual transaction took place this week when Frank H. Trussler started the cellar of a new dwelling on Trussier place, a part of the former Meeker farm, which Mr. Trussler has already extensively developed. The purchaser is Chester A. Beemer. As the result of this early transerected before cold weather sets in. Much credit is due Mr. Trussler for the conservative yet energetic manner erty that comes into his possession the bas already erected a goodly num.

PUBLICITY, NOW?

2. Hospitals have been increasing their facilities during and since 3. The war emphasized the value of nursing services, and health protection.

1. Nurses' services are more generally required. 5. Mor fields of nursing activities are opening.

6. Shorter hours during training necessitate more nurses. 7. The demand for nurses exceeds the supply. WHAT ARE THE QUALIFICATIONS TO MAKE A GOOD NURSE? Good Health—is of paramount importance as for any other vocation Age-18 to 35 years.

There are more Hospitals since the war.

Education-Requirements are that applicants should have one year high school or its equivalent. Character-Personality-"A nurse must be strong, because people will Isan on her. She must have steadiness and self-reliance, because heavy responsibilities will often be placed upon her. Sympathy and tact and espeproportion are essential. And above all else, she must have courage, the cool "fighting nerve" to battle, with unfaltering patience determination and hope against disease and suffering

WHAT IS THIS TRAINING? Practical and theoretical instruction in all forms of nursing arising in the care of the sick naually in a Hospital. The school is non sectation WHY IS TRAINING NECESSARY? The pursing art is as distinct and specialized as that of madern medicine. Duties and responsibilities fall upon the nurse which can be

met only by thorough and intelligent knowledge. This cannot be gained without study. WHAT IS THE CHARACTER OF THE TRAINING? Instruction is both theoretical and practical in nature. The propation period is 2 months. If the applicant is desirous of continuing her training at the conclusion of this time and has shown that she possesses the

ecessary qualifications, she is accepted as a student nurse, puts on the uniform of the school, and enters the word, continuing her theoretical in struction throughout her entire course The subjects studied are: a. The sciences underlying pursing work--Elementary Anatomy and Physiology, Elementary Bacteriology, Hygienic, and Ele-

mentary Chemistry. The Principles and Practice of Nursing in all its various branches . --- Medical, Surgical, Obstetrical, Infectious, etc., including a study of the various diseases and general principles of treat

Allied subjects dealing with the treatment of disease Materia Medica, Dietetics and Invalid Cookery, Massage, etc. d. Professional subjects-History of Nursing, Nursing Ethics, Social and Professional Problems. WHERE DO NURSES LIVE?

Boach near Keansburg, N. J.

A NEW FRIEND

"This is fine, perfectly fine, I am so

be satisfied with that. I am not the official forecaster, and I haven't my different. And this is how it came

be satisfied with that. I am not the official favecaster, and I haven't my goosehore with me, but I venture to predict that the marriage will be a dismal follure. Tobies, with all his excellent qualities, is the most close mouthed man in town, and if he ever had an emotion he probably took it for a chill, and began doning himself with quinine. There's as much sentiment in a coherete hitching jost as the same modern ment they came violently into collision, stern on. The result was that Jefferson plunged overboard on one side, and Cleveland, making a vain effort to selze and save him, lost his own balance and toppled over on the other. I have heard some strikingly original, graphic and vigorous language first and last; but I have never heard anything to equal the impromptudes in that man.

languishing sort of girl, who looks up laws of nature I knew it was impos- "Glad to know both of you," said boat. on herself as a vine, and will want her suite for mules to breed. So after the gobile. "There was a time, he Carliste observed the aquatic disason herself as a vine, and wall want her husband to be a sturdy oak, so she can wind herself around him as it were, she will expect Tobias to tell her, four thousand times a day, how much be loves her; and every time he takes a chair she will elimb on his knees and nush her tooknot into his one as a day, how has a lar that he was a liar. He went way very charrined at this, swear ing that he was speaking the truth.

Presently 1 beard the clatter of hoofs, indicating the approach of the hoofs, indicating the approach of the horses driven toward the homestead.

So after the goblin. There was a time, he continued, "when goblins were not considered nice. But it was gossip, more gossip. No truth in it at all.

They like us around these parts—in the neighborhood of the House of the neighborhood of the neighborho knees and push her topkno into his bosses driven toward the homestead face, and expect him to assure her in by the old Swabill at the appointed "Well, I'm so glad to know both of now for his wit. Not eloquent, but by face, and expect him to assure her in hy the old Swahill at the appointed hurning language that he simply hour. I went off to watch them pass, couldn't live five minutes without her.

"When that sort of a girl gets the right husband my friends she is an little creature tottering by the side of right husband my friends she is an little creature tottering by the side of right husband my friends she is an little creature tottering by the side of right husband my friends she is an little creature tottering by the side of right husband my friends she is an little creature tottering by the side of right husband my friends she is an little creature tottering by the side of right husband my friends she is an little creature tottering by the side of right husband my friends she is an little creature to the right husband my friends she is an little creature to the right husband my friends and feel that I have a friend at last in all this weary world."

"Well, I'm so glad to know both of you," said the appointed hour is given by you, said the appointed hour is given by you, said the appointed hour is given by you." Said the appointed hour is given by you, said the appointed hour is given by you." Said the appointed hour is given by you. Said the appointed hour is given by you. Said the sold that is given by you. Said the tinies, and so she usually marries a the fool with the mare like that."

	ABOARD THE ARK
	Noat.'s Passenger List Must Have Been Long One.
	Either the Bark Was a Mighty Flota tion, or the Voyagers Were De- cidedly Crowded.
	It is probable the human population of this earth, itself only a spinning atom in sidereal darkness, rises to up word of two billions, and is certainly not less than 1,650,000,000. But how many creatures of all kinds has pro-
	lific nature spawned upon this relatively minute speck in cosmos? I Noah took a pair of every living species aboard his ark, how yest an arm, did he have with him on his greathotation, and how large must have
	been that mighty ark? Sir E. Ray Lankester gives see II luminating and surprising figures in his "Secrets of Earth and Sea." He says that it is, to be sure, impossible to estimate the number of individual in existence. But naturalists have iden
	tified and classified a large number of kinds, breeds, or, more correctly, spe- cles of animals and plants. Not all it is certain. There are 19,000 spe- cles of mammals, about 14,000 of birds 7,000 of reptiles, 16,000 species of
	fishes. 500,000 sorts of six-legged in sects, 15,000 of crustaces such as the shrimps, lobsters and crabs; 62,000 o molluscs, such as snalls, mussels oysters and the like; 5,000 corals and polyps, 3,000 sponges, 6,000 microscop.
	In all, Breut 800,000 species of ani mais have been found. The scientis ways probably as many more remain to be recognised, and described. Single species may contain far more individuals than there are men of
	Individuals than there are mon or earth. ""The total number of described species of plants," adds Sir Ray, "has no been estimated, but some idea may be formed from the fact that 1.860 specie
	of flowering plants alone have beet found in Britain, 17,000 in British in dia, 22,000 in Brazil, not to mention those of Australia and Africa! These figures do not include the vast number of flowerless plants."
	Sir Ray might have advanced ever more startling figures if he had included insects in his that. One of the early American jokes about the arman cradited to Andrew Jackson, who
	after grievous annoyance during on of his Indian campaigns, remarked the he surely wished Noah had acciden ally stepped on that pair of chigger he took with him into the ark. The remark about a single specie
•	containing numberless individual might be applied to varieties in the case of insects. Americans and Their Wives.
	I am picking my words. In spite their proclamation, I doubt wheth the American man is quite as mu at his wife's feet as is made out.

at his wife's feet as is made out.
