Homely Advice

To the young men just leaving school a bit was finally done from the Suof homely advice should not go amiss. Fromnow on your road will be more difficult and trying than in normal times, but it won't be as hard as it was 25 or 50 years ago. The opportunities for advancement are more varied. but in the final analysis it depends upon the individual. Let us pause and say that there is nothing degrading in donning overalls and going into the shop or factory. If you com- have conquered the air. mence at the bottom and show those traits of character which have made your educational career a success you will gradually mount step by step to a firm and lasting position in the .business world. Spend a few evenings at home with your folks and get their slant on life. Find out how your father succeeded and then use that as an example to further build a successful career. It is not going to be an easy matter to get a job. Education helps materially but your own individual efforts will have to carry you through in these extraordinary times. You can't be a shirker and hope to win in life's battle. You must go in and be a sort of a partner, interested in your work. With that kind of a start and attitude you will go to unlimited heights.

From The Rahway Record-June 25, 1918. Rahway faces a critical situation in reard to its coal supply-serious now and sure o be more serious as winter approaches. The Record is informed that the U.S. Fuel Administration will permit the shipment of a little less than two tons per capita to this city for consumption during the period ending March 31, 1919. If the population of Rahway is taken as 9.600, the 1915 estimate, the allotment for this city will be only a lit--tle more than 19,000-tons. Rahway's population is now about 12,000 so the allotment is far below the city's needs.
