How murdering culprits are apprehended by a young secress is portrayed in "Before Dawn." The picture has an interesting mystery, treasure-hunting plot in which the characters are motivated by a search for a fortune in gold bullion. Some clever acting is done by Stuart Erwin as a detective who arrests Dorothy Wilson as medium who has obtained money under false pretenses. Without question the biggest assets a man's home town investment

can have are its retail merchants. Support them and a handsome divi-

dend yield comes back to you in the form of increased prosperity and

happiness.

# FROM Home Merchants

When you patronize your local merchant you are adding to the value of that home town investment. The reason is plain. The local retail merchant will spend his life in Rahway. He is interested in its development, in its schools and highways. He is a hearty contributor to all civic and other movements that maintain our collective prosperity.

When you patronize stores out of town for things you can buy at home, you are "selling Rahway short." You are sending your money OUT OF THE COMMUNITY thus depriving your home town of the support you should be giving it.

Cost of Electric Service **Cut Five Times Since 1929** 

Last week, through the medium of newspaper adver-tisements, this Company reminded its electric customers that the shifting, from the consumer to the producer, of the Federal 3 per cent tax on electrical energy used for other than industrial purposes, was equivalent to a reduction in electric rates amounting to approximately \$1,250,000

This assumption by the Company of additional taxes is the fifth reduction in the cost of electric service to consumers since 1929. The effective dates of the several reductions, (including the change in taxes), and the annual savings resulting from each were:

As a result of the successive cuts shown above, this Company's customers are now paying \$6,150,000 less a year than they would have had to pay for a like amount of service if the rates had not been reduced.

And prior to 1929, during the period when the cost of other commodities was steadily going up, the price of electricity was repeatedly reduced.
