... for giving up needless travel!

THOUSANDS of Americans conscious of the vital part that transportation plays in victory, are giving up non-essential trips. That is genuine sacrifice, self-restriction symbolic of American determination to win this war, Half the available Pullman cars and a third of all coaches are now in troop service. Those which are left are carrying an enormou volume of essential war and business travelers. many thousands of service men on furlough and people going about the daily business of making a living are taxing available—equipment to the limit. That kind of travel MUST come first:

is to remain at home. For frankly, there is not room at all times for all who would like to travel. Compulsory travel restrictions would restrain the few who consider personal convenience first, but by and larger plain horsesense and loyalty are making self-restriction work reasonably well. Americans in the vast majority who ask themselves conscientiously, "Is this trip necessary?" will not undertake any unestable properties of a service man on leave for a few precious days at home. with good grace there is almost universal acceptance of the fact that when no Pullman space is available the alternative to standing coach; and when coaches are filled, the alternative to standing coach; and when coaches are filled, the alternative to standing coach; and when coaches are filled, the alternative to standing coaches are filled.
