LIBERAL SCHOOL COURSE

With the opening of the railway public schools this year, it is necessary that the Board of Education give careful attention to certain conditions that now exist and to a variety of problems that have not confronted this nation since its independence was obtained.

Nothing of the kind followed the Civil War, the Spanish-American War or World War I. With the departure by our Government from the American way of life, during the past decade, which has lifted our nation from its age-long moorings and cast it into the vortex of a new era, the educational system has been faced with a new and different set of problems.

The past two years saw the Railway High School cope with the demands of the Government to supply all workers possible for our war industries. The war will soon be over. Furthermore, with 52,000,000 workers in this country and the peace-time demand for modern machinery, not over 40,000,000, there is going to be a great army of the working class that can no longer be absorbed in our industrial life.

Of course this could easily be taken care of by reducing the work week, to say six hours a day, five days a week, but it will not be, and perhaps it would not be economical from an industrial standpoint to do this. Our schools must, therefore, help to remedy this situation. The schools should also hold the children longer in the public schools, to avoid the criticism so often made, that our colleges graduate boys and girls not out of their "marble and pinfolds years."

Dr. Francis Gaines, president of the Washington and Lee University, told the National Teachers' Association last spring that our schools should "give every person in America a chance to find and develop his aptitude and talents, even if these have little relation to book learning or vocational training." However, because our industries will no longer be able to absorb all who would perhaps wish to enter the trades, therefore, instead of stogging the new type of secondary school, such as Great Britain is contemplating, so that all students, above a certain age may "earn and learn," such a proposition should be scouted as impracticable in this country, and "the education in the years ahead," as Dr. Virgil M. Hancher, of the State University of Iowa declares, "must become more concerned with the training of youth for citizenship and social living."

Our young people, as a body in the high school instead of being overtly encouraged to fit themselves for some trade, should be encouraged rather to fit themselves for the liberal arts course in college, for professional life, or for Government service, far undoubtedly, the next few years is going to see our Government expand its diplomatic and military service greatly. Therefore, more professional training will be and must be developed to take care of more and more of our youth.

Vocational training does have a very important place in the curriculum of our public schools, but postwar conditions would appear to make it necessary to conform to fit special emphasis upon the literary and cultural courses in our public schools.

CONFUSION CONFOUNDED

Following another resounding slap in the face, by refusing to allow China to be represented, though evidently having previously sounded out Generalissimo Chiang Kai-shek, President John Stalin and Prime Minister Churchill, at the Newfoundland, Cairns and Tientsin conferences, so that Secretary Hull would know just how far he could go to outline a world peace program, President Roosevelt has convened the Dumbarton Oaks World Organization Conference of all five nations, but with almost secrecy, behind closed doors and with all newspapers barred.

The question as to those who will control the peace after it is once made, appears altogether unnecessary, except to a few bewildered followers of the "fourth term." That question had been decided by Russia, who had already stated she wanted "no interference" in determining the boundaries of Russia encompassing all northern Europe, by China and the United States standing ready to take care of the Far East and the Pacific Isles, and by Great Britain and France, ready to declare their dominion over all parts of Europe that Russia does not want.

Of course there is a political ferment that is seething in Europe, because the Atlantic Charter, which was supposed to have determined the basis of the peace settlement has seemingly been debunked, since China was evidently to be permitted financially to go on the rocks; since Fascist Italy was to be allowed to retain her imperial form of government, as one of the terms of her "unconditional surrender," and since Gen. Charles DeGaulle, as France's only audible spokesman, has declared that France wants her independence and will conduct her own political affairs without the aid or even the sympathy of the other Allies, knowing she has Russia on her side, even though President Roosevelt has consistently been her worst enemy.

Yes, it will be amusing to learn of the outcome of the Dumbarton Conference, of which we will not, of course, be told through the "fourth term" to continue to mention the Atlantic Charter, as a basis for a peace settlement, as it provides that there shall be "no territorial changes or aggrandizement" whatsoever; that "ALL PEOPLES," Germans, as well as Japs, "have the right to choose their own form of government," that "success by ALL STATES" shall be maintained "to the trade and raw materials of the

world," yet, our "fourth term," representing the nation with the largest world supply of oil, has been trying for months to set up one of the largest oil fields of Asia, so that European and Asiatic countries would not have access to it; that the Allies shall guarantee "freedom from want" of food, clothing and shelter for several hundred millions of Chinese, some 50,000,000 of Indians, 10,000,000 Italians and fully 10,000,000 European peasants; and that "world disarmament" shall again be encouraged, as at the end of the first World War, that left the United States helpless to withstand Germany at the beginning of the second World War.

If the world has ever known of one single man that brought to all nations and to all peoples of the earth such utter confusion, misunderstanding and hopeless despair, as the "indispensable" Franklin Delano Roosevelt, there is certainly no record of it. And there are still intelligent Americans who would continue this man at the head of our nation another term.

just between you and me

by ding

The husband will begin to wonder if he made a mistake in having been so hasty in his selection of a life partner, and the wife will wonder if she will be able to get along together when her husband returns from the service and is ready to settle down. Furthermore, she will be in a new land, with new people and far from friends and relatives. No one, but a home-loving woman, will ever know the loneliness some of those young wives will suffer in this new country.

But, no doubt, most of those marriages will turn out all right, after all. Most Americans have the ability to make the best of even a bad situation, and this will be but one of many that will arise in the vicissitudes of a life in a new land. From the pictures of the arrivals of these young Australian wives, they seem to be exceptionally good looking, and the chances are that the most of our soldier boys who married them will be anxious to hasten home to claim their happy brides. They will then proceed to adjust themselves, their habits and dispositions in such a manner that, after all, they will make the finest of husbands. There is not the slightest doubt, but that in his determination their Australian wives will be willing to meet them even more than half-way.

Back in 1893, in common with other journals of the day, we featured advertisements on page one. Here's a sample: "Gilbey's is the place to get Fresh Goods, with no flies on them, as his fans keep all flies and mosquitoes out of his store."

Many Rahwayans were on their way to, or returning from, the World's Fair, and the editor mentions that "hundreds of wheelmen were in the city over Labor Day."

Local items included: Moses Turner's house on Essex street has received a coat of paint and trimmings that are simply immense; Mr. and Mrs. N. Lauria and daughter, Florence, returned from a four week's sojourn in the Catskills; Mr. and Mrs. Conrad Clark and family of Grand street have gone to spend a week there.

Rahway 50 Years Ago
"Automobiles passed along St. George's avenue at the rate of 2-3 in an hour early last evening. About twenty summons for traffic violations were served." The present Girl Scout house was in the house, with "Wm. A. Huggan, proprietor of Lambert Hotel, St. George and Westfield avenues, enjoyed an air flight at Asbury Park and reported it wasn't much different from riding in an automobile."

September 2, 1919 nuptials: Miss Marie F. Weber became the bride of James D. Dale; Walter George Behm took as his bride, Miss Matilda Louise Mintel; Robert James Love and Miss Ellen Emma Wainwright were united, all three at the Church of the Holy Comforter, with Reverend R. W. Elliot officiating.

Persons: Mr. and Mrs. Louis Schaffner, of 41 Lafayette street, celebrated their 25th wedding anniversary; Mrs. Ralph Schultz, of 64 Commerce street, demonstrated her skill and grace as a waitress, when she and Charles Schneider of Perth Amboy captured the prize walk at the Dutch Miller Association dance.

SCARCITY IN U. S. A.

There will be some smiles for those who read the recent statement of Dan Carroll, director of the price division of the Office of Defense Administration, who said, "As yet we have not reached the time when any commodity can be taken off rationing, but when the supply reaches 85, or 95 percent of the normal peacetime amount, we will ease up on rationing of foods, in order to avoid glut."

The fact is the proper emergency has been given the farmers of this country three years ago, the markets would have been glutted ever since.

The idea of rationing the people of the United States, because of a food scarcity, certainly must cause the Devil to hold his sides as he roars with laughter, every time he thinks of it.

It has been characteristic of the New Deal, from the very beginning of this war, to first wait for the people to determine what must be done, and then, afterwards, to wait for a year to a year and a half, before taking action. That was the case of the rubber situation, the oil and gas situation and of the food situation. Instead of anticipating a possible scarcity of food materials, because of the necessity of furnishing land-lease food aid to European countries, the New Deal made no attempt the first year of the war to stimulate food production, and not until last year was anything done to increase production, and that only through Victory gardens.

Two years ago last spring letters were sent out to editors all over the East, asking for suggestions as to how food production in the United States could be increased, and hundreds of editors wrote the Department of Agriculture, to the effect that all that was necessary was to guarantee the farmers sufficient help to put in the crop and enough help to harvest it and there would be, not only the produce needed but more than could be used. And instead of making that possible the government directed most of the help on the farms, and, except in a few isolated sections, made it impossible for farmers to secure enough to put in a crop, and very little additional in harvesting it.

Paul McNutt, war manpower commissioner, one of the hundreds of "yes men" the present Administration retains in Washington to keep anything from getting down, permitted thousands of acres of valuable products in this country to rot last year, when everything was so badly needed. In Central California two years ago, he could find no method of getting 100 acres of the finest cotton ever grown in this country, harvested, and every boll was left on the tree.

He was unable to suggest a way by which an average of 20 acres of produce per farm in the middle west last year might be harvested, because of scarcity of labor, and it perished; and in the Rio Grande valley, more than 20,000 acres of produce and fruit was lost because he said he had "no farm hands at his disposal."

The biggest reason in the world why we must hurry and get this war over is to stop its enormous unnecessary cost, due to the inefficiency and ineptitude of those at Washington who are managing it.

Not until a year ago this last spring did the Government remove the penalty upon farmers for raising more than a certain quota of corn and wheat, when, if the maximum production of these two grains had been encouraged two years ago, we would have had last year all the grain wanted to supply the world with all the synthetic oils needed.

We can take it, if we have to, because we are a part of the Government, but we resent things that palpably are unnecessary, as food rationing has been. We grip our teeth, however, and swear by all that is high and holy, that this thing does not need to continue further than the next election, and, as far as we are able, it will not.

"INDISPENSIBLE" RULES IN WINNING THE WAR
From a digest of conversations taking place on Capitol Hill in Washington, from reading between the lines, of what the White House has been willing to give out for public consumption, and from what is expected sooner or later may be learned from another "insider chat," the following rules, it appears, are being followed very closely by the "indispensable" White House occupant in winning the present war.

Rule 1. Cultivate strikes in war plants. A recent Sunday newspaper carried the anomalous accounts that President Roosevelt has issued orders to the War Production Board to "turn on the heat and step up production of items of which the U. S. Army stands in critical need," while from the same chief executive in Washington came orders, almost in the same breath, for the War Production Board to "take over" machine shops in the "defense area," where union disputes have been permitted to exist for some time. This, in addition to operating five other machine shops taken over there previously by the Navy. These orders were from the "indispensable" man, who, for almost 12 years has yielded to almost every request of labor organizations throughout the United States, for higher wages and more specific legislative labor enactments. In the previous war, President Wilson, with a backbone instead of a lumbago, in order to win the first World War, refused to tolerate strikes by issuing an order that "you can't strike against the U. S. Government," while during this war there has been every encouragement given to strike.

Rule 2. Let the Allied nations into promised security by international treaties and freedom. In years past the United States had a worldwide reputation of keeping her word and the nations of the world trusted her, today

the United States has lost the confidence of practically every nation but two, Russia and Great Britain, the former because she is in the middle and the latter because she has a rope around Columbia's neck, while the mouth of our chief executive is diplomatically sealed as a good neighbor policy. The Atlantic Charter has been repudiated, because it was apparently only intended for appeasement purposes to the small nations, while the Four Big Nations have been discarded because they were purely visionary and impractical even for such a nation as this.

Rule 3. Let Prime Minister Churchill run the war, with the Philippines to protect and defend, the one, if not the sole task of the United States, at the beginning of his war, as our Chief Executive originally planned, was to aid China and get the Japs out of the Philippines, but through the pressure and influence of Prime Minister Churchill, this program was discarded, even though a special visit by Madame Chiang, endeavored to restore the original program, the outcome of which has almost resulted in the loss of China as an ally, with a special visit by Vice President Henry Wallace being found necessary, that accomplished exactly nothing in restoring China's good will. The situation has become so serious between the two nations that the White House fourth turner found it imperative to send another delegation to China, headed by Chairman Nelson of the WPB, and Maj. Gen. Patrick J. Hurley, in an endeavor to prove to Chiang Kai-shek that, even though the fundamental withdrawal of American support for two years has resulted in the overrunning of great sections of China by the Japs, in starvation for millions of the Chinese coolies, and practically the bankruptcy of the Chinese nation, that, in the course of time, the United States does intend to help her.

Rule 4. See the world at Government expense. Four supposedly diplomatic missions of the "indispensable" man, has cost the taxpayers of this country, for a fleet to accompany him on each trip, an estimated \$35,000,000. And what was the net result? At Newfoundland: The Atlantic Charter, since abandoned. At Cairo: "In perfect agreement." At Teheran: "In utmost accord." At Hawaiian Islands: "Surprised at progress." All of which meant: "A good time had by all." Nothing to report and nothing has been. Not a message or word for Senate action or for Congressional action, nor any public consideration has resulted from these four expensive ocean voyages.

Could anyone be more who would think of retaining that kind of an "indispensable" man for another four years as president of the United States?

Continued From Page One

Many of these nations will welcome an opportunity to purchase any kind of clothing and shoes, at almost any price this coming winter. Let this surplus be delivered to any country, without the cost of freight, and at just the cost of manufacture or a slight margin below, and it should be acceptable. The whole idea is to give without some return. No nation or people will be excited, but finally should be and must be helped.

But, if this surplus cannot be disposed of abroad, then it must be sold at home, so as not to glut the markets. As much as possible should be held a year, and only the most perishable sold at once, so that the surplus will be of the same quality that is in the market. In this way it would have to meet competitive prices, and the prices only reduced in order to move the stock.

Every effort, appears, should be made to dispose of this surplus abroad, so that it would seem that a market could be found for it, but if not, then it should be fed into the home market, but without causing it to clog.

Our business council seems to be getting it from the other departments of the city all around. The firemen say they have been on their knees to them long enough, and do not propose to do any more of the fawning business.

An intimate personal friend of President Cleveland recently sent for a copy of the Union Democrat to forward to him. The paper contained an article which the friend thought would interest the President. The editor of the Democrat is not a candidate for any foreign mission nor the postmaster. And it is too much to expect the President to spare time from his other important duties to become a regular reader of our Railway paper.

Rule 5. Cultivate strikes in war plants. A recent Sunday newspaper carried the anomalous accounts that President Roosevelt has issued orders to the War Production Board to "turn on the heat and step up production of items of which the U. S. Army stands in critical need," while from the same chief executive in Washington came orders, almost in the same breath, for the War Production Board to "take over" machine shops in the "defense area," where union disputes have been permitted to exist for some time. This, in addition to operating five other machine shops taken over there previously by the Navy. S. Government," while during this war there has been every encouragement given to strike.

Rule 6. Let the Allied nations into promised security by international treaties and freedom. In years past the United States had a worldwide reputation of keeping her word and the nations of the world trusted her, today

the United States has lost the confidence of practically every nation but two, Russia and Great Britain, the former because she is in the middle and the latter because she has a rope around Columbia's neck, while the mouth of our chief executive is diplomatically sealed as a good neighbor policy. The Atlantic Charter has been repudiated, because it was apparently only intended for appeasement purposes to the small nations, while the Four Big Nations have been discarded because they were purely visionary and impractical even for such a nation as this.

Rule 3. Let Prime Minister Churchill run the war, with the Philippines to protect and defend, the one, if not the sole task of the United States, at the beginning of his war, as our Chief Executive originally planned, was to aid China and get the Japs out of the Philippines, but through the pressure and influence of Prime Minister Churchill, this program was discarded, even though a special visit by Madame Chiang, endeavored to restore the original program, the outcome of which has almost resulted in the loss of China as an ally, with a special visit by Vice President Henry Wallace being found necessary, that accomplished exactly nothing in restoring China's good will. The situation has become so serious between the two nations that the White House fourth turner found it imperative to send another delegation to China, headed by Chairman Nelson of the WPB, and Maj. Gen. Patrick J. Hurley, in an endeavor to prove to Chiang Kai-shek that, even though the fundamental withdrawal of American support for two years has resulted in the overrunning of great sections of China by the Japs, in starvation for millions of the Chinese coolies, and practically the bankruptcy of the Chinese nation, that, in the course of time, the United States does intend to help her.

Rule 4. See the world at Government expense. Four supposedly diplomatic missions of the "indispensable" man, has cost the taxpayers of this country, for a fleet to accompany him on each trip, an estimated \$35,000,000. And what was the net result? At Newfoundland: The Atlantic Charter, since abandoned. At Cairo: "In perfect agreement." At Teheran: "In utmost accord." At Hawaiian Islands: "Surprised at progress." All of which meant: "A good time had by all." Nothing to report and nothing has been. Not a message or word for Senate action or for Congressional action, nor any public consideration has resulted from these four expensive ocean voyages.

Could anyone be more who would think of retaining that kind of an "indispensable" man for another four years as president of the United States?

Many of these nations will welcome an opportunity to purchase any kind of clothing and shoes, at almost any price this coming winter. Let this surplus be delivered to any country, without the cost of freight, and at just the cost of manufacture or a slight margin below, and it should be acceptable. The whole idea is to give without some return. No nation or people will be excited, but finally should be and must be helped.

But, if this surplus cannot be disposed of abroad, then it must be sold at home, so as not to glut the markets. As much as possible should be held a year, and only the most perishable sold at once, so that the surplus will be of the same quality that is in the market. In this way it would have to meet competitive prices, and the prices only reduced in order to move the stock.

Every effort, appears, should be made to dispose of this surplus abroad, so that it would seem that a market could be found for it, but if not, then it should be fed into the home market, but without causing it to clog.

Our business council seems to be getting it from the other departments of the city all around. The firemen say they have been on their knees to them long enough, and do not propose to do any more of the fawning business.

An intimate personal friend of President Cleveland recently sent for a copy of the Union Democrat to forward to him. The paper contained an article which the friend thought would interest the President. The editor of the Democrat is not a candidate for any foreign mission nor the postmaster. And it is too much to expect the President to spare time from his other important duties to become a regular reader of our Railway paper.

Rule 5. Cultivate strikes in war plants. A recent Sunday newspaper carried the anomalous accounts that President Roosevelt has issued orders to the War Production Board to "turn on the heat and step up production of items of which the U. S. Army stands in critical need," while from the same chief executive in Washington came orders, almost in the same breath, for the War Production Board to "take over" machine shops in the "defense area," where union disputes have been permitted to exist for some time. This, in addition to operating five other machine shops taken over there previously by the Navy. These orders were from the "indispensable" man, who, for almost 12 years has yielded to almost every request of labor organizations throughout the United States, for higher wages and more specific legislative labor enactments. In the previous war, President Wilson, with a backbone instead of a lumbago, in order to win the first World War, refused to tolerate strikes by issuing an order that "you can't strike against the U. S. Government," while during this war there has been every encouragement given to strike.

ALL THIS WEEK, R. J. GOERKE CO., ELIZABETH, PRESENTS

A Futurama of Famous Fashions

WE'RE CELEBRATING the completion of our newly-remodeled store, by paying tribute to the All-American Fashion and its Future... by featuring America's Famous Fashion Manufacturers! And we're asking YOU, OUR CUSTOMERS, to celebrate with us... all this week... because by your faith in us, as authorities on America's Famous Fashions, YOU have made this kind of progress possible!

WHAT IS OUR FUTURAMA OF FAMOUS FASHIONS?

It's a whole week of exciting fashion presentations! ... Brilliant creations by America's most talented designers! Every day something new, exciting, will be going on! ... You'll see a newly remodeled, beautifully modern store... talk to professional demonstrators and fashion consultants! One day couldn't possibly do justice to all there is to see, so check your calendar now, and plan to be here everyday!

WHY DO WE CALL THEM ALL-AMERICAN FASHIONS?

Because all-America had a hand in their creation! Cut off from foreign markets since 1940, American fashion experts were quick to spot the infinite resources at our own disposal! The creative imagination of American designers... the ingenuity of American craftsmen... the vastness of American facilities! New York, Chicago, California, the Middle West... each took its logical place in the fashion field, and a tremendous new industry was born... we call it "All-American Fashions!"

WHY IS IT CALLED FUTURAMA OF FAMOUS FASHIONS?

Because this is our conception of the beauty, originality, quality you may expect now that America is taking her place in the world of fashion! Here are the sophisticated fashions of New York and Chicago... the colorful, carefree playfulness of California... the "young" fashions from St. Louis and Kansas City, designed for the petite American figure! It's not only a preview of Fashion for Fall, 1944... but a glimpse into the bright future of All-American Fashions!

MISS JOAN KENLEY... (Bel-tina Belegard, famous Cover Girl) will be here in person to model Joan Kenley's newest fall blouses. And, surprise of surprise, she'll autograph her photograph for you. Meet her tomorrow 1 to 4 P. M. in our Blouse Shop, Third Floor.

Further Changes By O.P.A.

Blue-Tokens-Only-Good Ten Days More: 50 Blue Points Monthly

The Office of Price Administration has ordered sharp increases in point values for blue tokens and blue points.

The new ration value on a number of commodities has been increased. For example, the value of a number 25 can of tomatoes is 20 points, up from 15.

Blue tokens can be used to purchase processed foods. After that they will have no value.

Blue points can be used to purchase processed foods. After that they will have no value.
