POOTS AND SHOES Sunshine

the Soil.

After a long and dreary winter the light and heat of the sun are pleasant and cheering. They coax back the birds and bring out the flowers. They also introduce the malarial season, for malaria is a poisonous emanation which arises from the soil under the influence of the heat of the sun, and in no other way. It can neither be seen by the eye nor detected by the sense of smell. While it chiefly lurks in low and marshy places, it is not confined to them, but may exist unsuspected in higher spots and in cities and towns. There is no source of disease so common and

difficult to avoid. All intermittent and remittent fevers, and what is familiarly called Fever and Ague, are caused by it. What suffering the vic tims of these complaints undergo cannot be told. Malaria not only produces certain diseases, but it merenses and aggravates all others. We call your attention to DESHLER'S FEVER AND AGUE PILLS as a specific and cure for all forms of malarial troubles. This remedy has a record of thirty years of great and signal success. It breaks up the feverish action and expels the porson from the system. Used as directed Deshler's Pills accomplish what no other medicine does. We have abundant proof of this from people of the highest character. If

you fear you malaria do not let it fasten upon

Upon application we shall be glad to mail you our new treatise on malaria- Sunshine on the FRASER & LEE, 3) College Place, New York
