The most important of the intermediale resorts is Atlantic City. It has the distinction of being strikingly unlike all other seesaile resorts. It reminds one of a striking character in "Uncle Tom's Cabin," a young woman who "just growed" Atlantic City wasn't planned. It jumped into existence apparently of its own accord, and has seemingly made a hit. It is practically an island, for it is separated from the main land by miles of salt marshes. It

DR. J. A. SHERMAN—Dear Friend: I am sorry, Doctor, you have left Bostor. Persons continue to come to my house to inquire respecting you, while many others write me. Many who left me said they would surely seek your aid. Your success has been wonderful, and I am quite sure without a parallel. To my surprise my large Hernia appears to be perfectly healed. I did not expect it at the age of 70, idea I should be living had you not taken my case in hand. I weigh now 170 pounds, over 30 pounds gratitude rendered.

You owe it to my son in Boston, who has known many of your patients before and after healing, that I applied to you. "Go" said he, "to Dr. Sherman; he is doing wonders." I had failed of help from a dozen others and doubted, but he would not let me rest till I went. I hiese the day I did so. It is to me a mystery. Doctor, that you have so wonderfully out-distanced all in your profession.

I hope your life will long be spared to relieve sufferers, and thus bless the world. Most affectionated and gratefully yours.

I hope your life will long be spared to relieve sufferers, and thus bless the world. Most affectionately and gratefully yours.

The Rev. John Alden's case was quite as bad as Mr. James Corlew's, in Dr. Sherman's illustrated forts of physical soundness, should lose no time in securing the benefits of Dr. Sherman's illustrated and remedies. CHICAGO, ROCK ISLAND & PACIFIC RAILWAY By reason of its central position and close relation to all principal lines East and West, at initial and ter-minal points, constitutes the most important mid-continental link in that system of through transpor-tation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East. Northeast and Southeast and companying East, Northeast and Southeast, and corresponding points West, Northwest and Southwest. The Great Rock Island Route Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted roadbed, smooth tracks of continuous steel rail, substantially built culverts and bridges, rolling stock as near perfection as human skill can make it, the safety appliances of patent buffers, platforms and air brakes, and that exacting discipling which governs the present

and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Tepots, and the unsurpassed comforts and luxuries of its Passenger Equipment. The Fast Express Trains between Chicago and Peoria, Council Bluffs, Kansas City, Leavenworth and Atchison are composed of well ventilated, finely upholstered Day Couches, Magnifleent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten. Between Chicago and Kansas City and Atchison are also run the Celebrated Recoming Chair Cars. The Famous Albert Lea Route Is the direct and favorite line between Chicago and Minneapsils and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of Interior Dakota.

BOOTS AND SHOES Our Invisible Enemy. Opening of the Maiariai Season Rea-sons for Not Taking Quinine— Opinion of a New York

Physician. Even after years of experience with it physicians are puzzled about the real nature of malaria. We allude to it because the season of malarial diseases is now upon us. From this time until frost comes again there will be more suffering from this one source than from any other. For malaria is not so much a disease in itself asithe cause of a vast number of diseases. Don't forget this fact when you have some lingering complaint which you try to persuade yourself is not malarious. If you live in or near a majaria district the chances are ninety. nine in a hundred that you are more or less poisoned by this exhalation. No matter what the dectors call your particular trouble you can't go wrong if you treat yourself for malaria, Dr. J. N. Tilden, of Peekskiil, N. Y., who has given much study to the subject, says in a late arti-

c'e in the New York Medical Times: "Malaria is an nascen foe which enters the human system with out warning, and gives rise to such various and aumerous disturbances that none can tell where it regins nor where it ends While the nature of this poison remains largely a mystery, the practical question is, What medicine shall we take? Quinine is mostly relied upon, but, although it may temporarily relieve the fever, it often leaves consequences aimost as bad as the complaint it is taken to cure. The poor soul who trusts to quinine, knowing of nothing netter, may pay out

a deal of money merely to buy a drug disease, with malaria ready to attack him again just as soon as he can no longer endure the medicine. Why people should go through all this when they can get Peshler's Inti-Periodic Pills is something hard to understand. For it is certain that these pills not only expel malaria from the system, but eave no reaction-no afterclaps. They are the thing, and, on testing them, you will say so too. We also advise our readers to send to Fraser & Lee, 20 College Place, New York, for their ar-headed little book, "Sunshine on the Soil." In a dozen words it tells all that is known about malaria.
