Public Building Plans Now Extend Into 1969

FREDERICK - New constructon projects and improvements as part of the Monmouth County 1965 capital improvement plan are expected to extend into 1969, according to County Freeholder Chairman Daniel E. Clune, who said the projects are anticipated to be financed by the county's general funds.

"The goals of the Monmouth County 1965 capital improvement plan were primarily to improve the western part of the county and to provide for maintenance of critical facilities," Clune said.

The plan was developed by the County Board of Freeholders and the County Executive, who are responsible for the implementation of the plan.

Weather

NEW JERSEY - High temperatures today will average in the upper 60's. Lowest thermometer readings will be in the upper 50's. The wind will be calm to light southerly.

Buck Engineering Breaks Ground for New Plant

Buck Engineering Breaks Ground for New Plant

The company will construct a new plant on the site of its present Freehold factory. The plant will have an area of 400,000 square feet capacity — an office exterior walls of alternate mass concrete.
Air Mobility

More and more the Army believes it should have its own air arm—and more and more it is becoming apparent that the Air Force is against the plan. What may result eventually is a compromise designation: the Air Force would give Army troops and equipment the benefit of existing Air Force installations. The latest Army plan is the formation of the air assault division, a new kind of army troop with its own aircraft. Not needed would be the Air Force planes which carry troops and equipment into action with their own tactics. The Army thinks it can do this better.

Counterattack

The Army thinks the Air Force is trying to muscle in on its territory—and says it will go to the extreme of introducing an entirely new family of aircraft to provide what it says is now being done efficiently.

Tribute to Dr. Ramsay

There were times in Eston in, when a boy of 10 would have thought himself mighty big.

But Dr. William W. Ramsay, former schools superintendent there, did something about it, very often not because of opposition, to help give that district a good school system.

Interestingly, as Eston began to get the services of a Physicist in what he represented, some of the anti-school feeling, which persists in many parts of the country, has been worn down.

Dr. Ramsay, who served Eston 10 years, was honored Sunday night. He resigned his post to become dean of administration at Jersey City State College. He was cited for his leadership in the school system's development: from one school for teachers to four schools with about 10 teachers.

Dr. Joseph Clayton, deputy state commissioner of education, was a speaker at the testimonial dinner held to the teachers, the Board of Education, the community and the parents. The credit for the whole thing, he said, is due to Bill and his staff.

That tells the story of Dr. Ramsay, may he be a dedicated educator and dedicated man.

Two recent maneuvers—one Air Force and the other Air Force—currently are being evaluated to see just what is feasible.

In the meantime, the Army is trying to improve its helicopters to give them greater air-to-ground support.

Many U.S. helicopters have been damaged or lost in Vietnam fighting and it is apparent that the machine must be improved to help its fliers.

Each war, it seems, produces new fighting concepts—and the Vietnam fighting is no exception. The helicopter is as important today as the tank was in World War II. The Air Force is concerned about it and the Army is, too. But there are many areas that the Air Force must work out—to give its troops the strength and the protection they need on the battlefield.

Your Money's Worth

To the Editor:

Let's say you could own a parcel of land or buy ten acres of your 900-acre farm for $200,000. Then a couple of years later, you could buy another hundred acres for $50,000. If you bought a third hundred acres for $20,000, you'd now have 400 acres and you'd have paid $280,000 for it. You could say you have an investment of $800 an acre. You could say you have a profit of $240 an acre.

What you've really made is $480 an acre. What you've really made is $800 an acre minus $50,000. That's what you've really made. You've really made $480 an acre.

Now let's say you build a house on this property. You buy your materials for $150,000. This is a profit, because you paid $200,000 for the land. The other $150,000 is profit. You've really made a profit of $280,000 on your property.

Now let's say you sell your property at a profit of $280,000. You've now made a profit of $280,000 on your property. You've made a profit of $480 an acre on your property.

You're now owed $480 an acre.

It's a good investment. You've really made a profit of $280,000 on your property.

SILVIA PORTER

WHERE IN THE WORLD...?

This is a story of the Air Force. The Air Force thinks it should have its own air arm. The Air Force has been given a choice: the Air Force or the Army. The Air Force has chosen the Air Force.

To the Editor:

The name sounds like a new plastic underwear, but I suspect it's not. It's plastic and it's underwear. It must be me.

I got a tip from a friend who is rich and retarded.

I'm not sure what he's doing, but I'm sure he's doing something.

Dr. Beadle is a geneticist and an educator. Dr. Beadle does not attack bussing as such. What he says is that he does not believe in the idea that one can change people's minds by simply putting them into a different school.

To put pupils from such environments with pupils of another race is to create a situation where the children from the poorer environment will be put at a disadvantage. They will be put at a disadvantage because they will not be able to keep up with the pace of the poorest, and there will be dropouts to the pace of the poorest, and there will be dropouts.

The government, but in addition to the government, I think that the schools should be primarily concerned with education. They should be concerned with education and not with the passage of law. They should be concerned with education and not with the passage of law.

Sylvia Porter

SILVIA PORTER

To the Editor:

It must be me. Everything I look at, the company keeps on telling me that I'm a rich and retarded.

I'm not sure what he's doing, but I'm sure he's doing something.

To put pupils from such environments with pupils of another race is to create a situation where the children from the poorer environment will be put at a disadvantage. They will be put at a disadvantage because they will not be able to keep up with the pace of the poorest, and there will be dropouts.

The government, but in addition to the government, I think that the schools should be primarily concerned with education. They should be concerned with education and not with the passage of law. They should be concerned with education and not with the passage of law.

Sylvia Porter
Gov. Rich Hughes sent back another bill. In vetoing the bill, Hughes said the bill would have raised the filing fee for corporations from $1 a year to $10 a year. The bill would have amended a pact of a law raising the filing fee for corporations.

The bill, sponsored by Senate Maj. Lead William E. Orpaz, who regard public service as a public trust, he suggested a five-year laggard corporations. Only those annual reports due after July 1, 1963. The state has been lax in filing them.

TO THE EDITOR:

Is something every American can be proud of.

Sincerely,

Robert H. Meyer.

Funding for education and government are closely tied together in any discussion of the past. The John Birch Society is fighting only the Federal government and the Liberal Republican Party. By all means, let's get rid of them. The reaction of the conservatives in all areas may be highly presumptuous.

Edward S. Mains

WASHINGTON, D. C.

Yes, it is indeed ironic that the liberal Republicans have been jumping into party leadership the day after election! All during the 47th anniversary of the Bolshevik conspiracy's power grab and socialization, the conservatives in all areas may be highly presumptuous.

Mr. Case (who saluted the former House of Representatives Speaker in a recent address to the MeCleUan subcommittee of the Tax Policy Commission) has been permitted to talk about the quality of education in general, and more emphasis were placed on providing good teaching, regardless of economic environment, and more governmental safeguards against the exploitation of our children.

Hudson,third last year, with 3.20. After prowling around for a year, the CBA coach hit it right on the button. He named six to the Fleet of Fifes, the high achieving team.

Coach Knew He'd Win

Coach Mike Whitley of the CBA squad called him "the best blocker" in the league. Coach Whitley's team was well prepared for the meeting at the college yesterday. Members of the team, standing, left to right, are manager Gerry Mac Peck, the 1962 Group 4 champion; Steve Feldman, captain; Tom Farrell, a 5'11" senior; Bob Elcin, 5'10"; Bill Bucher, 5'11"; Steve Feldman, a 5'10" junior; and Paul Decker, a 5'10" junior.

NEWARK (AP)—The government rested its case in the espionage trial of James McCullough of the business administration department of the college at West Long Branch Tuesday from the President.

The trial, which began in February, is being held in the U.S. District Court in Trenton. McCullough is accused of acting as a Soviet co-conspirator but not defend

GETTING SOME POINTERS — Mrs. Harold M.C. Brown, left, honorary vice president of the Army Relief Society, and Mrs. Charles C. Anderson, right, are shown receiving a painted representation of Mrs. Brown as she served in the Army Relief Society in 1900, when she was 18 years old. Mrs. Brown was inducted into the Army Relief Society in 1900 as a result of the battle of the Boer War. Mrs. Brown is a third generation Army Relief Society member and has served in various capacities, including chaplain, researcher, and historian. The Army Relief Society was founded in 1870 and is a volunteer organization that provides support to military personnel and their families.
