DR. J. T. PETERS TO BE GUEST SPEAKER AT THE EASTER SUNRISE SERVICE AT PARAMUS

Dr. John Thompson Peters, distinguished churchman, a resident of Bergen County, will be guest speaker at the annual Easter Sunrise Service at the Presbyterian Church this morning. The service will take place at George Washington Memorial Park, Paramus, at 6:30 Easter Morning.

Edward J. Stoffels of Waldwick Helps Form United Nations Council

Among the representatives of civic, church and education organizations which met last week and organized the Bergen County Council for United Nations, was Edward J. Stoffels of Waldwick, director of activities and camping for the North Bergen County Council of the Boy Scouts of America.

Mr. Stoffels was appointed a member of a nominating committee to select a director-general of the group.

The new organization, which meets at the Garden State Park, is already active in most of the areas. It plans to hold a week-long UN observation there from October 18 to 24, consisting of educational and entertainment features. It is planned as the largest and most comprehensive UN celebration ever undertaken.

WALDWICK JOURNAL

Private First Class Lloyd Wilson, son of Mr. and Mrs. John W. Wilson, 446 Haver Avenue, Waldwick, N. J., is home on furlough from Fort Ord, California, having served with the Second Transportation Company. He enlisted in U.S. Army on June 17, 1958. After furlough he is scheduled for overseas duty.

Mary E. Kuklmann, daughter of Mr. and Mrs. Chris Kuklmann of 84 Manhattan Ave., Waldwick, N. J., is about to embark on the fascinating profession of Modeling.

Mayor Robert Denver of Waldwick announced last Saturday that the big new pump installed at Well No. 4 at the foot of Malcolm Street is now giving 50 per cent more water output.

Adalai Stevenson Speaker in Newark On May Fifth

Former presidential candidate Adalai E. Stevenson will address a national conference on urban renewal May 5 in Newark.

The conference will be held by the American council to improve our neighborhoods (action).

Executive president James E. Lash announced today that a three-day session will be held May 4-6 with the Newark economic development committee to open a two-week conference on "The American City."

Lash said Stevenson will speak at a dinner May 5 before some 500 representatives of finance, industry and government.

The Democratic leader will discuss the role national leaders can play in "the orderly development of urban areas in the American tradition of initiative and free enterprise."

Those attending the two-week conference will be executives from National and regional corporations, Lash said. They will study city planning projects in Baltimore, Detroit and New Haven.

Hudson County Traffic Club Dinner Draws Huge Throng At Essex House

A reader of this newspaper has asked the editor to find out what does the middle initial of 1st Deputy Premier Mikoyan of Soviet Union stands for and we are glad to answer that it stands for: "IVANOVIC." The full facts about the biography of the second top man of Russia is mentioned herewith:

Anastas Ivanovich Mikoyan

Anastas Ivanovich Mikoyan was born November 25, 1895, the son of a worker in the Armenian village of Samek near the Georgian border. He was graduated from the Armenian Ecclesiastical Seminary at Tbilisi, the Georgian capital, and in that year joined the Bolshevik Party. After the 1917 revolution he became a member of the Bukh party committee and editor of the party newspaper. He was imprisoned three times in 1919 for strikes and partisan warfare but each time he escaped.

In 1922 he was chosen a member of the Central Committee Political Bureau. In 1930 he was Peoples Commissar of Supply of USSR.

In 1937 he became a deputy chairman of the Council of Peoples Commissars of USSR. Following the Nazi attack on Russia, June 41, he became a member (7 others) of the Committee on the Council of Peoples Commissars to direct the war effort.

At the end of the war in 1945 he became a member of the Peoples Commissions Committee for Economic Rehabilitation of Liberated Areas. At the present time he is deputy premier of USSR.

Little information is available on his marriage or his wife, but he is married and has a son. Stepan.

He speaks and writes in Armenian language fluently.
Dallas Is Big And Booming

By LYN CONNELLY

The new Rodgers and Hammerstein musical, "Flower Drum Song," has produced a song over which there is some title confusion... As recorded by Dick Haymes, the title was "She Is Beautiful"... The recording was made before the Boston opening, however, and after the show opened the song was changed to "You Are Beautiful"... It was recorded under this title by Johnny Mathis... Both versions have the same melody and basically the same lyrics... It just depends, apparently, on whom you think is beautiful, you or the other gal.

Remember Orin Tucker? He was the singer who brought Bonnie Baker to fame and immediately got just in the crowd... He was recently signed to record for Sel Combando Records... First release on the label is "The New Sounds of Orin Tucker," featuring the saxophonist and his cook... Phil Harris, recently on the "refere" list where recording is concerned, has come out of hiding and made an album for RCA Victor... "The American Fork" as yet untitled, is scheduled for release early this year.

**FOR AND ABOUT TEENAGERS**

**Second Chances For Wayward Teenagers**

A young Southerner asks this question: "Once a teenager has got off the straight-and-narrow, got in with the wrong kind of crowd, and maybe even into trouble with the police, is there any chance he can straighten up and make his folks proud of him again?"

"It's never too late to "straighten up"—but there is no element of "chance" here, or luck either. The first move must be a realization of the consequences of the mistakes that have been made. When a teenager gets into trouble he or she usually "knows" it was wrong, and yet he or she possibly did not realize that the consequences of the mistake would be serious, or that they would impact the family in the same way. The family and the teenager are simply too close for each to see the other's mistakes."

"Once the teenager realizes that he or she is on the wrong side of the fence, then the consequences of the mistake and the feeling that the family will not accept the teenager anymore must be met. The teenager must see that he or she did make a mistake and that he or she must work his or her way out of it."

"This An' That..." The 1959 Monza Speedeway 500, the world's fastest auto race, was canceled because of the new international rule limiting the power of Europe's high-speed cars, The Automobile Club of Milan hopes to replace the 500 with a new race for two-seat sports cars with no limit on engine capacity... Joe Kuharich, Notre Dame football coach, completed his squad of assistants with the signing of Joe Scudiere... the Washington Redskins... Four players from Wake Forest and two from North Carolina were placed on their best behavior by Atlantic Coast Conference Commissioner James H. Weaver after a brawl in a game between the two schools at Winston-Salem. He also said the Conference will not permit the teams to play at Winston-Salem next season... James A. Penny, 20, who starred in centerfield with Hamilton Air Force Base for two years, signed a bonus contract with the Boston Red Sox... With Otto Graham's appointment as football coach of the Coast Guard Academy goes a commission as a commander in the Coast Guard reserve.

"How Well Do You Know Your America?" The landmark shown above, which stands at Alexandria, Minnesota, will probably be new to many Americans. It is called the Kensington Runestone and is dated A.D. 1362.

According to its chiseled inscription, the seafaring Vikings explored this area in 1062, a century before Columbus sailed westward across the uncharted Atlantic in search of a new route to India. The original of this interesting log of what is said to be the first exploration of the New World is on display at Alexandria.

Translated, the inscription on the stone reads: "We are 8 Swedes and 22 Norwegians on an exploring journey from Fineland through the West. We had a camp by a lake with 2 rocky islands one day's trip north from this stone. We were out and fished one day after we came home we found 10 of our men red with blood and dead. Ave Maria. Save us from evil!"

To the men who could be tomorrow's soldiers

What you can do now to help strengthen America's Peace Power...

Nobody wants peace more than you do! But like most good things in life, it isn't free. Peace costs money.

Money for industrial and military strength to help keep the peace. Money for science and education to help make peace lasting. And money saved by individuals. Every Savings Bond you buy helps strengthen America's Peace Power.

The chart below shows how the Bonds you buy will earn money for you. But the most important thing they earn is peace.

Are you buying as many Bonds as you might?

<table>

BUY U.S. SAVINGS BONDS

The U.S. Government does not pay for this advertising. The Treasury Department thanks, for their patriotic donation, The Advertising Council and
Escape valve will break seal between inner and storm door.

The tighter storm doors fit, the better they serve their purpose. And if the inner door is well-fitted and weather-stripped, effective insulating space is created to cut down heat loss in winter. But even this good practice creates a problem.

Q.—“Every time I closed the door last winter, the storm door would be pushed open. So I put a new latch on the storm door. This held, but then it took a real effort to close the door. Any solution?”

From Bertha Clark, Florence, Ohio: “I remember when we lived on the farm. Our farm house was located in the fertile region along the St. Joseph River in southern Michigan.

One night father, mother and I went to church in the one-horse buggy. That was during those horse and buggy days over fifty years ago. We had to cross the river to get to church. Upon returning from church, we found the river so high that it was out of its banks, and the water over the road not covering all the bridges. We had four or five bridges to cross and most of them had no side railings. In the darkness I couldn’t seem to see anything but water, the shadows of a few trees and the dim outline of the horse ahead. I was very frightened, and the water seemed close to the buggy box. But father trusted the horse to take us through and nothing happened. Under the protection of God’s care, we reached home safely.

From David Wesley, Hopkins, Michigan: “My folks moved from Wayland to Macelona in 1878. We had four or five bridges to cross. Sometimes the same car would pass the bridge at the same time. Sometimes there would be another car coming in the oncoming traffic lane, zipping between the two cars. He’s so fast you couldn’t drop a piece of paper out of nowhere, usually in the vicinity of hills and curves, and it could be dangerous. You can’t get on the road at all, however, without meeting some of their ‘coconuts,’ which are just as dangerous. In my book, two of the worst are classed as ‘bumper riders’ and ‘scooters.’ The ‘trump’ rider comes out of nowhere, usually in the vicinity of hills and curves, and the ‘scooter’ could drop a piece of paper from the road. If you’re not careful, you could be hit.”

Q.—“What is the easiest way to strengthen stairs that have too much spacing between stringers, the diagonal pieces that hold the treads and risers. Horizontal 2 x 4’s can be made into a one-hole near the bottom of the storm door. Cover that hole with a small flap of leather or rubber, attached only at the top. It will serve as an air escape valve.

A.—“As long as your subfloor and joists are not damaged by rot and mold, it is worth a try. Your main concern is preventing such rot and mold by adding wood and dampness in the house—by stopping moisture penetration at the studs. To achieve this, the crawl space should be at least 28 inches deep. The floor should have a base flashing with full or plastic sheathing.

(Readers may address handcrafts to Thor Research Center, Marengo, Ill.)

GET SALK SHOTS NOW

Although the Salk vaccine was pronounced ready for use early in 1955, two Americans in three still have not been fully inoculated against the ravages of paralytic polio.

As a tragic result, polio epidemics erupted in 1958 in Michigan, New Jersey, Virginia, West Virginia, Montana and Hawaii. In the Detroit area alone, 876 persons were afflicted and 23 died.

Especially alarming last year was an increase in the incidence of paralytic polio, which was 44 per cent higher than in 1957. More than half these cases involved pre-school children, most of whom had not been vaccinated.

In reviewing the 1958 polio situation, Basil O'Connor, President of The National Foundation, through which the Salk vaccine was developed, reported that only half as much vaccine was shipped for domestic use in 1958 as in 1957.

Mr. O'Connor, whose organization now has expanded its attack on polio to take in arthritis and birth defects, asserted that "carelessness and apathy on the part of the American public produced epidemics which otherwise need never have happened."

While polio occurs among persons of all ages, children and adults under 40 are most susceptible. There are currently 57 million persons in this group who do not have the full protection of the Salk vaccine.

Full protection means at least three injections of vaccine, with the first two spaced two to six weeks apart and the third administered seven to 12 months after the second. Studies have shown that two injections provide 80 per cent protection, while the full series of three provides 90 per cent protection and longer-lasting immunity.

Some doctors recommend a fourth injection as additional insurance for those vaccinated when the Salk vaccine first became available and its potency was variable. However, the continuing protection of three properly spaced shots has been demonstrated for the country as a whole and the vaccine's potency is now maintained at a high level.

For your injections of Salk vaccine, visit your family physician or ask your local health officer where to go to get them.

If everyone in your family has not been vaccinated you must act promptly to build protection before the summer polio season begins.

GET SALK SHOTS NOW

Each year Americans read approximately 4,500,000,000 newspapers; 4,000,000,000 magazines; and 400,000,000 books. We pay 5,000,000,000 visits to the movies each year.

AMERICAN HISTORY

(Feb. 24-March 2)

On February 26, 1869—ninety years ago—the Fifteenth Amendment to the Constitution was adopted by Congress, and the following day it was submitted to the states for ratification. The Fifteenth Amendment specifies that "The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color or previous condition of servitude." It was declared ratified by three-fourths of the states on March 30, 1870. Although designed to eliminate racial discrimination in voting, the amendment did not fulfill its purpose. Property or educational qualifications, as well as a poll tax were not specifically forbidden, and in certain states, these qualifications are still the basis for excluding Negroes from voting.

A new law, however—the Civil Rights Act of 1957—gives a new Federal commission authority to investigate, and bring before the Federal courts denials of voting rights of American citizens because of their color, race, religion or national origin.

On February 27, 1844—115 years ago—Nicholas Biddle, American financier and editor, died at his estate near Philadelphia. After holding diplomatic posts in France and England, Biddle became editor of Port-Folio, a literary magazine in Philadelphia. He also served in Congress and in the Pennsylvania legislature. In 1819 Biddle was appointed by President Monroe a director of the Bank of the United States. Three years later, he became President of the Bank and served in that capacity until it closed its doors in 1836, when its charter was not renewed. Biddle's conservative policy made the Bank of the United States a powerful influence in the national economy as well as a political issue in the President's election of 1832. It was opposed by advocates of the "easy money" policy and its overwhelming victory of the candidate, Andrew Jackson, sealed the Bank's doom. It continued under a Pennsylvania state charter until 1841, when it closed its doors for the last time.

Nicholas Biddle is also remembered for his collaboration in writing the History of the Expedition of Captains Lewis and Clark.

I CAN'T HEAR YOU, DAD. WAIT UNTIL I TONE DOWN MY PHONOGRAPH!

The tiny Isle of Cuba exported $8,067,005 worth of foodstuffs in the first four months of 1868. Of this amount, more than $7 million were in vegetables and grains.

Near sighted children, more than any other group, like to read or do close work because their world is a limited one.
