"ON THE HILL" Health Resort was opened in the year 1903, and has steadily grown since that date. In need of more room the new addition was erected in 1907-8, giving better facilities in every way; including a new operating room, gymnasium and out door sleeping pavilion. "On the Hill" is fully equipped to give many different kinds of treatments, including Electrical, Medical, or Hydro-therapy, Nauheim Baths and Electrical or Dry Hot Air Baths, also Medical Gymnastics.

Dr. Chas. W. Jackson is a graduate of New York University Medical College, class of 1887; he also served as an interne in Bellevue Hospital, on the surgical division. Dr. C. W. Jackson was a student of the late Prof. Alfred L. Loomis, M.D., LL.D. For twelve years he was in charge of several clinics in New York city, and in general practice there until he came to Watertown to live. His Institution is recognized as one of the best equipped in the State. He was surgeon for six years in the First Signal Corps National Guard of New York. For two years Dr. C. W. Jackson was President of the Conn. State Society of Alienists, and he is interested in town affairs, and is a member of several Clubs and Medical Societies.

"On the Hill" Health Resort was formerly the old Hamilton place built in the early seventies and subsequently owned by Dr. Osborn and Mrs. Rosa Foster. The property was purchased for the Health Resort about eleven years ago.

RIVERSIDE STREET
How about those promised improvements on Riverside Street? About a year ago one of the property owners moved his house off the highway at the request of the Selectmen, making a chance to widen the street. The street is still narrow at this point, large rock sticking up in the street still keep the highway at the old width.

Hwyay Improvement

It is a far cry back to 1896, that is the year in which the first piece of state road was built in Watertown; starting at the brick store, and running south to near the Pritchard place.

Nearly twenty years ago, and yet it is close to the truth to say that this was as good a piece of road as has ever been built in Watertown or anywhere else in the state. Numerous accidents have been let and completed, and numerous contractors have used their skill in continuing the work commenced at that time, none have improved on George H. Abbott work in putting down this initial half mile.

When the two contracts now in process are completed, the main roads within the limits of the fire district, will have all been taken care of; the Waterbury and Litchfield road from the town line at the factory of the Oakville Company to beyond the residence of W. S. Rowland. We understand that the contract for the road does not include a new bridge at Steel's Brook west of the residence of Henry Sullivan.

The agitation now started towards getting apparatus of this kind into a certainty. The committee is as follows: C. B. Buckingham, C. Sherwood, W. S. Taylor, E. H. Butler, T. L. Shields, and R. V. Magee.

MAIL SERVICE

We understand from reliable information, that Watertown is to be once more on the map in so far as mail service is concerned. Ever since the number of trains were reduced on the Watertown Branch, we have had only two mails outgoing and incoming each day. One outgoing at seven o'clock in the morning and one at five o'clock in the afternoon. This condition has necessitated many trips to Waterbury on the part of those who had to get mail out at noon. The only way to get it was to take a trolley ride, and be your own postman. All this is going to be changed, and commencing August 1st, we are to have an automobile star route, leaving Watertown just before noon, and returning after one o'clock in the afternoon. This will be a great convenience, one which will be appreciated by the patrons of the post office, especially by those who of necessity must get mail started by noon each day; in addition it will relieve the postmaster and his assistants by distributing the work more evenly, with only two mails each day, a very large amount has to be handled quickly so that people will not be inconvenienced by long waits for the office to open. The evening mail, especially, will be much smaller as a great deal of the matter which comes in at seven p.m. lies over in Waterbury from the afternoon. Altogether it is welcome news to us that we are going to get back at least a part of our old time accommodations.

IMPROVEMENTS AT THE TOWN LOCKUP

For a long time, complaints have been numerous in regard to the lack of proper quarters at the town lockup. Within the last two weeks the old vault adjoining the present lockup has been made over and fitted with a new one, and two more will be added this year, so that the part will be used only for prisoners, the lock being left as it was the temporary home of the joyous hobo.

THE NEW AIRDROME THEATRE

Commencing this week the new open air theatre on Main Street will vie with the Dayton Moving picture theatre for patronage. Whether Watertown has enough people to support two theatres will undoubtedly be decided in the near future, both proprietors are hopeful, and expect a successful season.

WANTED ISSUE No. 1 OF THE WATERTOWN NEWS

We will pay cash for a copy of the first issue of the News. This copy is wanted to complete a full set; anyone having this copy and willing to part with it will confer a favor if they will communicate with the Secretary of the Watertown Business Men's Association.

CLAMBAKE

Several suggestions have come to us within the last few days to the effect that the Watertown Historical Society will hold a clambake this summer; these suggestions will be referred to a meeting of the executive committee to be held this week, and if deemed advisable arrangements will be made to hold such a gathering in the near future.

TROLLEY FREIGHT

There is a good deal of criticism about the way in which trolley freight is being handled by the Connecticut Railroad Company. It is delivered here and left on an open platform with absolutely no protection from the weather. A few days ago several boxes of macaroni, and bags of rice were off the car and left on the platform, just at the time when a thunder-shower was coming up, the whole shipment was completely spoiled. Those who handle the goods by hand can't spend all of their time waiting, so as to get them off the car when it comes in. If the Connecticut Company is going to continue the business of handling freight, it should at least invest in some kind of a shelter to protect the goods from the weather until the owners have a chance to call for it.

CONGREGATIONAL CHURCH ANNIVERSARY

Plymouth and Watertown churches are both celebrating their 175th anniversary this fall, and both are branches of the First Church of Watertown. Both of these communities applied to the Legislature for "winter privileges" in order that during the cold months they would not have to go away from Watertown. Watertown's First Church will hold a public worship. These requests were granted and in Watertown was settled a young Yale graduate, John Trumbull. For 45 years he ministered to the church, and if one wants to know something of the stuff of which parsons were made in that day let him go down to the Old Cemetery and read the inscription on Parson Trumbull's tombstone. The record closes,"—a worthy example to posterity; go, reader, and imitate his virtues! Behold the upright man, his end is peace." As was intended by the applicants, the request for services during the winter months was the beginning of a desire to have a separate church in "Westbury"as this town was then called. In 1730 the church was formally organized and the First Meeting House built the following year. To celebrate the organization of the church and the continuing services, special services will be held at the First Congregational Church, September 20, 21, 22, and 23. On Sunday the 20th, at 10:30, the sermon will be delivered by Rev. A. Croft of Simsbury. Mr. Pelton of New Haven, and Mr. Oilman of Waterbury from the forenoon. Altogether it is welcome news to us that we are going to get back at least a part of our old time accommodations.

JAMES STROCKBINE'S PEACH ORCHARD

Charles Strockbine is turning a few acres of Watertown land to good account at his Hillcrest Fruit and Poultry Farm. Mr. Strockbine has just finished picking over 300 bushels of currants besides some 80 bushels of cherries, gooseberries and other small fruit. Shipments of the fruit have been made to different cities in this and other states as such a quantity of small fruit would soon flood the local market. The fruit is grown by modern scientific methods and is of the highest quality. The quality commands a higher price and the proprietor of the farm aims to hit the select consumer who values the goods and is willing to pay a price consistent with the goods.

Mr. Strockbine's success is evidence of what can be accomplished by intensive farming on a few acres of Watertown land which is near good market and transportation facilities. In all probability this kind of farming will be developed more rapidly in the future and the example of Mr. Strockbine imitated by others.

"Charles Atwood's peach orchard where last year over 3000 baskets of peaches were picked and marketed is worthy of notice from the farmer who complains that there is no money in farming nowadays. Mr. Atwood has been growing peaches while getting a young apple orchard into bearing. The peaches, however, are to be given up to the apple trees. There is plenty of land in Watertown available for such promising enterprises and the opportunities of development of this kind of agriculture are unlimited.

The Grange held a large and successful children's meeting on July 7th. An excellent program was given by the children. The prizes offered for the collection of egg masses were awarded to John Feld and Maud Verba. As a part of the program a number of the young ladies of Watertown wrote essays on what they would do if they were young men. Here is a sample: I would treat my sister like other girls and would treat all the girls alike and would give them all a good time. I would never go to a dance or picnic alone if I knew of a girl who had to stay home because she had no one of her own with whom she could go. Mr. Strockbine has just finished picking over 300 bushels of currants besides some 80 bushels of cherries, gooseberries and other small fruit. Shipments of the fruit have been made to different cities in this and other states as such a quantity of small fruit would soon flood the local market. Meet Me at the “JUNCTION”

A Word from the Home of Good Furniture

WE CONSIDER our duty to the public unfulfilled unless every transaction gives permanent satisfaction; unless realization meets expectation; and unless value measures up to the customer’s standard of worth.

If we juggle with words, overate values, or misquote prices we have only ourselves to blame for the loss we sustain when you decide go elsewhere to buy. We believe it’s a good thing for the business to

Give a Little More Than the Customer Expects to Get

No advertisement must contain facts that cannot be backed up—and more—in the store.

If comparative prices are quoted, you shall find them as stated—neither too high nor too low, but exactly so!

this foreword to you, friends, from “The Home of Good Furniture,” a house that always means to “give a little more than the customer expects to get.”

We Furnish Your Home Complete

The Boston Furniture Co. of Waterbury, Incorporated
Corner South Main, Scovill and Brook Streets, Waterbury

“We know a young man who recently lost his position. He was steady and competent, but an unforeseen combination of circumstances threw him out of a job.

He had saved no money whatever—found himself without work, penniless, with a family to maintain.

Friends helped this young man. But he was two months idle, and had to wait another full month before drawing any pay in the position he finally secured.

It will be a year, at least, before this young man pays what he owes—provided he observes the strictest economy. That he had friends was unusually fortunate.”

What a Different Position He Would Have
Found Himself In If He Had Saved
Some Money When He Had It.

The Watertown Trust Company
Watertown, Conn.
FEMININE FANCIES

Vacation times have commenced, trunks, bags, and hat boxes are being shipped to country, beach, and mountains, but don't forget to pack a one-piece dress of some heavy material, for it will be found necessary for chilly days or perhaps motoring. Instead of the ordinary sweater the girls are using this year a jacket known as the "beach coat" made of stripes of plain or striped goods or something similar or with a dash of color in it. It laundered easily and is absolutely the most practical and stylish necessity that can be found. They are made in three quarter length with belt and patch pocket.

Paquin the French dressmaker is using the swallow-tail coat with the Greek-vase skirt. For separate wrap the very newest is the cape, and as fall advances it will be quite in vogue, made of heavy weave material in plaid and plain goods. The long Russian tunic is in great demand at the present time, often used over a plain colored skirt. The tunic can be made of striped or plaid goods and block checks and all.

The Horn Hat is rapidly making its appearance in these parts, it is now quite the fad in Paris also, and in America, the hat is a large citron shaped with high crown or of the mushroom style with two shell fan-like horns crossed on the extreme front of the brim.

Look through your treasures and pick out the pieces of lace which you have stored away, most any kind can be utilized this season for trimming. Bodices are made largely of lace, Spanish lace is brought forth again. Lace coats and lace capes. Lace is a wonderful material to add to an old gown, the goods of which can not be matched, by using it for a tunic, machine pleated.

BROILED BLACK BASS OR WHITE FISH

Clean and wash the fish, divide lengthwise into two parts, place on dish and sprinkle with salt and pepper; also with 2 tablespoonfuls of olive oil, to prevent sticking to broiler. Broil on moderate fire, turning from time to time. Sprinkle with a little lemon juice and serve with maitre d'hotel sauce.

MACAROONS

Mix one half pound blanched almonds, pounded fine, with a little rosewater to moisten, and one half pound sugar; add the whites of 8 eggs, beaten to a stiff froth; then mix all together, there is a little flour on the hands, mold into little cakes, and bake in a moderately hot oven.

APPLE TARTE

Cook soft 8 apples, rub them through a colander, and add 1 well-beaten egg, grated rind and juice of 1 lemon, butter the size of a walnut, and 1 cup sugar; mix well. Line tart with rolled paste, fill with the sauce, and bake quickly.

N. S.

WATERTOWN NEWS, AUGUST 1, 1914

OAKVILLE NEWS

OAKVILLE’S OPPORTUNITIES

Oakville is now at a stage where it would be a good thing for someone or several someones to get in and start a business or two before competition starts up. A combination of shoe and grocery store with a man with a little personal back of it would pay from the start. The same would be true of a line of staple dry goods with a notion counter and a kitchen department. A garage located centrally would be a good investment for the right man. A florist somewhere along the main road ought to sell plants from Waterbury to Woodbury, Bethlehem, and Morris besides Oakville and Morningside business without competition. A real up-to-date restaurant where people could board, if they wished, might take care of a few of the six hundred odd who work here and live elsewhere. Then there is the moving picture house, the hardware store, the lumber yard, and perhaps a business or two more that the right one could make. We are, however, of the opinion that it is a little early to start a bank, opera house, or a school, but not before the next number goes to press anyway.

THE OAKVILLE LIBRARY ASSOCIATION

Oakville's Library Association is getting ready to undertake the financing of a project. We understand that they will shortly send out a letter setting forth what they desire to do and the amounts deemed necessary to raise to accomplish this. Give Oakville Library is that somewhat comensurate with its needs.

As Oakville has very few rich citizens, we will undoubtedly have to reach down individually into the bottom of our pockets and make a contribution to this cause that we may well be proud of.

With her schools up to last year's standard, and the library well under way Oakville may rest assured that she is keeping fully up to her surroundings, and the library committee has expressed that cold cash is what Oakville needs just now. Come, brethren, express yourselves.

CITY HALL NEXT

Where is that fasteering citizen that will build a hall suitable to Oakville needs? We want a place where we can have a big Village Improvement Banquet, and sit down and blow ourselves and how big we are. Then the youngsters want to dance once in a while, and if they do, why have to go up to Watertown and hire a hall? Let's have one of our own! Then when the now famous Oakville Glee Club wants to really spread herself and give a concert why not have it in Oakville, not Bethlehem? A good many of us heard of Bethlehem before we heard of Oakville but that's no reason that they should have a better hall than we have.

Supposing when the Oakville Dramatic Society gets round, they have a play next winter they could hold it in a proper hall, wouldn't we all be there to see it? We all travel up to Watertown to their V. I. S. lecture course because it's good. And why not have a course here too. Yes, if we have a place to hold them.

Here's the program for one week:

Sunday morning, Union Service, Talk on Y. M. C. A. Work by the National Secretary.

Monday evening, concert by the Oakville Glee Club, proceeds for the library.

Tuesday evening play by the Dramatic Society of All Saints Church.

Wednesday evening, Dance by St. Mary's Drum Corps.

Thursday evening, Moving Pictures.

Friday evening, Lecture.

Saturday evening, Moving Pictures.

Sure let's have a hall, Watertown's going to, why not Oakville?

WILLIAM H. SMITH

William H. Smith, senior member of the firm of Seymour Smith & Son, Inc., died July 8, 1914, at his home on Main Street, aged 74 years. Mr. Smith was a man of public spirit, always interested in Oakville's welfare, and Represented Watertown in the State Legislature in 1887. He was identified with Oakville manufacturing for nearly half a century, coming here with his father, Seymour Smith, in 1866, and purchasing the Wheeler & Wilson Sewing Machine Company's factory on that street. He retired from business forty years ago, where they conducted a very successful business manufacturing prining shears and hardware specialties.

BUILDING NOTES

The Warner & Abbott Company have finished the residence for George Hodges on the Corner of Sunset and Maplewood Avenues. Doocitle and Putnam are building a two family house for E. D. Barlow on the Watertown Road just above Slades Mill. Frank Murphy has just finished a cottage for himself and family.

Chas. Mosgrove is remodeling his house on Hungerford Avenue.

Wm. Jerman is building a six-room house on Clematis Avenue.

TWENTY YEARS AGO!

The Baird Machine Company was organized in Watertown with a capital of 18,000.00 in 720 shares of $50.00 each, $5,000.00 paid in cash. The subscribers were: J. H. Baird, 449 shares; F. E. Warner, 60 shares; R. T. Lewis, Jr., 48 shares; and J. H. Baird, Trustee, 172 shares.

Waterbury Republican, July 19, 1914

WINNEMAUG LAKE

The Oakville Company is raising the dam at lake Winnemaug which will make them a greatly increased watersupply. This water runs into the Oakville Company Pond on Main Street near the Post Office. It is through this large reservoir at Winnemaug that the Little Lake in Oakville Center is practically always full of fresh sparkling water and not drawn down low in summer as is usually the case with mill ponds. The completion of the changes at Winnemaug will make it much deeper and will make the place well as deep as it and it will then be a pretty pretentious lake.

NEW INDUSTRY IN OAKVILLE

The Lower Pin Shop, so called, that has been unoccupied for a good many years is being cleaned out and retitled by The Waterbury Enamel Company who will continue there the business started in Watertown a few years ago. Oakville people will be glad to see wheels turning there again as it once was the center of Oakville's manufacturing in the old days of Suspendor Shop.

A simple house gown looks neat if worn with a Spirrella Corset
Fitted to your individual measure—brings out beauty lines, subdues irregularities. Let me show you how to wear it, also the Spirrella Boning—the 4-4 of the comfortable, shape-retaining Spirrella Corset. See Dr. Keilty, 133 Broadway, Waterbury.

ANTICHES AT COST
The property having been sold where I am now located, I well sell my entire stock at cost prices, within the next 30 days.

OLIVER C. HILL
90 Willow St., Waterbury.

By a recent invention known as the “Economy Gas Maker.” You can now make your own gas in your own home by simply using cheap coal oil. This machine can be used in hot air, hot water and steam furnaces in cook stoves and heating stoves of all makes. Do away with your coal and slitting ashes. Now on sale.

SEE PARKER

DON'T SWAT THE FLY
USE BANNER CEDAR SPRAY

Flies and Mosquitos will not congregate on window screens or screen doors sprayed with Banner Cedar Spray.

Dust is known to be one of the causes of the rapid spread of disease. Banner Cedar Spray lays dust, makes dusters dustless and brightens the colors in carpets and rugs.

Banner Cedar Spray destroys foul odors arising from sink traps, cess-pools and garbage cans, rids these places of flies and mosquitos, which are carriers of disease.

This preparation is being adopted by hotels, churches, stores, schools and private dwellings.

Never mind what you have been using try one can of Banner Cedar Spray one or two applications will prove to you in a few minutes more than can be written in two volumes.

Banner Cedar Spray household size (pint) 25c

Hospital size (one gallon) 1.75

5 gallon can 1.50 per gallon

Sprayer free with every can. Send 25c and we will send you a pint can prepaid.

Farmers will find Banner Cedar Spray has no equal for flies on cattle.
