WESTFIELD PARTY IN MOTOR ACCIDENT

M. M. Scudder And Mrs. Frank Irving Painfully Injured When Machine Leaves Road

Last Sunday afternoon Mulford M. Scudder, of Central avenue, Picton, a member of the Union County Board of Taxation, and his daughter, Mrs. Frank Irving, of Prospect street this town, were painfully injured when an automobile in which they were riding jumped a ditch at Stelton, throwing them out of the machine. Mrs. Scudder and her son-in-law, Frank Irving, who were also in the party, had a narrow escape.

The party had been visiting at New Brunswick and were returning to their homes when the accident occurred. At Stelton, near New Brunswick, where the main road makes a turn, there is a badly placed telegraph pole. Mr. Irving, who was driving the machine, made a wide turn in order to avoid the pole, when the machine left the road immediate their business and thus losing the optimization of his force. Moses, it seems, had attempted to do what a great turn in order to avoid the pole, when the pole turn in order to avoid the pole turn in order the machine left the road jumped over the ditch, landing in a corn results.

Go-to-Church Sunday.

It is gratifying to find that the of his constituents throughout people of Westheld are accepting the county. the invitation of the Inter-Church Committee in inviting the observance of next Sunday as "Go-to-Church Sunday". The invitation is given with the utmost feeling of generosity, and good will and we believe the invitation is accepted in the same generous spirit in which it is given. We bespeak for our town a genuine benefit by having its citizens resort to the house of public worship and there unite in their praise and worship to the one God and Father of us all. In and that the Assemblymen electall events, the applicant will learn ed may all represent one political that the statement made by these gentlemen meant business and was the final word in this matter It is certainly clear that public sentiment and the Council are atterly opposed to granting a

license for this place.
It is understood that some members of the Council were approached as to their attitude toward an additional wholesale license, and since there was ne new application for this character of license presented, we assume that the prospective applicant got his answer, in accord with the policy laid down by the present and former administrations, viz. that the number of licenses were not to be increased, either wholesale or retail selling. This too, is in entire accord with public sentiment, and we believe is a most wholesome condition in our excise matters.

Congressman Tuttle's Speech.

Congressman Tuttle was allot-Post Roads Committee, as to the proposition for the pur-chase of railway post office cars by the Government, Mr. Tuttle's presentation of this matter was exceedingly able, and his defense of the Committee's conclusion withstood the attack of the opposition in such a way as to produce applause from the opposite side of the House. This is a most intricate problem and involved a great amount of study and research.

We are glad to find our Congressman up to his jeb and able to defend his position against all comers. Mr. Tuttle's report was adverse to the purchase by the Government of rollyny post office cars. It is manifying to note that our Congressman has made ood in his first battle royal of the present Congress,

Against Small Board.

We feel like commending the afertness and determination of our Council in cutering its protest against the small board free- joined in very hearty and me holder bill, which Assemblyman ment of the new currence of a

Griffin of Elizabeth has prepared to introduce in this session of the Legislature. This bill denies the people the privilege of referen-dum, and it is clear from the experience already had that it places the entire control of counv affairs in the hands of the politicians in Elizabeth. This is most undesirable, and constitutes an entirely vicious piece of leg-islation. The whole county (outside of Elizabeth) is up in arms, and we hope they will make such a demonstration of their displeasure that our Assemblyman will not press his measure for a vote. Indeed, we hope he will see the unfairness of the measure and withdraw it be-fore he suffers the ignominy of defeat and loss of the confidence

We appreciate that such measure may please that coterie of politicians who came so near stealing the county a year ago. It is to the credit of the better class of Mr. Griffin's party in Elizabeth, and his entire party ontside of Elizabeth, that they are opposed to this bill. How Mr. Griffin can reconcile his ac-tion in the face of such opposition is hard to understand

We learn that Mr. Griffin's associate, Mr. Leonard, stands with sure, whereas Mr. Dobbins, o Rahway, is opposed to the bill congratulate Mr. This is getting back in a slight Dobbins for the courage of his convictions, as we understand the bill is to be made a party measure .

How About This, Mr. Governor?

The small board agitation throughout the county, which is growing in volume every day, got a set back by the Governor's mes-

Here are two exactly parallel conditions. In the one, the Governor cites evils proven by experience and recommends the dis tricting of the county, making the Assembly more representative. When it comes to the freeholder bill, he recommends the very thing that he recommends a rem-edy for in regards to election of assemblymen.

Oh Progress! Oh Reform! What crimes and what injustic are committed in thy name!

Legislative Epidemic.

We note with much interest an effort is to be made by our Legislature to make their work more thoroughgoing, and, possibly we might say, to give it more dignity. For the past two or three years there has been what might be called an epidemic of legislation, much of which is said to be unconstitutional and some ill ad-the Federation o vised. Certainly every thinking ties in this town. ted the task of presenting the citizen will welcome any plan or conclusions of the Post Office suggestion that would relieve us of this situation.

Senator Egan proposes California plan which is to have a thirty day recess between the introduction and the passage of bills, excepting in cases of unani-mous consent. This, we believe, would give the voters and legis lators an opportunity to analyze the bills, and would result in eliminating much undestrable and useless legislation, However, there are some drawbacks to this plan which may overbalance the possibilities of having such a scheme produce the ends desired.

For the past few years, almost any bill presented, which has had the of reform, has taken with the people, regardless of the true value of the measure to accomplish the results arrived at we find succeeding legista tures busy recoacting and amend ing bills in order that they shall accomplish the ends desired.

The Kind of Policy He Wanted

Calling on one of our customers the other day he said that when he next insured he would like to have a contract that would provide a definite income for him, beginning at a fixed period later on, and some provision in the contract under which if he should become disabled either by disease or accident he would receive an indemnity. We let him explain to us exactly what his idea of this contract was, and after he told us fully, he said "when you can offer me such a Policy, let me know and I will be interested." We were able to say that we could give him at once the very Policy he wanted in all its details, and the present indications are that we will soon receive a large application.

Baker and Allen of the Jr. O. U. A M. team were the only ones to reach the double century mark in the games with the Immediate Aid on Monday night.

Archbold of the Juniors bowled a fair game in the first with the lim-mediate Aid but in the last two bare-ly passed the one hundred mark.

Winter of the Juniors went to pleces in the second and third games.

Shotwell came close to the 200 mark in the first game with the limmediate Aid but went wrong in the last two.

BOWLING LEAGUE.

Last Friday night the Raptist and Presbyterian teams of the Sunday School Athletic League rolled three games on the Westfield Theatre alleys and the Baptists were the win-ners of all three games. That there ners of all three games. That there was some good pinning done by both teams is shown by the close scores.

191 There was lots of interest in the games and both teams bowled for 214 blood. In the first game the Baptlottists won by two pins, the second by four, and the third by two, making a total of eight pins for the three games. Baker, of the Presbyterian, was responsible for this team losing was responsible for this team losing the last game as he missed a spare in the last frame.

Shotwell and C. Ortleb, of the Bap-The Jr. O. U. A. M. team of the fist team, hung up scores of 202 and Fraternal Bowling League added Gilmore one of 212. RESOLUTION AND NOTICE.

School winning 33—15. The Alpha Sigma was far below their last year's standard. Marsh, the High School's star gnard, was out of the game but Harry Randall took good care of his position.

The game was a continuous rough house and Gilmartin was the only man in the game who did not have a foul called on him. Thirty-three fouls were called during the game, cleven of which were shot, Ewing getting eight out of twenty.

In total baskets, Traynor led with Sisserson second. The team showed great improvement in shooting all around. Cowperthwaite starred for the Alpha Sigma.

thing good or new. On second thought it occurred to me that for the purpose curred to me that for the purpose curred to me that for the purpose economic pressure forcing women in-of this article it might be all the to the industries, there is an insistent better not to know too much of the current arguments or phraseonogy; that because of this I might be able to approach the subject from a different angle from which it had hitherty been approached, and it might be all the more interesting if me about the subject from a different angle from which it had hitherty been approached, and it might be all the more interesting if me about the first control, to such a great extent, these industries Rosidae been approached, and it might be all the more interesting if not clouded by all the little arguments that are bound to spring up in heated discussions and which always befor the mind, preventing a clear grasp of the fundamental principles.

The Social Conscience.

now leads us, that is, the average is higher. Why do we disqualify her chitically then? Logically we can-

do so except she fail to qualify those standards we have set for n. Men can vote if they are twen-one years of age, of sound mind, and are not considered as criminals.

Men and women compose the Hu-

man Family,—they must all obey the laws set down by their respective governments (this includes taxation those few who have anything to). We claim to have a democracy and allow the men to vote if they are of sound mind, but are not just as large a proporition of women of sound mind? There are approximately no more women criminals than men, and women usually reach the age of majority in intellect car-lier than the men. Then why do we lier than the men. Then why do we not as a matter of course, as a matnot as a matter of course, as a mat-ter of justice, permit all qualified women to vote? To those who say she would not use the ballot wisely, I reply that it is an open question just how many men use it wisely.

If anyone feels that woman is not the equal of man, socially or men-tally. I hope be or she will say so in the columns of this paper in a reply to this article. We all want such a curiosity of humanity brought out in the light. Since in every respect in in the light, Since in every respect in which we judge the fitness of man for the ballot, woman is his equal, why is she not having it in a country which pretends to a democratic form of government? There can be but one answer: all down through the ages, with a few exceptions, woman has been subordinate to man and the conservative element in humanity cannot get over the feeling that she is still his inferior.

Conservatism wailed at the thought

of women having any education at all. It always protests against proall. It always protests agonize the accepted thing, then it settles down on the for its own. The "Antis" dare not say this even if they feel it, so they dodge the main question and parade the side issues to distract attention from the fundamental

ion and parade the side issues to most tract attention from the fundamental principles—Justice.

Logic and Justice.

There is no logical reason why women should not have the ballot, but people do not often get things because they are logical and just. If there were not other factors in favor of Woman's Suffrage than these they would be a very long time getting it. A Democracy is that form of government which gives the greatest amount of justice to the largest number. So far no government has every eiven this, so you see that "votes for women" is a lotar way off if there are no other factors in its favor than logic and justice. This is because they are logical very deeply, and therefore things do not site the average individual very deeply, and therefore I have fell compelled to add eyidence to prove that Equal Suffrage is soon to be a fact.

Our educational system is becom-

WOMAN'S SUFFRAGE.

A QUESTION OF JUSTICE.

When first asked to contribute to this interesting discussion, which the kindess of The Standard has made possible. I thought that I would be unable to do it justice. I have never heard a lecture in favor of Woman's Suffrage * and only two against the proposition, so my first feeling was that I had been too much out of touch with current events to contribute anything good or new. On second thought the standard of education is rising so that the masses are being better educated and becoming more intelligent year by year. It is the custom now to give girls, if anything, a broader education than boys. It is not necessary to discuss why this is so in this article. That it is so, is plain to anyone and with this broader view comes the feeling of equality and a determination to be equal in fact as well as in theory.

The Economic Factor. ing more inclusive as time goes on,

The Economic Factor.

The economic factor also has great weight. Besides the ever growing

mind, precenting a clear grasp of the fundamental principles.

Fundamental Principle.

The Anti-Suffragists lay emphasis on the added cost in elections, the small percentage of those interested, the unwise use that would be made of the ballot by women; anything and everything except the issue, which is, whether it is just or not to the women to keep the ballot from them.

It seems to me that we should try, at least, to be logical, and if we claim to believe, as I think we defin democracy, then we should carry it out logically. Democracy means political and social equality. Democracy political means the government, of, by, and for the people.

That phrase sounds familiar, does it mean? That all the people should have a voice in the government, or only a few? If we do not believe in democracy, do not want it, that is another shing, but I feel sure that every public spirited citizen wishes for this form of government. Class for class we must concede that woman is our equal socially into in our lead. Intellectually she now leads us, that is, the average is higher. Why do we disqualify her possible extremes. This is one of the

most formidable barrier to progress, yet necessary as a sort of governor to keep Progress from flying to impossible extremes. This is one of the many paradoxes in life. If this force were active, being reactionary, it would pull the world back to the beginning of time, or rather, it would have kept it from advancing in the first place. However it is a passive, negative quantity, that progress must take over, and make use of, before it can attain its object. Being passive and negative, the force necessary to overcome it must be active and positive, but need he only a fraction of its size. (The tiny hump of snow starts down the mountainside gathering up the inert particles as it moves, each particle adding to its power and momentum, until the mighty avalanche sweeps everything before it, could be materially dispersed to an attain again, accepting its new conditions). Progress a its neception is revolutionary, and as such moves things out of all proportions to proper and he made again, accepting its new conditions). Progress a its neception is revolutionary, and as such moves things out of all proportions to be precised to take and eondemnation for the surful service of head belonging to Robert II. Illingworth and Sam-Whereas, The owners of said property and the head of the mach and the mach and head of the mach and the mach and head of the second many and the head of the lands and the lands and the lands before its only to settle down finally in a state-of inertia again, accepting its new conditions). Progress at its inception is revolutionary, and as such moves things out of all proportion to its size. According to our opton to its size. According to our op-ponents' figures ten per cent, of the women are in this revolutionary movement to-day. This proportion is large enough to give us Woman's Suffrage in the near future. *This was written before Mr. Gil-bert E. Roe's lecture which I attend-ed.
