*Life is a series of collisions with  
the future. It is not what we  
have been, but what we  
yearn to be.*

*J.O. Gasset*

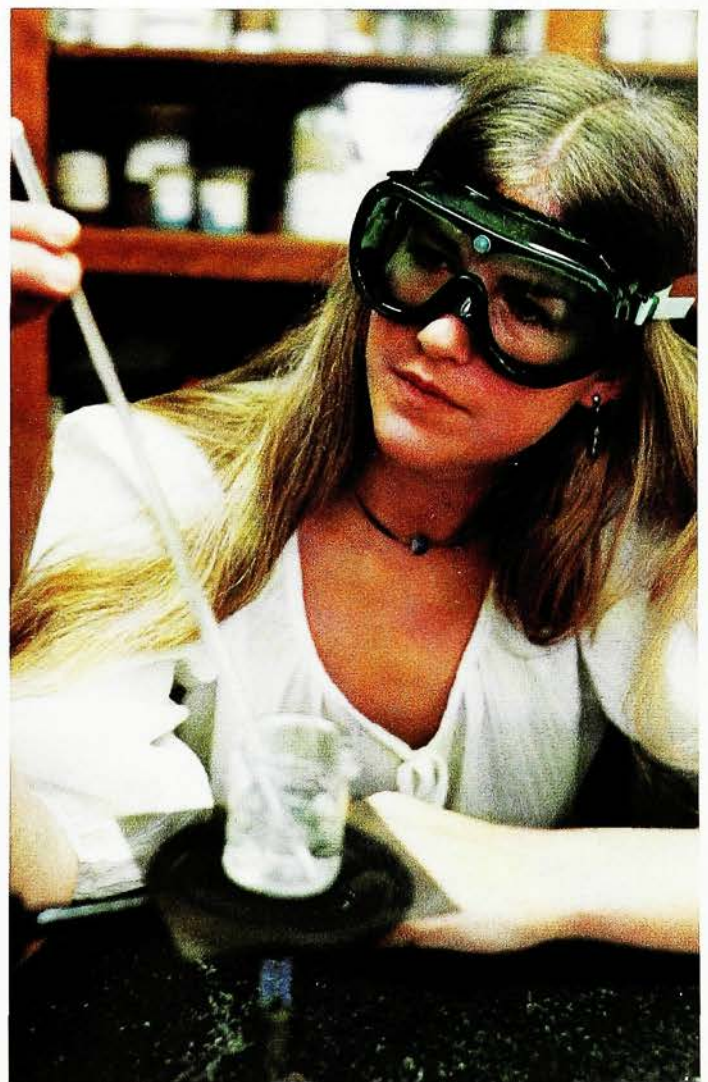

The decade of the 1980s has arrived! We, the generation of tomorrow, eagerly cheer its long awaited presence and the youthful energy it represents. As we wave flags representative of a better world, we must open our eyes to the opportunities that lie ahead. Entering the world of unknown tomorrows, we feel determined to succeed and confident that we shall overcome all obstacles in our paths.

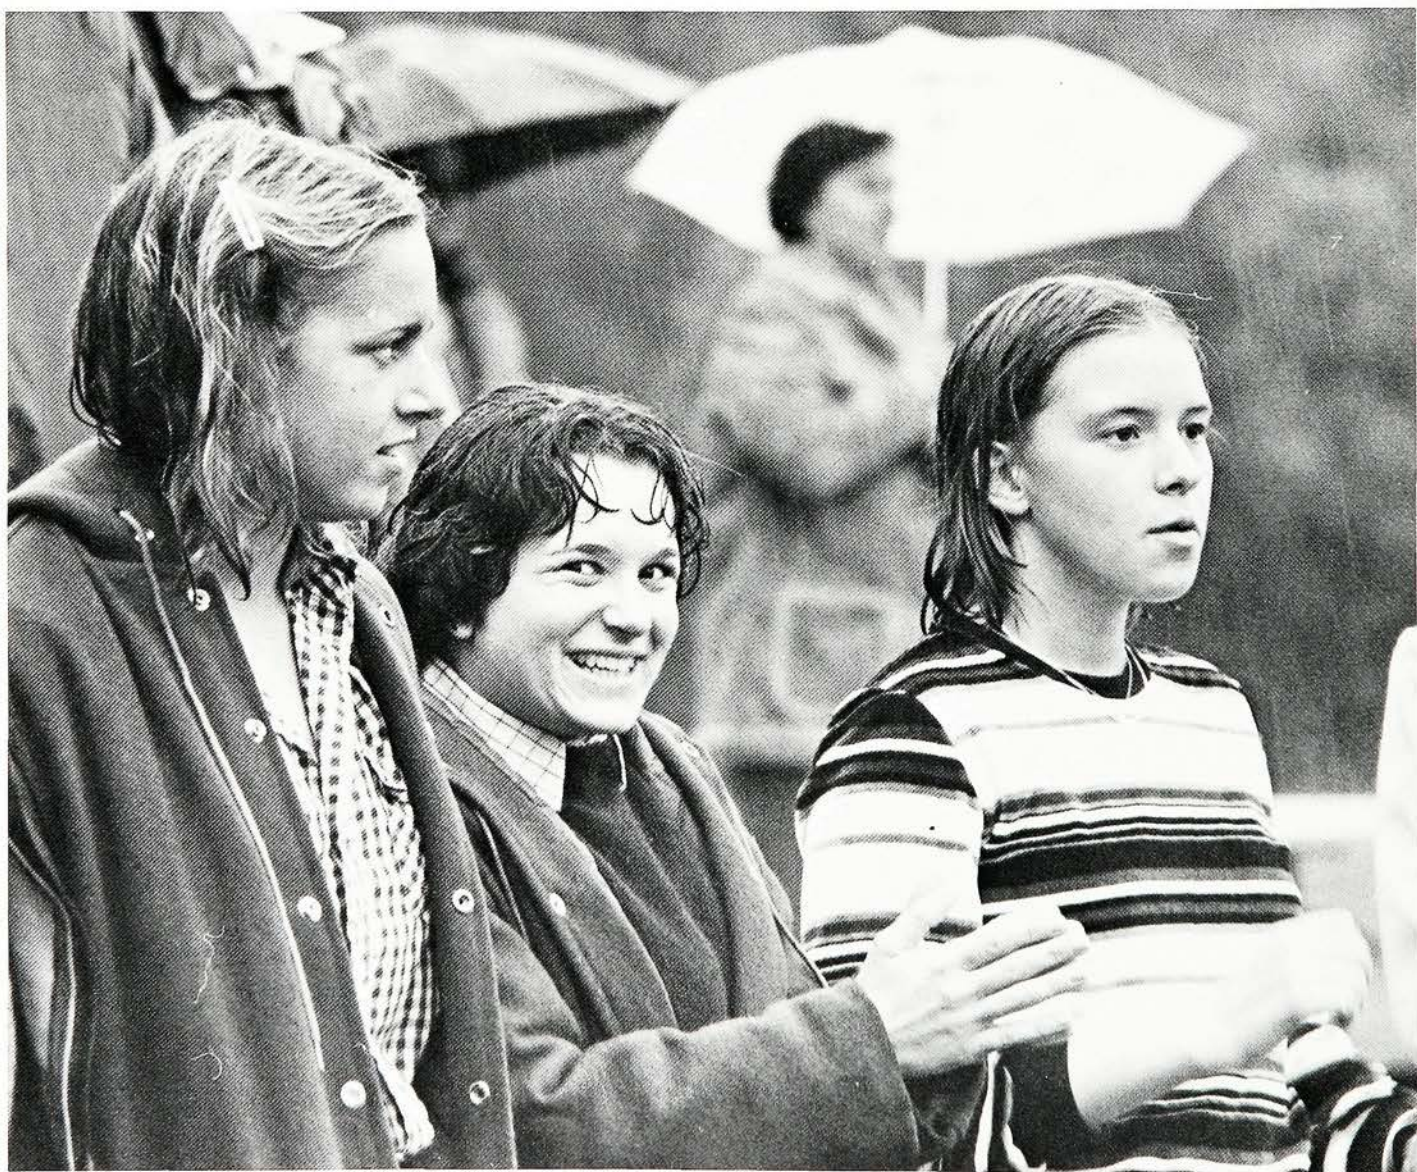

The history our past represents is no longer ours to recover, but the future is ours to create. The challenge awaits us. No longer a vision, the future is now.

# ***WEATHER VANE***

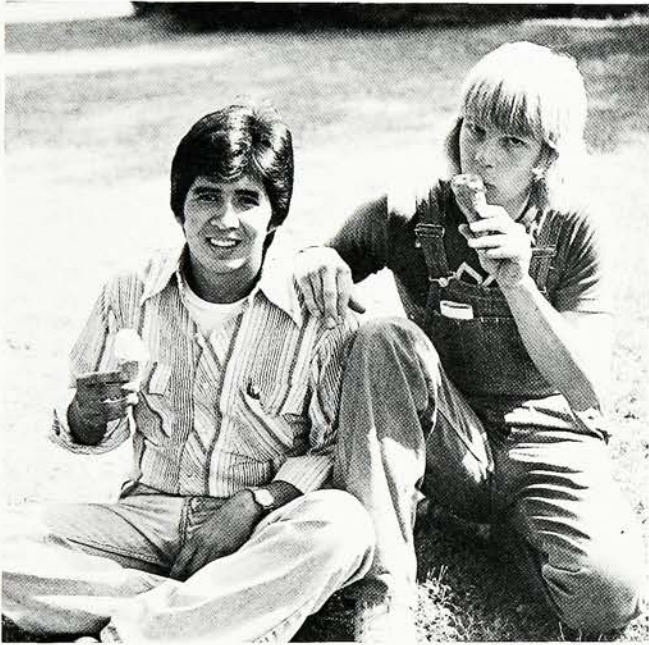

***WESTFIELD HIGH SCHOOL***

**Westfield, New Jersey**

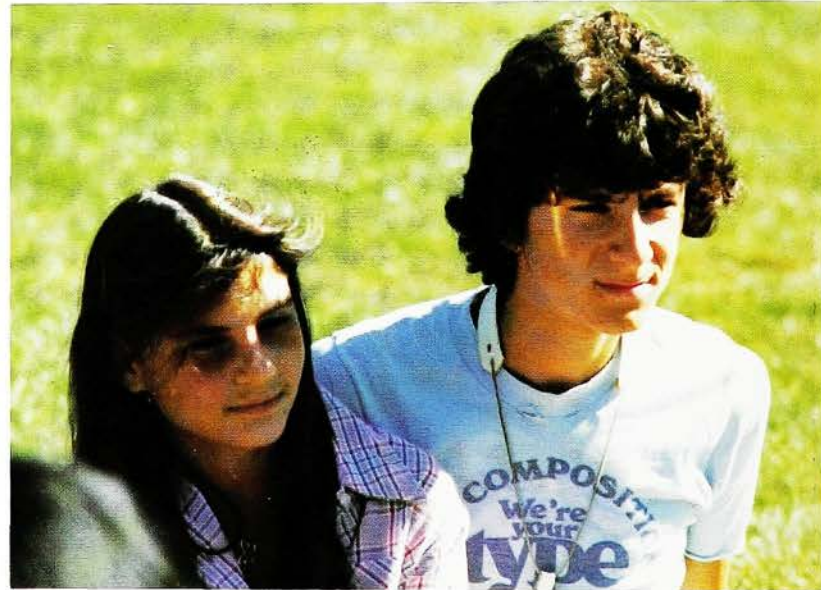

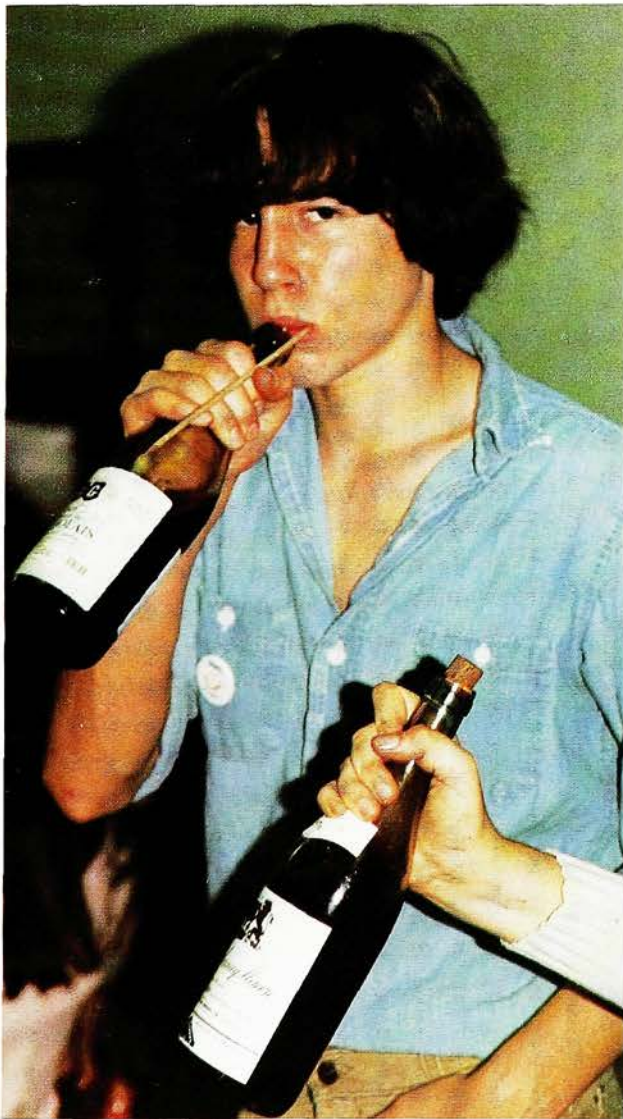

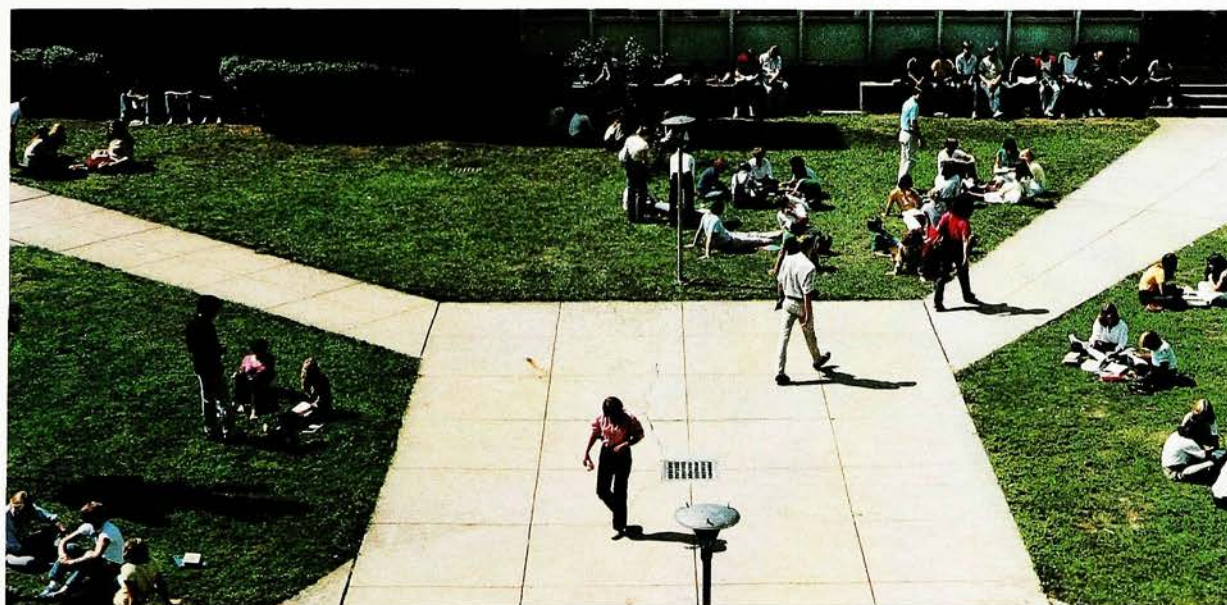

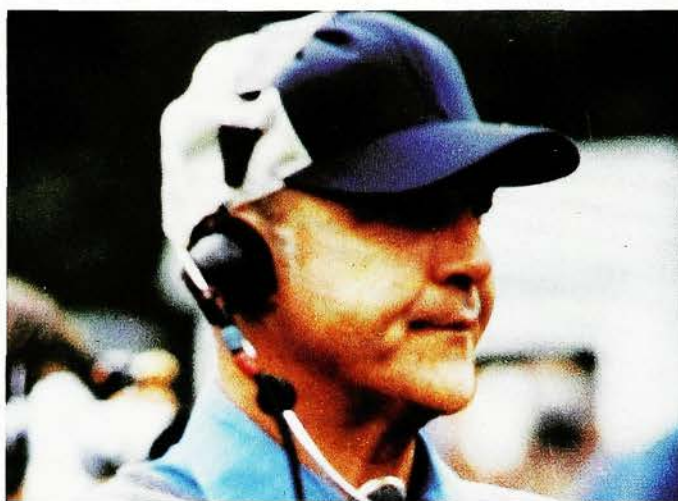

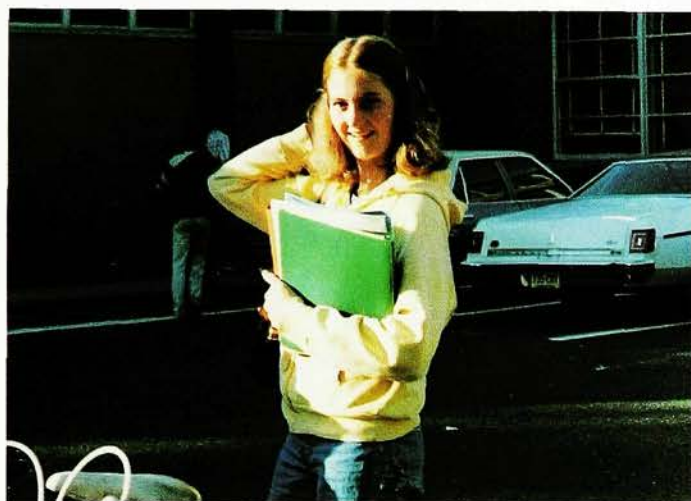

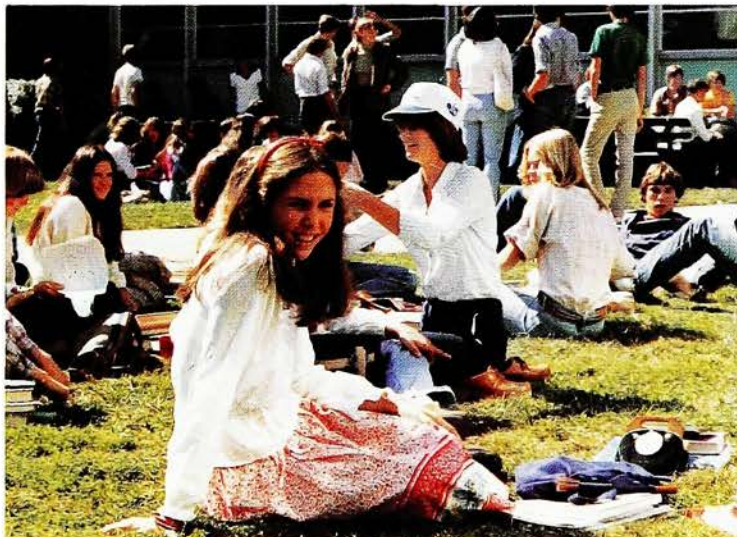

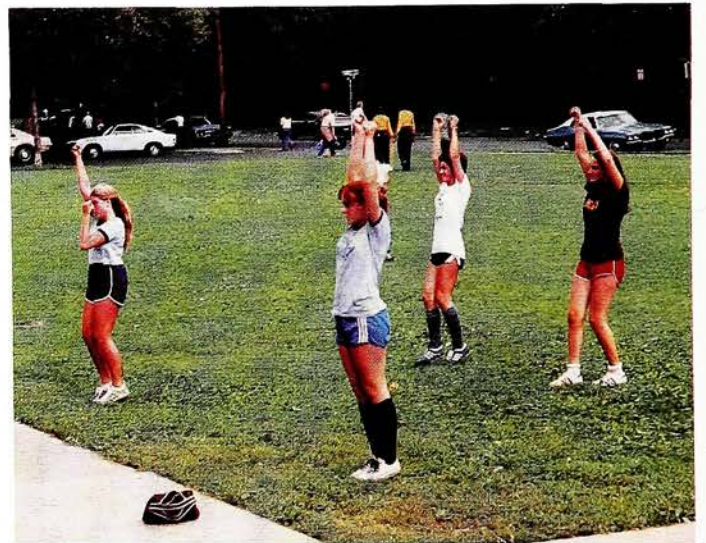

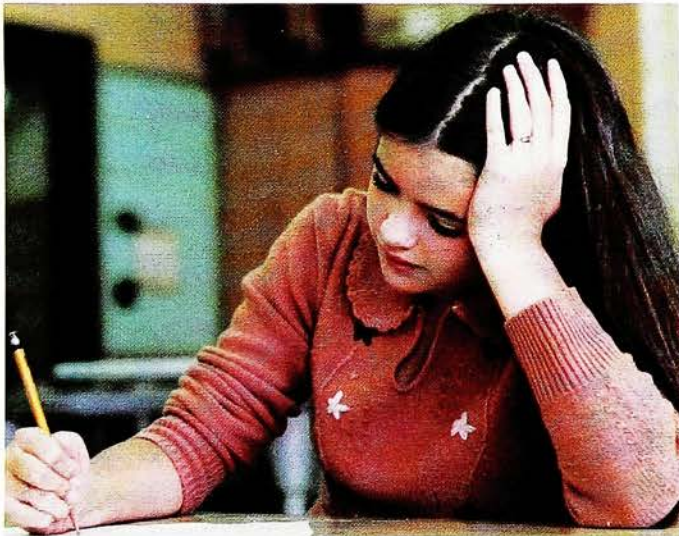

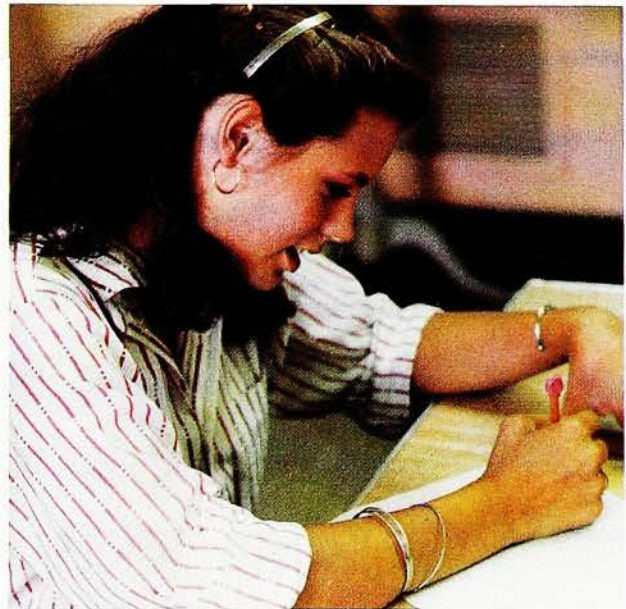

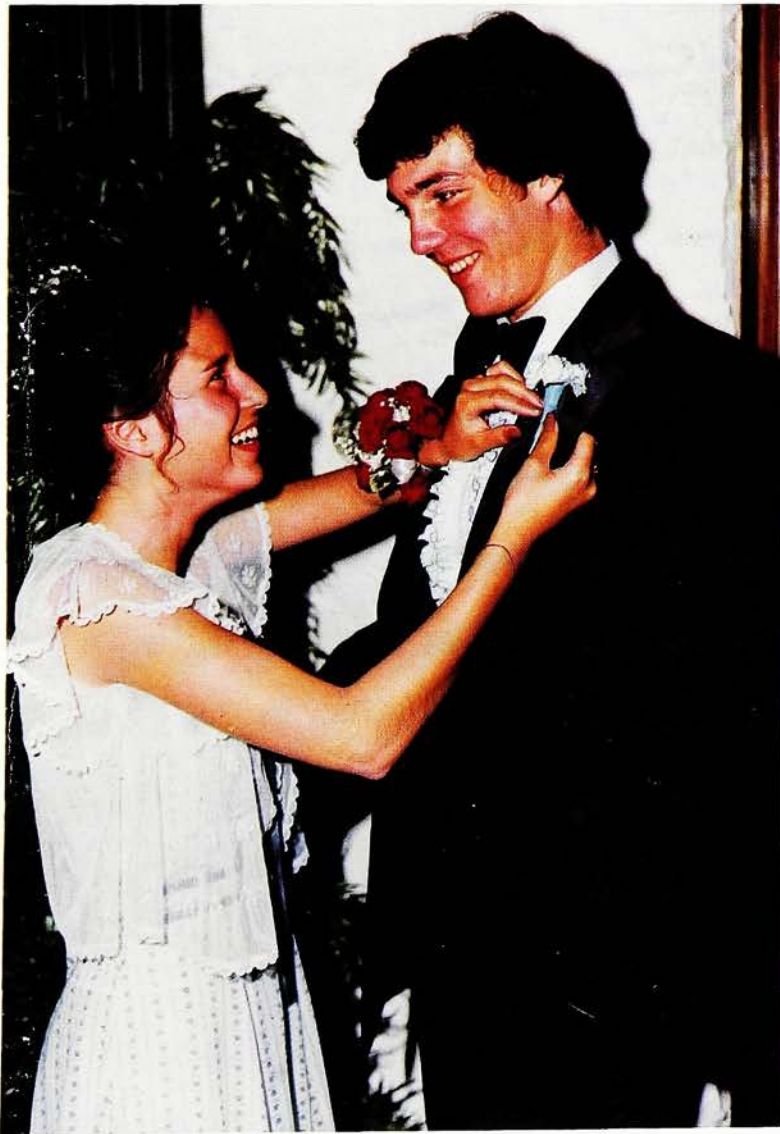

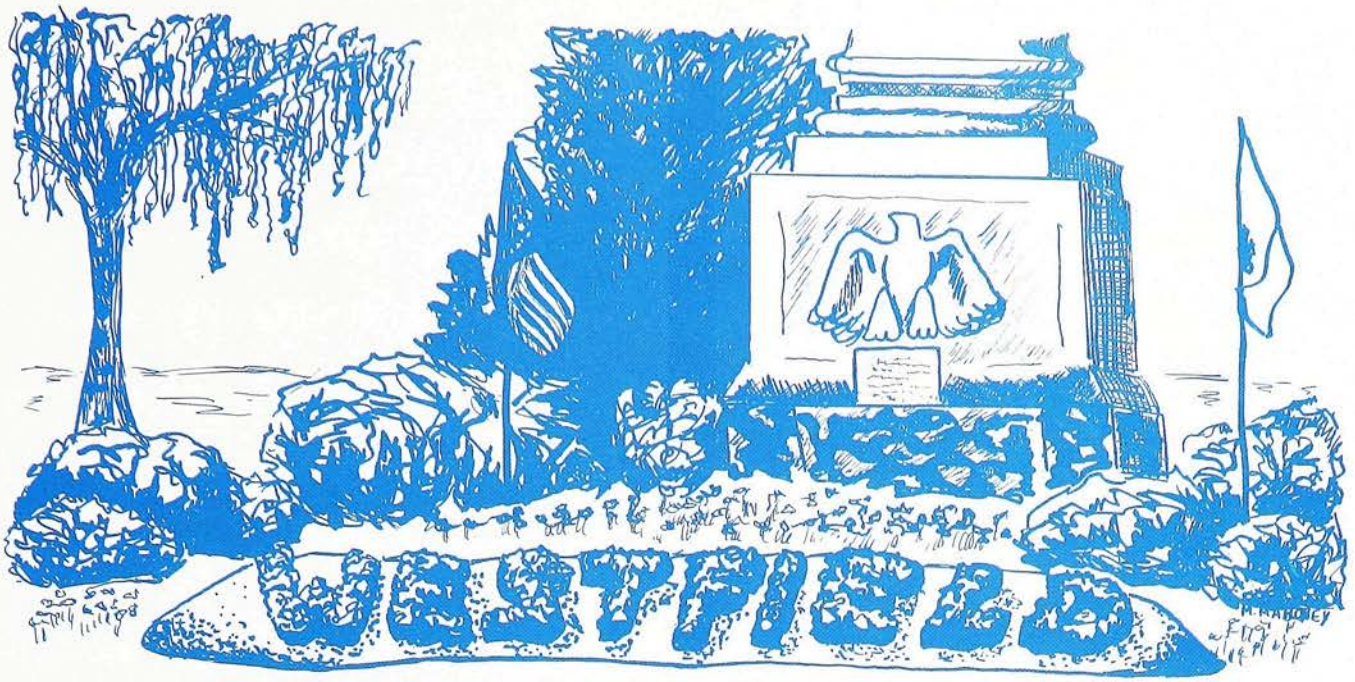

Gas lines, nuclear scares, political scandals, space explorations and attempts at international peace characterized the seventies. This tense climate was a reflection of the attitudes of both youth and age. As the youth of the seventies we acted only as observers; we recognized the problems we encountered; and we envisioned our own solutions. Fortified by these processes, and having increased insight into life as well as enriched cultural, academic, and personal experiences, we can work together to make tomorrow's success a reality.

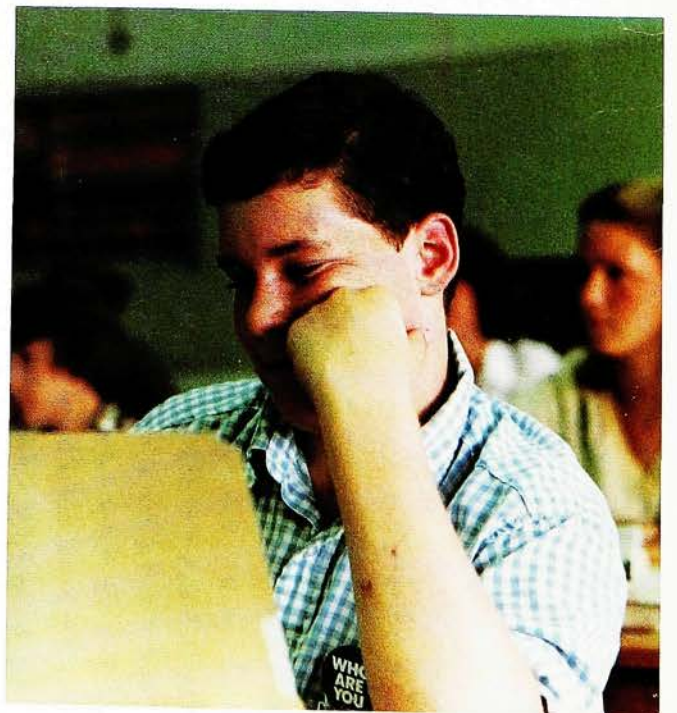

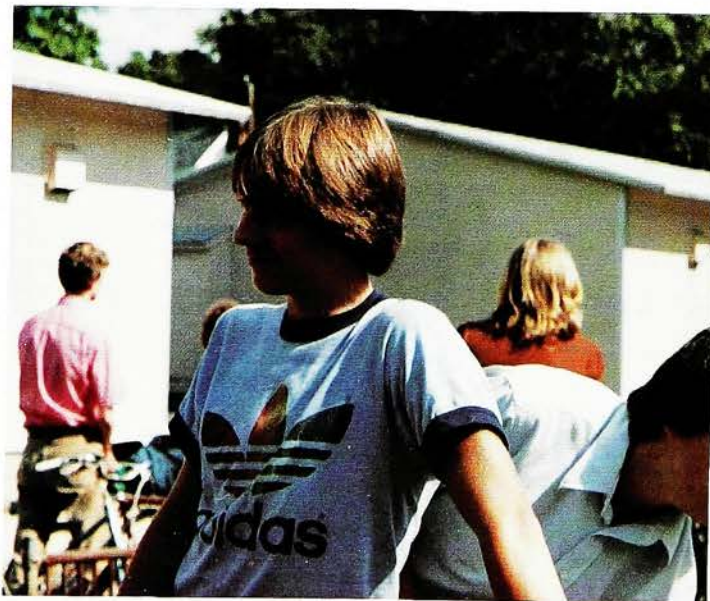

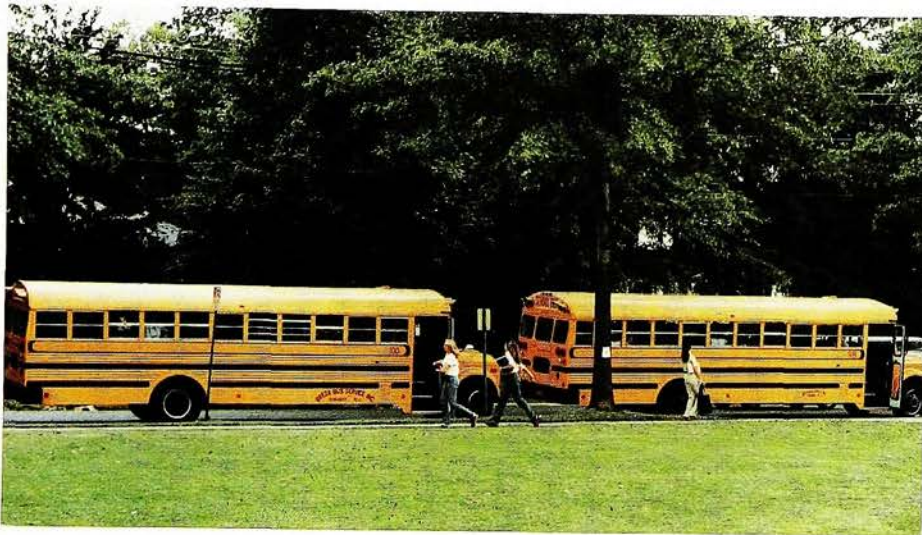

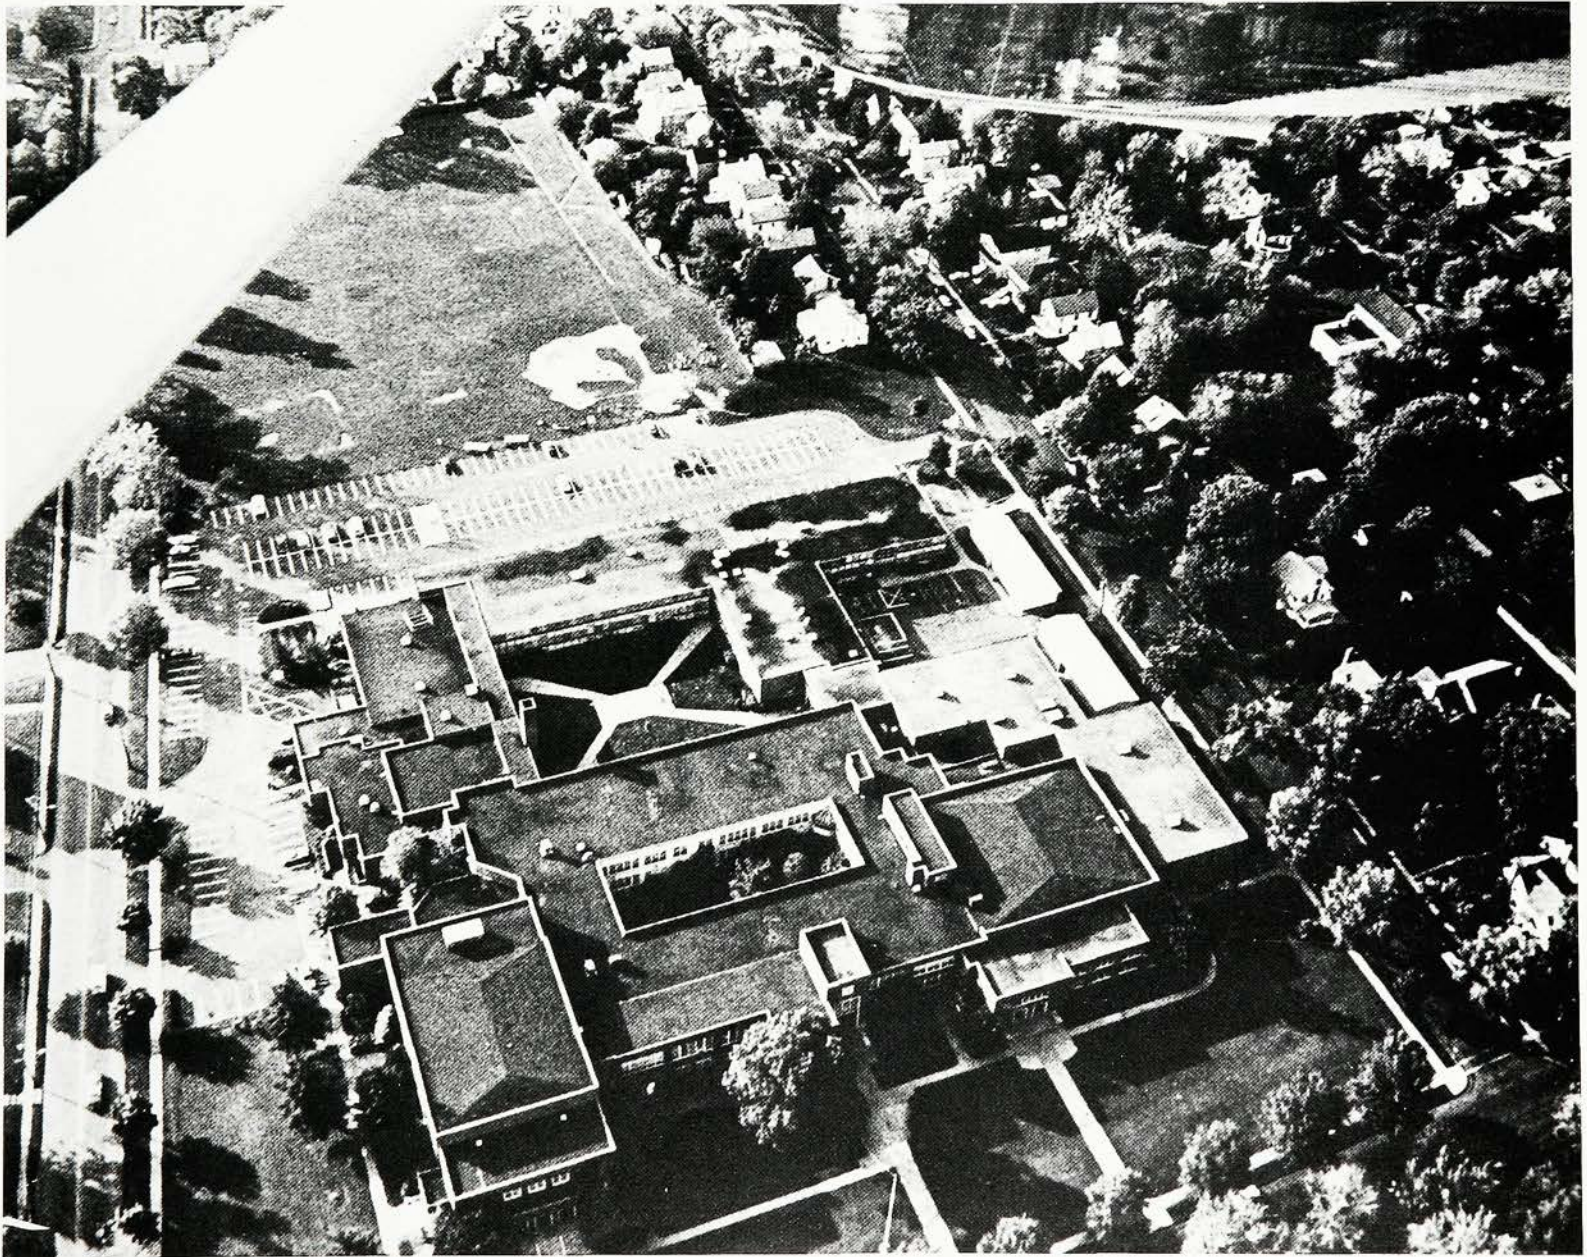

High school life frequently represents a chaotic world unto itself. Each day we discuss new thoughts, ponder new ideas, and store memorable images that will remain well after our three years in Westfield High School.

And the ageless questions arise: What will each of us become? What journeys lie ahead? Only the initial chapters of our lives have been written, the remaining ones are for us to complete boldly and intelligently. We can build our future by synthesizing and linking the pictures of today with the dawn of tomorrow.

Within and behind every picture lie the moments of a story, and ours unfolds on these pages . . . . .

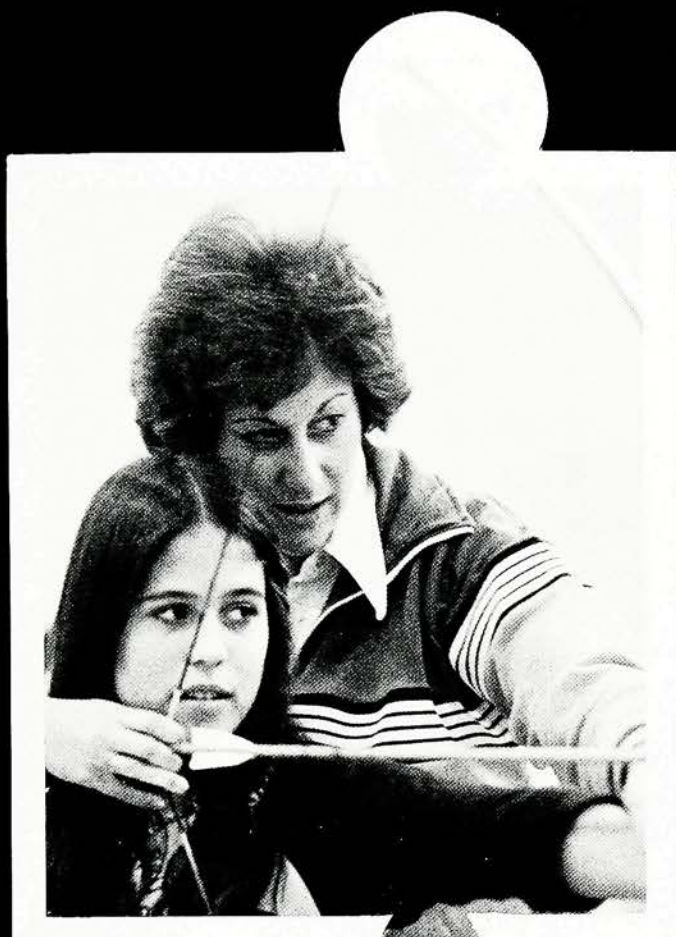

# FACULTY

"I feel privileged to have assisted in the education of hundreds of young people and to have known their teachers and parents during my 28 years of service in the Westfield schools."

## In Dedication

Albert R. Bobal, our principal, has earned the admiration and recognition of both students and faculty. Over the years Mr. Bobal has acted as a positive influence for administrators and educators, stressing creative, imaginative, and flexible instruction while maintaining excellence in curricular offerings.

As a high school social studies teacher, Mr. Bobal started his career in Westfield in the 1950's. He, however, quickly moved to the administration level, serving as an elementary principal followed by devoted service as principal of both Roosevelt and Edison junior high schools. Mr. Bobak returned to the high school as principal in 1969. Mr. Bobal's endeavors inside and outside of Westfield have earned for him the respect and admiration of Westfield residents and other academic leaders throughout New Jersey. His is indeed an unparalleled record of service to a community.

As he is about to depart from his academic role as facilitator and leader, we, the 1980 *Weather Vane* staff, wish Mr. Bobal continued success and warmly dedicate this first yearbook of a new decade to him.
