**SPOTLIGHT on SPORTS**

By Bob Gortin

**Win Tennis Title Third Year In Row**

For the third successive year Frank Casasz, a Belleville product, invaded our next door neighbor, Nutley and proceeded to walk off with the Junior Boys Tennis Tournament, conducted at the Nutley Tennis Club's courts. Casasz swept through to field and defeated Dave Brownell in the final round match for the title.

The next champion won in straight sets, 6-0, 6-8. For his winning effort Casasz captured the Olsen Memorial Trophy.

**Bill Murphy Organizes "Rec" Team**

Belleville once again is fielding a baseball team for boys of high school age. At first it was thought that all hopes of conducting a diamond team for baseball aspirants would go down the drain but at the last minute Bill Murphy came to the rescue and approached Bob Cook on the subject of sponsoring a recreation team for the summer. Cook went for the idea in a big way. That was the beginning. From that point Murphy, a diamond lover at heart took over and rounded up 17 boys with one common thought in mind, that of playing baseball.

Not wasting any time the Belleville Rec's, coached by Murphy, got right down to business. Murphy, who coaches Our Lady of the Valley, of Orange, went ahead arranging ball games. The first one was played against the Lyndhurst Baseball Club, with the Rec's walloping the neighbors from across the river by a one-sided 17-0 decision with Vinnie Parillo tossing a neat one-hitter and striking out 13 opposing batters in the seven-inning contest.

The little southpaw gave Lyndhurst a lesson in pitching. Vinnie gave up one hit in the last frame, the only hit the Giants got all day. One man reached second base and that's the only man who advanced on the little mite. "On the offense Belleville looked good as little "Cap" Johnston and Mike Sheppard led the team with two hits apiece.

Murphy's team will play all its home games on Saturdays with Municipal Stadium being the base of operations. He is scheduling Sunday frays for foreign fields. This week the Rec's play host to the New York Federation League Leaguers, the Bronx Giants, in the first home game for the Rec's and will be a double-bill starting at 1:00 p. m. Murphy will have Bob Mallack and Harry Payton going for the Belleville team. This pair were formerly the number one and two pitchers for St. Benedict's two year ago.

On Sunday, the Belleville Rec's will travel to East Orange to take on the strong East Orange Tigers, at Elwood Oval. Going for the Rec's will be Parillo, and in the second game Connie Egan, of Seton Hall, will toe the rubber.

**Baseball Certainly Has Changed**

Standing next to a former baseball star of another era at a Little League game the other day, he started talking about the change that has taken place in the National Past-time since he was young. "The field that we played on then didn't look anything like the facilities the youngsters of this generation are provided with."

Continuing on the big changes that have taken place, he said, "Gosh, now it's only 60 feet down to first base. Why, I remember when it was at least 90 feet, plus or minus 20, depending on where the rock or piece of cardboard was placed. Then as I remember it, second base used to angle off at about 110 degrees to the left, out toward the railroad tracks. Of course, that was if we were playing at home. On the road second base used to be conveniently placed closer to first when the home team was out and somewhere out in left field when we were up."

"The pitcher's mound had a strange way of moving closer to the plate when the visiting team was up. I'm glad to see that they have finally decided to anchor it at 44 feet. It's nice to know where to look for the pitcher."

"Perhaps the most phenomenal change in the game seems to be the ball. The one the Little Leaguers were using seemed to be white and spherical. My memory is of a little lumpy, but as I recall, the ball used to be black and slightly oblong. They don't make balls like them nickerbockers anymore."

"They also seem to be using nine men now. We had five or maybe sometimes six players, depending upon what was playing at the moment. There were two in the outfield, a man on first and third, the pitcher and the catcher. We'd shift the positions a little if the other team had a lefty up, but generally that was the line up."

"Using umpires to settle disagreements on pitches and plays is an innovation unfamiliar to old-time sandlot players. At one time, the fastest way to settle an argument was to threaten to take home a piece of vital equipment, usually the bat or the ball. There weren't too many gloves to go around, so threatening to take them home was always an effective way to settle an argument."

"At one time all that was needed to hold a game was handful of players, a bat, a ball, and a roll of friction tape to mend the ball. Now the kids have all the equipment that a major leaguer has, and then some. They have umpires, well-laid out fields, and good coaching. Yes, the game certainly has changed, but the change is for the good," the oldtimer concluded.

**BRAVES LEAD PAL BASEBALL LEAGUE WITH TWO WINS**

Shutting out the Giants by a 6-0 score for their second win of the season, the Braves jumped to top position in the PAL Baseball League, with the Cubs beating the Phillies, 11-2, in their first game to place second in the standings. The Phillies, with one win and one loss are third.

The Cards and Dodgers game was rained out, and will be played tonight at Municipal Stadium, beginning at 6:15 p.m. All League games are played every Tuesday, Wednesday, and Thursday night at the Stadium.

In the Braves' sweep over the Giants, Bloomeke made first base when he was hit by a pitched ball. DeBrowski doubled and Blaser singled for the first scores, and in the fifth Blaser, Harms and Musine each singled, and Basch hit a double to score three more runs. Musine, pitching for the winners, allowed only two hits and two bases on balls,

striking out seven batters. The Braves inflicted, played, good defensive ball.

The Cubs got off to an early start in beating the Phillies, with Lakowski reaching first on an error, and Williams pushing him to second when he was hit by a pitch. Caruso and Riordan brought in the first two runs with singles. The second inning began the same way, with Datto scoring one base on an error. Five singles by the next five men up tallied up another five runs, and so it went. Datto, the Cub pitcher, granted only a single hit, with Jim Apple, spoiling a possible no-hit game, in the sixth.

**WESLEY METHODIST CHURCH** - Built in 1900, the Wesley Methodist Church in Belleville, pictured here, is the third church building to be constructed by its congregations since 1803, when the first was built. The second was erected in 1846. The original congregation first met in private homes.

**Wesley**

(Continued From Page One)

of the local church here, who died many years ago, related the story in a history of the church which he wrote entirely in rhyme. She had gone to New York, he said, "on pleasure bent - to see the styles in silk and satin, and mimic the modes as the maids do now." Passing by the church, she entered, and then:

"She saw no fashions to please the eye,  
No smart parade of airs and graces,  
But found their souls' serenity  
Reflected in their happy faces."

Deeply moved, she returned to Belleville, traveled throughout the town to tell everyone of the revelation that had come to her, and thus the Methodist society was organized in that same year.

The growing band of Methodist lets met in private homes for a dozen years. At length, in 1803, their number was large enough to call for the erection of the first Methodist church building on Main Street just south of old John Street. Records indicate that the building cost a total of \$2,145.53. It was constructed of native stone covered with mastic around the foundation. The original building, which still stands, is occupied by the Logan Auto Radiator Company. Margaret Dowd is buried in the church cemetery behind the building.

The early church was soon served by a circuit rider who also traveled to Bloomfield and Springfield (now Nutley). Fairfield, Centerville, Cedar Grove and Tackanack. These seven points were known as the Belleville Circuit.

the crowded seat, and coppers in the front, with a handle by its side; a hay to pump the bellows full, and several the "hot hider." On Main Street, in those days, he noted, "no autos ran along the dusty street, but old-fashioned grey or brown or roan drew folks to church to meet. The old men used to wear plug hats, the dresses long trains had, I wonder what became of them since short ones are the fad."

The present pastor, Rev. Clifford A. Hewitt, took up his duties here in 1933. Under his leadership the church engaged in an evangelistic mission during the past year which brought 112 new members into the church. The present membership of the church is now 844 exclusive of children and constituents.

In keeping with the times, Wesley Methodist Church has embarked on a program of expansion and renovation which is now in its third year. The sanctuary of the church has been redecorated and refurnished. The basement has been expanded and modernized. This, together with other work which is contemplated, will bring the total cost of the project, when completed, to more than \$30,000.

Wesley Methodist Church believes it has a mission in the future of Belleville. It looks forward expectantly to generations of service to the community of which it is a part even as it looks back upon generations of service which are already a part of its history since the year 1701.

**DR. P. S. SYMONDS NAMED PROFESSOR OF ENGINEERING**

Appointed to New Post At Brown University in Providence, Rhode Island

Dr. Paul S. Symonds has been appointed a professor of engineering at Brown University, Providence, R. I. The announcement was made this week by Dr. Henry M. Wriston, president of the New England college. Dr. Symonds is the son of Mr. and Mrs. G. R. B. Symonds, of 39 Wayne Place.

Dr. Symonds joined the Brown faculty as an assistant professor in 1927. A graduate of Rensselaer Polytechnic Institute, where he received the Bachelor of Science in physics, Dr. Symonds completed his graduate work at Cornell University, where he received the Master of Science degree in 1931 and the Ph.D. in 1934.

Before coming to Brown he was an instructor at Cornell in mechanics and a physicist at the U. S. Naval Research Laboratory. Dr. Symonds was granted a leave of absence from Brown in 1940 to pursue research under a Fulbright Grant at Cambridge University, England, and in 1950-51 continued his research in England at Imperial Chemical Industries.

Dr. Symonds has written several papers on the subject of limit design for technical journals and has published papers on the properties of materials, vibrations and

# A Living Page Of History: When A Dream Set Hitler's War Back Six Months

## V-2 Rockets, War's Most Destructive Weapon, Were Held Up By Fuhrer's Nightmare

By Ralph Heinzen

Back Rogers never could have invented anything more unreal or more deadly than the Nazi rocket which Churchill, ever the phrase-maker, named the "buzz-bomb" and which the British, not the Germans, designated as V-2. V-1, in Churchill's lingo, was the pilotless airplane which the British knew the Germans were also perfecting.

### Hitler, Not Cold

Adolf Hitler got the credit for the weapon which he had brought victory to Germany, but it is a matter of historical record that Hitler never was enthusiastic about the V-2 rocket after he had a dream that no V-2 would ever reach England. It turned out to be the Nazis' finest weapon, but over Hitler's indifference.

I was a prisoner of Hitler, interred with an unhappy lot of American diplomats and war correspondents in the Black Forest, deep in the heart of Germany, when I first learned—through the proud boast of my Gestapo guard—that of the rocket which was to bring England to its knees. That was in June, 1942, a crucial time in Germany when the Nazis were looking for a cheap victory, following their severe troubling at the hands of the Russians at Stalingrad.

### Six Months Late

In his book, "Crusade in Europe," General Eisenhower said that delays in completing the invasion and in turning out the rockets in mass production alone prevented Hitler from delaying invasion and, perhaps, from losing the war.

Eisenhower wrote: "If the Germans had succeeded in perfecting and in using these weapons six months earlier, our invasion of Europe would have proceeded exceedingly

difficult, if not, perhaps, impossible." It is now fairly clearly established that Hitler's silly belief in dreams caused that six months delay and, perhaps, saved our situation in the West.

It was several years before the war that the Germans began their experiments with liquid fuel rockets and pilotless aircraft, and had built an experimental station on the Baltic Coast, at Peenemunde. The whole project was headed in secrecy and the war had been in progress four years before the threat of rockets became serious and before Churchill learned of the testing of these new weapons.

### Timely Nightmare

It was in March, 1942, as the German scientists were near to the answer to their years of experiments, that a message reached Peenemunde: "The Fuhrer has dreamed that no V-2 will ever reach England," it ran. There was consternation. The management knew that the dream meant a delay of weeks, perhaps months, in perfecting the V-2.

If it was not Hitler or Himmler, it was the Budget Bureau that held back the scientists and engineers. Supplies that were of direct military use could be obtained with some delays and without too much questioning, but when it came to a lead pencil, the bureaucratic machinery ground very slowly. Subterfuges were resorted to. If a tie that beat him, when a typewriter was needed, the order described an "instrument for recording tests with a rotating roller, as per sample."

Walter Dornberger, an able German engineer who ended as a general and who was in charge of research that produced the V-2 rocket, has just written a very revealing book about his difficulties.

### Politics And Rivalries

Faith in the V-2 did not begin to flower until 1944, when the generals and the scientists knew that the war was lost. Hitler's intuitions and dreams,

Himmler's interference, the bickering, jealousies and intrigues, the scheming of Nazi officials for personal power, the long refusal of high priority for raw materials threatened to wreck the whole undertaking time and time again.

Experiments had been in progress since 1930 but not until 1939 did Hitler take the trouble to visit Kummersdorf, seventeen miles from Berlin, where work on the V-2 was underway before the necessity of tighter security made it advisable to transfer the laboratories and shops to Peenemunde. He asked no questions, simply stared. Dornberger says that he was the first witness of a test who was not moved by the spectacle of a missile roaring into the air. Goring, on the other hand, laughed, slapped his thigh and indulged in gleeful prophesies of utter annihilation.

### First Rocket

Peenemunde's first unquestionable success came on October 3, 1942, when a five-and-a-half-ton prototype of the V-2 rocket to a height of sixty miles and traveled at supersonic speed for a distance of 127 miles, with a deviation of only two and a half miles from the calculated course.

No wonder there was rejoicing. Thereafter the development would no longer be held back by inefficiency and bureaucratic stupidity, thought Dornberger and his staff. But the delays continued. It was not until September 8, 1944, that the first V-2 fell in England.

When, in 1943, Hitler saw the film of the test made in October, 1942, he reacted really at last. It was known as early as 1940 that the Luftwaffe could not indefinitely lose bombers and crews in raids on Britain.

### Tell Of Bombers

A bomber made an average of no more than five or six flights before it was brought down. A V-2 cost \$80,000, made thirty times as much, including the training of the crew. Here, then, was the V-2, a weapon that could bring Britain to her knees. Materials poured in as never before. Peenemunde became a kind of Black Ridge, where thousands were employed.

Hitler had made up his mind too late. Even when V-2's were being delivered at the rate of 900 a month it was apparent that they could not win the war alone.

One reason was Himmler's intrusion with a decision to entrust the management of Peenemunde to favorites who knew nothing of rockets and gave conflicting

### Eisenhower Said If Rockets Perfect 6 Months Earlier, Invasion Would Have Been Affected

Orders.

### Gestapo Arrests Scientists

Most of all, some of Dornberger's best men were arrested by the Gestapo. Among them was Werner von Braun, who had been designing and testing rockets for ten years and who is now in this country working on guided missiles for the United States Government. He and his companions were charged with sabotage.

Though he was himself suspected, Dornberger succeeded in saving von Braun and the rest of the scientists on the ground that without them there would be more delay in turning out V-2's. As for von Braun's sabotage, it was based on nothing more than discussions of space travel and the interest in eventual voyaging to the moon, than in winning the war.

It was in the Spring of 1943 that General Ismay, in the name of the British Chiefs of Staff, reported for the first time to Churchill about the great progress that the Germans were making in developing a rocket capable of reaching London and the South Coast from Nazi positions in France.

### British Spy Reports

Ismay suggested to Churchill that he name his son-in-law, Duncan Sandys, to coordinate all available information about the rockets. Sandys asked the RAF to obtain detailed aerial photographs of Peenemunde and when one of the photos was developed and showed large rockets piled up in the firing point, he saw clearly that they were capable of a range of from 90 to 150 miles more than that of a bomb from London to the French coast.

Hitler, after having been lukewarm to the project, suddenly became inspired with the rocket possibilities. He visited Peenemunde early in June, 1943, and after watching rockets being fired, became enthusiastic about the new weapon. Comforted by what he had learned and seen at Peenemunde, Hitler returned to Berlin and called a General Staff meeting.

Germany had only to hold out six months longer, he told his generals. By the end of 1943, London would be levelled to the ground and Britain be forced to

surrender. October 20 was fixed as zero day for the rocket attack to begin. It was that hourful claim which was relayed to me in my prison camp by my Gestapo guard.

### Hitler Goes All Out

It is a matter of German record that Hitler, after the Peenemunde visit, ordered the construction of 30,000 rockets to be ready for October 20. This is an indication of the absurdity of Hitler's thinking, at times. (The German Minister of Navigation, Dr. Speer, estimated that each V-2 required as many man-hours to make as did six fighting planes. Hitler's demand was, therefore, for the equivalent of 180,000 fighting planes to be made in four months.)

But in keeping with Hitler's orders, 1,500 skilled workers were transferred to Peenemunde from anti-aircraft and artillery production.

Intelligence reports of the stepped-up in rocket production were not long in reaching London and the British government made its preparations for the October 20 onslaught. Arrangements were made long in advance for the evacuation of 10,000 London school children and pregnant women, and 30,000 Morrison shelters were moved into London.

Instead of sitting back and waiting for the Nazi attack, Sandys ordered an air attack on Peenemunde. On the night of August 17, 1943, the RAF under Air Marshal Harris, chief of Bomber Command, struck Peenemunde with 571 heavy bombers. More than 1,500 tons of high explosive bombs and an enormous number of incendiaries were dropped.

The rocket experimental buildings were scattered along a narrow strip of coast and were protected by a smoke screen, and none of the apparatus in the British planes could locate their position positively. It was necessary, therefore, to resort to visual bombing, by moonlight, from a height of 8,000 feet, much to the usual bombing altitude.

The British crews were told by Harris that if the operation failed on the first night, they would have to be repeated on the next night and on all suitable nights thereafter, regardless of casualties and regardless of the

knowledge that the enemy would obviously do everything possible to increase its defenses after the first attack.

### Loss Forty Bombers

It was a perfect attack. Fifty fighter planes led the bombers to the targets and master bombers circled the target instructing the approaching bombers by radio telephone. To fool the Nazis, the bombers followed the usual air route to Berlin and even did send a decoy force of bombers on to the capital when the main column turned northeast and headed for Peenemunde on the Pomeranian coast.

The Germans were, at first, deceived by the feint on Berlin but not for long and then the night fighters caught up with the British bombers. In the bright moonlight, forty bombers were shot down.

It has since been learned that the actual structural damage was much less than had been supposed, but we now know that all of the constructional drawings that had just been completed for issue to the workshops were buried. The start of large-scale rocket production was thus seriously delayed.

### Capture A Rocket

Hitler, not knowing how much or how little the British knew of his secret weapon, ordered Peenemunde dismantled. The production factories were moved eastward into occupied Poland, out of the range of British bombers. All that caused serious delay and Hitler's October 20 deadline had to be changed.

That was to work out in Britain's favor, also. As soon as the experimental station was moved to Poland, the Polish agents of British Intelligence went to work. They reported when the first rockets were tested in January, 1944, and by a stroke of luck they got their hands on an intact rocket.

The experimental rockets fell widely and German patrols always raced to where they fell and collected the fragments. But one day a rocket fell on the banks of the Bug river in Poland and did not explode. Polish patriots got there first, rolled it into the river, and waited until

the Germans gave up the search for it.

### Patriot Pays

The Poles then salvaged and dismantled the rocket, a dangerous feat accomplished by A. Kocjan, a Polish pilot who was a Polish field on the night of July 25, 1944, and packed up about 100 pounds of the essential parts of the rocket, along with Kocjan's technical documents, and flew out of Poland back to England. Britain has the secret of the V-2. Kocjan went along to England but later returned to Poland, was caught by the Gestapo and executed.

Nearly fifteen months had elapsed between the time that General Ismay informed Churchill of the Nazis' secret weapon and the actual attack in June, 1944. Defense preparations completed in those 15 months enabled Britain to ward off the Nazi attack, although losses in lives and property were heavy.

### Flights Of Fantasy

Not all of Hitler's neuritis into the realm of science were as successful. His scientific knowledge was very limited, and that explains why he gave official backing to many projects which were the work of charlatans. Genuine physicists had trouble staying out of the Gestapo's clutches but an X-ray "scientist" named Scheideitl was given an allowance of a hundred thousand marks to perfect an X-ray machine to burn the Allied pilots out of their cockpits.

Scheideitl sold Hitler on the idea of using a high-voltage X-ray machine, the Betatron, an American invention, to spread death in the skies by X-rays. Something similar was another

# MC GLYNN TO BE GUEST OF GOP

## Candidate For 10th District Slated To Attend Young Republican Picnic On Wednesday

William E. McGlynn, Republican candidate for the 10th District seat in Congress, will be guest of the Nutley Young Republicans at a picnic on Wednesday. The affair is scheduled for 7:30 p. m. at 226 Vreeland Avenue.

Miss Ruth Grey, chairman of the Young GOP, has extended an invitation to all local voters to meet McGlynn. She also reported that plans for the club's drive to register eligible voters are progressing.

Lists of unregistered voters are now in the hands of the three ward chairmen who are preparing data sheets for their canvassers. The drive is expected to get into full swing before the end of the month.

Voters who would like to register but who need transportation to Town Hall may call the ward chairman: John Blivins, of 41-1/2 Locust Court; John Peto, of 6 Church Street; or David Felinitz, of 66 Mapes Avenue. Transportation will then be arranged.

nonsense project, given the code name of "Hadubrand", which was to make use of two infrared rays, which, intersecting at the proper angle, could explode the bomb load of Allied planes in the air.

Neither ever got beyond a gleam in the inventor's eye.

looking beauty will stay in the style parade for seasons to come. (That means a better deal for you come resale time.)

Is it any wonder, then, that Buick now outsells all other cars in America except two of the so-called "low-price three"?

Come in for a demonstration - this week, for sure. And learn, in the doing, what a big trade-in allowance our volume sales can bring you.

 Buick Sales are Soaring!

But - dig a little deeper if you want the real clincher. That's when you find that those few dollars more you pay for a Buick buy you a lot more automobile.

They buy a whale of a lot more power - Buick V8 power - plus the new economy of Power-Head combustion.

They buy a lot more luxury and comfort and solidity - more room, more glass area, more frame strength, more tread width, more ride steadiness - including the million dollar "feel" of all-coil springing and torque-tube stability.

They buy, too, the most advanced styling of the times, and the great panoramic windshield, and the surety that such fresh

More money for you!

NOW YOUR MATURING

SERIES E BONDS CAN EARN INTEREST

TEN YEARS LONGER-AT 3%!

Have you given any thought to what you'll do, with those maturing Series E Defense Bonds you patriotically bought ten years ago? Well, here's real good news for you. You won't have to do a thing with them and they'll continue to earn interest for ten years longer at 3% interest, compounded semiannually. Just hold on to your bonds and allow them to go on earning!

And in the meantime join the millions of thrifty Americans who are investing in a secure future with Defense Bonds bought regularly through the Payroll Savings Plan. Thousands say it's the one sure way to save.

The sum you set aside each week may be as little as 10c - or as much as \$275. If you can save just \$3.75 a week regularly through the Plan, in five years you will have \$1,025.95! In 9 years and 8 months you'll have \$2,137.90... in 19 years and 8 months, \$5,153.72! For now the Series E Bonds you buy and hold to maturity can earn 3% interest compounded semiannually.

No matter how small your income, you can't afford not to put something aside for yourself. So join the Payroll Savings Plan where you work today.

3 new money-making opportunities for you!

New Series M, J and K

Defense Bonds pay 2.76% to 2%!

SERIES M. A new current-income bond, available in denominations of \$500 to \$10,000. Sold at par. Matures in 9 years 8 months and pays an average 3% interest per annum held to maturity. Interest paid semiannually by Treasury check. Annual limit, \$20,000 maturity value.

SERIES J. A new 12-year appreciation bond, available in denominations of \$25 to \$100,000. Sold at 72% of par value. Pays 2.76% compounded semiannually if held to maturity. Annual limit, \$20,000. Issue price jointly with Series K Bonds.

SERIES K. A new 12-year current-income bond in denominations of \$500 to \$10,000. Pays interest semiannually by Treasury check at the rate of 2.76% per annum. Sold at par. Annual limit, \$20,000. Issue price jointly with Series J Bonds.

**Bandit**  
(Continued From Page One)  
The Loan Association was called several years ago by a burglar who broke into a safe and stole approximately \$17,000. He was arrested in Florida just as he was about to fly to Cuba after an accomplice had broken down under questioning by Belleville police.

**Fog**  
(Continued From Page One)  
13. But by July 5 the number had jumped to 232, of which 208 were females. It is the female of the species that inflicts bites. The last count on July 11 tallied 632-452 females and 270 males. The Joralemon Street trap was unable to claim a single mosquito on June 14, but had recorded 426 on July 11.  
The mosquito season ordinarily continues unabated until about the middle of September, when the insect swarm begins to fall off. Hot weather and rainfall helps to prolong the annoyance.

**\$100,000**  
(Continued On Page Two)  
construction of a \$15,000 office, warehouse and garage for a plumbing and heating business at 567-569 Franklin Avenue by the Sapace Company of 15 Meacham Street. The location is in a B residential zone, and the commission approved a variance.  
The commission also granted a mercantile permit to Wladis M. Fahmie for the conduct of a fruit and vegetable business at 382 Franklin Avenue, despite objections voiced by Atty. Grubbin, who said he represented residents who objected to location of the business there. Fahmie was represented by Atty. Leonard J. Bonco.

Nothing more delightful than recovering lost money. Alfred E. Arena, of 2 Brighton Avenue dropped a wallet containing \$50 while shopping in the Woodworth store on Washington Avenue. Police Sgt. Joseph Smith, also shopping, found the money and brought it to the police station. When Arena walked into headquarters to report his loss he found the \$50 waiting for him. Mr. and Mrs. John Buca of 38 Greylock Avenue reported the first catch of the season. The victim was their six-year-old son, Joseph, who picked up a stray cat without being introduced. The cat was inoculated against infection at Columbus Hospital. Another pet department item Robert Gleason, 1 South Carver Street, found a two-month old female puppy, color brown, and turned him over to the police department. No claimants yet.

Just thinking of women pipe-smokers again. COULD there be one in Belleville we didn't know about?  
—Morris Goldberg

ens out along the Second River. James R. Golden, commission candidate in the last election, called attention to the fact that a four-year-old boy had been killed in Nutley when the sign post from which he had been swinging, snapped at its nailed base and suggested that Belleville sign posts be checked. Commissioner Kenneth Smith, public works director, replied that such a check had been started more than three weeks ago by his department, before the Nutley accident occurred. Golden also commended Commissioner Smith for the recent installation of 22 waste disposal cans placed about the city's streets. Smith said they had been purchased for \$100.  
Golden also congratulated Commissioner Hyde for the Independence Day celebration, which he said he believed to be perhaps the best in the county in proportion to the amount of money appropriated for it. Hyde, whose recreation department sponsored the program, was general chairman for the event.

**All Around**  
(Continued From Page One)  
turned to Nutley, where he had told the cyclists to wait, and the boys continued the tour.  
P.S.: Doctors said that in handling Robert as he did, Cook had probably saved the lad's life.

Today's compliments to Detective Jim Dunn and Officer McNish of the Belleville police department for their handling of the department's Police Athletic League program, in which 1,200 kids are enrolled. Heart-warming to see the way they approach their job. Whole department, in fact, deserves praise for its support of the program, initiated here by Public Safety Director Sullivan. Dunn directs the program, and McNish is the secretary.

Before the regular meeting, it was learned, members of the commission held a caucus to discuss payment of a premium to the Pacific Employers' Insurance Company, which holds the town's employees' compensation insurance account. Mayor Padula said he would call a special meeting next Monday to take action on the matter.  
Commissioner Elmer S. Hyde had earlier objected to what he described as the exceptional share of town insurance written by Arthur E. Mayer, Belleville real estate and insurance broker, who is agent for the Pacific company. As a result, it was reported, payment on the premium was held up, and is now past due.  
In other town business, the commission Tuesday set aside approximately 2 1/2 acres of town land for recreational purposes upon motion of Commissioner Hyde. The land has a 50-foot frontage on Mill Street, but wid-
