GUSTAF F. HEGG, Editor, Box 314, Kenilworth, N. J.

EDITORIAL COLUMN

We feel that tonight should be a night for reflection on the part of our citizens. Some twenty-five or thirty citizens were deprived of their privilege of voting due to the fact that the polls had been closed even though they were not closed. It is a pity that we should have had a night of reflection on the part of our citizens. We do not want to make the record of our citizens. We do not want to make the record of our citizens. We do not want to make the record of our citizens.

It was clearly stated at the school board meeting that the polls should be closed at 8 o'clock. It was clearly stated at the school board meeting that the polls should be closed at 8 o'clock. It was clearly stated at the school board meeting that the polls should be closed at 8 o'clock.

George Dorsey spent the week end with friends in Kenilworth, and as always spent the usual amount of good cheer amongst them. As a Kenilworthite Mr. Dorsey has always shown a genuine liberal spirit in the furtherance of any good cause, and we hope Mr. Dorsey will soon find it convenient to spend some of his time here. We need citizens that take a real genuine interest in the community.

Darden Thomas of Elizabeth and C. A. Grant spent Sunday evening with Mr. and Mrs. H. K. Heger, Chief of Police A. Vardala after a protracted illness is now back on his feet again. Our chief attempted to restore his duties too soon and suffered a relapse, which kept him confined indoors for another ten days. We are glad to see him back on the job again.

Kenilworth is gradually getting on the map in the basketball field, and considering this is our first year at the game, we certainly have cause to feel proud of our school boys and girls. Every year we have a number of the games have been a walkaway for the opponents. And Mrs. Hapley has won several as well as Mrs. McCarty. Consequently we cannot help but feel that a gross injustice was thrust upon thirty or more citizens of the Borough at the last school election when they were denied the privilege of casting their ballot. The result of the election would have been the same, there is no doubt about that. But it might happen at some future time that a few more votes would change the election. We hope this lesson will make each and every citizen write his representative at Trenton to have the school election law amended so that the polls shall open at a definite hour as well as close at a definite hour, or have it read "the polls shall remain open 2 hours, etc." instead of one. Because it is absurd to think that 68 voters can be accommodated in one building in one hour.

DISTRICT COURT
James McGeeva of 12th street, was awarded a \$100.00 verdict in the District Court at Elizabeth, this week. Mr. McGeeva sued Paul E. Glanzer of Elizabeth, for damages done to his machine when three automobiles collided on Chrysler street and West street, Elizabeth, on the 31st of August last. Englisher's machine struck another with such force that the second auto was hurled on McGeeva's machine, damaging the same considerably. Mr. Glanzer resides at 62 Orchard street, Elizabeth.

COURT NOTES
Helen Jones, Gabriel Renz, John Hegg and Joseph Miller were arrested by Officer Hegg and Special Marshal E. L. Johnson for disorderly conduct. Gabriel Renz was also arrested for interfering with an officer. All were arraigned before Mayor Kosnutz. The defendants were represented by Carroll Conolly of Elizabeth. They were arraigned and suspended sentence.

First Steel Pens Costly
When steel pens first appeared in England, in 1803, they were sold for \$2 to \$3 each. In the course of ten years, so great was the production and competition, that the price dropped to 12 cents.

JUST NEWS

The Country Club will hold its regular monthly meeting at the home of Mayor and Mrs. C. A. Kosnutz on Friday evening, February 20, 1925. The date has been changed so as not to interfere with the Firemen's celebration on Thursday evening. Members of the club are all urged to be present on Friday evening at the home of Mayor Kosnutz on the home.

Judge Grippo is dividing his time with Kenilworth and Trenton and up to the minute news on the legislative program for the State can be had by Kenilworthites at any time they desire the same. If you want anything brought before your representative at Trenton, Mr. Grippo will more than willingly take the matter up for you.

Harvard Anthony is doing a rushing business on road. It seems and we are glad to know that Kenilworthites are prospering. An era of prosperity for Kenilworth is approaching and there is nothing like being on the ground floor.

George Dorsey spent the week end with friends in Kenilworth, and as always spent the usual amount of good cheer amongst them. As a Kenilworthite Mr. Dorsey has always shown a genuine liberal spirit in the furtherance of any good cause, and we hope Mr. Dorsey will soon find it convenient to spend some of his time here. We need citizens that take a real genuine interest in the community.

BASKETBALL
Kenilworth is gradually getting on the map in the basketball field, and considering this is our first year at the game, we certainly have cause to feel proud of our school boys and girls. COUNCIL NOTES

The regular adjourned meeting of the Mayor and Council was held Thursday evening. His Honor the Mayor, C. A. Kosnutz, presiding. The auditor's report was presented and read and the same approved by the Finance Committee, as well as the entire Council.

The Mayor then appointed John E. Butler to fill the unexpired term of the Collector's office, which appointment was unanimously concurred in.

A petition for the laying of sidewalks was introduced and the necessary ordinance passed. The sidewalk to be laid from Newark avenue to 6th avenue on the west side of Michigan avenue.

The Finance Committee was authorized to furnish a Ford one-ton dump truck, the same to be used for garbage removal. One additional light was ordered placed on Fairfield and Michigan avenues.

WOMAN'S REPUBLICAN CLUB
The Republican Club met at the home of Mr. and Mrs. Alexander Zelenik last Thursday and a very enjoyable evening was spent by all present. Mrs. Zelenik as usual proved a jovial hostess and soon had the entire Club in high spirits.

DIED
Mrs. Mary Hurden, a resident of Kenilworth for number of years, died Tuesday afternoon at the St. Elizabeth Hospital, after a long illness. Mrs. Hurden had been at the home of her daughter, Mrs. H. E. W. DeLar, and Mrs. Winchester, all from Kenilworth, attended the tea-luncheon in honor of Mrs. Hurden at the home of the Mrs. H. E. W. DeLar, 45 South 21st street, Kenilworth.

NEWS
Mrs. Fred Frost, Mrs. E. W. DeLar, and Mrs. Winchester, all from Kenilworth, attended the tea-luncheon in honor of Mrs. Hurden at the home of the Mrs. H. E. W. DeLar, 45 South 21st street, Kenilworth.

Overcome Disappointment
When sours by disappointment we must endeavor to pursue some fixed and pleasing course of study, that there may be blank leaf in our book of life.—Keechance.

BOROUGH OF KENILWORTH, NEW JERSEY REPORT ON AUDIT DECEMBER 31ST, 1924

January 27th, 1925.

The Honorable, The Mayor and Council, Borough of Kenilworth, New Jersey.

Sirs: Audit of the books and accounts of the Borough of Kenilworth, N. J., has been completed for the year 1924. The results thereof are presented in the following certified Exhibits and accompanying Schedules:

EXHIBITS
"A" Balance Sheets January 1st and December 31st
"B" Revenue
"C" Expenditures
"D" Unexpended Balances and Surplus Revenue
"E" Collector-Treasurer's Receipts and Disbursements

SCHEDULES
"1" Taxes
"2" Tax Title Liens
"3" Franchise and Gross Receipts Taxes
"4" Indebtedness
"5" Assessments
"6" Improvements
"7" Sundry Changes
"8" Bank Reconciliation
SUPPLEMENTAL SCHEDULES (Submitted Separately)
"9" Taxes Uncollected
"10" Taxes Added, Remitted and Overcollected
"11" Assessments Uncollected

PROCEDURE:
The financial condition of the municipality at the beginning and the end of the year is set forth in Exhibit "A" and all transactions during the year is presented in other Exhibits and Schedules. Certain changes were found necessary in the January 1st Balance Sheet as presented in the Report of Audit for 1923 presented by your former Auditor.

The balances from the former report are shown in Exhibit "A" as well as the amended balances and the changes are shown in the Surplus Revenue Adjustment Schedule "D". The Cash in Bank was verified by statements of the depositories, duly reconciled.

The amount of all taxes outstanding at the beginning of the year was established and the current duplicate was added and proved. In the 1924 duplicate, page 7, line 3, the tax of Ed. Lora B. McIntyre has been carried "paid", but the item does appear in the cashbook. The item has been carried as uncollected and the collector has communicated with the McIntyre to ascertain whether the tax was paid or not. He has stated that his recollection is that he stamped this item in error but if he finds that it was paid he will pay the Borough with interest.

All remissions, exemptions, deductions, etc., have been checked to the proper authorities.

The Tax Title Liens were established by comparison with the certificates of sale duly recorded, except those of the sale held December 27th, 1924. Miscellaneous taxes have been added.

All revenues accruing were established and verified by the original record and all receipts traced to the Treasurer's accounts.

The Surplus Revenue Account is properly kept. General books of account are kept by the Treasurer as follows: Cash Book, Journal, and Ledger.

The proper divisions of accounts, i. e., Current, Trust and Capital have been established. None were confirmed during the year 1924.

All notes and other evidences of indebtedness have been issued in compliance with the statutes.

The Surplus Revenue Account is properly kept. General books of account are kept by the Treasurer as follows: Cash Book, Journal, and Ledger.

The proper divisions of accounts, i. e., Current, Trust and Capital have been established. None were confirmed during the year 1924.

All notes and other evidences of indebtedness have been issued in compliance with the statutes.

The Surplus Revenue Account is properly kept. General books of account are kept by the Treasurer as follows: Cash Book, Journal, and Ledger.

The proper divisions of accounts, i. e., Current, Trust and Capital have been established. None were confirmed during the year 1924.

All notes and other evidences of indebtedness have been issued in compliance with the statutes.

WE CERTIFY that the foregoing is true and correct as presented and represents the facts disclosed by the books and accounts at December 31st, 1924.

Ingenuity Displayed by Spider Repairing Web

On the porch of a mountain cottage in Pennsylvania, a tiny spider was seen to repair her web in a very interesting manner. The web, except for the threads that spread radially from the center, was torn and weak.

Labor That Calls for Much Physical Effort

A well-known writer once said that oyster dredging on the American coast was the hardest work in the world. The two dredges were wound in by hand, and that everlasting windlass, hand on a swiveling deck, was worked by hand.

Sight of Cats and Owls

The belief that cats and owls can see in the dark is a popular fallacy. The iris of a cat's eye is capable of great variation, so as to admit more or less light, thus enabling the cat to see much better in the dark than can humans.

Do Good Work in World

Those to whom a commonplace appears to be extraordinary are rare, but they are precious, since they are the ones who have built up our world. They are the creators of human intelligence.

Storm Clouds' Visibility

The weather bureau says that the distance at which storm clouds are visible to the naked eye varies greatly with one's position and the kind of clouds. If a person is in an open flat country and the clouds are of the broad stratus or layer type, he may not see them more than 20 or 40 miles away.

Australians Know Snow

Snow falls in southeastern Australia during the winter months, and occasionally lies on the ground as far north as Melbourne and Sydney. On the mountains and in northeastern Victoria and southern New South Wales, the snowfall is very heavy.

Another Good Way

"That's a fine car. How did you get it?" "Out of a prize competition." "Did you win it?" "No, I organized it."—London Evening News.

Widespread Belief in Horseshoe as Talisman

The horseshoe is one of the very oldest talismans for good fortune that exists. The belief in its efficacy is held almost all over the world and has been present since the earliest history of the human race.

Wilds Well Aware of Failing of Humanity

Among other amusing stories in his "Mysteries and Adventures" Arthur Conan Doyle relates this characteristic story told him by Oscar Wilde. "We were discussing the cynical maxim that the good fortune of our friends made us discontented."

Must Not Be Separated

Parodying the great chemist, learned a lesson in boyhood by a very childish experience. As a little lad, humbly earning his bread selling newspapers in the streets, he was waiting outside the office of an Edinburgh publisher for the morning paper, and thrust his head and arms through the callings of the iron gate.

Franking Privilege

The privilege of sending and receiving mail free of postage was once enjoyed by the President of the United States, also presidents, judges or department heads, senators and representatives, and other officials of the government during their official term.

Alone in His Progress

"Tell me," said the interviewer at the bedside of the aviator who had fallen three thousand feet and hit the earth, "what was your dominating thought as you fell through all that space?"

Making His Peace

Huber, who had been set to bed for being naughty, could not get to sleep. At 10 o'clock he crept downstairs and said to his startled mother: "Didn't you say I was not to go to sleep until I had made my peace with my enemies, mamma?" "Yes, dear," was the reply. "Well, I've come down to forgive you and God."

Cash Prize Puzzle

Crossword puzzle grid with numbered squares for letters. The grid is 15x15 with various black squares indicating non-letter positions.

This puzzle is made up of some of the Chevrolet 83 quality features listed on each side of the puzzle and contains many regular cross word puzzle words. It is a real test of your ability at working cross word puzzles.

Credit on New Chevrolet or 6% Chevrolet Purchase Certificate. First Prize \$30, Second Prize 20, Third Prize 10.

CONTEST CLOSES MIDNIGHT, FEBRUARY 28th. Send all answers to Harry Hummer, 32 North Avenue, West, Cranford, N. J.

Vertical and Horizontal word lists for the puzzle. Includes words like 'Motor', 'Cooling', 'Ignition', 'Transmission', 'Universal Joint', 'Rear Axle', 'Brakes', 'Chassis', 'Bodies', 'Equipment', 'Open Models', 'Closed Models'.

Watching His Step

A young man of nervous appearance, wearing a certain determined air, walked late in the evening down a quiet street, his hands in his pockets, his eyes fixed on the ground. He was about to take the final step, when one of the well appointed officers of the law stepped into his path. "Mr. Gerald K. Stevens?" "Yes." "Is he in?" "Yes; would you like to see him?" "No-no! No, thank you! But could you tell me how long he will be here?" "Why, he should be here at least three hours. But he can see you perfectly well right now."

Didn't See It

Recently I asked a man, who has arrived from Europe on one of the frigate boats that are now used as ferries, whether there were any rough days. "I haven't the slightest idea," said he; "I never saw the sea from port to port." It appeared that he was on one of the enclosed decks some 80 feet above the water. There is an appalling contrast between the artificiality of the modern floating palace and an element so primitive as the ocean; it is like a dining car passing through infinite miles of sagebrush.—Scribner's Magazine.

Emerson

If this emotional nature lacked warmth, what eminently it possessed was an exquisite refinement, and a courtesy of his refinement was an instinctive antipathy to ideas of dominance, dictation, patronage, caste and material superiority whose essential grossness repelled him and whose ultimate origin in contemptuousness—probably, the one moral state except cravenness that chiefly he detested—was plain enough to his penetration.—W. C. Brownell, in "American Prose Masters."

Bathroom Innovations

The first built-in china bathroom accessory was a soap holder which originally appeared on the market in 1924.

YOU ARE NOT SOUND

To keep any Gabriel Saubbers bought here which find unattractive and either exchange it for something else or get your money back. We sell satisfaction with our Gabriel Saubbers or we do not consider it a sale. Trade with us on that basis. You need saubbers to take the jounce and the wear and riding comfort too.

English Cathedral Go Far Back in History

The great cathedrals of England in many instances replace former edifices that were erected by the early Christians who formed part of the ancient British church, and which were later destroyed by fire or otherwise, a writer in the Montreal Family Magazine relates. For instance, Canterbury cathedral was first built in 602, on the site of an old church dating from very early ages. It was destroyed by fire in 1077, and Archbishop Lanfranc, on taking office in 1070, undertook the rebuilding of an entirely new church. This lasted until about 1150, when under Anselm, Lanfranc's successor, Erolf rebuilt the eastern part. A fire destroyed most of the portion of the building erected in 1150, and the year William of Sens took up the work of rebuilding severe injury by falling from a scaffold, another William, commonly distinguished as "the Englishman," carried on the work and completed it in 1164. Many alterations and changes have been made during the ensuing centuries. I might mention that as early as 695, Theodore of Tarsus, of the city of St. Paul, was elected archbishop of Canterbury, not appointed king of Kent according to his election. He was the first archbishop to receive the allegiance of the whole of the English church.

Resin and Turpentine Put to Various Uses

Resin and turpentine have been produced on this continent since 1602. These commodities were gathered and exported by the early colonists. While they were originally used for caulking wooden vessels and protecting rope rigging, they gained their name of "naval stores," chemistry has developed many uses for resin and turpentine, making them indispensable in a large number of important industries, says the Montreal Star.

Sea Cucumber a Fish

The sea cucumber is really a living creature and not a vegetable. Its other names are the trepan or holothurian. The body of this strange dweller in the sea is composed of a muscular tissue covered with warts or spines, and which generally resemble in shape their vegetable namesake, says the Boston Globe.

Couldn't Be Fooled

When Bobbie was six he was given a real watch, which, regardless of quality or accuracy, had a delightfully loud tick. Naturally, the little fellow was inordinately proud and would strut up along and down Wilshire boulevard, stopping every moment or two to draw the timepiece from his pocket and regard it gravely.

Wanted, His Share

He was a little, unheroic, inoffensive-looking person. He had managed to get on the Broadway express at Times square by the simple expedient of holding his breath and allowing himself to be jammed into the train by the blue-coated guard. His found himself in a pocket formed by four men surrounding him. His chin reached up to about their knees. The atmosphere—what there was of it—was stifling. He managed to stand it for about two minutes. Then he twisted his neck up to the man in front of him and said: "Pardon me, sir, but would you mind holding your breath for a moment? I would like to get a mouthful for myself."—Mercury.

The Reason

"Do you remember, dear?" said Mrs. Blank, "that before we were married you always offered me your left arm?" "Yes," replied her husband; "I wanted to have my right hand free. You see, I had a lover's fear that someone would try to take you away from me, and I always kept it in readiness for defence."

Crab Found in Book

In the matter of odd bookmarks between the pages of a returned volume, one librarian claimed the blue ribbon by citing a slice of raw bacon which was brought to America at least 100 years ago and there are many noted specimens in cities and towns of the eastern states. The Himalayan horchestrut and the species of central China are not hardy here, and the Arboretum has not succeeded in obtaining seeds of the north China species, Aesculus chinensis, which will probably flourish in this latitude.

Had to Keep It

Mother—Where did you get that nickel? Willie—You gave it to me for the heathen. Mother—Then why did you keep it? Willie—Well, teacher said I was a heathen.—Montreal Gazette.

Comparison of French and English Housewives

It is said that the French working woman's only thoughts concern food and money. She certainly manipulates the former with great skill and as is well known, her savings are the backbone of her country. Whenever a fresh loan is floated in France long queues of housewives are always waiting outside the banks with their money.

Location of Famous London Well Unknown

Even before the Norman conquest the holy well of St. Clement, London, used to be the scene of many pilgrimages, and the continued until the Reformation. It used to be the favorite resting place for ladies and ladies on summer evenings, in the time when the Strand of London was a country thoroughfare as it is today. The site of the old well is believed to be somewhere between the fair courts in the Strand and St. Clement's Inn.

Lifting Power of Love

Love lifts up the lowliest to the highest, places the lowly born by the side of the brightest and noblest. It binds us to earth; and when our love is heaven, who shall tell its glories and its victories? Without it a life passed is like a year gone by without any summer—cold, chilly, unfruitful, without pleasure or charm. With it the worst state is endurable. The pain is but a stable or an outhouse without it—very prison; the very-prison when the loved one shares it is a palace. Such is the particular love. When this muggy venture of decay which inclines it to grows into general love for our fellows and love of adoration for our Maker we shall not be far off paradise for indeed heaven's harmony is universal.—Hals Friswell.

Law's Bad Effect At the beginning of the Christian era an equal liberty in regard to divorce was established—for women. Theselin's orgy of matrimony was thus made possible.

Uses for Precious Metal About one-fourth of the annual production of gold is used for money. The remaining three-fourths being consumed in dentistry, in the arts, such as jewelry, gilding and gold leaf work and the making up of the annual loss from various causes.

MARY, MOTHER of WASHINGTON

FRANCIS BURNING

By JOHN DICKINSON BHERMAN

EDMUND WASHINGTON is known to have said that his mother was the most beautiful woman he ever saw.

It is very good of you to get the presumed portrait of my mother's name Middleton, who formerly held a commission in the British service.

Washington, it is evident, was torn to part with the portrait, even temporarily. Presumably, also, he had little confidence in Charles Carter's ability to have it restored.

When James Sharples, the English painter, went to Mount Vernon to make portraits of Washington and his wife, it was a different story.

Why this portrait of Washington's mother never got back to America is one of the unanswered questions of history.

Americans Secure Manganese Supply

Washington.—From Paris it is announced that a United States firm has won the concession for the Teblatur manganese mines, biggest in the world.

There is a very intimate connection between Teblatur, deep in an arid ravine under the Caucasus snow peaks, and the cutting edge of the daily "razor."

Also are steel, steel in iron, but steel also is carbon and silicon and sulphur and phosphorus and manganese or aluminum are alloy just as bronze and Pittsburg can get iron from Minnesota and most of the "seasoning" for their steel in the United States, but they must go abroad for much of their manganese.

Georgia, the United States commonwealth, but the Soviet republic which is the Soviet Union, lies along the southern slopes of the Caucasus mountains which cut off from Russia like the Pyrenees cut off Spain from France.

Before the day arrives for the resumption of the Washington portrait, it is to be noted that the Washington portrait is in the hands of a professional artist.

POULTRY FACTS

PRODUCE MORE EGGS IN WINTER SEASON

The Badger state's winter production can be increased very noticeably by carrying out certain easily followed plans, says O. Johnson, superintendent of the Wisconsin College of Agriculture poultry flocks.

"We have discovered," says Johnson, "that pullets must be separated from the old hens to get the best possible egg production. If this policy is not carried out, the older hens will keep the pullets from their feed and boss them around so that they do not have a chance to get full development."

By letting the pullets run with the older fowls, there is also a great danger of spreading disease. This, too, is fatal to egg production. An underdeveloped pullet or one that is backward in her development should be sold, continues the poultryman. These pullets, as well as cockerets that are not fit for spring's breeding, should not be kept for the winter season.

"Skin milk is one of the greatest aids in egg production," and it should be used to the limit," says Johnson, "and each pullet should never be withheld plenty of milk, either sour or sweet." Washing the dish thoroughly each time before feeding is a precaution so as to guard from disease.

When hens have all the milk they can drink, very little water is needed, he says. In fact, it is best, advises the poultryman, that pullets do not have water if they have all the milk they can drink. The milk will furnish them with water and at the same time the proteins and minerals the pullets need.

Whole cabbages hung up in the scratching pens will furnish fine green feed, but other greenstuffs also serve their purpose. Many poultrymen make the mistake of throwing away large amounts of green stuff on the floor where it gets moldy and dirty.

For the mash, which the pullets should have access to at all times, equal parts of bran middlings, yellow cornmeal, and feed wheat are the best. The mash has given the best results. If the chickens have all the milk they can drink, the meat scraps and tankage can be cut to one-half part.

Chicago School Has Mouth Organ

Students may scoff at that common juvenile instrument, the mouth organ, but the Nison school, not only has the revival of interest in the harmonica in the pupils, but it has freshened them in many respects, even as to cleanliness.

More Building Now Is Done in Winter

Better Stabilizing of Inflation Is Result

New York.—Constructors say mid-winter building has become a conquered peak. First started successfully after years of effort in the winter of 1922, they report that during the present winter they will go 1923 enough better to make the conquest permanent.

The business world, watching the climber from below, already sees the effect in an early easing of seasonal trade in the building industry. In relieving the housing shortage and in a better stabilizing of the building industry as a whole by distributing the old back-breaking seasonal loads over a full 12-month period.

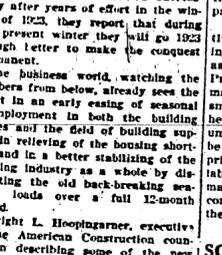

Dwight L. Hoopinger, executive of the American Construction Council, in describing some of the new aspects of winter construction, says: "This greater stabilization has been secured by relatively simple methods."

Lesson From Experience. Experience has shown that work on large buildings, whether of masonry or concrete construction, can be conducted with safety in temperatures down to 20 or 25 degrees above zero.

After that salamanders to produce heat, tarpaulins to keep it and materials where they are needed, have solved the problem of keeping winter operations to go ahead in many greater economies. Records of contractors over periods of years have shown an average of about fourteen days with scarcely over thirty-one days maximum in any one year in the precautions of winter building being taken.

Sweden's Newest Canal Opened

The new, Soderfjorden canal in Sweden has just been opened with much ceremony. The illustration shows a steamer passing through the road bridge of the waterway.

SOLVE SECRET OF "GENTLEMAN BUM"

Brothers Trace History of Cultured Beach Comber

Day Shore, N. Y.—Photographs of the "Gentleman Beach Comber" committed suicide in his but on Fire Island, were identified by relatives as those of Andrew Sherman McMillen, a contractor and former lawyer, who disappeared from Bridgeville, Pa., seven years ago.

Identify was established by McMillen's brothers, Charles E. and George H. McMillen of Bridgeville, and George H. Baird, Pittsburgh banker.

McMillen's brothers examined letters, trinkets and friends of "Old Mac," as the man was known, until they found a photograph of him taken only a month ago. It was the picture of a bent and broken old man, with a snowing beard and white hair.

McMillen once was an attorney in Bridgeville. They had become a contractor and constructed many bridges in suburbs of Pittsburgh. He was a Mason and an Elk.

Seven years ago he was divorced and shortly thereafter disappeared. About five years ago "Old Mac" moved into a hut on Fire Island. It was learned, however, that he had been in season and acquired scores of friends among wealthy summer residents.

Ration Recommended for Making of Winter Eggs

The following ration for winter egg production recommended by the Missouri College of Agriculture, satisfies the needs of the hens and is economical and efficient. During the past year it has been found that a number of farms with good results, a number of grain—ten pounds of shelled corn and five pounds of dry threshed oats. Dry mash—three pounds of wheat bran, three pounds of wheat shorts and oat and one-half pounds commercial meal.

Where milk is plentiful three gallons of skim milk or buttermilk furnished each 100 hens daily will insure a place of meat scrap. Either milk or skim milk of lean meat must be supplied in every ration for successful winter egg production. Commercial meat scrap can be obtained from most feed dealers in 100-pound sacks. One sack will supply protein needed by 100 hens for more than two months.

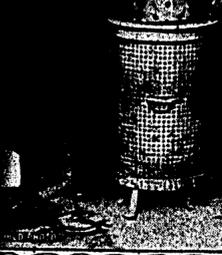

Barley feed wheat may be used instead of oats. Corn meal or ground oats may be substituted for shorts in the mash. Alfalfa meal or clover leaves may take the place of the bran. A good grade of tankage may be used instead of the meat scrap. In feeding this ration all the feed should be fed in deep straw to compel the birds to exercise. The mash should be fed in self-feeding hoppers or troughs and a supply kept before the birds. In addition to this ration, hens should have an abundance of water, a supply of green food and free access to sharp grit and crushed oyster shells or soft limestone grit. With early hatched pullets, housed comfortably, and fed this ration, winter eggs are assured.

Plan of Line Breeding. Line breeding can be done by using the same ancestry or blood lines with careful selection that avoids the bad effects of inbreeding. The shade of difference between line-breeding and inbreeding is sometimes very slight. Breeding the pullets of a mating back to the sire, and one of the cockerels back to the hen, is a strict line breeding, which is often practiced to establish certain qualities in a strain.

One Nest for Six Fowls. One nest should be provided for five or six fowls, and even more if trap nests are used. Twelve by twelve inches is large enough and one-fourth inch mesh hardware cloth is excellent for the bottom. Wall nests are to be preferred to those located under the dropping platform, but the wall nests require a top place at an angle of at least 45 degrees, to prevent the chickens roosting on them. The runways along the sides of the nests can also be made to fold up.

Centenarian Likes Them Hard

They don't come too hard for Ambrose Hines of Washington, D. C., who just celebrated his one hundredth birthday. "Bring on the hard ones," says Mr. Hines, "I've got all the dictation, time and pencils necessary. And he solves 'em, too."

They don't come too hard for Ambrose Hines of Washington, D. C., who just celebrated his one hundredth birthday. "Bring on the hard ones," says Mr. Hines, "I've got all the dictation, time and pencils necessary. And he solves 'em, too."

POULTRY FACTS

PRODUCE MORE EGGS IN WINTER SEASON

"The Budget state's winter egg production can be increased very materially by carrying out the plan," says O. Johnson, superintendent of the Wisconsin College of Agriculture poultry school.

"We have discovered," says Johnson, "that pullets must be separated from the old hens to get the best possible egg production. If this policy is carried out, the older hens can be kept from their feed as they do not have a chance to get full development."

By letting the pullets run with the older fowls, there is also a great danger of spreading diseases. This is fatal to egg production. An underdeveloped pullet or one that is backward in her development should be culled, continues the poultryman. "There are, as well as cockerels that are to be kept for spring's breeding, not as a rule pay their board."

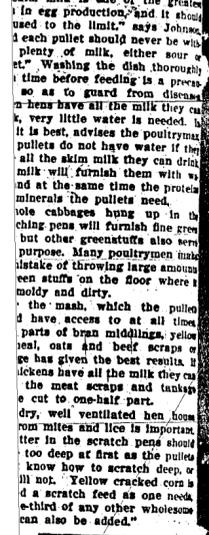

Skim milk is one of the greatest in egg production and it should be used to the limit," says Johnson. "Each pullet should never be without plenty of milk, either sour or sweet. Washing the dish thoroughly before feeding is a precaution to guard from disease. If hens have all the milk they can eat, very little water is needed. It is best, advises the poultryman, pullets do not have water if they all the skim milk they can drink. Milk will furnish them with vitamins and at the same time the proteins minerals the pullets need.

Note cabbages hung up in the ching pens will furnish fine green but other greenstuffs also serve purpose. Many poultrymen make mistake of throwing large amounts of green stuff on the floor where it molds and dirty.

The mash, which the pullets have access to at all times, should have bran middlings, yellow meal, oat and beef scraps or any of the best results. Chickens have all the milk they can eat the meat scraps and (unless cut to one-half part.

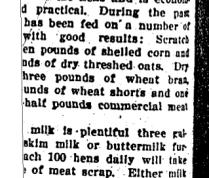

Dry, well ventilated hen houses from mites and lice is important. In the scratch pens should be too deep at first as the pullets know how to scratch deep, it will not. Yellow cracked corn is a scratch feed as one needs a third of any other wholesome can also be added."

Chicago School Has Mouth Organ Orchestra

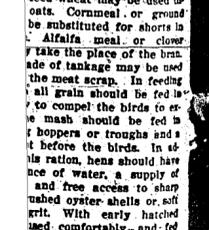

Children may scoff at that common juvenile instrument, the mouth organ, but it has come into its own at the public school, Chicago. The "mouth organ orchestra" of the school numbers 200. According to Miss O. Jacobs, principal of the Nison school, not only has the revival of interest in the harmonica cultivated an appreciation of good music in the pupils, but it has freshened them in many respects, even as to cleanliness and tidiness.

His American Patrons Liked This

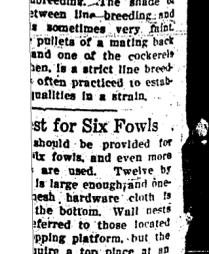

Miss Ethel Comstock of Chicago is a quiet little woman who, sitting in her own little office with her own little business and plucked a fortune out of the wheat pit. She is credited with having "cleaned up" between \$20,000 and \$50,000 in the sensational rise of wheat. Miss Comstock said: "In August I took \$150 out of the bank and bought. I made money and put back the \$150. I worked with my profits. I bought, waited till I had made 15 cents profit; then sold. I never expected to buy at the bottom or sell at the top."

Centenarian Likes Them Hard

They don't come too hard for Amrose Hines of Washington, D. C., who just celebrated his one hundredth birthday. "Bring on the hard ones," says Mr. Hines. "I've got all the dictionaries, time and pencils necessary. And he solves 'em, too."

Car for African Research Tour

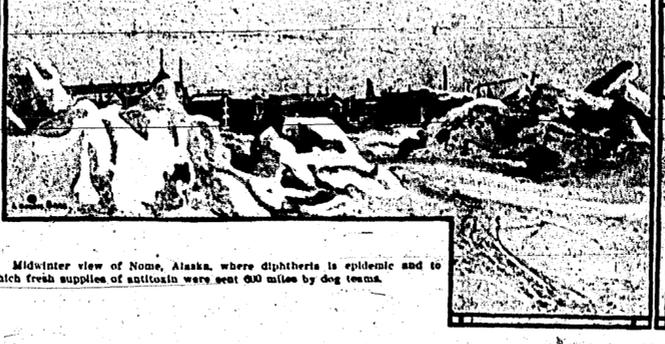

Kamal el Din Hussein of Egypt, noted scientist, has set out on a tour in Egypt accompanied by a van of motor tractors which carry the new type of motor tractors, was taken at the start of the expedition. The tanks contain gasoline for the caravan.

Detroit Looks After Her Pedestrians Well

Here is the first covered, illuminated and enclosed safety zone for pedestrians in the world, and it is the new safety idea in the city of Detroit. It is one block long, on the east side of Woodward avenue, extending from Cadillac square to Gratiot avenue. Construction was hurried by special orders from Mayor John W. Smith.

Winter View of Nome Where Diphtheria Rages

Midwinter view of Nome, Alaska, where diphtheria is epidemic and to which fresh supplies of antitoxin were sent 600 miles by dog teams.

IN HER DEAUVILLE SUIT

Miss Liette Jernase, pretty Parisienne who won a French scholarship and recently was graduated from Vassar, appears at Miami beach in the bathing suit she brought from Deauville.

Ready to Meet the Bank Bandit

Out in Los Angeles the banks have protected themselves against robbers by building on top of the vaults armor-plate boxes in which riflemen are constantly on guard. One of these marksmen is here shown behind his shield.

WELL-BALANCED KID

"The world's youngest equilibriumist," so it is claimed, is little Miss Lewis Feist, Metairie of Chicago. Twenty-months-old daughter of Y. E. Metzler, coach and associate physical director of the Central Y. M. C. A. This tiny miss performs breath-taking stunts that would upset the poise of such older persons, but is very calm about it all.

HOLDS SERVICE RECORD

Joseph Kraganow, upholsterer employed in the Union Pacific railroad shops, Omaha, Neb., has the longest service record of any railroad employee in the United States—56 years, 5 months. He was one of 15 veteran employees given a dinner by President Carl R. Gray of the Union Pacific in Omaha recently, that was attended by prominent railroad men from all parts of the country.

HAS UNIQUE JOB

John Joseph Hahn is a first-class cook, not only literally but that is his title in the United States navy. Besides that, he is an aviator or something approaching that, because he is a cook on an airship. He is the only flying ship's cook in the navy and is stationed aboard the dirigible Los Angeles.

Famous Forts in U. S. History

By ELMO SCOTT WATSON

"Remember the Alamo!"

What Bunkerburg is to Kentucky, the Alamo is to Texas and both are more than the most famous forts in their respective states. They are monuments to the memory of two great American frontier heroes—Daniel Boone and Davy Crockett—they are national shrines.

The Mission of San Antonio de Valero, commonly called the Mission del Alamo (Alamo being the Spanish word for cottonwood tree) was founded by the Franciscans in 1705 and after various renovations was established in its present location in 1722. Soon after the outbreak of the Texas War of Independence in 1835 the Alamo was seized by the Texans.

Its commander early the next year was Lieut. Col. William Barrett Travis, a young Virginia lawyer. Associated with him was Col. James Bowie of Georgia and of Bowie knife fame. They had only about 140 men but in February there came a welcome reinforcement in the person of Davy Crockett, accompanied by some of his neighbors from Tennessee.

On February 23, 1836, Santa Ana, the dictator of Mexico, appeared before the fort and demanded its surrender. Travis answered with a shot from his cannon and a defiant hoisting of his flag. The Mexican leader had more than 4,000 men but he did not care to risk an assault so erected batteries and opened fire.

For eleven days the siege was continued with heavy losses for the Mexicans but without a single casualty among the defenders. In the meantime Travis' appeals for help brought to the Alamo Col. James Butler Bonham, who slipped through the lines of the besiegers, and a detachment of 22 men, led by Capt. J. W. Smith, which cut its way through.

Finally on March 6 Santa Ana ordered a grand assault by a picked force of 2,000 men. Two attacks were beaten back by the desperate Texans but the garrison, weakened by the long night and lack of food, could not back the third attempt. The Mexicans swarmed over the walls and for the next few minutes there followed one of the most desperate hand-to-hand encounters ever fought on the American continent. When it ended only five of the 190 defenders were left alive and they were wounded, helpless prisoners. By command of Santa Ana they were killed at once.

But the sacrifice of Davy Crockett and his fellow heroes was not in vain, for the battle cry which swept the field at the decisive battle of San Jacinto, was "Remember the Alamo!" On a monument in the state capitol at Austin commemorating their deeds is this line: "Thermopylae had its monument of defeat. The Alamo had none."

"Old Shotto's Bloody Rancho."

"Oh, we don't mind the marching, Nor the fighting do we fear; But we'll never forget old Barney For bringing us to Pierre. They say old Shotto built it, But we know it isn't so— For the man who built this bloody rancho Is reigning down below!"

So sang the veterans of Gen. W. B. Harney's Sioux expedition who spent the winter of 1856-57 there, and this "bloody rancho" which they were securing, was Fort Pierre, South Dakota's most famous fort. An army legend asserts that it was founded by Peter the Hermit, survivor of the first crusade, who selected this place near the Bad Lands because of its insuperable dreariness and desolation.

More authentic history informs us, however, that it was built on the west bank of the Missouri about three miles above the mouth of the Teton river by Pierre Chouteau, Jr. (of the famous St. Louis Chouteaus), in 1820, and was occupied as a post of the American Fur company in 1822. From that time until 1856 it was the most important post of the A. P. C. in the upper-Missouri country and was the center of the vast trade in buffalo robes with the Sioux.

In 1856 the United States bought Fort Pierre for a military post, but abandoned it the next year and moved all its property to Fort Randall, about 100 miles down the Missouri. But even after the old post was abandoned, its name remained as a landmark for everybody in that region who still spoke of it as though it still existed.

From the day in 1804, when Lewis and Clark held their council with the Teton Sioux on this spot, it was visited every year for the next half century by a succession of noted travelers and explorers. Among them were George Catlin, the Indian painter, Prince Maximilian of Wied and Dr. Nicollet, who was accompanied by Lieut. John G. Fremont, as yet unknown to fame as "The Pathfinder." The first religious services in South Dakota were held at Fort Pierre in 1840 by Dr. Stephen H. Riggs.

In 1858 a second or new Fort Pierre was built as a trading post about two miles above, the site of the old fort. Although it never became so important as the older fort, around it grew up the settlement which became the city of Pierre, South Dakota's capital.

Thinks He Can Predetermine Sex

Here is shown Julius Huxley, noted British scientist, at work in his laboratory at the museum, Oxford, where he is engaged in tests intended to prove, theoretically, that it is possible to predetermine sex. Mr. Huxley, who is a grandson of Prof. Thomas H. Huxley, prophesied that a method of sex predetermination would be completed within the next 50 years, but, as he says, the problem that will then face science is, what is to be done with the method.
