CRANFORD, N. J., THURSDAY, SEPTEMBER 6, 1934

FIVE CENTS

## Townpeople To Greet Dr. Morrisett Next Week

### Open Meetings Tuesday and Thursday Evenings Will Honor School Head.

Two public meetings for the purpose of introducing Dr. Lloyd N. Morrisett, new supervising principal of the Cranford Public Schools, to the townpeople, will be sponsored next week by the Board of Education, it was announced yesterday by Floyd B. Shannon, chairman of the board's publicity committee. The first meeting will be held Tuesday evening in Roosevelt School and the second on Thursday evening in Sherman School.

Tuesday evening's meeting, which will be opened with a selection by the High School Orchestra, under the direction of Jack A. van Brederode, supervisor of music, will start at eight o'clock. The Rev. E. W. Richards, pastor of the Christian Missionary Alliance Church, will offer invocation, followed by an address of welcome by Ray A. Clement, principal of the High School. Mrs. William Nagle, Jr., president of the High School Parent-Teacher Association will extend the greetings of that organization. Following a short program of music, a short program of the community singing under the direction of Mrs. van Brederode, Joseph A. Plummer, president of the board, will extend the welcome of that group and introduce the new supervising principal, who will give a short address. The Rev. James F. McDonald, pastor of St. Michael's Church, will pronounce the benediction, and the program will be concluded with a selection by the orchestra.

On Thursday evening, the meeting in Sherman School auditorium will also start at 8 p. m. The program will be as follows: Selection by the High School Orchestra, invocation by the Rev. Frank Magill Sherlock, rector of Trinity Episcopal Church, address of welcome by G. A. and Mrs. C. A. Marr, president of the Lincoln School Parent-Teacher Association; community singing, under the direction of Mr. van Brederode; address of welcome by Joseph A. Plummer, president of the Board of Education; address by Dr. Lloyd N. Morrisett, Tuesday night at 8 o'clock; meeting will be held in Roosevelt School to introduce and welcome the new supervising principal and a similar gathering will convene at Sherman School on Thursday evening at 8 o'clock.

Alumni Members Invited  
All members of the newly-formed Association of Cranford High School Alumni are invited by their president, Winchester Britton, Jr., to attend either of the special meetings sponsored by the Board of Education in honor of Dr. Lloyd N. Morrisett. Tuesday night at 8 o'clock a meeting will be held in Roosevelt School to introduce and welcome the new supervising principal and a similar gathering will convene at Sherman School on Thursday evening at 8 o'clock.

## Prizes Are Awarded At Casino Opening

The Cranford Casino attracted a large crowd on Tuesday afternoon and evening, the opening day of the fall season, according to William Austin, the manager.

Winners and prizes during the day were: Bowling, Gerald Austin, 209; Buck pins, R. Pielhau, 145; barrel pins, Raymond Lusardi, 101; pocket billiards, Martin Donnelly, Sr., with a run of thirteen balls.

Runners-up for the prizes were: Bowling, George Kurts, 202, and Charles Kramer, 138; barrel pins, Charles Hermann, 128; billiards, M. Sikora, a run of ten balls.

Manager Austin announces that a "pot of gold" will be awarded each Saturday night at the Casino.

## CARS ARE DAMAGED

Cars operated by Oscar Jackson, colored, of 247 Cranford avenue, and Jack Macht of 21-Dorchester Road, Rockville, were damaged at 7:20 o'clock Monday evening when they collided at the intersection of Elizabeth and north Union avenues. Jackson was en route west on Elizabeth avenue and Macht was driving north on north Union avenue. Neither driver was injured and there was no complaint. Sgt. William Fischer investigated.

## BAND HOLDS MEETING

A meeting of the Cranford Band was held last night at the home of Felix DiPablo, 117 Retford avenue. There are now nearly enough members to complete the band. Another meeting will be held Monday evening at 8 o'clock for rehearsal at the Republican Club rooms, and all musicians are requested to be present, bringing their instruments and music stands.

## W. J. Law Hurt When Car Hits Abutment

### Wallace J. Law, 34 years old, of a Berkeley Place, is in a serious condition in St. Elizabeth Hospital, Elizabeth, suffering from wounds sustained at 2 o'clock Tuesday morning when the car which he was driving ran into a cement abutment in the Bronx Parkway as he was returning to his home here from a twelve days' vacation at Saratoga Inn in the Adirondacks.

Fog and rain are believed to have obscured the vision of the local man so that he failed to see the abutment which marked the intersection of the main highway with a branch road. Mr. Law was taken to the Fordham Hospital where his injuries were dressed and he was removed by ambulance Tuesday afternoon to St. Elizabeth Hospital.

Eugene Farley of Maplewood, who had been employed at Saratoga Inn during the summer as a caddy, was returning with Mr. Law. He escaped with minor injuries. The car was completely wrecked.

Mr. Law conducts a printing and stationery business in Bayonne which was established by his father, the late William D. Law, several years ago.

## \$340 Taken From Safe In A. & P. Store Here

### Cash, Checks Stolen From Union Avenue Store Tuesday Night.

Approximately \$340 in cash and checks was taken from the safe of the Great Atlantic and Pacific Tea Company's store, 17 north Union avenue, sometime Tuesday night, according to a report to police at 7:45 o'clock Wednesday morning. The theft was discovered by Al Henkel, manager, when he opened the store for business Wednesday morning.

The money was taken from a safe located near the rear of the store in the grocery department. Inasmuch as the safe had not been tampered with, police and A. & P. company officials are working on the theory that the money was taken by someone who was familiar with the combination.

Supposition is that entrance to the store was gained through front cellar window. The cellar is divided into two compartments and the door between the two was slightly sprung, the investigation disclosed. A trap door leading from the cellar to the store was apparently not locked for there was no sign that any attempt had been made to force the door. It is believed that the thief or thieves made their getaway through a rear cellar door, which is locked from the inside with bars. This door was found partly ajar.

Mr. Henkel reported that all doors to the store were securely locked when he closed the store on Tuesday evening. No merchandise was reported stolen. Sergeant George Rosendale and Patrolman John Joseph McNeerney conducted the police investigation.

## LIIONS RESUME MEETINGS

The Cranford Lions Club will resume its regular weekly dinner meetings in Hayashi's Restaurant at 6:30 o'clock Friday evening, following the summer recess. President A. T. Baker will preside.

## RECOVERS STOLEN BIKE

Acting Sergeant George Rosendale and Patrolman Thomas Woods Tuesday recovered a bicycle stolen from the Railway-Pool by two Cranford boys. Names of the boys were withheld.

## RECOVERS STOLEN BIKE

Acting Sergeant George Rosendale and Patrolman Thomas Woods Tuesday recovered a bicycle stolen from the Railway-Pool by two Cranford boys. Names of the boys were withheld.

## 13 Drum, Bugle Corps To Be Here Sunday

### Fiake Post Unit to Sponsor Contest at Meadow Grove.

Nine senior and four junior drum and bugle corps have returned entry blanks to participate in the drum and bugle corps competition to be sponsored Sunday afternoon at Meadow Grove by Capt. Newell Rodney Fiake Post, No. 333, Drum and Bugle Corps, in connection with its picnic. Final plans for the event were completed last night at a meeting of the unit in Veterans Hall.

V. P. W. senior corps which will participate are from the following towns: Westfield, Somerville, Perth Arroy, Bloomfield, Jersey City, New Brunswick, Nutley, Kearny and Orange. Junior corps have been entered by the following V. P. W. posts: Roselle Park, Elizabeth, Weehawken and Cranford. Several more are expected to be entered before Sunday.

The visiting corps, headed by the Cranford unit, will parade from the corner of South and Walnut avenue to Meadow Grove, the line of march being as follows: North on Walnut to North avenue, east to Springfield, north to Union, south to North avenue, west to Eastman street, south to Pittsfield street, west on Orchard to the picnic grounds. William McMath, County V. P. W. commander, will be grand marshal of the parade.

Committees in charge of the affair, appointed by Chairman Charles Lanza, are as follows: Corps arrangements—Herman Dietrich, William McMath and Daniel Heyburn; grounds and parking—Robert Midgley, Mariano Green, Edward LaDale, Charles Cummings, Harold Oberg, Harold Lawrence, Walter Long, and John Roenke.

Main gate tickets—Douglas Ogilvie and Peter McKillop; refreshment tickets—John Winters; corps tickets—Robert Midgley; refreshment stands—James Cullen, Bernard Yanceh, Ben Smith, Frank Abbott and James Scott.

Grocery wheel—Gaston Crosby and Leon Scully; chance—Daniel Arnold and Phil Brydy; children's games—Thomas Albans, Joseph O'Connell and Howell Evans; ice cream—Mrs. William McMath; clam chowder—Mrs. Thomas Albans and Mrs. Daniel Heyburn; hamburgers—Thomas VanSickle.

Business men and townpeople have been requested to display flags on Saturday as a welcome to the visiting veterans. The corps will participate in the "Welcome Home" celebration Saturday evening, presenting a half hour concert before the start of the band concert.

On September 17, the unit will take part in the Harold Hoffman Day celebration at New Brunswick. Application has been filed with the County Legion Club to enter in competition with other units in the County contest at Warranoo Park September 30.

## Local Men to Attend Edinburgh University

Douglas Sloan, son of the Rev. William R. Sloan and Mrs. Sloan of 9 Springfield avenue, and F. Taylor Fraser, son of Mrs. Louise G. Fraser of 317 Casino avenue, will sail Saturday for Scotland where they will attend the University of Edinburgh this winter. Both young men will pursue an arts course.

Douglas, who was graduated from the Fishbourne Military Academy in Virginia, will sail on the S. S. Calcutta of the Cunard Line. While in Edinburgh, he will reside at the dormitory hall of the Church of Scotland.

F. Taylor, who is the P. T. A. scholarship at the High School, commenced his studies last spring. He was editor of the High School yearbook, a member of the National Honor Society and took an active part in many extra curricular activities.

## Democratic Club Resumes Activities

### Meets Tonight in New Quarters in Cranford Casino.

The Cranford Democratic Club will resume activities tonight in its new quarters in the Cranford Casino. The club had its headquarters at 16 north Union avenue from December, 1931, until recently.

The club will meet every Thursday night at 8:30 o'clock until election, according to Municipal Chairman William D'Arcy, to lay plans for the forthcoming campaign.

## Republicans Prime Election Machinery

### G. O. P. Club Directors Make Initial Plans for Fall Campaign.

The local Republican election machinery was organized and initial plans for the fall campaign were formulated at a meeting of the Board of Directors of the Cranford Republican Club Tuesday evening in headquarters. Financing of the forthcoming campaign and securing new members will be the first two problems undertaken by the directors.

To assist Treasurer A. A. Smith with raising campaign funds, the following committee was appointed: Capt. J. H. Fraser, William C. Klein, J. H. Doran, Roger Aldrich, Mrs. Frank McCullough and Mrs. A. T. Orr.

The directors adopted a resolution to reinstate former members for payment of the current year's dues. The special finance committee will also function as a membership committee.

The meeting of the Republican Club, scheduled for next Wednesday evening, has been postponed until Wednesday evening, September 19, because of the all-County car party and dance which will be staged September 12 in the Elizabeth Armory. Tickets, which are priced at 50 cents, may be procured from Mrs. Ralph Lovell, Republican Municipal chairman.

Mr. Doran and Mr. Coppitt were named as a committee of the directors to visit August Behner and James Polidoro, who are ill. Mr. Behner, who is an officer of the club, is seriously ill at his home, and Mr. Polidoro, a member of the Board of Directors, is confined to St. Elizabeth Hospital.

A letter was authorized to be sent to the clerk of the County jury commission in reference to a Cranford man being called to jury service twice within two months. It was the opinion of the directors that a citizen should not be required to serve more than once a year.

## Glovier, Pompiano To Attend Legion Meet

Harold A. Glovier and Louis R. Pompiano of Cranford Post, No. 212, American Legion, will leave tomorrow for Belmar where they will represent the local post at the Department Convention which is being held there this week-end. A feature of the Saturday morning program will be the annual drum and bugle corps contest, which is open to the public. The winners will be designated as State champions. It is expected that a large delegation of post members will attend in addition to the delegates.

The annual installation of officers of Cranford post and Cranford Unit, American Legion Auxiliary, will be held jointly in the Casino Tuesday evening. William Regan will induct the post officers, while the unit officers will be inducted by the unit officers. The president-elect of the County Auxiliary, Mary prominent County and State Legion and Auxiliary officials as well as Commander Frank Abbott of Fluke Post, V. P. W., and Mrs. Louise Brossseau, president of V. P. W. Auxiliary, have been invited. They will be accompanied by several interesting speakers. The public has been invited to attend. Cranford Post has received an invitation to attend the meeting September 11 when Dr. Lloyd N. Morrisett will be introduced as Cranford's new supervising principal of public schools.

Plans are nearly completed for the observance of Constitution Day September 17. Legion members will address members of the eighth grade and high school classes. Members of the post are displaying white stickers on their car windshields bearing an appropriate picture and inscription. All Legionnaires and townpeople have been urged by American Legion Chairman Guy D. Peck, Jr., to display the National colors September 17.

## CEMETERY MAY BE LOCATED IN KENILWORTH

The proposed cemetery on Gallop Hill road, Kenilworth, in the form of a memorial park, seems to be a good thing for this vicinity as these memorial-cemeteries are becoming very popular, due to the fact that they do not use tombstones, instead a bronze tablet is placed in the ground.

## FAYS FINE FOR SPEEDING

J. P. Glynn of 1209 Stone street, Hillside, paid a \$7 fine for speeding in police court Tuesday. He was arrested by Patrolman Thomas Woods for exceeding the speed limit on South avenue.

## DRAWN \$10 FINE

John Lansing Hubbard of 214 Walnut avenue, arrested Tuesday morning by Patrolman Thomas Woods, was given a suspended sentence by Judge L. L. Loveland on a drunk and disorderly charge.

## Rotarians Hear Address By Railroad Official

### The problems of the heavily taxed railroads in trying to compete with Government subsidized airlines, tax-free canals and inland waterways and bus routes with unregulated interstate fares for passengers were presented to the Cranford Rotary Club at its luncheon last Thursday noon in Hayashi's Restaurant by Wilbur Shipley, an official of the Central Railroad of New Jersey and a member of the New York Rotary Club.

Shipley said that those problems coupled with the increased cost of operation brought about by the NRA make it necessary for the railroads to increase the freight rates.

Dr. Samuel Hinman, the president, initiated Walter S. Robinson as a new member. Cranford's new supervising principal, Dr. Lloyd N. Morrisett, was among the guests and was extended a cordial welcome to Cranford by the club.

Other visitors were Jerry Greaves, Ernest Howcroft and Casey Valdes, all of Roselle; A. C. Brook of Rahway; Paul S. Storch of Westfield, and Norman Hotchkiss of Summit.

## Symphony Orchestra To Open Second Season

### Initial Rehearsal Scheduled for Sept. 17; Group Seeks New Members.

Letters were mailed out this week by officers of the Cranford Symphony Orchestra to its thirty-five former members and more than fifty prospective new members calling attention to the initial rehearsal of the organization at 8 o'clock Monday evening, September 17.

The orchestra, which is conducted by Jack A. van Brederode, supervisor of music in the Cranford Public Schools, was organized last winter. The organization grew from a small group of musicians to a unit of thirty-five, and on May 22, it joined with the High School orchestra in presenting a concert under the auspices of the Lions Club. The group made excellent progress during the past winter and the director and officers of the orchestra are confident that, with proper support, the organization will be among the best in the County during the coming season.

The orchestra is planning to sponsor a varied musical program during the coming winter with a view of bringing to Cranford music lovers the finest in the way of orchestral and solo performances.

The organization is now conducting a drive to enroll patrons and contributing members. The former, who pay \$5 annually, are entitled to two seats to all concerts, while the latter, at a fee of \$5 will receive four seats.

## Funeral Rites Friday For Harwood Fish

Private funeral services for Harwood Fish, 58 years old, of Roselle Park, father of Harwood Fish, Jr., of Cranford, will be held at 2 o'clock Friday afternoon from the home, 429 Chestnut street, Roselle Park. Mr. Fish was found dead Tuesday morning in the kitchen of his home, sitting in front of a gas stove, with his left eye open. Police listed the death as a suicide.

A former Mayor of Roselle Park, Mr. Fish was secretary of the Roselle Park Building and Loan Association since its founding thirty years ago. He was instrumental, through shareholders' ratification, in bringing about a merger of the Venice Building and Loan Association of Cranford and the Jewel Building and Loan Association of Roselle Park with the Roselle Park Building and Loan Association. This association, which was completed in November, 1933, was considered one of the most important transactions in financial and investment circles in this section.

Other survivors besides the son are his wife, another son, Theodore Killmer Fish of Roselle Park, two daughters, Miss Gertrude Fish and Mrs. H. C. Thompson, both of Roselle Park; and a sister, Mrs. W. H. Marshall of Everett, Wash.

## TO ENTER HOTCHKISS

Frank N. Spole, Jr., son of Mr. and Mrs. Frank N. Spole of 807 West End Place, will leave next week for Lakeville, Conn., where he will enter the Hotchkiss School for Boys. Frank, who attended Cranford High School here for two years, will be in the prep grade, corresponding to a junior standing in the High School. Last June he passed an examination for a scholarship which covers tuition for one year. Frank is the first Cranford boy to enter Hotchkiss School which is considered one of the finest college preparatory schools in America.

## Schools Open With Enrollment Decrease

### 15 Less Pupils Reported Yesterday Than on First Day Last Year.

Cranford Public Schools opened yesterday with an enrollment of 2448 pupils in the High School and the four elementary schools, a decrease of fifteen under the opening day enrollment last year. It is expected that late enrollments will bring this total up to and perhaps above last year's opening week figure.

Only part session classes were held yesterday morning and afternoon. Full time sessions started this morning. Roosevelt and Sherman Schools show the only increase over last year's enrollments in the two elementary schools. The former had 497 pupils yesterday as compared with 456 on the opening day in 1933, while Sherman seated 569 pupils as compared with 560 last year.

The High School enrollment showed a decrease of ten pupils from the opening day of last year, 619 reporting yesterday. Grant School reported the largest decrease—there being 325 pupils present yesterday as compared with 367 in 1933. Lincoln enrolled 438 yesterday while 451 were present on the opening day of 1933.

Enrollments by grades in the various schools follows: Cranford—9, 202; 10, 167; 11, 134; 12, 116; total, 619. Lincoln—Kindergarten, 35; 1A, 27; 1B, 35; 2A, 23; 2B, 21; 3A, 32; 3B, 29; 4A, 34; 4B, 31; 5, 40; 6, 42; 7A, 31; 7B, 29; 8, 36; total, 438.

Sherman—Kindergarten, 60; 1A, 43; 1B, 34; 2A, 32; 2B, 22; 3A, 41; 3B, 34; 4A, 44; 4B, 28; 5B, 27; 6A, 34; 6B, 24; 7A, 35; 8A, 38; and 8B, 37; total, 569.

Grant—1H, 22; 1W, 22; 2, 45; 3N, 29; 3K, 28; 4K, 37; 4H, 34; 5, 41; 6B, 29; 6T, 38; total, 325.

Roosevelt—Kindergarten, 66; 1, 49; 2W, 28; 2M, 27; 3, 40; 4, 31; 5, 31; 6M, 33; 6G, 25; 7R, 35; 7T, 30; 7Q, 21; 8R, 31; 8A, 28; 8M, 24; total, 497.

## C. O. P. Groups Make Campaign Plans

Plans for the fall campaign were formulated last night at a special meeting of the Cranford Republican Municipal Committee in the Township Rooms.

In addition to municipal committee members, representatives of the Cranford Women's Republican Club, the Cranford Republican Club, and the Cranford Colored Republican Club were present.

A committee was appointed to arrange for a monster rally to be held here under the auspices of the joint Republican groups sometime the latter part of October.

Mrs. Ralph L. Lovell, the municipal chairman, presided.

## Rosendale Promoted To Rank of Sergeant

George L. Rosendale of 441 Brookside Place last night was promoted to sergeant of the Cranford Police by Police Commissioner Edmund P. Sullivan and police Chief Carl A. Massa. His new badge and chevrons were presented to him by Mr. Sullivan. Rosendale was recently appointed acting sergeant to serve in the absence of Sergeant P. J. Martin, who is off duty because of illness. Prior to his appointment as acting sergeant, Rosendale served for twelve years as a patrolman, during which time he had a commendable record.

## GETS SUSPENDED SENTENCE

John Ouzley of Coal street, Nequehoning, Pa., was given a suspended sentence by Judge L. L. Loveland in police court Wednesday on a reckless driving charge preferred by Sgt. George Rosendale.

## BICYCLE IS STOLEN

David Brown, 10 years old, of 12 Craig Place, reported to police yesterday afternoon that his bicycle was stolen from the Cranford Oval.

## O. E. S. TO MEET

Assize Lodge, No. 126, P. & A. M., will hold its first meeting of the fall season in the Masonic Temple at 7 o'clock tomorrow evening.

## MASONS TO MEET

Assize Lodge, No. 126, P. & A. M., will hold its first meeting of the fall season in the Masonic Temple at 7 o'clock tomorrow evening.

## JERSEY CITY MAN FINED

Arrested Monday by Patrolman Archie Bird for operating a car without a registration card, Anthony Gallandria of 156 Summit avenue, Jersey City, was fined \$3 and \$3 cost of court by Judge L. L. Loveland.

### Methodists To Mark Founding of Church

#### Program to Be Held During October; Resume Fall Schedule.

Initial plans have been completed by the Pastor's Cabinet of the Cranford Methodist Church for the observance by the local church of the sesquicentennial of the founding of the Methodist Episcopal Church. The celebration will be held during the month of October.

Special speakers have been secured for each of the four Sunday services. Dean Frank C. Lankard of Drew University will preach at the evening service October 7. Other visiting ministers, all of whom will speak at the Sunday morning services, will be as follows: October 14, Dr. J. Edgar Washbaugh, district superintendent; October 21, Dr. Arlo A. Brown, president of Drew University; and October 28, Dr. Robert J. Trebacz, president of Seminary College Institute of Hackettstown.

The first Sunday in October has been designated as Parent-Teacher-Officer day, and a special service is being planned for the morning service. There will be a fall and Tom Thoms wedding sponsored by the church October 20, 26 and 27. L. R. Memmott is chairman of the fair committee.

The pastor, the Rev. Matchett Y. Poynter, will begin a series of three sermons Sunday morning on the subject, "Salvation." Midweek services will be resumed at 8 o'clock next Wednesday evening in the chapel. The pastor will conduct a series of Bible studies at the midweek meetings.

### Presbyterians to Resume Regular Services Sunday

Sunday School will be resumed in the First Presbyterian Church Sunday morning, according to an announcement this week by the pastor, the Rev. William R. Sloan. The Sunday evening services in the church will be resumed September 16.

The ordinance of the Lord's Supper will be observed the first Sunday in October at which time new members also will be received.

### CHRISTIAN SCIENCE CHURCH "MAN" Will Be the Subject of the Lesson-Sermon in All Churches of Christ, Scientist, on Sunday, September 9.

The Golden Text is: "As many as are led by the Spirit of God, they are the sons of God" (Romans 8:14).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "And God said, Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth" (Genesis 1:26).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Immortal man was and is God's image or idea, even the infinite expression of infinite Mind, and immortal man is coexistent and co-eternal with that Mind. He has been forever in the eternal Mind; God; but infinite Mind can never be in man, but is reflected by man" (p. 338).

### The Hated Housefly

The body of the housefly is covered thickly with hairs and bristles of varying lengths and when it crawls over infected material it readily becomes loaded with germs, and subsequent visits to human foods result in their contamination. Some of the diseases carried by flies are Asiatic cholera, typhoid, tetanitis, and infantile diarrhea, and there is circumstantial evidence that they carry such plagues as tuberculosis, anthrax, yaws, ophthalmia, smallpox, tropical sore, and parasitic worms. Probably the most common and most terrible disease frequently carried by flies is typhoid.

### Paper Was Hand-Made

Paper during the early Seventeenth and Eighteenth centuries was largely made of rags, either cotton, or linen. There are records of numerous appeals to the women to save their rags. Until late in the Eighteenth century all paper was hand-made. Before 1087 all paper in England was brown in color. White paper was first manufactured in that year.

### Clubs Used in Golf

The clubs used in golf include: driving-iron, mid-iron, mid-unable, mashie-iron, mashie-niblick, putter, mallet-iron, mashie-niblick, putter, mallet-iron, mashie-niblick, putter, mallet-iron, mashie-niblick, putter.

### Dinner at the Poles

When polar explorers sit down to dine, tableware made of wood is considered good taste. Metal cutlery, unprotected from the frost or sub-zero temperatures, would stick to their lips and "burn" the skin away.

### Washed and Fried in Mexico

"Surely, Peter must have opened the gates of heaven to let down such a beautiful girl," is what the Mexicans of Guadalajara say while a pretty girl is painting.

## The SNAPSHOT GUILD

School Ahead! Pictures, Too!

Excitement is part of the picture as any football game. It's easily worth the missing of one play to get an over-the-shoulder shot like this!

**A**BOUT this time of year, school is in everybody's mind; not only students and teachers, but parents, sunis, and aunts.

And if there ever was a snapshot shooting opportunity, it's school. It may be a one-room school or it may be a great university. Wherever, whatever it may be, it's crammed with unbeatable picture possibilities.

Yet we might as well face the silly fact of the matter—few snapshots make the most of school's snapshot shooting opportunities.

Perhaps they are dashed by the very wealth of the material at hand. More likely, they assume that somebody else is going to take the pictures. And that's a fatal mistake. For nobody else can see things as you see them. And it's what you see that means most to you—and to the folks at home, now or years from now.

The question, then, is how to make the most of school's picture possibilities. A little planning will do the trick.

First, about the right camera for school. Any camera will do, providing it is clean and in good order and uses a size of film that is easily available anywhere. If yours has a fast lens and a fast shutter, you'll have an advantage in taking shots at sporting events, but such a camera is not at all essential. With a little care you can make even the simplest box camera turn out entirely satisfactory pictures.

Then, how can snapshotting be planned? All of it, of course, cannot be planned, but many of the most important shots can be. Why not work out a scenario, Hollywood fashion?

First of all, whether school's just around the corner or a thousand miles away, you'll want a few good shots of home. Then a view or two taken on the way to school. Maybe those views seem commonplace now, but wait a few years...

At school, of course, there are the obvious shots of the buildings, the grounds, new classrooms, teachers, old friends, sports, parties, class ceremonies, and so on. It's a good idea to take them so as to form a kind of continued story. Then, when they are mounted in your album, the pictorial story will flow along evenly.

It's easy to plan ahead for the kind of pictures mentioned above. But don't forget the spontaneous things.

For example, if there's an exciting football game, try the trick of shooting blindly back over your shoulder into the crowd at an exciting moment. People that notice the look on their faces and the chances are that you'll get some amazing facial expressions!

And in less exciting moments it is still a good idea to avoid "posed" pictures as much as possible. People standing up in a stiff line, gazing stonily at the camera, simply don't look comfortable, that's all. Catch them at leisure moments, as they perch on the school steps or linger on the lawn.

A really good collection of school pictures is hard to find, as any school yearbook editor will tell you. Yet it's a thing much easier to take; and few snapshots increase in value, year after year, as surely as those taken at school.

JOHN VAN GUILDER

### Discipline Foods Budget By Comparison Shopping

"How can I economize on my food budget without sacrificing good standards of nutrition?" asks the perplexed housewife who finds that she must cut down on living costs and wishes to do so without mending the health of her family.

Selecting those fruits and vegetables which are at the height of their season and therefore most reasonable is one way of doing it, according to Miss A. G. Adams, Union County home demonstration agent. She utilizes peaches, plums, carrots, tomatoes, beets and several other fresh garden products that are plentiful in the markets now to excellent advantage in the \$7.50-a-week-for-a-family-of-five menus which she has prepared for Union County housewives today.

Miss Adams also stresses the importance to the economical budget of comparing prices when shopping. The housewife who does her own marketing will be able to judge prices far better than she who relies upon telephone-purchasing. The careful shopper substitutes something cheaper that has the same nutritive value and texture when she finds that the vegetable she had originally planned to use has suddenly advanced in price. "Specials," too, are frequently offered in the markets and give the woman who buys wisely an opportunity to effect a considerable saving in her weekly food budget.

#### WEDNESDAY

Breakfast—Plums, oatmeal, toasted muffins, butter, milk, coffee.

Dinner—Italian macaroni, spinach supreme, bread, butter, apple sauce, milk, tea.

Supper—Potato stew, toast, butter, beet and cabbage relish, oatmeal-cookies, milk, tea.

#### THURSDAY

Breakfast—Sliced bananas, cornmeal mush, toast, butter, milk, coffee.

Dinner—Egg loaf, potatoes au gratin, escalloped tomatoes, bread, butter, peach shortcake, milk, tea.

Supper—Savory beans, sunset salad, Boston brown bread, butter, apple sauce, milk, tea.

#### FRIDAY

Breakfast—Tomato juice, fried mush, syrup, toast, butter, milk, coffee.

Dinner—Spiced salmon, creamed potatoes, pan-fried eggplant, cucumber salad, bread, butter, plum tapoca, milk, tea.

Supper—Harvard toast, bread, butter, carrot sticks, oatmeal cookies, milk, tea.

#### SATURDAY

Breakfast—Sliced peaches, oatmeal, toast, butter, milk, coffee.

Dinner—Fried rabbit on toast, pan-fried cabbage, sliced tomatoes, bread, butter, oatmeal cookies, milk, tea.

Supper—Bean soup, lettuce sandwiches, plum tapoca, cocoa.

#### SUNDAY

Breakfast—Cantaloupe, oatmeal, cinnamon toast, milk, coffee.

Dinner—Meat loaf, browned potatoes, glazed carrots, lettuce and tomato salad, bread, butter, caramel custard, milk, tea.

Supper—Cucumber sandwiches, plums, cocoa.

#### MONDAY

Breakfast—Sliced bananas, French toast, syrup, milk, coffee.

Dinner—Sliced meat loaf, gravy, mashed potatoes, string beans, bread, butter, cream whip, milk, tea.

Supper—Creamed rice with bacon, sliced tomatoes, bread, butter, caramel custard, milk, tea.

#### TUESDAY

Breakfast—Tomato juice, rice, toast, butter, milk, coffee.

Dinner—Dutch eggs, baked potatoes, baked, sliced beets, whole wheat muffins, butter, fruit salad, milk, tea.

Supper—American string beans, potato cakes, bread, butter, oatmeal cookies, milk, tea.

### C. of C. Model Home Will Be Opened to Public Saturday

In view of the wide attention and interest which the furnishings of the Elizabeth Chamber of Commerce model home inspire, this feature of the 1934 main award of the show to be held October 29 to November 3, inclusive, at the Elizabeth Armory, have been selected by the main award committee with great care and with the cooperation of the business concerns participating. The chairman, Frank L. Foote, today announced the selection of the firms which will supply the furniture, fixtures and appliances, and added that the furnishings will be in place by Thursday in readiness for Saturday, September 8, when the home is to be open for inspection by the general public, starting at 12:30 p. m.

As always quality, artistry, convenience and modernity have been considered by the committee in its choice of the things which, next to the home itself, attract most attention and interest of the thousands who will "follow the arrow" to the Colonial residence on Lakeview Drive. Various craftsmen engaged in the work at the home and grounds are putting in the finishing touches, so that both the home and its immediate surroundings will make a complete picture for the beholder. The grading work has progressed, and the planning of the stituberry scheme has been partially completed by the Elizabeth Nursery Company under the direction of John B. Taylor.

### Attention Is Called To Untaxed Property

The New Jersey Taxpayers Association, in a statement issued today, calls attention to the growing list of property which is exempt from property taxation.

"In 1919 the value of property exempt from taxation was \$316,000,000 but in 1933 it was over three times as much, or \$1,027,000,000.

"The average tax rate for all municipalities in the State during this period increased from \$28.33 to \$37.56 per \$1,000 valuation. In 1919, therefore, the tax on the exempted property would have amounted to \$9,024,000, while in 1933 they would have amounted to \$38,744,000, or over four times as much as in 1919.

"Over forty different kinds of property are exempt from taxation, public property being equal to 33 percent of the exempted value, schools 29 percent, churches and charitable institutions 20 percent, and miscellaneous properties 18 percent.

"The exemption of charitable institutions is open to many abuses, and while the law set examples only those institutions which are operated exclusively for charitable purposes, many millions of dollars of property have been placed on the exempt list which property is seldom used for charitable purposes of benefit to the people or State as a whole. The loss of tax revenue from the exempted religious and charitable property amounts to about \$5,500,000 each year.

"The State constitution provides that property shall be assessed at its true value for tax purposes, but in some taxing districts much of the property is assessed at less than 50 percent of its true or sales value, and seldom is any property assessed at more than 80 percent of its value.

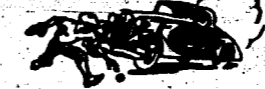

"If property is not assessed at its full value or at a uniform value, then a form of tax exemption is being practiced, because if one piece of property is assessed at 50 percent of its value and another piece is assessed at 80 percent, then the property assessed at 50 percent does not bear its equitable part of the cost of government.

"The tax exemption policy in New Jersey should be revised so that only those properties which render a distinct public service to the people of the State shall be exempt from property taxation."

Taught to Carry Water on Heads Women natives of Oshima Island, about 100 miles from Tokyo, learn when children to carry water on their heads because the island is volcanic and the water must be borne for five miles or more.

Can Create 60-Mile Wind At Teddington, England, is a high-pressure wind tunnel, 30 feet long. In this a 60-mile wind can be created.

### DRIVE SAFELY

#### Speeding on Curves and Hills

WOULDN'T it be utterly foolish to close your eyes while walking near the end of a precipice? Still many motorists shoot around curves at highly dangerous speeds without having the slightest idea of what may lie ahead.

SLOW DOWN on curves and especially at turns where the vision is impaired if you value your life and the lives of others using the highway. The fellow coming toward you may be speeding, too, and worse yet, he may be on the wrong side of the road.

Going over the top of a hill presents a similar situation. You never know what is on the other side until you get there. In fact it is just another way of trying to see whether you can catch the gates on high. If another fellow is coming up the other side the meeting would be untimely, painful and embarrassing.

If the vision ahead isn't clear, keep down your speed and stay on your own side of the road.

### First Weather Records

The first weather records in America, so far as known, were kept by the Rev. Johann Campanius, who recorded the weather each day in the settlement of New Sweden near the present site of Wilmington, Del., for the years 1644 and 1645.

250 Different Varieties There are more than 250 varieties of cherries generally classified as sweet and sour. As with apples, the composition varies with the variety, and the flavor is influenced by the climate and soil in which they are grown.

Took Papyrus to Rome Papyrus, the Egyptian writing "paper," was probably introduced into Greece and Rome after Alexander the Great made his victorious Egyptian expedition.

### Let Electricity Work for You

Any one of these electric vacuum cleaners will take the dirt out of your rug, straighten the nap and brighten the colors. All you need to do is to guide the machine.

The Universal is a remarkably good cleaner for the money. Its special feature is the nozzle with its smooth blunt projections which comb the hairs and threads from the rug. Strong cross currents of air dislodge and draw the dirt up into the bag.

The Westinghouse motor driven brush cleaner has an extra wide nozzle set especially low. This means fewer trips across the rug and more efficient cleaning of difficult places. An extra belt is given with this cleaner. \$3 allowance is made on the price of the Westinghouse if you trade in your old electric cleaner.

**\$29.50 CASH**

**\$44.95 CASH**

**\$66.50 CASH**

Carrying charge extra on any electric cleaner if you buy on the monthly payment plan.

THEATRE PREVIEWS

HERE COMES THE NAVY Warner Bros. melodramatic thriller of Uncle Sam's Jack-lars, "Here Comes the Navy," opens at the Cranford Theatre, Sunday, with James Cagney and Pat O'Brien co-starring and 3,000 sailors taking active part. The picture is said to carry some of the most breath-taking thrills ever witnessed, in addition to supplying plenty of hilarious comedy and a glowing romance. The action takes place aboard the U. S. S. Arizona; at the dirigible field at Sunnydale, Calif., with the U. S. S. Mason; at the Naval Training Station at San Diego, Calif., and at the Navy Yard at Bremerton, Wash. One of the stirring scenes which comes in as part of the background of the picture is the weighing of anchor of the entire Pacific fleet to start its cruise for Atlantic waters on Presidential command. This is the first time such a scene of an entire fleet in action has ever been shown in a picture.

BABY, TAKE A BOW "Baby, Take a Bow," coming to the Cranford Theatre on Friday, introduces five-year-old Shirley Temple in her first title role. James Dunn and Claire Trevor, who have been teamed in three pictures, are together again in "Baby, Take a Bow," as Shirley's parents. It's a sparkling comedy-drama that gets under way in the first few scenes and maintains a rapid tempo to the exciting finish. The story deals with the struggle for happiness and success of a young man just out of prison, a girl who marries him because she believes in him, and the result of their union, an adorable baby girl who is the pride and joy of their hearts.

STRAIGHT IS THE WAY A college education, Franchot Tone believes, is a waste of time for an actor. Tone, who is featured in the Metro-Goldwyn-Mayer picture, "Straight is the Way," which opens tomorrow at the Regent Theatre, Elizabeth, though a graduate of Cornell University, recently stated that the three and a half years he spent at college might have been devoted to a fuller and more varied life.

"That's what an actor needs more than a college education," said Tone. "A fund of experiences is far more valuable to him than a lot of theories which he has gained from books. A good actor can be good whether he is educated or not. When we speak of education, I mean a school education. Any average intelligent person is constantly being educated by those living and observation, whether or not he ever put a foot inside a classroom. I honestly believe that an actor can be over-educated. He can develop schooled emotions which prevent him from becoming one of the great artists of the theatre. An actor must not think too much. If he does he will become conventionalized. He will react to his brain rather than to his heart. The greatest quality that an actor can possess is an affective memory. The old belief that you must live through every emotion to portray it is absolute bunk if you possess this sort of memory." Tone, in "Straight is the Way," portrays the role of Benny, who tries to break with his old life. Produced by Lucien Hubbard and directed by Paul Slovic, the cast also includes May Robson, Karen Morley, Gladys George, Nat Pendleton, Jack LaRue and C. Henry Gordon.

GRAND CANARY "Grand Canary," A. J. Cronin's best-selling novel, serves as Warner-Baxters

second starring vehicle, opens at the Liberty Theatre, Plainfield, Saturday, for a four day stand. Preview reports from the coast indicate that Baxter has the strongest dramatic and romantic role of his career. Madge Evans has the romantic female lead. The film is a love drama with strong underlying theme and motives. Warner Baxter portrays a doctor who is called a "murderer" by the world because his new serum has failed and three people have died. He starts on a journey to oblivion to scatter the wreckage of his life. On board a ship bound for the Canary Islands, he meets beautiful Madge Evans and falls in love with her. When they reach the islands, a devastating plague of yellow fever threatens the inhabitants and Madge Evans falls victim to the plague. Inspired by his great love for her, Baxter fights back and vindicates himself with the world by putting an end to the epidemic through the use of his serum. The supporting cast of top-notch performers includes Marjorie Rambeau, Zita Johann, Roger Imhof, H. B. Warner, Barry Norton, Juliette Compton, Gilbert Emery, John Rogers, Gerald Rogers, Desmond Roberts and Curtis Daumery.

ONE MORE RIVER A dramatic screen story of exceptional power is "One More River," the Universal picture which opened an engagement at the Ritz Theatre, Elizabeth, yesterday, with Diana Wynyard in the starring role. The novel was written by the late John Galsworthy as the last in the Forsythe saga, and in it he details the story of a tragic marriage in high society, with a London matron fleeing from her sadistic husband in Scotland and being unjustly suspected on account of her subsequent friendship with a young man whom she met on shipboard. The climax of the screenplay brings about a most surprising conclusion to a story which at all times is full of suspense and interest. Diana Wynyard displays her beauty and talent to excellent advantage as the abused wife, and fine performances are given by Frank Lawton and Colin Clive, who plays leading roles. The entire cast, in fact, is excellent, including such talented players as Mrs. Patrick Campbell, Reginald Denny, Jane Wyatt, Henry Stephenson, Lionel Atwill, Alan Mowbray and many others. Miss Wynyard debuts in this picture. Keep your eye on this young lady. We predict a vogue for her.

Continuing with its Fall Festival of Fun, the Ritz Theatre is again presenting an eight-act program which started Wednesday and will run through Friday night. Featured on this eight-act bill are Tex Fletcher, better known as WOR's "Lonesome Cowboy," and the Emerson Mountaineers, formerly the "Rex Coal Mountaineers," who will present fifteen minutes of hillbilly singing in their own inimitable style. Arthur and Morton Havel, musical comedy favorites, are seen in their latest sketch "Ship Ahoy." Eddie White offers his famous monologue and story telling in the clever way he has of twisting words and sentences to his own advantage. Five other acts will complete this state program.

BUD 'N BEN The management of the Rialto Theatre has booked "Bud 'N Ben" in a series of short western comedy-romance dramas, the first of these will be presented Saturday matinee of this week as an added attraction. This new type of picture has taken the theatre

goers by surprise. It is not a serial picture which is usually long and drawn out affair, but a complete story at one showing. There are twelve of these junior productions, which are packed with thrills and interesting adventures. The first of these series will be Bud 'N Ben in "Potluck Pard," Laurel and Hardy will be presented in a rollicking comedy, "Busy Bodies."

MURDER IN THE PRIVATE CAR Secret panels, sliding doors, invisible microphones and disappearing rooms—tricks of legederman that would make Houdini look like an amateur come to the screen in "Murder in the Private Car," Metro-Goldwyn-Mayer's comedy mystery thriller that opens today at the Rialto Theatre, Westfield. Charlie Ruggles, Una Merkel, Mary Carlisle, Russell Hardie, Porter Hall, Willard Robertson, Bertion Churchill and others are in the featured cast. Into one set, the last car on a transcontinental limited train, studio technicians incorporated every known trick of magic. The effects are used for surprise entrances and exits of giant gorillas, mysterious assassins and others who add to the nerve-tingling aspects of the picture. There were three separate places in the car in which a human being could be made to vanish in the twinkling of an eye. There were no less than nine invisible panels concealing secret alcoves large enough to hide a human body.

Rural Mail Delivery Credit for the idea of rural mail delivery belongs to Postmaster General John Wauamaker. He was the first to officially suggest rural free delivery. This suggestion was made in his annual report for the fiscal year 1891.

City of Fiume Fiume is a city on the Adriatic sea and together with the surrounding territory was a part of Hungary until 1918. Following the Hungarian revolution in that year, Gabriele d'Annunzio organized a legion and seized the district and the adjoining islands. Until 1924 Jugoslavia claimed Fiume as part of her domain.

Wife's Happiness Important The Roman philosopher, Seneca, used to excuse himself for more thought of his health than for the happiness of his wife by saying that the happiness of his wife depended upon it. "Her life is wrapped up in mine and for her sake I must take care of my own. What can be more delightful than to be so dear to one's wife that for her sake one becomes deaf to his self."

Tailors Worked in Homes Tailors used to go about the country making suits from the cloth that the women of the houses had woven. In the early part of the Eighteenth century they were paid 12 shillings a week and their board.

SHOOT THE WORKS. Ben Berlie and his lads make their screen debut in "Shoot the Works," the Paramount feature film which will be shown on Monday at the Westfield Rialto Theatre. Surrounded by a fine cast headed by Jack Oakie, Dorothy Dell, Arline Judge, Alison Skipworth and Roscoe Karns, Berlie's orchestra plays six new hit tunes by the combined teams of Ralinger and Robin and Gordon, and Revel. They include "With My Eyes Wide Open, I'm Dreaming," "Do I Love You?" "In the Good Old Winter Time," "Take a Lesson from the Lark" and "Were Your Eyes Burning?" "Shoot the Works" is a comedy-melody-romance about a broken-down side-show troupe, the Nicky Nelson Enterprises, which survives extinction because it has a flappole stiter and a stuffed whale.

Animals Swim Cats hate the water, yet swim strongly. All cattle swim well, and so do pigs, in spite of the silly legend that they cut their own throats in doing so. The only poor swimmer among British mammals is the hare, yet the hare has been seen to swim across a flooded stream from an island on which it was marooned.

Water Absorbed by Trees The composition of sap, being what it is, a chemist has calculated that in order to obtain a weight of 1,000 pounds an elm tree must absorb from the soil and evaporate into the air 85,000 gallons of water, or some thirty-four gallons for a single pound of increase.

Food of Gods Called Ambrosia The food of the gods was called ambrosia because it was derived from the Greek "a," a privative denoting the opposite quality and "brotos" meaning mortal. Ambrosia was the food that was supposed to make gods immortal.

Argentine Drink "Cacha" is a drink made from sugar cane and used extensively in northern Argentina. Tobacco is steeped in the liquor to give it an added "kick."

French Books Lead The French book publisher can generally count on three or four times the demand that an English publisher can.

**Welcome Home**  
 Cranford merchants Saturday night will stage their second annual "Welcome Home" celebration in honor of the townspeople who are returning to the community after spending their summer vacations at the shore or elsewhere.

At the inaugural of the event last year, more than 3,000 townspeople turned out and enjoyed a band concert and block dance and renewed old friendships. The business men have arranged a more extensive program for this Saturday night, including, in addition to the concert and dance, the awarding of more than fifty prizes and an hour's preliminary program by the Fiske Post, V. F. W., Drum and Bugle Corps.

Townspeople should show their appreciation to this splendid gesture on the part of the merchants by coming down town and taking part in the celebration.

With merchants and townspeople of Cranford cooperating, this community should have a bright future before it.

**A Point Well Taken**  
 The point raised at the last meeting of the Township Committee by Police Commissioner Edmund P. Sullivan to employ local labor on the Lexington avenue improvement is well taken and deserves the commendation of the townspeople. On all local projects, particularly, employment should be given to Cranford workmen wherever possible. It is a good sign to see that the Township officials are paying attention to this important matter.

**Indefensible Policies of Government**  
 There can be no defense of the "spoils system" whereby public trust is betrayed.

There can be no defense of bureaucracy.

There can be no defense of a policy which destroys cattle or crops.

There can be no defense of the policy of lending money to set up instrumentalities that would compete with and destroy businesses in which the public has invested its funds.

There can be no defense of the policies which seek by subterfuge to usurp the rights of the states as, for instance, in the N. R. A.'s theory that all business has suddenly come under federal jurisdiction.

There can be no defense of the policy of wasteful spending which unbalances our budget by 4,000 millions of dollars and gives no dependable pledge of abatement of such expenditures.

There can be no defense of the retention of any individual in any public office who believes that the Constitution can be violated because the end justifies the means.

If it is desired to amend the Constitution, let the people have the chance to express themselves upon every such proposal.

If it is desired to give the federal government complete power over all business and industry, let the people vote upon that proposition in constitutional conventions.

If it is desired to abolish the state governments and let the federal authorities control electric light and power, coal, oil, and all the production of American farms, let the American people, also in constitutional conventions, pass upon the such fundamental changes.

There is nothing in the Constitution which permits any man or group of men to equalize competition, to redistribute wealth or to redistribute brains, to put a penalty upon efficiency or to punish success by confiscatory taxation. —David Lawrence.

**Orange of Asiatic Origin**  
 The orange is apparently a fruit of Asiatic origin and has been cultivated from the most ancient times in India and southern China. It has been distributed by successive stages to the east and west, and the present orange is a cross between the sweet temperate regions. It was introduced into Asia Minor at an early date, and thence spread to all the Mediterranean countries, where it is extensively cultivated. Spanish and Portuguese explorers and settlers brought it to the New World in the fifteenth century and they now flourish in many parts of Central and South America. That the California and Florida climates were exceptionally well suited to orange culture were discoveries made by the Spaniards while those states were still in their possession. Australia, the Pacific Islands and Japan are countries in which orange growing has since been developed.

**Hypnotism**  
 Hypnotism may be described as a condition of artificial sleep. Different stages of hypnosis have been described by different authorities; three are best known. In very light hypnosis there is complete passivity and relaxation with an inability to open the eyes or resist simple commands concerning the voluntary muscles. The individual is quite conscious of all that goes on. In the next stage further phenomena can be produced, but still there is recollection of the hypnotic period. The most susceptible subjects may pass into a deep sleep known as artificial somnambulism. While in it they respond to all or most suggestions made by the operator, and on awakening they have no recollection of anything they heard, said, or did, while in that state.

**Vulcan Island Men Most Valet**  
 Vulcan Island, off the New Guinea coast, has the most modest women and the valet men in the world, according to an anthropologist. The native women are extremely modest and would not dream of taking their daily bath in the sea without donning an ankle-length skirt. It is made of a shredded banana leaf. On shore the women wear several petticoats, sometimes as many as six, and have their hair cut short. The men, on the other hand, spend much time in dressing their own long trousers in which they fasten crimson flowers. It is the men of Vulcan Island who wear corsets. They are made of stiff bark drawn tightly round the body.

**Beware These Perfumes!**  
 Some Have Caused Death  
 Our craze for perfume is an echo of King Solomon's days, but not all scents are "sweet-smelling" favors. Doctors treat the most common cause of death is the traveler who rests beneath their shade, writes an authority in "Hi-Bits Magazine."

On the slopes of Chill is a tree which the natives look upon as being possessed of an evil spirit. Many innocent travelers have crept under its branches during the heat of the day, and paid for its shade with their lives. After resting under one of these trees for a short time, the hands and face of a traveler become swollen, as in a case of snake-bite, and the surface of the skin is covered with boils. In South America, the traveler who rests beneath the shade of a tree which has succumbed to the influence of this tree.

The trumpet flower, or datura, found in most tropical countries, although not deadly in the open air is highly dangerous in a room. Fascinated by its coloring and scent, unfortunates take it indoors and soon fall into a trance, developing into a deadly stupor, from which they may never awaken. If this trumpet flower were brought into a sick room and left for the night, it would mean certain death to the patient.

In South America, an accusation of murder was brought against a family who were said to have profited financially by the death, in their house, of a wealthy relative. It was found that trumpet flowers had become mixed with other plants in a vase, which allowed to stay in the house all night and had caused the death.

**Bureau of Fisheries Was Started by U. S. in 1871**  
 The United States bureau of fisheries, the sole federal agency concerned primarily with the conservation and utilization of the nation's aquatic resources, had its origin in a joint resolution passed by congress on February 9, 1871, authorizing the appointment of a commissioner of fish and fisheries. Originally the commission of fish and fisheries was independent and its duties were largely investigatory. They were outlined by the first commissioner, Spencer Fullerton Baird, then assistant secretary of the Smithsonian Institution, in the following words, which refer to the resolution of congress and the act of the president: "The resolution... directed that it should be the duty of the commissioner to prosecute the necessary inquiries, with a view to ascertaining whether any, and if so, what diminution in the number of food fishes in the coast and lakes of the United States had taken place; and to determine what were the causes of the same, and to suggest any measure that might serve to remedy the evil."

In 1908 the commission was incorporated into the new Department of Commerce and Labor, becoming known as the bureau of fisheries, and on the organization of the Department of Commerce was included in the new department.

**TRY RADIO WAVES AS TALKWAY LINK**  
 May Bridge Natural Barriers With Short-Wave Radio Instead of Wires  
 EXPERIMENT ACROSS BAY

What is said to be one of the most interesting experiments in the field of communication is being made this summer up in Massachusetts, where the Bell System is trying out the possibilities of using ultra short waves for bridging natural barriers.

The experiments are being carried on between Provincetown, out on the very tip of Cape Cod, and Green Harbor, twenty-eight miles across Massachusetts Bay. At each point two 100-foot poles have been erected for antennas, arranged so that the short radio waves can be shot directly at their goal. If the experiments prove as successful as preliminary tests have indicated, the new radio telephone link will provide an additional through circuit between the tip of the Cape and Boston.

The use of ultra short waves in telephone work is of comparatively recent origin. In the early days of trans-Atlantic telephony only very long waves were used, since that was the region about which most was known. As time went on, however, there proved to be two big disadvantages to the sole use of this type of carrier for messages. One was the fact that long waves made transmission in the summer highly unsatisfactory at times because of static. On top of that, the time soon came when the wave length bands in this region became crowded and narrow.

As knowledge of the ether increased, shorter waves not so affected by static were occasionally used, and today long distance transmission is carried on both long and short waves (5,000 meters and from 15 to 60 meters respectively), depending on the time of year, the time of day, weather conditions, etc.

Even waves as short as fifteen meters, however, are not entirely immune from static when conditions are bad, so for the last few years much study has been given to the use of shorter and shorter waves. The radio spectrum is fast becoming congested, but below ten meters considerable room still remains. Ultra short waves, as this band of frequencies is called, have the advantage of being highly dependable, with static and fading affecting them but slightly. On the other hand, their very nature makes it impossible, because of the curvature of the earth, to transmit them over much more than 100 miles.

The wave length used in the experiments being carried on in Massachusetts is about five meters, ideal for the short distance for which it is being used. The point of the experiments is to provide a system which gives a consistently good result to be useful in telephone service without requiring continual technical attention and adjustments.

To guard against listening-in by amateur radio fans, all speech is thoroughly scrambled as it leaves one point, and translated back to its original characteristics upon its reception at the other.

Mr. and Mrs. J. E. Rose and son, Jerry, Jr., of 405 Central avenue, returned Tuesday from Lake Harmony, Pa.
Mrs. William McMahon and daughter, Margaret, of 87 Benjamin street, were week-end guests at Mrs. Vernon, N. Y.
T. D. Anglemeyer of 34 Spruce street has returned from Huntington, Ind., where he spent two weeks visiting relatives.
Miss Lillian Manning of Burnside avenue returned Monday from Seaside Heights where she vacationed for ten days.
Mr. and Mrs. Anthony C. Wall of 6 Claremont Place announced the birth of a daughter, Anne Coleman, August 23.
Miss Betty Rogers of 327 Walnut avenue returned Monday from New York where she spent two weeks visiting relatives.
Miss Beatrice Marsac of 209 Walnut avenue has returned from Lake Hopatcong, where she vacationed for several weeks.
Mr. and Mrs. E. K. Loveland and family of 11th street have returned from Moscow, Pa., where they passed the summer.
Miss Marjorie Smith of Hillcrest avenue returned Friday from Manassas, Va., where she vacationed for several weeks.
Mr. and Mrs. Carl L. Lloyd of Osisto avenue have had as their guests Miss Clara Hobbs and Hubert Edwards of Pontiac, Ill.
Mr. and Mrs. A. L. Roberts and family of 6 Beech street are home from Seaside Heights where they vacationed during August.
Mr. and Mrs. L. B. Mason and Miss Elaine Wetherill of 104 Cranford avenue are home from a vacation at Deauville Beach.
Mr. and Mrs. W. W. Erice of 335 Walnut avenue have returned from Lake Mohawk where they spent the summer months.
Mrs. John Spencer has returned to her home in 4 Berkeley Place after spending the months of July and August at Asbury Park.
Mr. and Mrs. William Ettinger have returned from a two weeks' trip to Maine and in motoring through the New England states.
Mrs. H. B. Bornkahl of Westport, Conn., has been visiting Miss Katharine Anglemeyer in 34 Spruce street for the past several weeks.
Paul Beckmyer and family of 16 Adams avenue spent the week-end at Butler with Frank Hanley and family, former Cranford residents.

Mr. and Mrs. Joseph A. Plummer and family of 430 Riverside Drive have returned from Portaupee where they passed the month of August.
Mrs. Isabelle Franke of Manor avenue, who will attend Sweet Briar College in Virginia this year, will leave next week to take up her studies.
Miss Myrtle Susan of 305 Manor avenue has returned home after spending the summer with relatives in Lake Carmel, N. Y., and Wethersfield, Conn.
Mr. and Mrs. O. T. Harris and Mrs. William Madden of Springfield avenue have returned from Beach Haven where they spent the month of August.
Mrs. Sarah Doyle of 205 Walnut avenue spent several days last week in New York visiting her son-in-law and daughter, Mr. and Mrs. Thomas DeFino.
Miss A. Macintosh of North avenue, east, and Miss Terry Graffe of New York will leave on Saturday on the Monarch of Bermuda for Nassau and Bermuda.
Mr. and Mrs. Lane McLean and family returned to their home in 16 Central avenue Tuesday from Ship Bottom where they passed the month of August.
Fred Casant of 25 Woodlawn avenue, who was taken to St. Elizabeth Hospital Friday night in the Township ambulance for observation and treatment, is reported to be improving.
Mr. and Mrs. Kenneth B. Jones of 429 North Union avenue entertained with a buffet supper at their home Saturday night. Guests were present from Summit and Cranford.
Mr. and Mrs. Carl Dushanek of Westfield announce the birth of a son, Charles Carl, Tuesday at the Brookside Hospital. Mrs. Dushanek was formerly Agnes Frank of Cranford.
Township Committeeman J. Edward Wolf, Mrs. Wolf and daughters, Lillian and Dorothy, of Burnside avenue, returned home Labor Day after spending several weeks at Seaside Park.
Mrs. Lee Miller and four sons have returned to their home in Elizabeth avenue after a two months' stay in Kentucky. They were accompanied home by her sister, Miss Mary Landis Case.
Mrs. Franklin W. Shaw and Marjorie O. Franklin, Jr., of 121 Riverside Drive, have returned from a summer vacation at Sea Girt and at Bassen Harbor, Lake Champlain, where they visited at the home of Mr. Shaw's parents.

TO SPONSOR CARD PARTY
St. Theresa's Guild will sponsor a card party at 8:30 o'clock Friday evening in St. Michael's Parochial School. All games will be played. Mrs. Anthony Fischer is general chairman. She will be assisted by Mrs. William F. Wepler, Mrs. E. V. Ray, Mrs. M. J. Glane, Mrs. Charles Hess, Mrs. B. B. Crowley, Mrs. B. A. Doyle, Mrs. Ethel, Mrs. L. W. Hammond, Mrs. J. J. Sheehy, Mrs. Fred Shearns and Miss Bella Jordan.
"Thieves' Cave" in Hocking county, Ohio, was so named for the reason that in the pioneer days it was a stronghold and place of concealment of bands of robbers who preyed on the settlers, stealing their live stock and other valuables.
Human Sacrifices
Human sacrifices are found more frequently among barbarians and semi-civilized peoples than among genuine savages, and at the lowest stages of culture known to us human sacrifice is hardly heard of.
Banana "Feared" in 19th Century
Until the Nineteenth century bananas were not known outside the tropics, except by reputation. Popular Mechanics.
Lakes Aid Nature
One of the most interesting parts played by lakes in the economy of nature is that of control of the flow of rivers, by checking possible floods.

Methodist Women Will Meet Monday

The Young Women's Auxiliary of the Home Missionary Society of the Methodist Church, will hold a meeting at the home of Mrs. G. B. McDiarmid, 308 Walnut avenue, on Monday evening. The new officers of the auxiliary are as follows: Mrs. B. H. Hales, president; Mrs. H. Le Due, vice-president; Mrs. H. Winkler, treasurer; Mrs. L. Laurion, recording secretary; Mrs. L. Brown, corresponding secretary; Mrs. B. W. F. Randolph, devotion leader; Mrs. Memmo, lessons. The new group leaders for the year are: Mrs. J. M. Killian, Mrs. H. Lorey, Mrs. M. M. Thomas, Mrs. L. R. Churchill. After the business meeting refreshments will be served by the hostesses, Mrs. G. McDiarmid, Mrs. H. Lorey and Mrs. H. Le Due.
Sandpaper Backing Was Originally Just Paper
Sandpaper backing was originally ordinary paper. With the development of strong manila fiber papers these were substituted for the old sandpaper backing material. Later, says a writer in the Scientific American, for special uses, backings of cloth or a combination of cloth and paper gave better service and endured greater stress. The strength of glues and adhesives also was greatly improved.
The primary form of sandpaper has generally been the roll, made in widths up to 36 inches. From this were cut sheets, disks, covers for drums and molded forms to meet special requirements in various industries. The nature of the grits, or abrasive particles, was extensively studied, and countless experiments were made to improve their efficiency. Quartz, though tough, did not provide sufficient strength for severe work in the metal trades. Experiments were made with other materials. Garnet, the same mineral used for jewelry, was found to be highly satisfactory, especially for wood-working, and is used to produce the familiar "red" sandpaper.
A revolutionary development came with perfection of the electric furnace. It was found that aluminum oxide and silicon carbide could be fused at high temperatures to form synthetic minerals which, when crushed, provided grains of amazing hardness with extremely efficient cutting edges. Garnet, aluminum oxide and silicon carbide are the minerals almost exclusively used for sandpaper coatings.

DON'T Keep Money at Home

We read occasionally of persons who hide their money at home rather than trust it to the care of a Bank.
Quite frequently, it is lost, destroyed by fire or stolen. But, in any event, it earns no interest, which means a positive loss of 3%.
This Bank offers a safe depository for all funds, secured by the resources of the Bank together with the resources of the Federal Deposit Insurance Corporation, which is an agency of the United States Government.
Why not make use of the safety facilities offered by this Bank, and, in addition, receive 3% on any money deposited in a Savings Account?

Deposits guaranteed by Federal Deposit Insurance Corporation

Must "Capture" Brides

The marriage ceremony in many parts of Poland is an elaborate pageant. Marriage by capture still prevails, with the groom and his friends dashing up to the bride's house on spirited horses, seizing the bride and running off with her. The procession through the village is led by bagpipers, fiddlers and flutists. The married-and-maiden-friends of the couple wage a mock tug-of-war symbolizing the struggle of the bride whether to marry or remain in single blessedness. The groom and his friends are dressed in costumes of black and red, with hats adorned with peacock plumes. The bride is crowned with a tall wreath of roses and daisies tied with rainbow ribbons; she is sure to have rows and rows of beads around her neck and a bright velvet cloak and silk apron over her full skirt. Dancing and feasting last for two days and nights.
A gold coin, 1,700 years old, was found in the ruined village of Mahanad, in South Bengal, India.
Sand Called Best Insulator
Minute sand is found to surpass the best heat insulator, "Silica aerogel" is reported to be 60 per cent better than materials in use.

HOOPLE CLUB HARVEST PICNIC SUNDAY, SEPT. 9th 2 P. M. TINNES GROVE (End of Bloomingdale Avenue) REFRESHMENTS MUSIC and DANCING BALL GAME and OTHER EVENTS TICKETS \$1.00

Great Apes Pair for Life

The great apes have a strong family sense. This is particularly true of the gorilla and the chimpanzee. In the African bush gorillas live in herds that travel together, the herds being made up of monogamous pairs and their children. A gorilla pair mates for life, and often there will be several children of different ages in a family at the same time, explains an explorer. This pair-step arrangement of children is educationally advantageous, for the youngsters learn from the older children. Many of the lower species of monkeys live polygamously—the baboon, for example, supports a large harem—but practically all monkeys are zealous, and indeed jealous, in attendance on the solitude for their offspring.

Wolverine Is Diligent

The wolverine is a despicable character, according to a zoologist. Larger than a shepherd dog, he prowls alone. He is such a greedy thief that by common repute he is known throughout the Canadian northwest as "the glutton" and "the devil." The wolverine raids cabins and systematically destroys. He will follow a trapper's line of traps and destroy every animal he finds in them. The wolverine is the only animal known which deliberately spoils property and fouls foods which he cannot eat or carry away. He is exceedingly sly and clever; it is almost impossible to keep a wolverine in confinement.
Calcium Abundant in Body
Calcium is the most abundant metallic element in the body. It occurs to the extent of about 2 per cent of the total body weight.

LORENGER-BATES

The marriage of Miss Margaret Bates, daughter of Mr. and Mrs. John Ross Bates, of "Overbrook," to Eli James Loranger, Jr., of Philadelphia, son of Mr. and Mrs. Eli James Loranger, of Larchmont, N. Y., took place at Trinity Episcopal Church at 7:30 o'clock Saturday evening, the pastor, Rev. Frank Magill Sherlock, officiating. The bride was given in marriage by her father. She wore her mother's gown or ivory satin brocade and veil of old rose point lace with orange blossoms, and carried a bouquet of valley lilies, gardenias and orchids. The groom wore a tuxedo. Richard Doane Bates of Elizabeth, and the maid of honor, Miss Carol Van Velsor Hibson, of Cranford, were given in jade green velvet and carried orange gossamer. The bridesmaids were the Misses Ruthicks, Elizabeth Miller, and Elaine Wetherill of Cranford; Miss Winifred Wheeler, of New Haven, Conn.; Miss Sarah Lee Lilly of Baltimore, Md.; and Miss Virginia Harris of Salem, Ohio. They wore Cresent green velvet and carried bouquets of orange gladioli. The flower girl was Diane Mount, daughter of Mr. and Mrs. A. R. Mount. The best man was Franklin Cole Loranger of Larchmont, N. Y. The ushers were Preston L. Kelsey, of New York City; Ralph L. Polk, Jr., of Detroit, Michigan; Joseph Gaillard, of Larchmont, N. Y.; Gardner DeMalley, of Worcester, Mass.; A. Samuel Corkman, Jr., of Englewood, N. J.; and Richard Doane Bates, of Elizabeth, N. J., a brother of the bride. The bride is a graduate of Skidmore College, class of 1934. The groom is a graduate of Phillips Exeter Academy and Williams College, class of 1933, and is connected with R. L. Polk Co. publishers.

MOLEEN-HOLDING

At a quiet wedding at 10 o'clock last Wednesday morning in Calvary Lutheran Church, Miss Katherine Kirkwood Holding of Cranford became the bride of Raymond Howard Moleen of Rahway. The Rev. William F. Behrens, Jr., pastor of the church, performed the ceremony. The bride was attended by Miss Edith Ruth McKee of Cranford, and Herbert Moleen of Rahway, brother of the groom, was best man.

Lutherans to Mark Sixth Anniversary

The Women's Guild of Calvary Lutheran Church will sponsor a dinner in the church from 6 to 8 o'clock Tuesday evening in honor of the sixth anniversary of the establishment of the church and the Guild in Cranford. The committee in charge is Mrs. George Doss, chairman; Mrs. C. G. Galt, Mrs. E. Ernest, Mrs. E. Montag and Mrs. W. Bonhag. The church council will meet at 8:30 o'clock Friday evening in the church, according to an announcement this week by the pastor, the Rev. William F. Behrens, Jr.

TO SPONSOR CARD PARTY

St. Theresa's Guild will sponsor a card party at 8:30 o'clock Friday evening in St. Michael's Parochial School. All games will be played. Mrs. Anthony Fischer is general chairman. Newark Bears Club League Championship

Manager Bob Shaway and his Newark Bears are the champions of the International League for the season of 1934. The Bears clinched the flag in one of the most exciting campaigns in years and they turned the trick on their home lot.

By finishing first, it marked the third consecutive year the Bears have accomplished the feat. This year under the new league rules they will be recognized as the International Champions for leading the field to the wire.

Former stars of the diamond, including many ex-Bears who later made fame in the big show, will engage in an abbreviated game, before the final battle between the Bears and the Orioles.

In addition to the final game of the season, Sunday, an Old Timers' Day will also be staged. Former stars of the diamond, including many ex-Bears who later made fame in the big show, will engage in an abbreviated game, before the final battle between the Bears and the Orioles.

Following the game between the Bears and the Orioles, both of this city, will also be in the lineup. Zimmerman for the past two weeks has been playing with the boys in his neighborhood in order to limber up the muscles.

County Tennis Tourney Will Start Sunday

Those planning to enter the Seventh Annual Union County Tennis Championships are urged to send in their entries at once. Each year anywhere from 15 to 20 are disappointed in not being permitted to play in this annual fixture due to their lateness in filing blanks.

This competition brings together some of the outstanding tennis players in the county. For the past several years about a hundred have competed for these county honors.

As in the past the championships will consist of singles and doubles events. The eliminations in the singles championship will start at 1 o'clock on September 9 and each player will engage in at least one match on the opening day.

The championship trophy which has been in competition for two years was won in 1932 by Dr. Harold Christensen of Summit and in 1933 by Roger Taylor, also of Summit.

The doubles crown is held at the present time by an Elizabeth team consisting of Edward and Albert Bender.

Entry blanks may be secured by applying at the tennis courts in Warrancop Park or at the office of the park commission, Elizabeth.

Ohio Admitted to Union The principal reason for Ohio's admission to the Union in 1803 was that three additional Democrat-Republican votes were needed in the electoral college.

Force of Tropical Storm Explorers assert that nothing can equal the intensity of a tropical storm. A heavy storm in the interior will cause a peaceful stream miles away to overflow its banks and become a raging torrent in less than a half hour.

The Cleveland Region Cleveland was once a town in Connecticut. Due to the phrase "sea to sea" in colonial charters, several states held claims reaching from the Atlantic to the Pacific. The Cleveland region was called New Connecticut.

Where Venus Was Born It was off the town of Paphos, Cyprus, that Aphrodite, the Greek goddess of beauty, was "born of the sea." The flower-covered island is still as beautiful as it ever was.

Expect Many Entries In County Swim Meet

The Eighth Annual Union County Swimming Meet scheduled for the Rahway Swimming Pool at Rahway on Saturday, September 8, should produce a list of entries surpassing those of any previous year, not only in numbers alone but in performance as well. It is expected that strong teams will be entered by the Westfield, Elizabeth and Plainfield Y. M. C. A.'s, and the series of junior swimming meets which have been held at the Rahway and Wheeler pools this summer have done much to promote interest in swimming competition among the younger boys.

A. R. Rule, Westfield's premier swimming star and former U. S. Naval Academy swimming team captain, has again announced his intentions of awarding a trophy to the boy in the junior division who scores the greatest number of points in this meet. Last year's trophy was won by Malcolm Forester of Elizabeth, who took first place in three events.

To be eligible for the junior division a boy must be under 18 years of age. The events in this classification are as follows: 25-yard free style, 50-yard free style, 50-yard breast stroke, and diving. There will also be a 100-yard free style relay race, but points won in this event will not count toward the Rule Trophy.

Gold, silver and bronze medals will be awarded for first, second and third places, respectively, and a trophy will be presented to the team of men and young boys scoring the greatest number of points, as well as a similar award to the women and girls team scoring the most points in their division. Points in the midget class, however, will not be counted toward team trophies.

OUR CHILD AND THE SCHOOL

By Dr. ALLEN G. HIRLAND, Director, Division of Health Education, New Jersey State Department of Public Instruction

Health Protection The opening of schools means the congregation of large armies of children into groups. This means that the chances of disease contagion are greatly increased, especially for children entering school for the first time.

To offset the danger, there are the following procedures which every parent and teacher should support. (1) Abolish competitive attendance determination as a routine procedure. This includes vaccination against smallpox and toxoid injections to prevent diphtheria. Undoubtedly we shall soon accept similar measures against other communicable diseases.

(2) The morning health inspection by the teacher during the first five minutes of the session. (3) Immediate exclusion from school of every child showing any departure from normal. (4) Support the health authorities in asking that all children be given a skin test to determine the presence of tuberculosis. (5) Have a qualified interested physician employed by the board of education. School athletics will be the subject of Dr. Ireland's next article.

First in Shenandoah Valley The first white man to visit the Shenandoah valley was Louis Michelie, a Frenchman, in 1707. He was followed in 1716 by Governor Spotswood and his knights of the Golden Horseshoe.

The Cleveland Region Cleveland was once a town in Connecticut. Due to the phrase "sea to sea" in colonial charters, several states held claims reaching from the Atlantic to the Pacific. The Cleveland region was called New Connecticut.

Force of Tropical Storm Explorers assert that nothing can equal the intensity of a tropical storm. A heavy storm in the interior will cause a peaceful stream miles away to overflow its banks and become a raging torrent in less than a half hour.

Your Garden This Week

By A. C. McLean, N. J. Agricultural Extension Service

The early part of September is the most favorable time for moving and dividing perennials, which require a fertile soil for best results and which generally resent too much moving. There is no real advantage in digging up established clumps and moving them, unless they are not doing well. Very often such clumps will recover with liberal feeding and do splendidly. It would be wise, therefore, to ascertain the results from special feeding before moving, unless the clumps are wanted in a different location, or increased stock seems desirable.

If perennials are to be moved and divided, however, the job should be done immediately. Dig all the root possible and divide into natural divisions, leaving at least three good eyes on each division. There is nothing to be gained in making small divisions, for it will take the plant too long to recover. After planting, dig the soil thoroughly and incorporate some manure or humus in it. Do not cover too deeply. Two inches of soil above the eyes is about right.

Now is the best time to purchase perennials, too, for planting in the border or garden. Be sure to buy good-sized divisions, for they will prove more satisfactory. Three to five-eye plants are the standard size.

This is about the last date to move bearded iris if the plants are to produce much bloom next spring. The latter part of the month is a better period in which to move and set out both Japanese and Siberian iris.

Pansy seed can still be planted, and the amateur will probably have better success with it now than he would have had earlier, but it must be planted soon or the growth will not be sufficient to permit transplanting this fall. The plants will winter successfully in a seed bed and can be transplanted early in the spring, but they will not make as large plants nor will they bloom as early as those that are transplanted in September.

Green Lawns on Terrace Slopes

By Howard B. Sprague, Agronomist, N. J. Agricultural Experiment Station

September is the ideal month for planting new terraces or for repairing damaged turf on old terraces. The steepness of the slope makes it much more difficult to maintain a creditable turf on terrace slopes than on other portions of the lawn. To offset the moisture shortage which is inevitable on slopes, it is highly essential that new terraces be adequately lined and organic matter incorporated at the time the seed bed is prepared. In addition, a complete commercial fertilizer should be used at the rate of 25 to 40 pounds per 1,000 square feet of surface, at the time of planting.

The New Jersey Experiment Station has devised a lawn seed formula for terraces, composed of species which are deep-rooted and tolerant of drought. This mixture may be obtained from a large number of seedsmen, and is known as New Jersey Formula No. 4. Approximately 4 pounds of such a mixture should be adequate for planting each 1,000 square feet of surface.

To avoid washing of the newly planted lawn by rains or artificial watering, the entire slope may be covered with cheesecloth or open-mesh burias. The fabric is held permanently in place by short stakes or staples, inserted at frequent intervals. The young grass seedlings grow through the cloth without difficulty, and the rotting fabric forms a mulch to protect the plants until well established.

Slopes of established lawns from which the soil has been washed should receive a liberal topdressing to fill the depressions prior to any fall treatment. The regular September application of commercial fertilizer should then be made, and seed planted approximately one week later.

The terraced lawn will endure the drought more satisfactorily if mowed at a length of one inch or longer, throughout the entire season, than if close mowing is practiced. It is also desirable that a fairly liberal fertilizer application be made again in late March or early April, to stimulate growth during the season when moisture is plentiful.

Americans Great Travelers Americans know more about the world than the world knows about America. For many years our tourists have spent six times as much money in foreign countries as foreign tourists have spent in the United States.—Collier's Weekly.

Weighted Mountain In and around the Mountain Village of Visp, Switzerland, the land is so steep that the peasants have to tie little iron weights on the legs of the chickens to keep them from rolling off the farm.—Collier's Weekly.

Short Work Day Centuries Old The six-hour working day was given as one of the ideal conditions in Sir Thomas Moore's "Utopia," published in 1516.

DEPENDABLE SERVICE IS WORTH THE PRICE

TRUE, in paying the electric bill, you pay for the current consumed over a stated period. But, however intangible, there is another commodity that is yours also as a user of electric service!

That commodity is—Dependability. And dependability is based on 24 hour a day service. Electricity is a servant which is never idle, night or day.

Dependability is assured by the most modern equipment, up-to-the-minute findings of the research laboratory and the efficiency of well-trained workers.

In order that you shall have the best service at all hours of the day and night your company keeps pace with the latest improvements in the ever-developing field of electricity! It costs money to keep modern—and, thus, dependable. But who would have it otherwise!

You get a lot for a little when you pay for electric service that you can depend upon!

No other item in the household budget gives so much for so little as electricity.

G. O. P. County Card Party to Be Wednesday

The Executive Committee of the Union County Republicans, consisting of Sheriff C. Wesley Collins, Mrs. Helen Glaser, Mrs. Katherine Beatty, Mrs. Esther Middleton White and Mrs. Ellen T. Muir wish to announce the selection of Mrs. White and Mrs. Muir as co-chairmen of the card party, entertainment and dance to be held in the Elizabeth Army on Wednesday evening, September 12.

Mrs. Esther Middleton White, formerly Republican County Committee woman from Hillside and past assistant Secretary of the County Committee, is now associate chairman of the New Jersey Young Republicans in charge of the northern district of New Jersey. She is also Chairman of the Membership Committee of the State Organization of Young Republicans. Mrs. Ellen T. Muir is now assistant Secretary of the Eleventh Ward Republican Associates of Elizabeth and an active worker on the Williams for Mayor Campaign Committee. Both ladies are ardent Hoffman backers.

Girl Dies While Visiting Aunt Here

Carol Emma Davis, 12 years old, of New York City, who had been here visiting her aunt, Mrs. J. J. Bindenberger in 6 Lincoln avenue for several weeks, died last night in the Muhlenberg Hospital, Plainfield.

Funeral services will be held at 2:30 o'clock Saturday afternoon from the Bindenberger home in charge of the Rev. M. J. Poyner, pastor of the Cranford Methodist Church. Interment will take place in Fairview Cemetery, Westfield.

Columbus Aids Wives

Under a law in Columbus a married woman is liable only for her own debts and those arising out of domestic obligations and the rearing and education of children.

One's "Nemesis"

The word "nemesis" is popularly used to denote retributive justice, writes G. R. Turner in the Kansas City Times. Sometimes the individual responsible for the infliction of such justice upon the offender is described as the offender's "nemesis," the word in this instance being spelled with a capital N. Inspiration for the word is derived from Nemesis, the goddess who, according to Greek mythology, was the goddess of divine retribution and who allotted to men and women their exact share of good or bad fortune.

Ship Designs

Ship design during the first few hundred years of the Christian era was greatly influenced by the models produced by the Vikings. The Viking ship of the eighth century was a remarkable example of expert shipbuilding. The vessels of the Norsemen were from 75 to 140 feet long and 15 feet wide, propelled by 32 oars, 10 on each side, and a square sail. The remarkable feature of the design was the planking and highly practicable shape of the hull. Wooden ships today are built on the same general lines.

Keep Weather Records

Both tree rings and varves are mute witnesses to weather fluctuations. Very old trees show thick and thin rings. Layers of clay, called varves, found in the former beds of ancient lakes fed by melting ice sheets, form another record. These layers are due to the annual deposit of sediment. Thick layers were deposited in warm summers when melting was rapid, and thin layers in cool summers.

Copernicus and Galileo, the Early Astronomers

Copernicus preceded Galileo as the founder of modern astronomy, showing that the sun rather than the earth is the center of our planetary system. He feared the criticism and hostility of the church for he had been accused of proceeding in a task opposed to the scriptures. When his work explaining his theories and discoveries appeared, it was dedicated to the pope, in the hope of getting the sanction of the church, but Copernicus died suddenly soon after receiving the first printed copy. He was not punished on account of his doctrines, but both Catholic and Protestant authorities, with some exceptions, condemned them as unscriptural.

Galileo, 70 years later, became an ardent propagandist of the Copernican theory and this brought him into conflict with the church authorities.

In March, 1616, the Catholic congregation condemned all books advocating the Copernican system as a fact, not merely as a theory. Galileo, who had promised to teach it no more, was brought before the Inquisition and after a long trial was ordered to renounce his scientific theory and was sentenced to an indefinite term of imprisonment. This was not strictly enforced, as he was allowed to remain in the homes of his friends.

Ancient University Found

Discovery of a university 8,000 years old was made at Tel el Amarna, ancient city on the Nile.

States Have Nicknames; Some Have More Than One

Some states have more than one nickname. The commonest is usually given first in the following list: Alabama, Cotton, Lizard, Yellowhammer; Arizona, Baby, Sunset, Apache; Arkansas, Bear, Bowie; California, Golden, El Dorado; Colorado, Centennial, Silver; Connecticut, Constitution, Nutmeg; Delaware, Diamond, Blue Hen; Florida, Everglade, Land of Flowers.

Georgia, Empire State of the South, Cracker, Buzard; Idaho, Gem; Illinois, Sucker, Prairie; Indiana, Hoosier; Iowa, Hawkeye; Kansas, Sunflower, Jayhawk; Kentucky, Blue Grass, Corn-Cracker, Dark and Bloody Ground; Louisiana, Pelican, Creole; Maine, Pine Tree, Old Dirigo.

Maryland, Old Line, Cockade; Massachusetts, Bay, Old Colony; Michigan, Wolverine, Auto; Minnesota, Gopher, North Star; Mississippi, Bayou, Eagle, Magnolia; Missouri, Ozark, Iron Mountain, Show Me; Montana, Stub Toe, Buffalo, Treasure; Nebraska, Hatelope, Blue Water, Cornhusker, Sycamore, Silver, Sage Brush.

New Hampshire, Granite; New Jersey, Jersey Blue, Garden, Mosquito; New Mexico, Sunshine, Spanish; New York, Empire, Excelsior; North Carolina, Old North, Tar Heel; North Dakota, Flickertail, Sioux; Ohio, Buckeye, Oldom, Sooner; Oregon, Beaver, Web-Foot; Pennsylvania, Keystone, Steel, Coal.

Rhode Island, Little Rhody, Plantation; South Carolina, Palmetto; South Dakota, Sunshine, Coyote; Tennessee, Volunteer, Hog-and-Hominy; Texas, Lone Star, Beef, Utah, Desert, Beehive, Mormon; Vermont, Green Mountain, Maple, Orange; Virginia, Old Dominion, Mother; Washington, Evergreen, Chinook; West Virginia, Panhandle, Mountain; Wisconsin, Badger, Copper; Wyoming, Equality.

Fly Is Wonderfully Made; Eyesight Is Unsurpassed

Although most of the household fly is wonderfully made, and when just out of the chrysalis, with the sun gleaming upon its wings, beautiful, it belongs to a class of insects known as the Diptera, which means two-winged flies. If we examine it under a magnifying glass we see that on its head are two large compound eyes. This means that instead of having two eyes like most animals, each consists of thousands of tiny lenses. All insects have these compound eyes, and those of the housefly can be divided up into 14,000 separate lenses. In addition to these, the fly has three more situated on top of its head.

On each foot, and it has six legs, there are two sharp claws, looking, when magnified, like the talons of a bird of prey. With these it is able to walk with ease over any rough surface, but it is also provided with moist pads which assist it to run up a window or wall, or walk upside-down on a ceiling. On its pads it picks up and carries all kinds of disease germs.

It has two wings which vibrate at a great speed when in flight. Near the base of each there is a wonderful piece of mechanism, which is really its buzzer, consisting of two tiny drums.—Tit-Bits Magazine.

Sleeping Beauty's Castle

The ancestral castle of the Counts of Elix is in Germany. High on a precipitous rock, rimmed with woods and hills, cloud-reaching with its towers and turrets, it is one of the truest to type, the type that dreamers conceive, when they see ladies fair and knights bold prancing homeward toward the end of a romantic day. The Sleeping Beauty is said to have lived in this castle, or rather that the legends of the old tale wrote it after a visit into its grand halls. It dates back to the twelfth century and has seen many a battle waged about its walls. It might almost be said to be three castles in one, grouped about an inner court, and each of the three is the old tale wrote it after a visit into its grand halls. It dates back to the twelfth century and has seen many a battle waged about its walls.

Greyhounds Liked by Nobility

The modern type of greyhound is a development from a variety which arose in western Asia before the Christian era and was adopted and esteemed in Syria, Egypt and Rome during the classic period. These dogs were taken by the Romans in their conquest of Europe and later became the favorite of nobility and were extensively used in falconry. The earliest notices of the greyhound in literature are those in Ovid's Metamorphoses and in the poem on hunting by Gratian. The greyhound was so highly esteemed that it was protected by the Bible, Burgundian and German barbed codes, and Spelman is authority for the statement that at the court of Charlemagne there was a special officer of the greyhound kennel.

Cultivation of Lemons

Lemons seem to have been unknown to the ancient Greeks and Romans, and to have been introduced by the Arabs into Spain between the Twelfth and Thirteenth centuries. In 1494 the fruit was cultivated in the Azores and shipped to England. As a cultivated plant it is grown throughout the Mediterranean countries and in most tropical and sub-tropical regions.

Shakers Claim There Is Father and Mother Deity

According to the Shaker records the outstanding feature of the religion is their belief in a dual God, both male and female, observes a writer in the Cleveland Plain Dealer. Just as these two sexes exist throughout the animal and vegetable kingdom, as well as the human race, so, too, the Shakers claim, there is a Father and Mother deity. For proof they quote this passage from the Scriptures: "So God created man in his own image; in the image of God created he him; male and female created he him." Genesis 1:27.

They believe the first appearance of the Lord on earth was through Jesus, the second in Mother Ann Lee, who founded the Shaker religion in England in 1749 with a group which broke away from the Quakers. She was the victim of much religious persecution and died to America with seven followers to organize the first settlement at Watervliet, N. Y. She died ten years later but had firmly established the doctrines of Shakerism through her "visions" from heaven.

The Shakers recognize two orders of people on earth. Those belonging to the Adamic Order, who wish to marry and populate the earth, and the Spiritual Order, like themselves, whose members abstain from marriage as Christ and the Apostles did.

England's Dew-Ponds Are Still Puzzles to Science

The dew ponds of England, relics of pre-historic man, remain today one of the few practical inventions of that era," says the Illustrated London News. "The mystery of the dew-ponds still remains; and men are wondering today, as they wondered centuries ago, how and whence the water comes that fills these lonely ponds on the highest hills. On the bleakest ridges of the Sussex Downs, far from shade of tree or protecting cove, where no streams have ever flowed, where no marsh has ever been, there, on those arid uplands, is the dew-pond with the water that never falls. Condensation of the moisture of the atmosphere it may be, cooling into drops that merge into the pond in the chill night air, and so concentrating the evaporation under the summer sun. Go when we will, at all seasons of the year, there is water for the cattle or the sheep that roam the green downlands.

The secret of the making of these ponds is known to but a few. The lime and flint to form the saucer-shaped bed, the layer of straw beneath the covering of clay, the final concrete surface, are all wrought with experience and craft that are a heritage from the past, and then left to dry.

When a Ship Is Born

Owners of a new ship are sometimes at sea over the question of her certificate. The certificate is a document which embodies her measurements for tonnage as made by a board of trade surveyor, notes a writer in Tit-Bits Magazine. Then follows the task of drawing up their "declaration of ownership," an imposing document among the names of which a number of shares, which had to be signed before a shipping master or commissioner of oaths and then handed to the registrar of ships at the vessel's proposed home port. He now writes out with due formality a "Certificate of Registry," giving the name of the vessel, the name of the owner, and the name of the master. With so many ships at sea, the name problem is not easily settled, and of parliament forbidding a new ship to take the name of an existing one. But one vessel registered at Jamaica, a port in Ceylon, successfully avoided duplication. She carried the name of a number of shares, which had to be signed before a shipping master or commissioner of oaths and then handed to the registrar of ships at the vessel's proposed home port. He now writes out with due formality a "Certificate of Registry," giving the name of the vessel, the name of the owner, and the name of the master. With so many ships at sea, the name problem is not easily settled, and of parliament forbidding a new ship to take the name of an existing one. But one vessel registered at Jamaica, a port in Ceylon, successfully avoided duplication. She carried the name of a number of shares, which had to be signed before a shipping master or commissioner of oaths and then handed to the registrar of ships at the vessel's proposed home port.

Various Good-Byes

The people who live in different countries and speak different languages have different ways of saying "Good-bye." The Turk will solemnly cross his hands upon his breast and make a profound obeisance when he bids you farewell. The gentia Jap will take his slipper off as you depart, and say, "You are going to leave my deplorable home in your honorable journey—I regard thee!" In the Philippines the departing benediction is bestowed in the form of rubbing one's friend's face with one's hand. When you leave a Hindu he falls in the dust at your feet. The Fiji islanders cross two red feathers. The natives of New Guinea exchange chocolate, the Burmese bead low.

Booming Armaments

Military forces sometimes face armaments which their own country has previously sold to the enemy. During the war, 120,000,000 of German patent fuses for hand grenades were used by the allies, the British fleet used German gunboats, and Germany bought British copper through Sweden. In 1918, a company in France and a British firm in Constantinople supplied Turkey with the bullets which later mowed down the British and Australian troops in the Dardanelles.—Collier's Weekly.

Animals Obey Commandments

Many of the Ten Commandments are natural laws obeyed by wild animals. Disobedience, murder, theft, adultery—these are taboo in many animal societies as well as in human. Courage is approved, cowardice is condemned, and such qualities as friendliness, gentleness, generosity and bravery are not rare among the wild creatures in their natural environment.

Northern Rhodasia Has Variety of Wild Beasts

Northern Rhodasia is one of the queerest shaped political subdivisions of Africa, says the National Geographic Society. If it were not for a few miles of straight line along its border it might be described as the profile of an oval-shaped top balloon that has been forced out of its normal form by a finger thrust into one side. The finger in the case is a point of land belonging to the Belgian Congo, which so far indents the colony's northwestern border that it comes within 100 miles of meeting the border of Mozambique, a Portuguese colony, which bars northern Rhodasia from the Indian ocean.

Most of the colony occupies the central plateau of Africa. Only a small area is less than 5,000 feet above sea level, while much of it is above 5,000 feet. Elephants and giraffes range over nearly the whole colony. Lions, antelopes and zebras are at home in northern Rhodasia; hippopotamuses are nearly everywhere; and the hardiest, most stubborn, blue-crocodiles and many animals whose names are unfamiliar to the American layman are natives of the region.

Progress has been slower in northern Rhodasia than in southern Rhodesia. Mineral resources of the former—copper, zinc, iron—have not been developed like those of its southern neighbor. Northern Rhodesia has attracted fewer white men, and the natives have not been apt students of agriculture. In the southeastern section of the colony, however, large areas have been made, the chief crops, tobacco and cotton. Cattle raising is the occupation of many of the natives as well as whites.

Missions of California Given Start at San Diego

California missions date back almost 200 years, the first having been founded at San Diego July 1, 1769, by Fr. Junipero Serra, whose name still is honored in the state. In 1924 a celebration was held at Monterey in honor of Fr. Junipero, and a bronze sarcophagus, designed to hold his bones, was dedicated. Fr. Junipero founded all the missions in California, which were called the "beats of the state's settlement and played an important part in the civilization of the Indians.

A writer of 1890 discussing the establishment of the missions, says: "The missions were a happy mixture of the Spanish and the Indian. The Spanish politicians desired new lands for the crown; the missionaries burned to save souls. The state had all the appetites of expansion. It was eager to liberate and civilize the Indians for what they might be in the future." The missions were not mere frontier chapels, but little walled cities, with church, school, quarters, workshop, not only for the religious and educational, but for the material needs of the patriarchal community—and a town of 2,000 Indians and five or six Europeans is not a small thing for circumlocution.

"The first California mission, that of San Diego de Alcalá, was founded in 1769. By the year 1800 there were 18 missions, dotting a line 500 miles long. Three more were established in the next century."

The Blue Danube

Famous for its banks and for a particular letters was not practical on account of the many "and" varying postal rates, then in effect. The old rates were a relic of Colonial times and were based on two factors, distance and the number of sheets of paper a letter contained. Six cents was the rate for a single-sheet letter for three miles not exceeding 30 miles; 10 cents up to 80 miles; 12½ cents, 150 miles; 18½ cents, 400 miles, and for distances over 400 the rate was 25 cents. A letter of two sheets of paper took double these rates, three sheets treble and so on.

Nature Fashions Flowers of Gold

The South Kensington museum in London has been presented with specimens of curious gold "flowers" taken from a depth of 5,700 feet at the City Deep Gold mine near Johannesburg, South Africa. The flowers are said to have been formed by crystallization of the precious metal in a manner similar to that in which "ice-flowers" are formed upon a window pane in cold weather.

Brilliance, Brilliance

The words brilliance and brilliancy are so closely synonymous that the dictionary records them as interchangeable. An exception to that interchangeability might be taken in the event that two colors were to be compared. In such instance, brilliancy is superior, having a degree of quality. One would say, "The comparative brilliancy of two colors" rather than "the comparative brilliance of two colors."—Literary Digest.

The Balkans

The Balkans are a series of ridges of mountains in southeastern Europe. The term Balkan peninsula is applied to the region which contains them, the peninsula of southeastern Europe which was formerly under Turkish suzerainty, except that Rumania and Greece are often omitted in naming the Balkan states. The others are Jugoslavia, Bulgaria, Albania and the remnant of European Turkey.

Pigeon Roost Settlement Wiped Out by Marauders

What was known as the Pigeon Roost settlement in Indiana consisted of several families that made a little community in what is now Scott county, says a writer in the Indianapolis News. This settlement, founded in 1800, was separated from any other by several miles, and was confined to about a square mile of territory. On September 8, 1812 it was attacked by a band of about twelve marauders, said to have been Shawnees who, scouring the locality, going from cabin to cabin, murdered within an hour twenty-two persons—sixteen of them children and five women. Prior to this general killing two men were shot in the woods. Most of the cabin homes were burned. A spirited fight in the house of William Collins, in which three Indians were killed, probably prevented a greater slaughter, as the check to the savages enabled the rest of the settlement to escape to the blockhouses that stood within a few miles. Several spectacular escapes have been recorded. The news of the massacre was carried to Charleston, Clark county, and by 2 p. m. the next day, 200 armed men reached the scene, where only one house remained standing. They took up the trail of the savages, but never caught up with them. Two children were carried away by the Indians. Ginesy McCoy, age three, and his boy, Peter Huffman. They were later returned to their people, but went back to the Indiana afterward. In 1908 an appropriation was made by legislature for a monument of Bedford limestone, 44 feet high, which was dedicated October 1, 1904, at the spot where the massacre victims were buried.

Water Power Was Used in Mills of Ancient Romans

The origin of water mills is buried in the depths of antiquity, for they are mentioned by Pliny, and are said to have been introduced into England by the Romans, writes R. Angus Dowling in the Edinburgh Scotsman. Yet they remained unknown in Scotland prior to the twelfth century, and did not become anything like common throughout the country for a hundred years. Before their introduction wheat was ground by bruising in a quern, a method followed in the Bronze age, and depicted upon the rock tombs of predynastic Egypt. When St. Columba studied under Iona he brought with him a quern each evening, and at Iona caused his disciples to go to grind their daily meal.

Up to the middle of the Eighteenth century water power was only applied to the grinding of oats. The other processes of production were carried by the labor of human hands. After the harvest was cut the grain was separated by the use of the mill. In 1710 James Mellick introduced the use of fanners to remove the loose chaff, but his invention was opposed by religious farmers, who regarded the raising of wind as interfering with the domination of Providence, and it only came gradually into general use. Barley was ground by bruising in a mortar or "knocking stone," until about 1750, when these humble, crude, and wasteful methods were replaced by mills for grinding barley.

No Envelopes With Letters

Prior to 1845, although postage stamps had been under discussion for several years in this country, their use was not practical on account of the many "and" varying postal rates, then in effect. The old rates were a relic of Colonial times and were based on two factors, distance and the number of sheets of paper a letter contained. Six cents was the rate for a single-sheet letter for three miles not exceeding 30 miles; 10 cents up to 80 miles; 12½ cents, 150 miles; 18½ cents, 400 miles, and for distances over 400 the rate was 25 cents. A letter of two sheets of paper took double these rates, three sheets treble and so on.

Contrary to Popular Belief, Goats Do Not Eat in Cans and Hoards, but are Very Clean and Particular about their Food

Contrary to popular belief, goats do not eat in cans and hoards, but are very clean and particular about their food. They eat small twigs and shrubs, but are especially fond of alfalfa and clover hay.

Modern Magicians in Talkway Bureaus Spot Breaks in Cables Miles Away

Prevention of Troubles, Faster Repairs Purpose of Test Boards Connected to Cables in Many Parts of State

Like range finders directing the fire of big guns on objects beyond the horizon, experts seated at centrally located test boards in various parts of New Jersey now act as the eyes of repair forces in "shooting troubles" in telephone cables for miles around. A new bureau of this type was recently placed in service in Trenton having jurisdiction over all aerial, underground and submarine cables in the Trenton, Bordentown, Lawrenceville and Princeton central office districts. At the time this bureau was established, three similar ones were already in existence—the Newark centralized locating bureau, taking care of all cables in the Newark, Paterson, Morris-town, Orange, Elizabeth, Plainfield and Jersey City areas; the Ashbury Park bureau, serving the areas surrounding that city; and the Hackensack bureau, with jurisdiction over all cables in that area. The Newark bureau alone has facilities for locating trouble in over four million miles of wire.

The method used to determine the location of a break in a cable is both too complicated and too technical to be easily understood by the layman. Briefly, though, the key to the method used lies in the fact that the resistance of any conductor of electricity—this includes telephone lines—varies with a number of different factors, the principal one being the material of which the conductor is composed—iron, copper, or brass, for instance—its area, or cross-section; the length of the conductor, and the temperature. Young technicians learning the business find these four vital factors easy to remember by memorizing the word "mait," which contains the first letters of the four factors.

To a visitor at one of these bureaus, the ease and speed with which the test men locate trouble sometimes many miles away seems little short of miraculous. With nothing up their sleeves but a galvanometer so sensitive that a hole no bigger than a pin point in a cable ten miles away causes its needle to go into a mad dance, these modern magicians flip a key or two, perform some lightning calculations, consult a blue print, then tell the repair force where to find the hole. Invariably they are right to within a few feet. The primary purpose of the bureaus, of course, is to speed up the restoration of service when for one of a million

Quarantined in her home because her daughter was ill with diphtheria, the widow of a prominent Albany, N. Y., dentist was able to listen to her husband's last rites recently, although they were performed in a funeral chapel many blocks away. The telephone company made this possible by means of a special hook-up between the home and the chapel. The transmitter on the public line telephone circuit was linked by a pair of leads to a loudspeaker in the home.

## Merchants Redecorate Stores During Summer

**Many Improvements Made; \$5,000 to Be Spent Remodeling South Side Business Block.**

Practically every business house in Cranford has been renovated and re-arranged during the summer months in preparation for the fall rush of business. Many merchants have had both the fronts and interiors of their stores redecorated and are now ready to give the customers added service with new fall merchandise.

Outstanding among the changes contemplated in the business district is that planned by the West End Building and Loan Association of Newark for its building located on the north-west corner of South and Walnut avenues. The association plans to spend approximately \$5,000 in its alterations of the building so as to make it one of the most up-to-date business blocks in town. Workmen are expected to start within a few days.

The property at 25 North avenue, east, known as the Blakeslee building, has been sold by Mr. Blakeslee to the Westfield Realty Association. The new owners plan to have the building taken down and rebuild the property into a new dwelling, eight garages, fifteen gasoline filling station which, upon completion, will be operated by the Pure Oil Company. Mr. Blakeslee, who had occupied the building for twenty-

## Summary of Important Events in Cranford This Summer

(From the Files of The Citizen and Chronicle)

### Thousands Expected to Attend Celebration in North Union Avenue From 7:30 to 11:30 P. M.; 61 Prizes To Be Awarded.

One of the largest gatherings to be held here in years is expected to take place from 7:30 to 11:30 o'clock Saturday night at the second annual "Welcome Home" celebration, which will be held in north Union avenue, between North avenue and Aiden street, under the auspices of the Cranford Business Men's Association and other merchants. Although planned primarily to greet those townspeople who have been away from Cranford on vacation during the summer months, the affair will be open to the public.

Highlights of the evening's program will be an hour and a half band concert by the Union County C. W. S. band; a two hour block dance with music by the Union County C. W. S. orchestra; a half hour program by the Capt. Newell Rodney Fiske Post, V. F. W. Drum and Bugle Corps; and the awarding of 61 merchandise prizes.

The affair will get underway shortly after 7 o'clock Saturday evening when the Fiske Post Drum and Bugle Corps will open its program at the corner of South and Walnut avenues, and parade through the underspass to the band stand in north Union avenue, where they will play until 8 o'clock. At that time, the O. W. S. band, of 20 pieces, under the direction of Edward Biringer, will open their program.

During the band concert program, which will continue until 9:30 o'clock, the 61 prizes will be awarded to the holders of lucky tickets. Edward O. McMahon will act as master of ceremonies and preside at the drawing. Lucky tickets may be secured from any of the merchants awarding prizes, whose names will be found elsewhere on this page. Holders of the lucky numbers must be present during the drawing.

From 9:30 to 11:30 a block dance will be held to music of a 12-piece orchestra under the direction of Ray Farrell.

The block on Union Avenue between North avenue and Aiden street will be roped off and properly policed.

Successor Miss Sarah Edmond, who retired July 1. Board of Education eliminates position of supervising janitor; Joseph Cannon named janitor of Roosevelt School. Cranford scouts plan to entertain the Rev. Kenneth D. Martin, former scoutmaster, October 19. Mr. and Mrs. William Gary of 3 Grove street mark golden wedding date. State Alcoholic Beverage Commissioner Burnett upholds Township Committee in refusing to issue liquor license to Lena Myers.

August 23—Nelm Haddad of Brooklyn was fatally injured when he fell off the running board of a car operated by his nephew, Joseph Haddad of Cranford. The seventh annual clam-bake, sponsored by the Firemen's Club, attracted a large crowd. Mr. and Mrs. Harry Heins entertained 19 members of the Cranford Lions Club at their home in 22 Madison avenue. Fiske Post makes plans for State drum and bugle corps competition at Meadow Grove September 9. Louis Herbert Halsey, formerly of Cranford, died in Rosendale, Calif. Edwige Butlerworth, succumbed in St. Elizabeth Hospital. Mrs. Greta B. Hess of 112 Spring Garden street and the Rev. Herbert Rhine-smith of Rahway were married at Ocean Grove. Announcement has been made of the marriage of Miss Elizabeth Smock of Flemington to William Holcombe of 86 North avenue. East's Word is received of the wedding of Miss Bule Fulton of Phillipsburg to Frank McMahon, formerly of Cranford.

August 30—Winchester Britton elected president of High School Alumni Association. Sergeant-Major Charles C. Hoag is tendered testimonial dinner by officers of 115th Infantry. Board of Education plans to sponsor two public meetings for the purpose of introducing and welcoming Dr. Lloyd N. Morrissett, new supervising principal. Township Committee receives bids for the improvement of 14th street section in Cranford. Meeting of Mayor and Council. Richardson of Cranford dies in Overlook Hospital, Summit.

# Master Kraft LEADS In INSTALLATION

More and more Cranford home owners are learning that  
Master Kraft Oil Heat is not an expensive luxury, but a  
money saving convenience.

**BUILT FOR**

**ENDURING SERVICE**

The Master Kraft has been built of the most endur-  
ing materials and accessories to give long years of  
efficient service and to pay for itself with enduring  
service and savings.

**Small Down**

**Payment**

**Balance in**

**Monthly Payments**

COMPLETE

MASTER KRAFT Cost Is  
in Proportion to Size of Home

It is no longer necessary for the owner of a small cottage to pay approximately  
as much for oil heat convenience as the owner of a large home. Nor is it necessary for  
the owner of a moderate sized home to pay for a burner which has been built to heat a  
manseion.

The development of five different Master Kraft models assures a practical,  
efficient and economical installation which is Custom-Tailored to the exact requirements  
of each individual heating problem.

Consider these two big advantages:  
First—The cost of the Master Kraft model, storage tank and installation which  
will fit your particular heating requirements will be in correct proportion to the size of  
your home.

Second—The amount of fuel oil you will burn will also be in proportion to your  
actual heating needs.

Therefore, due to the wide range of Master Kraft Models it can be truthfully said  
that Master Kraft Automatic Oil Heat is not only Custom-Tailored to your particular  
individual type of home, but it is also Custom-Tailored to your individual type of  
pocket-book.

Visit Our Showroom and Inspect the Master Kraft
