Such stories as these develop all that is manly and lawless in our boys, and teach them lessons that cannot fail to be of immense service to them in whatever criminal career they may adopt. There are a few old-fashioned people who denouce the new juvenile literature in unsparing terms; but that nearly all fathers approve of it is self-evident. They know that their boys are reading novels illustrative of the excellence of crime, but they make no effort to suppress that sort of literature, as they certainly would do did they disapprove of it. Nothing would be simpler than to drive those novels out of existence. All pr that it would be necessary to do would be to "Boycott" the news-dealers who keep them for sale. The truth evidently is that fathers either do not care what A SSIGNEE'S NOTICE. their boys read, or that they have no fault to find with "Jack Harkaway" and the "Boy Burglars." It cannot be that respectable gentlemen who dislike crime, profanity and vulgarity willfully refuse to know what their boys are read ing, or weakly hope that by some happy chance their reading will do them no harm.-Harper's Magazine.

One of a Long Line.

The death of Samuel B. Gardiner, the terth proprietor of Gardiner's Island, at East Hampton, N. Y., was announced Gardiner's Island, which is set be

tween two long arms of the eastern end of Long Island, has been in the possession of one family for 242 years. It was purchased and occupied in 1639 by Lyon Gardiner, the first Englishman who settled in this State. It is nine miles long and two and one half wide, and comprises 3,300 acres. Lyon Gardiner purchased it from the Indians when he was commandant of Fort Saybrook, for a few coats, hats, hatchets, and similar trifles of civilization. It was then called Mauchonock, but he named it the Isle of Wight, after the English island, which was his birthplace. Lyon Gardiner was a military engineer, who came to America in the employ of Lords Say, Seal and Brooke. He lived on his island from 1639 until 1653, having only the Montauk Indians for his neighbors. While he was commandant at Fort Saybrook he had endeared himself to them. He restored to the Montauk Sachem Wyandouek, his daughter, who had been abducted on the night of her nuptials by the Narragansett Chief Ninicraft. The Englishman and his descendants for many years bore the title of Lord Gardiner.

Captain Kidd buried some of his treasure on Gardiner's Island in 1699, a year or two before his execution. John Gardiner was proprietor of the island at the time, and to him the pirate revealed the fact. John Gardiner forwarded the information to the Colonial Government, and a Commission was sent out, and dug up a chest, which contained 783 ounces of gold, 850 ounces of silver, diamonds, rubles, pearls and gold, and silk and

The present colony on the island consists of about 100 men, women and children, who are employed at farming, gardening and stock raising. The 'Squire's mansion is of wood, and was built in 1774. The 'Squire supports a school, a mill, a smithy, and a carpenter's and a shoemaker's shop. His people raise everything for the table except tea, coffee and sugar. The farms turn forth 5,000 bushels of corn and 5,000 bushels oats yearly, and wheat and hay in proportion. There is a stock of 300 cattle, 100 hogs, and 80 horses. Thousands of pounds of butter are annually

made, and at times the dairy has turned out 120 pounds of cheese a day. Besides the island is stocked with abundant fruit

"WE TOLD YOU SO !"

Judge Knapp, by his decision in the declares as plainly on did not know what he was cording to the learned Judge, Dr. Allers The irregular proceedings of the Council, upon which the Mayor based his claim, are familiar to our readers and need not be repeated. The irregularity was so apparent that any one possessed of even a school-boy knowledge of parliamentary rules could have told the

Mayor he was wrong. It is hard to believe that Besson, who has shown himself so sharp in many ways, was so stupidly ignorant as to think himself in the right in regard to the matter. And yet we would rather it were so than that he should knowingly persevere in a wrong course. The opinion of Corporation Attorney Niven at the time was substantially the same as that given in the decision of Judge Knapp on Tuesday, but our infallible Mayor, learned in legal lore, knew better than any lawyer.

The suit just concluded was brought against the city either by his ignorance or knavery, and he should be made to pay the costs. There is another question which has an important bearing on the case. It is his right to veto appointments. The Judge says:

(referring to Hoboken's charter) used in the charter of Jersey City was, in the case of Haight against Love, 10th Vroome, 14, given a construction adverse to the Mayor's right to a voice in the matter of appointment to such office. It was there held that resolutions that were subject to the Mayor's veto were those of a legislative character, and did not extend to appointment of office. Upon this point, between that case and this, there is so close a parallel that the con-struction there adopted must be controlling here. The a tempt to draw a distinction between the provisions of the charter of Jersey City and this, in favor of the right of veto in the Mayor of Hoboken, in my judgment, entirely fails. The provisions in the charter of Jersey City are stronger in favor of the right set up than are those of the charter of Ho boken."

So Besson was meddling in what did not concern him. It was none of his business who the Council appointed City Physician, and his veto power does not extend to the appointment of office.

In point of fact, every statement made by the Advertises in regard to the case, has been borne out by the decision, and Hoboken's knowing Mayor is badly left.'

HORGERN'S WATER SUPPLY.

The Jersey City Sunday Eagle, in an article containing a little news, some illogical reasoning and a slight trace of the "green-eyed monster," thus getteth off a good-natured "sling" on poor little Hoboken:

"In November next the city of Hoboken will bid Passaic water adieu, and thereafter obtain its supply from the Hackensack river above the city of that name. During the past week work was commenced on the reservoir ocated at Union Hill: Mr. Miles Tierney, of this city, has secured the contract for laying the conduit line from the pumping station to the reservoir. Competent engineers claim that the water-shed of the Hackensack is not sufficient to supply Hoboken. It would seem that there is foundation for this claim. The water-shed of the Hackensack river does not exceed one hundred square miles, while that of the Passaic above our pumping station exceeds nine hundred The water company have evidently taken into consideration Hoboken's capacity for beer. The loss that will be sustained by this city in water rents by reason of the change will be large, and our

water department will feel it keenly." Now it does not necessarily follow that the Hackensack will afford an insufficient water supply because its water-shed is so much smaller than that of the decided that we will get plenty of waterclean water. And they are just as certain that the filth-shed of the Passaic as far exceeds that of the Hackensack as does its water-shed.

The Jersey City Water Board, instead of crying over the loss of a trifle of \$80. 000 per annum, had better take steps to get a little water from the Passaic, or it may have some serious cause of complaint. People cannot always drink a mixture of mud. sewage and decayed animal matter and keep healthy. If that sort of stuff is to be run through the pipes that were intended to carry water, Jersey City may have to fall back on Hoboken's beer supply.

HEADS OFF

There is sorrow in the sanctum of 'dead-heads" all over the State. The Pennsylvania Railroad has cut down her "pass" list seventy-five per cent., and people who have never known what it was to pay their fare on the railroad

This wholesale slaughter of the pass or free ride system was found necessary, as in many cases it was much abused. Men having no claim on the company "Guiteau's horrid jests, ribaldry, and held free tickets, many owners of irreverence toward the majesty of justice "press" passes loaned them to friends, were but clutchings at lociora hope. and employees travelled free when they No suspicion that Guiteau was insane were on pleasure excursions instead of disturbed the minds of the judge and "business for the road," thus defrauding the company out of thousands of

STATE SECURITIES.

The appointment of a committee of State Senate to examine into the wor h of the securities held by the Sinking Fund commissioners and the State School Fund, is well timed. Every now and then we hear of the State suffering loss from the depreciation of property upon which the State has loaned money, and although the law is very clear in regard to the matter, saying upon just election. what kind and value of the real estate occurred. Money has in years past been borrowed by State officials, notably ex-Controller Runyon, some of them are far behind with their interest, and a general overhauling is just what is needed. There will be a rattling among the dry bones when the report is made public, but that ought not to deter the committee from doing their duty. The people want to know how their money s invested, something which is only partially given them in the State reports.—Camden Democrat.

GOV. NEAL ON THE MORMONS.

Governor Neal, of Idaho, says, with reference to Mormonism, that the Government must go right at it now and cut it out by the roots. If not, it will have bayonet. "Already," he says, "they think they can defy the United States, and I have seen a mob of twenty thousand Mormons in Utah, march by the Federal Court, when it was in session, and hoot in derision of its authority. I have seen the flag, borne covered with insulting mottoes, and I have seen it dragged in the dirt. We must meet this thing now or it will cost blood-shed to put it down."

Cure for Small-Pox.

We give the following from Hall's Journal of Health for what it is worth: "I herewith append a recipe," a Paris physician says, which has been used to my knowledge in hundreds of cases. It will prevent or cure the small-pox though the pittings are filling. When Jenner discovered cow-pox in England trafficing in stamped bottles. the world of science hurled an avalanche of fame upon his head, but when the most scientific school of medicine in the worldthat of Paris-published the recipe as a panaas unfailing as fate, and conquers in every be paid to the municipality where the taxed astance. Take a spoonful every hour. Either lisease will disappear in twelve hours. For child, smaller doses, according to age. If counties would compel their physicians to use this there would be no need of pestouses. If you value advice and experience, use this for that terrible disease."

Reclaiming the Jersey Wilderness.

A project is now under way for the further cultivation of what was formerly known as the "New Jersey Wilderness." The "Garline of the West Jersey Railroad, near Buena Vista. The soil is a good quality of loam, supplied with an abundance of water and is largely covered with valuable white oak timber. Three sites have been selected for the building of mills, and it is also intended to lay out three towns along the line of the railroad. One of them, which is to be named Passaic. "Competent engineers" have Garfield City, is to stand between Buena Vista and May's Landing; another, Oakland City, will be between May's Landing and Atlantic City, and the third, for which no name is yet mentioned, between Millville and Seaville. The capital stock of the company has been divided into 30,000 shares of \$10 each.

New Jersey Ahead.

The remark that "New Jersey is forging ahead as a manufacturing State," is fully confirmed by an extract from the report of the Bureau of Labor Statistics. The fact of the business is, New Jersey is the largest State of her size in the Union, both in manufacturing and agriculture. Her brains command the first place in the Cabinet of the Government; her locomotives are the best in the world; her pottery puts English plates and platters in a cold sweat; her glass gives the Bohemian ware the "blues;" her silks put the French to their trumps for quality and beauty; and her eyes are as sharp, her many a country editor, and howling in wits as quick, and her talents as diversified the homes of impecunious professional as those of any State in the world.—Enthusiastic Exchange.

Copper Mines in Jersey.

Just before the Revolutionary war a copper mine was discovered and worked, near Griggstown. During that war work was discontinued, the mine gradually became dilapidated, shafts rotted away, and it was was done. A few months ago, a company from New York examined the old ruins and announced their intention of starting operations. This they have done, new shafts have been erected, the water drawn out, and ore is now being taken out every day. The copper extracted appears thus far to be very pure

Stone Fights.

The dangerous practice of stone fighti which is fashionable among the young street Arabs of certain parts of this city, has been often alluded to in the papers. These boys engage in pitched battles with stones, clubs and other missiles, and so bold are they that crowd of them will not scruple to attack a grown man. They are fleet of foot and can keep at a safe distance, and generally man-age to escape from a pursuing policeman. In fact when they spy a uniform, "then is

that the police had redoubled their efforts to capture some of their number. The favorite battle ground is on the vacant meadow lots, and one day last week, while stones were flying thick and fast, Officer Breen "sniffing the battle from afar" came down on he boys silently but swiftly. Immediately route, ruin, panic, scattered all" but the officer collared two prisoners, Williams, aged fifteen, and Charles Volk, aged thirteen, both from the "Hill" and marched them off. Re-

corder McDonough fined them \$5 each.

Yesterday morning Detective Gallagher arrested three youngsters for the same ffense, on warrants issued by the Recorde They were Wm. Kennedy, Michael Duffey and Wm. Crage, all of this city. They atacked Wm. Glock with stones, and they were held by the Recorder for trial in \$100 apiece on a charge of assault and battery hope this will serve as a warning, but we are still of the belief that some more vigorous punishment than fines will have to be resorted to before the nuisance can be abated.

Our "Devil" Says

The cold wave brought quite a tramp wave to the station house, during the fore part of the week.

Some mayors are born to cities: some cities acquire mayors, and some have mayors thrust upon them. Besson made eight sheets of waste paper

this week out of official letter-heads, and called 'em five vetoes. I saw the word "hugger-mugger" in one of Besson's vetoes and I asked Webster what

it meant. He says: Secret, clandestine, close, sly, confused, disorderly, poor, mean, contemptible, as "hugger-mugger" doings hugger-mugger" condition. Now, which did his Honor mean in the veto? How do our City Fathers like their doings to be called hugger-mugger?

Vaccination.

Physicians report that the wholesale vaccination that has been going on for some ime is beginning to have its effect, and that the spread of small-pox is being checked. A marked decrease is reported in the number of new cases in the county, the people now being so generally vaccinated that they de not contract the disease when exposed to it Last Saturday 243 people were vaccinated in the City Hall, 200 on Monday, 242 on Tues day, 198 on Wednesday, 50 on Thursday, and 100 yesterday, making a total of 1,033 sines our last issue. The vaccinating corps wil continue the good work until February 1, and will be in the Council Chamber at the City Hall every afternoon from 2 till 4 o'clock until that date.

Across the Ferry.

We have often heard complaints from people obliged to cross the Barclay street erry daily, of the state of the sidewalk or Barclay street, from West up to Greenwich street. They are very narrow at best, and are so crowded with fruit stands and market stands of every description, as to be almos impassible. Thousands of people crossing the ferry from this city are obliged to pass up and down the sidewalk morning and light, and in view of the difficulty they have had to contend with, it is a wonder some formal complaint has not been lodged with the municipal authorities of New York long ago A very short time since, a number of commuters on the D. L. & W. R. R., sent in a empower the Common Council or Board of petition to Mayor Grace, of New York, Aldermen in any city to appoint a City Clerk making such a complaint. The petition re ceived his personal attention, and assurance Clerk's term of office to be the same as that was given that the matter would receive immediate attention.

Bold Attempt at Bobbery.

One of the boldest attempts at robbery that as ever been made in this city, occurred on Monday night, at the feed store of James Brock, corner of Clinton and Second streets Brock sleeps over the store and, being waken up by a noise in the room beneath about midhe went down stairs and a peared in the rear of the store, four men ran since, is reported to have been found on the withstanding the severe cold weather, the out of the front door, which had been forced open, and were joined by a fifth man, who then ran away.

Hourigan and Aymong promptly appeared on the seens. They found the safe, which of the floor, and a horse and wagon standing in front of the door. Nothing was missing and it was evidently the intention of the bur glars to carry the safe away, and they would have succeeded if Brock had not interrupted their midnight labors. The safe contained about \$75. It has been ascertained that the wagon was stolen on the same night from 28 Greenwich street, New York. Henry Martin Jr., of 601 East Fourteenth street. New York claims the horse, which was hired from him. Chief Donovan has a clue and Detective Gallagher is working it up.

Interesting Statistics.

Roundsman Hayes, of the Hoboken police force, has been compiling some very interest-ing statistics. Before the Board of Police Commissioners was formed in 1870, there were thirty men on the force. The Board afterwards increased the regular force to forty-five, and it now comprises a chief, two aids, two roundsmen and forty patrolmen besides four chancemen. The oldes on the force is Officer Carroll, who was appointed by the Mayor and Council, June 6. 1862. Aid Ringe is the next, having been appointed twenty days later. Officers Hourigan Kaiser and Kerrigan and Chief Donovan were appointed in 1866. Since 1870, the force has ost twenty-three men, either by resignation, dismissal or death, and their places have been filled by appointment. So far as faxes bought by "third parties," they no longer concern us,—the city having received her due—but it is well to state they are only for the years 1875 and 1876, amount to \$155.54, without interest, and were bought in by Mr. Goodrich. This clause, as inserted in your resolution, has evidently deceived some of your members. The amount due the city for taxes is \$674.40, without interest, and includes the years 1870, 1871, 1872, 1873, 1874, 1877, 1878, 1879, 1870 and 1881; the amount due for assessments is \$1.684.42, without interest—Twelfth and Thirteenth streets improvements—a total of \$2.355.82, without interest. It is also well to state here that the remainder of the lots of the block, with the exception of the ceitaer one on Adams street, have fallen due, and they are on the rear street—Adams street—thats.

The consideration then for the release of all taxes and assessments due the city is that the lots he filled up and a paper factory erected thereon, whenever it may so please the owner. By this he can hold the property on speculation without investing a dollar. Is this business-like? Is this advisable? Granted the proposition be in good faithgranted the lots be filled and the factory erected within one year from date—would the consideration justify us, acting for the best interests of the city of Hoboken and the property owners in that vicinity who have paid their taxes and assessments, in cancelling this great indebedness? I think not.

and catching the light from a larger one opposite, in one of the offices of Adams Express Company, at 59 Broadway, New York-the office occupied by Mr. W. H. Hall, head of the delivery departmentis a plainly finished but neatly framed chromo about two and one-half by three feet in size, which is looked upon by hundreds of people daily, on many of whom it has a wonderful and salutary effect. It represents a flight of half a dozen rough stone steps leading from the swarded bank of a placid lake to a little rustic temple set in the rugged side of the mountain which rises in stupendous proportions in the background all extended, holding forth a small, dimly defined package, while seated on the sward at the foot of the steps an aged sward at the foot of the steps an aged plight, harefooted, lame and decrepid, bears a staff in one hand, and in the other holds before his dim eyes a small bottle, whose label he eagerly scans. This label bears the words "St. Jacobs Oil the Great German Remedy." Simple as this little chromo appears in its unostentatious position, it has an influence which it would be difficult to estimate. "It is to that picture and the persuasions of Mr. Hall," said Mr. Edward J. Douglass, a gentleman connected with Mr. Hall's department, "that I ed with Mr. Hall's department, "that I owe my present ability to perform my work. Some weeks ago I was violently attacked with sciatic rheumatism, and hour by hour I grew worse, and nothing my family or the doctor could do gave were given up to die by both their physicians and friends."

"You speak of your own experience, what was it?" my family or the doctor could do gave me any relief. I began to think in a few days that my case was hopeless and that I was doomed to be an invalid and helpless cripple for life. But at last I thought of that picture which I had so often looked at with but little interest, and then Mr. Hall came to my bedside, and talling me how St. Jacobs Oil had and then Mr. Hall came to my bedside, and telling me how St. Jacobs Oil had cured him of a worse and longer standing case than mine, urged me to use the same remedy. I did so that very night, directing my wife not to spare it but to apply it thoroughly according to the directions; this she did with a large piece of flannel cloth saturated with the cloth to the affected parts. The next morning I was free from pain, and although a little sore it would have proven true if I had not fortunate would have proven true if I had not fortunate. We made used the remedy now known to a warner's safe Kidney and Liver Cure."

"And this caused you to manufacture it?"

"No, it caused me to investigate. I went to the principle cities with Dr. Craig the discoverer, and saw the physicians prescribing it and sush that Dr. Craig the discoverer, and saw the physicians prescribing it with its facilities, to supply the medicine to thousands who wanted it. I therefore determined, as a duty I owed humanity and the tothousands who wanted it. I therefore determined, as a duty I owed humanity and the solution in the cloth to the suffering, to bring it within their reach and used the remedy now known as warner's safe Kidney and Liver Cure."

"And this caused you to manufacture it?"

"No, it caused me to investigate. I went to the principle cities with Dr. Craig the discoverer, and saw that D affected parts. The next morning I was free from pain, and although a little sore in the hip, was able to dress myself, and the next day resumed my duties in the office as sound as a dollar. Here I am now in full health and strength, having heal no touble of phonomerism or other courteboary answered the questions that were pain since. Whenever I see one of our drivers or any other person who shows any symptoms of lameness or stiffness, I point him to the picture in Mr. Hall's office, and then direct him to go for St. Jacobs Oil at once."-N. EXCITEMENT IN ROCHESTER.

The Commotion Caused by the State-ment of a Physician.

An unusual article from the Rochester, N. Y. Democrat and Chronicle, was republished in this paper and was a subject of much conversation, both in professional circles and on the street. Apparently it caused even more commotion in Rochester, as the following from the same paper shows :

same paper shows:
Dr. J. B. Heaion, who is well-known not only in Rochester but in nearly every part of America, sent an extended article to this paper, a few days since, which was duly published, detailing his remarkable experience and rescue from what seemed to be certain death. It would be impossible to summerate the personal enquiries which have been made at our office est to the validity of the article, but they have been so numerous that further investigation of the subject was deemed an editorial necessity. been so numerous that further investigation of
the subject was deemed an editorial necessity.
With this end in view a representative of
this paper called on Dr. Henion at his residence on St. Paul street, when the following
interview occurred: "That article of yours,
Doctor, has created quite a whiriwind. Are
the statements about the terrible condition
you were in, and the way you were rescued,
such as you can sustain?"

"Every one of them and many additional
ones, Few people ever get so near the grave
as I c"d and then return, and I am not surprised
that the public think it mavvelous."

"How in the world did you, a physician,
come to be brought so low?"

alls them, and I am sorry to say that too (ew physicians do either."

"Tisst is a strange statement, Doctor."

"But it is a true one. The medical profession have been treating symptoms instead of diseases for years, and it is high time it ceased. We doctors have been clipping of the twigs when we should strike at the root. The symptoms I have just mentioned or any unusual action. It irritation of the water channels indicate the approach of Bright's disease even more than a cough announces the coming of consumption. We do not treat the cough, but try to belp the lungs. We should not waste our atime trying to relieve the headach, stomach, pains about the body or other symptoms, but go directly to the kidneys, the source of most of these aliments."

"This, then, is what you meant when you

said that more than one-half the deaths which occur arise from Bright's disease, is it Doctor?

Precisely. Thousands of so-called diseases are torturing people to-day, when in reality it is Bright's disease in some one of its many forms. It is a Hydra-headed monster, and the blockers of the said of the sa forms. It is a Hydra-headed monster, and the slightest symptoms should strike terror to every one who has them. I can look back and recall hundreds of deaths which physicians declared at the time were caused by paralysis, apoplexy, heart disease, pneumonia, malarial fever and other common complaints, which I see now were caused by Bright's disease."

"And did all these cases have simple symptoms at first?"

Lyman's Gelebrated Ales see now were caused by Bright's disease."

"And did all these cases have simple symptoms at first?"

"Every one of them, and might have been cured as I was by the timely use of the same remedy—Warner's Safe Kidney and Liver Cure. I am getting my eyes thoroughly opened in this matter and think I am helping others to see the facts and their possible danger also. Why, there are no end of truths bearing on this subject. If you want to know more about it go and see Mr. Warner himself. He was sick the same as I, and is the healthlest man in Rochester to day. He has made a study of this subject and can give you more facts than I can. Go, too, and see Dr. Lattimore, the chemist, at the University. If you want facts there are any quantity of them showing the alarming increase of Bright's disease, its simple and deceptive symptoms, and that there is but one way by which it can be escaped."

Fully satisfied of the truth and force of the Doctor's words, the reporter bade him good day and called on Mr. Warner at his establishment on Exchange street. At first Mr. Warner was inclined to be reticent, but learning that the information desired was about the alarming increase of Bright's disease, his manner changed instantly and he spoke very earnestly:

"It is true that Bright's disease has increased wonderfully, and we find, by reliable statistics, that in the past ten years its growth has been 250 per cent. Look at the prominent men it has carried off: Everett, Summer, Chase, Wilson, Carpenter, Bishop Haven and others. This is terrible and shows a greater growth than that of any other known complaint. It must be plain to every one that something must be done to check this increase or there is no knowing where it may end."

"Do you think many people are afflicted with it to-day who do not realize it, Mr. War-

Hanging between two small windows,

"Do you think many people are afflicted with it to day who do not realize it, Mr. War with it to day who do not realize it, Mr. Warmer?"

"Hundreds of thousands. I have a striking
example of this truth which has just come to
my notice. A prominent professor in a New
Orleans medical college was lecturing before
his class on the subject of Bright's disease. He
had various fluids under microscopic analysis
and was showing the students what the indications of this terrible malady were. In order to
draw the contrast between healthy and unhealthy fluids he had provided a vial the contents of which were drawn from his own person. 'And now, gentlemen,' no said, 'as we dous proportions in the background all covered with a rank luxuriant growth of foliage in brush and tree. In the open door of this little temple stands a half concealed figure, with an arm and hand extended, holding forth, a small dimly he said; 'Gentlemen, I have made a painful discovery; I have Bright's disease of the kidneys' and in less than a year he was dead."

'You believe then that it has no symptoms

courteously answered the questions that were propounded him : "Did you make a chemical analysis of the case of Mr. H. H. Warner some three years

case of Mr. H. H. Warner some three years ago, Doctor?
"Yes, sir."
"What did this analysis show you?"
"The presence of albumen and tube casts in great abundance."
"And what did the symptoms indicate?"
"A serious disease of the kidneys."
"Did you think Mr. Warner could recover?"
"No, sir. I did not think it possible. It was seldom, indeed, that so pronounced a case had, up to that time, ever been cured."
"Do you know anything about the remedy which cured him?"
"Yes. I have chemically analyzed it and

which cured him?"

"Yes, I have chemically analyzed it and upon critical examination, find it entirely free from any poisonous or delecterious substances."

We publish the foregoing statements in view of the commotion which the publicity of Dr. Henion's 'article, has caused and to meet the protestations which have been made. The standing of Dr. Henion, Mr. Warner and Dr. Lattimore in the community is beyond question and the statemets they make, cannot for a moment be doubted. They conclusively show that Bright's disease of the kidneys is one of the most deceptive and dangerous of all diseases, that it is exceedingly common, alarmingly increasing and that it can be cured.

It is true I had frequent headaches; felt tired most of the time; could eat nothing one day and was raveneus the next; felt dull indefinate pains and my stoused was out of order, but I did not think it meant anything serious."
