HOBOKEN, N. J., SATURDAY, SEPTEMBER 23, 1882.

PRICE THREE CENTS.

BICENTENNIAL CELEBRATION.

Great Military and Civic Display at Philadelphia—To Continue Four Days.

The following is a general outline of the more prominent features of the Bi-Centennial celebration in Philadelphia, commencing October 24th, and lasting four days. It is promised by those in charge that the observance of the two-hundredth anniversary of the founding of Philadelphia and the Commonwealth of Pennsylvania will be the grandest celebration ever held in that city, not excepting the Centennial.

First Day—Parade of civic bodies, including thirty-five companies from the State, the old firemen of Philadelphia, the paid Fire Department, who will entertain the visitors; the United States Departments, the Post Office, showing the rise and progress of the postal service. The U. S. Mint will display the process of coining, striking off a commemorative medal; the City and State Departments, the secret and benevolent societies, temperance organizations, the butchers in magnificent costume. The Marine Band, of Washington, will be at the head of the U. S. Department. Grand tableaux of the landing of Penn at Dock street wharf; naval display on the Delaware, ending with magnificent display of fireworks in the Park, with pieces illustrating the early history of Philadelphia. At least 25,000 men will be in the procession.

Second Day—Parade of the different trades, manufactories and foundries of Philadelphia, with wagons, all showing the various modes of manufacture, wood-ware, hardware, furniture, printing, dyeing, weaving, sewing machines, engine building, tinware, household goods, upholstery, etc. Grand parade of the Pennsylvania Railroad, showing the rise and progress of railroading and car building; 30,000 mechanics and manufacturers will be in line.

Third Day—Musical entertainment. Allison's Hall (old Machinery Hall) engaged, lighted by electric lights and fitted up to accommodate 15,000 persons; 2,000 singers on the platform; all the principal Welsh and German singing societies and choirs; \$1,250 in prizes, and reception to the societies in the evening.

Fourth Day—The greatest military display ever seen in Pennsylvania; 25,000 State and visiting troops and Grand Army posts; all the National Guard of Pennsylvania and New Jersey; visiting corps from Boston, Providence, New York, Baltimore and other points; 10,000 men of the Grand Army; arrangements will be made to entertain all visiting delegations of soldiers. In the evening the city will be entirely illuminated, and receptions at the Academy of Music, Horticultural Hall and other places.

During the four days the city will be magnificently decorated; the United States lending the assistance of all departments.

Why He Left Her.

"Do you love me?" The words came softly forth from ruby lips still dewy with the kisses of the one to whom they were spoken, and Gladys McMurry knew that Ethelbert Freelinghuysen was no dissembler, no trifler with women's hearts, but ever kept within the precincts of his soul a tiny shrine at which there burned forever and ever a flame of pure and passionless affection for her upon whom he had lavished the treasures of his heart. Wild and reckless though he might sometimes be, caring naught for the voice of conscience, but plunging madly forward into the darksome labyrinths of sin, even at times smoking cigarettes, Gladys knew that her voice could ever call him back to purity and repentance, her dimpled hand lead him in paths that were gemmed with the roses of innocence. And so, when he asked the question that she loved so well to hear, there came to her pretty face a joyous smile, and the drooping lips that overhung the radiant mouth quivered with pleasure. But she did not answer his words. Putting her dimpled arms around his neck, she kissed him in the warm, North Side fashion that was so dear to his heart, and then a little head nestled confidently upon his shoulder, and the gentle pressure of a soft, warm hand told him the story of how he had won the first affection of a pure, and trusting heart.

"But this is not all," she said. "Kisses and embraces and fair words are very pleasant things—sweet lips and warm arms and loving eyes—but truth and sincerity and loyalty and purity are very much rarer, and infinitely rarer."

"Do you mean this?" asked Ethelbert, bending forward and looking at Gladys with a fixed, nailed-at-the- corners-and-clinched-on-the-other-side look.

"I do," she answered, speaking the

words in the slow, New-York-Evening-Post fashion that became the sensuous grace of her Konosha feet so well. "Then," said Ethelbert, with a grave tenderness that showed what a daisy liar he was, "I will not deceive you longer."

"What do you mean?" said Gladys, hurriedly.

"I mean," he replied "that I have joined the Anti-ice Cream Benevolent and Protective Association;" and, turning suddenly, he began chasing a horse car, leaving the girl who loved him so well alone and desolate.—Chicago Tribune.

INVISIBLE POISON.

How it Works Its Way Into the Body and How to Counteract it.

One of the great scourges of the present year in all parts of America has been malaria. This is a trouble so treacherous in its nature and so dangerous in its results as to justify cause apprehension wherever it has appeared. But there are so many erroneous ideas upon the subject that a few words are in order at a time when people are subject to malarial influences.

Malaria, which means simply bad air, is the common name of a class of diseases which arise from spores of decaying vegetable matter, thrown off from stagnant pools or piles of vegetation undergoing decomposition. The spores, when inhaled with the breath or taken into the system with water, soon enter the blood and, germinating there, soon find a foothold, whereby the whole system is poisoned and the various functions disordered. When the germ theory of disease was first advanced it was supposed that these spores were of animal nature, and like the bacteria in diphtheria were propagated in the blood, but they are now conceived to be of vegetable origin, like the fungi found on decaying wood or in cellars. The source of this state of the air is generally swamps or stagnant pools, which, partially dried by the hot sun, send forth vapors loaded with this malarial poison. These vapors descend to the earth in the night, cooled by the loss of temperature, and breathed by sleepers are readily inhaled. Hence, persons living near stagnant pools or marshes are liable to be afflicted with chills and fever, and such localities are never healthy, though they are more so when the streams flowing into them are pure, and also when the water is high. Again the drainage of houses, slaughter houses, barns, etc., are a fertile source of malaria. One will often notice in coming into the neighborhood of one of these sluggish streams that pass through almost every village a most villainous smell caused by the offensive refuse which communicates its bad odor to the atmosphere, especially on hot days. This absorbed into the system by the lungs or taken in through water, which also absorbs it from the air, poisons the blood and deranges the whole system. This poison is also developed in force in wells and springs when they become low, and the result of drinking these is the same as breathing the poisonous air. In a time of drouth the great quantity of vegetation that dries up in the meadows, stubble fields and pastures, the corn fields and forest lands produces the same effluvia. On the prairies when large tracts of prairie ground are turned over, the decaying vegetation is a widespread cause of malaria.

The evils which follow malarial poisoning are almost infinite. Disease of a malignant and dangerous nature, accompanied by symptoms the most distressing are certain to manifest themselves and life is a burden so long as this poison remains in the system. The indications of malarial poisoning are loss of appetite, shortness of breath, pains about the heart, wasting of flesh and strength, despondency, nervousness, chill sensations, unaccountable lassitude, dull pains in various parts of the body, headaches, dizziness, a coated tongue and dry mouth, night sweats, muscular debility, puffing under the eyes, an unusual color, odor or sediment about the fluids passed from the system, etc. Any one of the above symptoms may be an indication of malarial poison in the body which necessitates immediate and careful attention.

But if malarial poison could not find a lodgement in the human body, it would be just as harmless as the oxygen of the air. The great difficulty is that, after being absorbed into the system, it produces obstructions in the stomach and lungs, clogs the circulation of the blood, affects the kidneys, liver and other organs, and brings on diseases of a most dangerous character. There is only one known way by which these diseases may be avoided or cured after they have once made their appearance, and that is by keeping the great purifying organs of the body in perfect health. These organs are the kidneys and liver. No one whose kidneys or liver are in a perfect condition was ever afflicted by malarial poison. And when these organs are disordered, they not only permit, but invite these diseases to make their inroads into the body. It is now admitted by physicians, scientists and

the majority of the general public that one medicine, and only one whose power has been tested and proved, has absolute control of, and keeps the kidneys and liver in constant health and hence prevents malarial sickness. This remedy is Warner's Safe Kidney and Liver Cure, the most popular medicine before the American people, and sold by every druggist in the land. It fully counteracts the evil effect of malarial poison in the system, and not only banishes it, but restores the members which that poison has weakened. How well it does this can be learned from the following:

KANSAS CITY, Mo., June 26, 1882.—Moving from the State of New York to the western country, I was attacked with malaria and general debility. I had lost all appetite and was hardly able to move about. I had tried a great many remedies, but nothing bettered my condition until I began using Warner's Safe Kidney and Liver Cure, which seemed to help me right away, and I feel as well as I ever have in my life. It is a blessing to people in this malarious country.

C. F. WILLIAM, of William & Co., Hardware, 1412 Grand ave.

This great remedy has proven its power in innumerable cases, and is to-day more extensively used in malarial districts, whether in cities or in the country, than any or all other remedies for the cure of the same class of disease. No one can afford to trifle with the first symptoms of malaria, but instant care should be taken to check it on the start before its evil influences overshadow the life.

WARNER'S SAFE KIDNEY & LIVER CURE.
