## IN MEMORIUM

ALL DECEASED MEMBERS

Matawan Borough, N.J.

To all of you gathered here to celebrate the 100th Anniversary of Washington Engine Company, we extend the hand of welcome and warm greetings.

The membership of the Department, and particularly Washington Engine Company, is grateful for your response and aid in commemorating this event, and we convey to you our appreciation and thanks for your presence here today.

We extend to you our hospitality and hope that your stay here will be most pleasant and joyful.

To the citizens of Matawan and vicinity, we extend to you our sincere thanks for your generosity and cooperation in helping to make this centennial celebration a success. It is very gratifying to know that we have so many wonderful people to call upon for assistance when needed.

We, of the Boro of Matawan Fire Department, wish to assure each and every one of you that the work started by our forefathers shall continue for centuries to come, That, with this event, we are rededicating ourselves to serve you faithfully and efficiently with an ultimate goal of minimizing fires, loss of property and human life.

# Washington Engine Co. #1

Soon after the turn of the 19th century, it was obvious that Matawan was rapidly becoming a growing community and a thriving business place. Indication of this growth were quite evident because of the number of people coming hereto settle. Industries were being established, retail stores were opening, new homes were being built, and to meet the needs of its citizens, the first bank in Monmouth County opened here.

Among the many people who settled here were a few men who visualized the need of fire protection for the community. Soliciting the aid of many towns people and getting men that were interested and willing to become volunteer firemen, they were instrumental in organizing on January 28, 1869 the first fire company in this shore area; namely, the Washington Engine Company No. 1. Members present at the organization meeting included the following: John Cumack, Lawrence Cartan, Irving Cody, William Schank, Fredrick Stark, William Atkinson and William Parker. The meeting was held in the same building on Little Street which is still occupied by the Fire Company today.

On June 11, 1869 the Washington Engine Company purchased from the Guardian Engine Company of New York a used hand pumper fire engine. It was delivered to Matawan by steamer and immediately placed in service.

The method used to sound the alarm for a fire and to summon members for fire duty was by bell, which was tolled by hitting the bell with a heavy hammer. When responding to an alarm of fire, the pumper was taken out of the fire house to the street then hitched to a team of horses supplied by the William Van Brunt Stage Coach Company which then proceeded to the fire. In later years the pumper was often hitched to a trolley car that ran the length of Main Street. Of course, no fare was charged for this service. The source of available water was cisterns.

Washington Engine Company No. 1 now being the only Fire Company in this area equipped with a fire apparatus soon became notable and rapidly gained recognition.

Request for the services of the engine and the Fire Company came from many areas. A few of these worth mentioning are:

1. September 24, 1877 the fire engine was hitched to a team of horses belonging to John C. Straub and responded to a call of a disastrous fire in Keppart. For the prompt, courageous, and efficient manner Washington Engine Co. performed at this fire brought great praise from the people of Keppart, and in appreciation for its services, the citizens of Keppart presented the Fire Company with a copy of a resolution adopted by that body. The resolution read as follows:

Matawan Borough, N.J.

No. 1

No. 1

# Washington Engine Co. #1

On Friday night, Sept. 24, 1877, our Town of Keypart was visited by a most terrific conflagration far exceeding any other ever experienced in our county and being for a long time at the mercy of the fiery element without suitable apparatus or equipment to meet such an emergency and many of our citizens being well nigh exhausted by their efforts to subdue the fire. At such a time a new hope and energy was imparted by the timely arrival of Washington Fire Engine Company No. 1 of Matawan.

Therefore, be it resolved that we the citizens of Keypart do hereby express our heartfelt thanks and gratitude for their prompt response to our cry for help for their cheerful and laborious efforts when upon the ground and the efficient manner in which they very materially assisted in stopping the fire and protecting the almost unprotected homes of our citizens and for their kind & gentlemanly deportment while here.

Resolved that a copy of these resolutions be engraved on parchment and presented to Washington Fire Engine Company No. 1. of Matawan.

Resolved that the secretary be authorized to furnish a copy of these resolutions to the county papers.

S/George Cooper  
Secretary

S/Thomas R. Brown  
President

This resolution beautifully embossed on parchment and appropriately framed, remains a prominent part of the decor in the Washington Engine Company meeting room.

2. September 11, 1886 the Washington Engine was hitched to a team of horses and responded to a call of a great fire in Freehold. The Taylor Hotel and the Perine store were destroyed in that fire.

3. February 4, 1890 the Washington Engine was put aboard a flat car at the railroad station and responded to a call of a great fire in South Umbay.

For many years Washington Engine Company No. 1 continued to render great service to Matawan and its neighboring communities. During this time the Company continued to grow and progress. Activities and events other than the saving of life and property by fire include the granting by the state legislature a charter to Washington Engine Company No. 1 in March 1870.

Matawan Borough, N.J.

# No. 1 Washington Engine Co. #1 No. 1

The organizing of the Hook and Ladder Co. as a second fire fighting unit in Matawan took place in the year 1877.

George L. Sickels was elected the first foreman of Washington Engine Company No. 1 in the year 1875. The first fund raising firemen's fair was held in October, 1894. The Company purchased their first uniforms for all members in good standing on November 1, 1894. The Company received and accepted many invitations to participate in parades in other communities. On one occasion on October 12, 1892, they participated in a huge Columbus Day parade in New York City. The engine, members, and the citizens band accompanied by the Keypoint Engine Company, made the trip to New York and returned by steamer.

At the regular meeting held on May 2, 1893, the foreman, Harry P. Link appointed a committee of five members to explore the best feasible means to procure a steam fire engine and pay for same. The five members appointed to serve on the committee were: William A. Fountain, E. A. Scott, G. B. Shepherd, C. J. Easton, and Harry Boyd. On June 8, 1895, after months of tireless research and inquiries, a communication was received from the Village of Olean, N. Y., informing the Company that they had a Silsbee Rotary Engine, class 3, weight 6,000 lbs. water capacity 300 gals. per minute, which they were selling for \$800.00. The original cost of this engine was \$3,850.00.

The Company received the letter enthusiastically and appointed C. A. Scott, a committee of one, to go to Olean to examine the apparatus, see it work, and if satisfied, purchase same at the best possible price. The Company authorized the treasurer to submit a check for \$100.00 to C. A. Scott to be applied towards the payment of the steamer so that same may be secured. At the regular meeting held on Oct. 8, 1895 the Committee reported that "our steamer from Olean, N. Y. was in the railroad yard at Jersey City and would be at the Matawan station early in the morning of Oct. 9, 1895." Foreman C. A. Scott was appointed to make arrangements for the unloading of the engine.

At the regular meeting of Washington Engine Company No. 1 held on Nov. 12, 1895, the Foreman, G. B. Shepherd, appointed two temporary engineers; namely; Frank Vanderbilt and Mike W. Stoddard, also two stokers; namely Janet Hendrickson and William A. Scott to assume these positions in the operation of the steamer. The Company also authorized the payment of a bill of \$ 2.70 for 600 lbs. of coal.

Matawan Borough, N.J.

No.1

No.1

# Washington Engine Co. #1

On July 7, 1896 after giving Matawan and its neighboring communities many years of fame and illustrious service, this splendid engine that so gallantly battled the elements of many a disastrous fire was ultimately retired. The engine was taken and stored in a workshop owned by C. A. Scott. It remained there for several years. It was later moved and placed in a garage adjacent to the Town jail house. In 1923 the jail house, garage and the famous historic and dedicated engine that fought many great fires was ironically itself destroyed by fire.

During the years that followed the procurement of the Washington steamer, the town's fire fighting power grew at a rapid pace. In 1903 two new fire companies were organized - the M. E. Haly Hose Company and the Midway Hose Co., making a total of four fire companies.

In 1919 Washington Engine Company received its first motorized apparatus, an Overland Fire Engine.

In 1921 the Mayor and Council passed an ordinance creating a municipal fire department uniting the four fire companies under the control of the Mayor and Council.

During the 100 years of existence as a fire company Washington Engine Co. has had a total of six pieces of fire apparatus. Other than the three already mentioned the others were obtained in the following order:

In 1924 a Sanford 500 Gallon Pumper

In 1946 a Seagrane 500 Gallon Pumper

In 1968 our present Ford 1,000 Gal Pumper

Washington Engine Co. boasts of an excellent membership roster. The company today has seventy members on its rolls, also lets not fail to mention the wonderful, energetic, and active ladies of the Washington Engine Auxiliary. Organized in 1954 this splendid group has faithfully contributed financially and socially to the good and welfare of the company. They have a total of 21 members on their roster.
