TARIFF REVENUE.

The new fiscal year of 1892-93 has started out well for reciprocity. Our exports to Cuba for July were

\$1,624,229

as against \$1,644,491

for July, 1891.

During the month of July, 1892, our imports of British tin plate were invoiced at

2.96 cents

per pound, as against 3.38 cents

per pound in July, 1891, the first

month of the McKinley duty.—New York Press.

It is not possible that any Plainfield delegate to the Democratic Convention

at Trenton, yesterday, is to-day boastful of the glorious unanimity that characterized that eminently characteristic

body of men. It was confusion, was

confusion. Oaths and blasphemous epithets were cast about freely. No

one not in the audience can gain an idea of the positively

rowdy character of the proceedings. Men honored in the party's councils for

years were openly insulted, if they

chanced to express an opinion in opposition to those of the majority of the

delegates. If it is a fair sample of Democratic unity in the State of New

Jersey, then the Republican party has

flattering prospects of carrying the State in November.

THE beacon light of Mr. Arratt, who the Westfield Leader would have us believe is nourished in Grover's bosom,

was very small potatoes in the Democratic Convention yesterday. The

THAT BICYCLE SULKY.

Growth of People Admired the Prisoner of

Mr. Rogers' Handicap and His Success

Several Officers of the Somerville Fair.

The Courier of last Friday told of a

pneumatic sully which W. H. Rogers,

of West Fifth Street, was building for

J. Wesley Johnson, who intended to

use it in speeding some of his horses

this week at the Somerville Fair. The

notice attracted the attention of

visitors who came to see the sully.

The sully was finished on Monday

and shipped on the afternoon of that

day to Somerville. Yesterday, the

owner used it on the track in several of

the races and it is being used again

this afternoon. Its advent on the

track did not occasion much surprise,

in a general way, for in every trotting

race which was contested yesterday,

there were number of such sulkies

used, but all remarked about its general

workmanship and several expressed

surprise at the substantial manner in

which it was put together.

Mr. Rogers was on the track watching

the running of the sully and receiving

the congratulations of his friends at the

success he had attained in its construction.

Before the races were concluded he had received orders

from more, one of which is to be finished

in time for the Waverly trots which

take place next week. He was pleased

to find that his piece of workmanship

stood every test to which it was subjected,

and he was kept busy looking after and

overhauling the sulkies of other makers during the

races.

It may not be out of place to ascribe

to small amount of attention which

was attracted to the sully to the article

which appeared in the Courier. The

paper circulates among the best people

in the city, and its news columns are

eagerly scanned each day by the

people who wish to find out what is

going on. So when the article appeared

concerning the manufacture of the

pneumatic sully by a well-known

wheelman, multitudes flocked to his

place of business to learn all about it.

In conversation with a representative

of the Courier, Mr. Rogers said he

was much surprised at the large

number of people who came to see it.

He little dreamed that the notice in the

paper would be read by so many persons,

or that they would take so much interest

in the matter. He knew that his

sully was a good one, and that it was

circulation, but he had no idea that so

much interest would be taken in his

attempt to build a sully similar to the

one with which Naylor Hanks lowered

the trotting record of the world.

In speaking about the value of the

paper as an advertising medium, Mr.

Rogers said that the notice was brought

to his mind. A short time ago, he

said, he was in need of a boy, he put

advertisements in the papers of the

city and through the notice in the

Courier the vacant place was filled. By

some oversight, the notice ran over in

the Courier for a long time, and he

was originally ordered, and he was

actual forced to bend word to the office

not to allow the advertisement to slip

into the hands of the advertiser, and

as he was so overwhelmed with

applications.

All of this only goes to prove that

the Courier is read by a large and

rapidly increasing clientele, and the

attention of advertisers is directed to

this fact. The Courier makes it a point

to get all the news.

It is a fact never to publish a story unless

it has proof that it is true in every

particular. Its aim is to give the best

account of everything of interest which

takes place daily in the city, and its

rapidly increasing subscription list

shows that its efforts are being

appreciated.
