Subscription, five dollars a year, or fifty cents a month. Single copies, two cents. In advance.

Advertisements in Want Column, one cent a word. For other rates apply at the public office.

THURSDAY, APRIL 27, 1893.

A PLAINFIELDER'S IDEA.

A Wire Cables-Pneumatic Bicycle Tire Invented by John Vetterlein. Please to Support All Other Kinds New to Use.

In the Recorder of last Sunday a statement appeared to the effect that the Wilson, Myers & Co., makers of the Liberty tires, are fitting their wheels with their new Liberty tire.

Improved wire tire designed to overcome all the disadvantages of the old wire tire, and to be connected with that style of attachment and does not depend on the air pressure to hold it to the rim. It has a compound valve, and creeping and rolling in the rim are impossible.

It may not be generally known that the Rev. Clerk John Vetterlein is the inventor and patentee of this tire. In conversation with Mr. Vetterlein it was learned that the idea of this tire came to him about a year ago. He was one day talking with a number of bicycle experts in New York. When one of them said that the only thing which was lacking to make the bicycle a success, was to manufacture a tire which should combine the principles of a cushion and pneumatic tire in one.

This talk set Mr. Vetterlein to thinking. He came home, and the following morning an idea came to him which he at once proceeded to put into practice. He at the time was engaged in the machine repairing business in Essexburg alley, and among other things he had a quantity of piano wire on hand. Among his many friends he knew one by the name of Richardson, who was the manufacturer of a wire mosquito netting. Mr. Vetterlein went to him and gave him an order to make a netting about twenty-four inches long and eight inches wide from the finest size of piano wire.

In due course of time the wire netting was received. Mr. Vetterlein cut a strip just large enough to fit on the inside of a pneumatic tire. To prevent the wire from rubbing against the inner surface of the tire, he covered the wire with camels hair felt, with and without and then submitted the tire after getting it patented, to the bicycle experts in New York.

Experts examined the tire carefully, and all agreed that it was just what they had been looking for. They then and there entered into an agreement with Mr. Vetterlein, the conditions of which were that they, as representatives of the Rubber Trade, were to have the control of the patent for one year. During the year, a number of bicycles are to be fitted with the netting, and a thorough test. If at the end of the year, the tests prove to be perfectly satisfactory, then the Trust will purchase the patent outright from Mr. Vetterlein, paying him a large sum of money for it.

Of the time which the Trust is to make up, according to agreement, Mr. Vetterlein will have one pair fitted to his own wheel. He will give a pair to Zimmerman and to another crack rider, who will race with him on the race track. Mr. Vetterlein intends doing considerable riding this Summer and will test the tire on the county roads. He has also sold the tire to a pair to a Courier representative, who has agreed to test them on the rough country roads, north and west of this city. This will test the tire in all the conditions which will be tested in this city.

The main points where the tire differs from all others is, that no matter how many times a rider may bump the outer rubber coating of the tire, the inner wire frame will act as a cushion and the rider can come to a stop where he can get it repaired. The tire is just as truly as the regular rubber tire and about ten times stronger. They will not weigh any more, and in fact it is said that they can be made lighter than those in use at the present time.

The Arbor Day exercises of the North Plainfield public school will be held this afternoon, and will consist of readings, recitations, and singing. No tree will be planted.

Marshall Pangborn has recovered from another case of the whipple which were stolen from a carriage in the rear of Horace Martin's shop on Somerset street a few days ago. The whipple was taken by a boy who lives on the other side of the mountain and sold to different parties in the borough. The young thief has not been captured.

MATE NO EQUAL. Alcock's Porous Plasters have attained a world-wide reputation solely on their superlative merit. They have many would-be rivals, but have never been equalled or even approached in curative properties and rapidity and safety of action. Their value has been attested by the highest medical authorities, as well as by unimpeachable testimonials from those who have used them, and they are recommended as the best external remedy for weak back, rheumatism, sciatica, colds, coughs, croup, chest affections, stomach affections, kidney difficulties, weak muscles, neuralgias, aches and pains of every description.

Persons who are subject to attacks of bilious colic can almost invariably find relief in their feelings when to expect an attack. If Chamberlain's Colic, Cholera and Diarrhoea Remedy is taken as soon as these symptoms appear, they can ward off the disease. Such persons should always keep the Remedy at hand, ready for immediate use when needed. Two or three doses off at the right time will save them much suffering. For sale at H. W. Randolph's Pharmacy, 21 East Front Street, Park and North Avenues.

PERSONAL. Weather Forecast and Pharmacy. The death is announced of Mrs. Sarah A. Young, of North Plainfield, who departed this life yesterday afternoon at the age of nearly 81 years. Mrs. Young, it will be remembered, had the misfortune to dislocate her hip just winter, by a fall on an icy sidewalk. From this injury she never fully recovered. Within the past few months, partial paralysis set in, and was the cause of her death. Funeral services will be held to-morrow afternoon, from the Congregational church, at half past two o'clock.

R. J. Neal, of West Front street, is confined in his residence with a severe attack of grip.

Prof. Andrews, of Broadway, is moving to his new house on Central avenue near Ninth street.

John P. Munn, of Le Grande avenue, will vacate his residence in a short time, and will remove to State island for the Summer, while his new house is being built.

Mr. Baker, of Seventh street and Adams avenue, will remove May 1, to Staten Island, to remain during the summer, and will return when his residence at Seventh and Division streets, is finished.

Mrs. Cadmus, of 12 Duar street, North Plainfield, fell down the steps in the rear of the house Tuesday night and cut her forehead. The fall also bruised her considerably.

Harry Squires, now of New York, will remove to this city and will occupy the house vacated by Fred H. Andrews, of Broadway.

B. R. Watson, of New York, is moving to Washington avenue and Mercer avenue, North Plainfield.

THE WOMEN'S AUXILIARY SOCIETY OF THE NEW JERSEY DIOCESE. The Women's Auxiliary Society of the Diocese of New Jersey held its annual meeting in the church of the Holy Cross, yesterday. Delegates from all parts of the Diocese were present, about two hundred in number.

Service and the celebration of the holy communion took place at 10.30 a. m. The Bishop of the Diocese was assisted, assisted by the Rev. R. B. Rodman, of New York. The Rev. T. Logan Murphy, Rev. E. M. Rodman and Dr. Langford of New York. The Rev. T. Logan Murphy made an address to the delegates at the address were made by the Bishop, Dr. Langford and the Rev. Mr. Pott, missionary to China. Mr. Pott's remarks were very encouraging. He gave a description of the manners and customs of the Chinese.

Lunch was served in the beautiful spacious rooms of the parish building. The parish of Grace church and the Holy Cross provided for the entertainment of the guests.

In the afternoon the delegates assembled in the church, elected officers for the ensuing year, and transacted other business by voting to the society. The meeting was an exceedingly pleasant one, and a complete success in every way.

TWO MEMORIAL ADDRESSES. A special service was held in the Congregational church, last evening, when the Rev. S. C. Leona, of Newark and the Rev. F. W. Baldwin, of East Orange. The meeting was held for the purpose of increasing the interest in missionary work.

Short addresses were made by the speakers, the subject of Mr. Baldwin's talk being "The Literature and Romance of Missions" while Mr. Leona spoke about the contrast between missionary work of one hundred years ago and that of the present time. He made his remarks very entertaining by describing the naval parade in the Hudson river yesterday morning, which he happened to witness and draw a contrast between the modern war ships and the galleons which were in use at the time of Columbus' voyage.

Quite a large number of people were present at the service. Horace Martin led the singing. Large quantities of flowers decorated the pulpit and the altar. The perfume was quite noticeable.

An Industrial Exhibition Proposed For the State Fair. The State Fair at Waverly will be held this year the first week in September. Five days instead of four, as in previous years, will be devoted to the exhibition. The Managers held a meeting Tuesday, and it was proposed to make the coming fair especially an industrial as well as an agricultural show. There are many thousands of people who cannot go to the World's Fair, and there is much interest in industrial displays, which can be to a large extent exhibited by a State exhibition such as the manufacturers of New Jersey could give. Accordingly a committee was appointed to confer with the manufacturers in Newark, Jersey City, Trenton and other cities in the State to invite them to make exhibits.

LOOK OUT FOR THOSE ROBBERS. The advance agent of the Barum show, which will be here Wednesday next, wishes to prevent all accidents or mishaps to the citizens which might occur during the progress of the parade, and particularly cautions all people to keep their horses off the street, away from the line of procession. Horses may be accustomed to unusual sights, and their owners may think they can depend on them to stand any excitement without fright, but it is not safe, for they don't see the elephant often enough to get used to him. The floods are made all combine to terrify any equine. A little precaution taken early may prevent serious accident. The display avoided all such mishaps last year and is desirous of keeping up the good record.

Persons who are subject to attacks of bilious colic can almost invariably find relief in their feelings when to expect an attack. If Chamberlain's Colic, Cholera and Diarrhoea Remedy is taken as soon as these symptoms appear, they can ward off the disease. Such persons should always keep the Remedy at hand, ready for immediate use when needed. Two or three doses off at the right time will save them much suffering. For sale at H. W. Randolph's Pharmacy, 21 East Front Street, Park and North Avenues.

When Baby was sick, we gave her Chamberlain's. When she was a Child, she cried for Chamberlain's. When she became a Woman, she clung to Chamberlain's. When she had Children, she gave them Chamberlain's.

ARTICLE NOTES.

The contract for the League of America's Wheelman's track in Chicago has been let at last. It calls for the completion of the track by May 15 or forfeiture of \$100 per day for overtime.

About forty New York wheelmen went over the Irvington-Millburn course on Sunday, trying the time and inspecting the road.

Zimmerman, it is said, intends to make this year his last of racing and has an eye on some active manufacturing interest for '94. He says: "Even then I retire I'll want to go to all the tournaments to see the boys race. They are a fraternity among racing men, a sort of interest fascinating and binding, which makes it so hard to quit racing and relinquish all interest in it."

ITS RATHER EARLY FOR BICYCLE RACING TO BE ON.

Yesterday morning about half past ten, two dusty bicycle riders stopped at W. H. Rogers' place of business on West Fifth street, and inquired the way to the home vacated by the late James as Theodore Patterson and John Harrod, of Brooklyn, and said they were on their way to Philadelphia. They left Brooklyn at 8.30 a. m. and were making the trip on a wager against time. They expected to dine at Trenton, and to reach Philadelphia in time of supper. The racers were attired in racing costume and rode Rudge light racing pneumatic wheels. After obtaining a drink of water, they proceeded on their journey.

Dime Sociable at Green Hook.

A dime sociable was held last night by the Young People's Society of Christ and the Missionary Church, at John Sebring's home. About fifty people attended and the condition of the exchequer of the society was improved thereby. The evening was spent in various amusements up to twelve o'clock. The donkey party provoked a deal of merriment, as the blundered persons insisted on locating the equine animal appendage everywhere else except in the vicinity of the donkey. Another sociable will be given by the society at the next session.

THE U. S. EXPRESS IS AHEAD.

The United States Express has acquired some new territory, by securing the American Express, on the New York and New England railroad at points in Connecticut, Rhode Island, Massachusetts and portions of New York, which will give Plainfielders a finer service to New England points than ever before. The matter was decided Monday favor of the United States Express after a tedious litigation in the courts.

AMUSEMENT NOTES.

The Rutgers College Glee Club gave a concert this evening at All Souls' church, for the benefit of the Y. W. C. U. The leader will imitate Patti and Levy, and the entire programme is one to please all.

Small Artist—Manfred, I painted this little girl in the picture, and I've got the bones alongside of her, but I want to paint a rough box on the bureau, and I can't make it look right.

Manfred—Why do you want a rough box there?

Small Artist—I've got her cheeks too red and want it to look as if she did it herself.—Good News.

Glass Eyes and Their Makers.

In Thuringia there is a whole district which is dependent for its support on the manufacture of artificial eyes for lame, blind, and children all working together at this same means of livelihood. And yet, though these cheap German village people turn out these eyes by the score, they are not so good as the eyes made by the individual worker, though the eyes of the latter are sold at a price which is not a very complicated one. These are costly glass plates, which are blown by the means of a hand into the form of an oval-shaped eye. Then there is the coloring of the eye, which is done by the means of tracing with the needle, the tint being laid in the taste of the individual worker, though the eyes of the latter are sold at a price which is not a very complicated one. These are costly glass plates, which are blown by the means of a hand into the form of an oval-shaped eye.
