trated by a 12-Inch Projectile.

Washington, July 13.—Naval ordnance officers yesterday fired two 12-inch projectiles at a Carnegie 17-inch Harveyized curved steel plate, typical of 367 tons of armor, constituting one of the barbettes protecting the 13-inch battery of the bartleship Oregon. The plate, which weighed 76,000 pounds, behaved under fire in a remarkable way, resisting the first shot, which had a velocity of 1,410 feet per second, and utterly failing to stop the second shot, which went entirely through it and pierced the 30 inches of oak planking.

The first shot penetrated 13 inches and rebounded 25 feet without breaking up to any considerable extent. The second shot, a Wheeler-Sterling projectile, had a muzzle velocity per second of 1,858 feet, and when it was recovered from the sand bank it was scarcely injured. The plate was not cracked, except slight radial breaks at the points struck by the shells. It behaved in all respects as if it had not been Harveyized at all.

The entire lot of armor will be rejected

PHILADELFHIA, July 13.—Justice Fell, in the suprems court, has rendered an opinion affirming the conviction of banker F. V. Rockafellow, of Wilkesbarre, Pa, who was found guilty in the court of quarter sessions of Luzerns county of receiving money from a depositor while insolvent.

ent.

Rockafellow was convicted under an act which provides that any banker who shall receive money from a depositor with the knowledge that he is insolvent shall be guilty of embezzlement.

Justice Fell holds that the act is not to be nullified, as counsel for the defendant claimed, because the offense is called "embezzlement." The word was not well chosen, the opinion reads, "but the intention is clear."

work, and that business of all kinds was being resumed as rapidly as could be expected under the circumstances. Some of the roads that have been most directly affected posted notices in their down town ticket offices to the effect that they were prepared to receive freight and to forward it with reasonable promptness. At the same time they gave it out that the commercial community could not expect normal conditions to be resumed in a day or even in a week.

As General Manager Egan put it, the railroads are in the position of a merchant whose place of business had been burned down. The building is commenced almost before the ruins are cold, but the recon-

this traffic increases they will need more

they have not already, as many men as

claims of ultimate victory that has been manifested since the boycott was declared. The officers insisted that the strikers were standing firm, that their position was being even reinforced by tens of thousands of men of every trade who, while having no direct interest in the outcome, were determined to manifest their sympathy in the strongest possible manner and that such a thing as a stampede was out of the operation.

were produced to justify the claim. The officers and directors of the union held a brief confesence during the afternoon with W. W. Erwin, who has been retained as special counsel, but no definite line of policy either in regard to the threatened prosecution of the railway managers of the defense of the officers and others ar-rested under the indictments found by

rested under the indictments found by the federal grand jury was mapped out. The questions involved will be further discussed to-day.

Everything was quiet throughout the city yesterday except at the stock yards, where a few hundred striking butchers attacked an incoming train of cattle and by tampering with a switch derailed the engine. Two companies of militia were brought to the scene in quick time and the mob was just as quick in scattering.

Several heavy trains were sent in and outduring the day. Of the 5,000 butchers in the yards less than 500 went out in compliance with the appeal of Grand Master Workman Sovereign, the remainder continuing at work.

The federal grand jury examined a large number of witnesses concerning the sayings and doings of the officers and directions.

number of witnesses concerning the say ings and doings of the omeers and afrectors of the railway union. Some of these were newspaper reporters and were asked to testify concerning the accuracy of interviews with President Debs and Vice President Howard that had been printed President Howard that had been printed in their papers. In one case a reporter declined to affirm an interview which he had written, on the ground that it had been mangled by the blue pencil of the copy reader, while two others refused to respond to the interrogatories, on the ground that statements made to them in their reportorial capacity, were privileged. This raises a question somewhat similar to that now at issue in Washington in the case of the correspondents who refused to disclose the source of their information before a senate committee in the sugar trust scandal.

The correspondents were ordered to re-

will report the fact to Judge Grosscup. If the latter holds that the work of the separates is not privileged they will be confronted with the alternative of giving the information desired of them or being committed for contempt of court.

Many of the questions put to the witnesses related to what was designated as "creasonable utterances" on the part of Debs and other officers of the union. This gave rise to the rumor that indictments for treason might be supplemented for those already found against the officers of the organization. District Attorney Milchrist, however, desied that anything of the kind was contemplated.

In labor circles a report gained considerable currency that George M. Pullman had weakened and was willing to submit his side of the trouble to arbitration. Vice-President Wickes promptly sailed the story with the official announcement that the Pullman company stood by every declaration that it had previously made on the subject.

Chicago, July 13.—It is the opinion of careful and conservative observers that the labor troubles, so far as Chicago and lits vicinity are concerned, are dying by inches. There may be a faw more manifestations of their continued existence in the form of minor wa'k-outs and similar demonstrations, but thesewill be but the sparks that precede final dissolution.

The railroad managers were especially elated. TREES IN THE TOWN They Add Value to Property—A Few Re-marks on Street Lighting.

A love of the beautiful is inborn in

man. Trees are a source of never failing enjoyment to dwellers in the town, and no town can be beautiful without them. How refreshing their shade in summer, and the dreariness of winter is rendered less desolate by their presence. Sentiment aside, trees have a direct value. A tree shaded average is a work. lacks their adornment. Property is more valuable on this street, and landlords demand and receive a higher rate of the lawns are green and smoothly shaven, and beds of flowers and bunches of shrubbery bear witness to the friendly rivalry among the dwellers to excel in the lighting of street.

The lighting of streets at night is a subject of great importance to the peo-ple of a community. The benefits are many and far outweigh any question of cost or economy. How many accidents that have caused loss of life and limb are due to insufficiently lighted or wholly dark streets! How many crimes have een committed under cover of darkner that would never have been perpetrate had there been light to reveal the re or assassin to his intended victim!

Birthday Anniversary.

At the residence of Mr. and Mrs. Cortwright, corner of Sixth and Sycamore streets, last evening, a large number of friends gathered, and spent a most delightful evening, the occasion being the anniversary of Mr. and Mrs. Cortwright's charming daughter, Miss Kate Cortwright. She was the recipient of many handsome gifts, and well wishes for her future happiness from her many friends, and she right royally entertained them in such a manner that when the small hours of morning arrived and they were compelled to part for home, it was the senti-ment of one and all that they had spent a most pleasant evening. They congratu-lated her upon the success, and in bidding

A month ago Captain Israel Jones o the Victor Wheelmen sent to the Atalanta Wheelmen of Newark his entry in the Newark-Princeton century road race to take piace tomorrow. Since that time he has risen early to train, and has ridden during his leisure moments in preparation for the run. Yesterday he received a notice from the Atalantas that they had decided to reject his entry because of his color. The captain thinks it very unjust that he received no warning of such a decision before he began to train for the event. Captain Jones went to Newark this morning and saw Chairman Whitfield Smith of the Atalanta's Racing Commit tee. He said that the protest against Israel's racing came from 40 Cortlandt street, New York.

PANIC IN CONSTANTINOPLE. Another Earthquake Shock Terror

CONSTANTINOPLE, July 13.—Another severe earth-quake shock was felt last evening. The panic was revived at once. Tradesmen nurried from their shops, and families ran from their houses to the open spaces. Most places of business, which had been opened with the return of confidence, were closed before 5 o'clock. The parks and squares are again filled with improvised tents and beds.

The important experiences of others are interesting. The following is no exception: "I had been troubled with heart disease 25 years, much of that time very seriously. For five years I was treated by one physician continuously. I was in business, but obliged to retire on account of my health. A physician told my friends that I could not live a month. My feet and limbs were badly swollen, and I was indeed in a serious condition when a gentleman directed my attention to Dr. Miles' New Heart Cure, and said that his sister, who had been afflicted with heart disease, had been cured by the remedy, and was again a strong, healthy woman. I purchased a bottle of the Heart Cure, and in less than an hour after taking the first dose I could feel a decided improvement in the circulation of my blood. When I had taken three doses I could move my ankles, something I had not done for months, and my limbs had been swollen so long that they seemed almost putrified. Before I had taken one bottle of the New Heart Cure the swelling had all gone down, and I was so much better that I did my own work. On my recommendation six others are taking this valuable remedy. Washington, July 13.—The progress made by the senate yesterday in the matter of annual appropriation bills was on a par with that insugurated by it at the beginning of the present week. Bills which in previous congresses have provoked long debates and occupied the time of the senate for days and weeks have glided through during the past few days meeting hardly an impediment. And if the same speed shall be maintained, there is no reason why the last of the great appropriations should not be cleared off the senate calendar with the close of this week or endar with the close of this week or

been one of the appropriations taken up in the senate. No less than five of them were passed before the adjournment on Wednesday, and are now in the hands of the conference committee. They were the naval, pensions, military academy, and diplomatic and consular, and one and diplomatic and consular, and one—the postoffice bill—has gone to the president. The army and the fortifications bills were passed, and progress made on the river and harbor bill. Those still on the calendar are the District of Columbia, Indian, legislative, sundry civil, agricultural, and general deficiency.

Outside of the appropriation bills there was little of interest in the proceedings of the senate.

cumstance of having the conferences on the tariff bill confined, so far, to the dem-ocratic managers of the two houses, ex-cluding the republican conferees, was called to the attention of the senate in a resolution offered by Mr. Hale (rep., Mr. Mirecling the chairman of the senate Me.) directing the chairman of the senate conferees (Mr. Voorhees) to inform the senate whether a full and free conference

s being heid.

An amendment to the sundry civil appropriation bill was presented by Mr.

Manderson (rep., Neb.) and referred to the manderson (rep., Neb.) and referred to the committee on appropriations to pay to the families of 20 cierks who lost their lives through the falling of the Ford Theatre building \$5,000 cach. The select committee on that subject will not, Mr. Manderson says, be able to decide at the present session what compensation should be paid to those who were injured, or to the families of the three persons who died some lies of the three persons who died some months after the accident. The senate adjourned at 6:15.

The senate adjourned at 6:15.

House of Representatives.

The house made its best record except npon the passage of private pension bills, when it passed an even dozen bills of general character and agreed to the senate amendments to two others. These latter were more important, however, being the bill to provide for the admission of Utah into the Union, and the postoffice appropriation bill for the year ending June 80, 1895. They now go to the president for his signature, and if he acts promptly the postoffice bill will be the first to become a law. Eleven of the twelve bills were reported from the committee on foreign naval officers to receive decorations and medals presented by foreign governments in recognition of various services; others were directing the secretary of state to ac-cept for the United States the picture "Love and Life" from G. F. Watts, royal n, and to distribute the

TARIFF CONFERENCE. Both Sides Stand Firm on the Sugar

Schedule.

Washington, July 13.—The whiskey schedule was discussed yesterday, and the house conferees are holding out for the terms of the house bill, which fixes the tax at \$1 and the bonded period at five years, instead of \$1.10 and eight years, as years, instead of \$1.10 and eight years, as provided for in the senate bill. The house conferees are unanimous in this. It is understood that no fight was made on the schedule in the senate, for the reason that it was hoped, by leaving it alone, time could be gained. Sugar also again came up, but the con-

ferees are no nearer an agreement than when they first met. Both sides stand firm, and it is believed that nothing short of a disagreeing report can be made on this schedule.

Held Up the Barkeeper.

Baltimore, July 13.—A bold robbery occurred at Flood's pavilion on Curtis bay, while the resort was crowded. Barkeeper Banner was busy dealing out beverages when two men rushed behind the bar. One grabbed the cash register and wrenched upon the drawer. The other pointed a pistol at the barkeeper and pulled the trigger. Banner fell wounded in the legs. The robber who did the shooting was arrested, but the other escaped with \$100.

To those who do not already know that there is established in Newark, at 105 Halsey street, a physician who stands in the foremost rank of his profession, who is in dorsed by the leading colleges of the country and who can prove by witnesses right here in Newark (not by one, but by hundreds) that he has succeded in curing cases that have been utterly given up by other physicians, t and good ones, too. To those who do not these facts we state that any person, rich or poor, old or young, is welcome here and receive examination and advice free of charge. Thousands praise the day they came to us for treatment. There is no guess work, no experimenting, no painful operation. No matter how difficult the case, no matter how much of the physician's time it may consume, the diagnosis will not only be thorough, it will be absolutely free. There is no taint of quackery or deception; no claim or statement is made that is not borne out by facts and living witnesses.
