PLAINFIELD NEWS
PUBLISHED AT PLAINFIELD, N. J.
BY J. B. MILLER & CO.
STREET ADDRESS: 100 NORTH STREET.
SUBSCRIPTIONS: \$1.00 PER YEAR.
S. W. ROBERTS, EDITOR AND PROPRIETOR.
PRINTED BY J. B. MILLER & CO. AT PLAINFIELD, N. J.

To Congress: Next time you meet, whether in October or December, talk law and do more.

It is unfortunate that Gen. Grant could not have left behind him dead bodies enough to go around to all the places that are contending for his bones.

Let us rejoice, without distinction of race, sex or previous condition of servitude. The only reason is going to be the richest and fairest one in seven years, and the only thing without an R already said behind us.

There is nobody alive who can put more wisdom into a few words than Gen. Sherman. This is one thing that the Grant Army boys in Milwaukee: "Keep young as long as you can, and don't go into a soldier's home if you can help it."

Our Railroads.
The United States now possesses nearly half the railway mileage of the world. At the end of 1908 we had 166,000 miles of railroads. The only city that it is that these miles are not all paying as they ought to. Too many parallel roads have been built for the purpose of exacting blackmail from a rival, for that is what the construction of the road parallel to another too often means.

Our railroads, directly and indirectly, give sustenance to one-eighth of the whole population of the country. For every acre the average income in 1911 (but) has been 2,600 miles a year. Last year the net earnings of the roads fell off 10 per cent. The showing will be better this year. Finally, here are the biggest figures of all: The cost of the building of all our railway lines is \$4,136,043,116.

Monument to Isabella.
A movement has been inaugurated by the women of Illinois which is so altogether praiseworthy that the women of somebody did not propose it long ago.

Catherine V. Waite, Dr. Julia Holmes Smith and Dr. Fanny Dickinson are a committee incorporated to procure subscriptions and superintend the erection of a monument to Isabella, the pious and clever queen who sent her jewels to fit out the ships in which Columbus sailed to discover America. But feminism! A woman was the only person who had brains enough to appreciate the value of Columbus' ideas, they say. Therefore, good Queen Isabella of Spain shall live in this country, which is so kind to women. A beautiful monument to her was unveiled in 1892. It seems peculiarly graceful and fitting that women should build the statue. Let the movement be made a national one and take in all the women of America.

The Great London Strike.
A month ago the laborers on the London docks knocked off work and refused to resume it until their wages were raised twelve cents an hour. They had been working for ten cents an hour at the hardest labor they could take hold of.

The movement of the dock men resulted in the greatest strike of kindred trades joined the dock men, in London and elsewhere, till there were altogether 150,000 laborers idle. This involved the going hungry of at least half a million people in the great city outside. They had for weeks been paid from trades organizations and friends, and it cost \$10,000 a day to feed them.

The lot of the laborers was so hard, and the strike was kept within the limits of law and order to such a degree, that this sympathy of everybody except the dock owners was with the men. Their good behavior was owing to their own sense and the common sense wisdom and power of their leader, John Burns. He is 55 years old, a man of magnificent physique and strength, an engineer by trade, and a born leader of men, as he has shown. It is to be noted that the first blow in the great strike was struck by policemen themselves. They fired on and mortally wounded a striker who, with his mates, was preventing outsiders from taking up their work.

The London docks are the largest and most famous in the world. It is said that \$100,000 a day has been expended on them. The oldest dates back to 1805.

There are some eight or ten of the principal ones, the largest being the Thames Royal Albert dock. It has a mile of water way and a solid mile of iron warehouses. To build it required the labor of 8,000 men from 1875 till the summer of 1880, when the dock was finished and opened with splendid ceremonies. Railway cars pass over a hand lead and unload at the steamer's side.

The influence of the great strike was felt everywhere. It affected all commodities. The price of sugar, coal and many other commodities at once advanced. Six thousand tons of coal and millions of pounds of fruit lay rotting in the docks at one time. No intimately are mankind bound together that 30,000 men can thus affect the whole world.

BOOBS OF PEOPLE CRUSHED.

A Great Landslide Descends on Thirty Tenements.

Seven Dead Bodies Taken from the Ruins.

And Fifty More Unfortunates Are Buried Under Debris.

Victims of Rock Slide from Quebec's Historic Citadel with Frightful Results—Five Added to the Roster of the Deceased.

Quebec, Sept. 20.—A landslide occurred from the face of Cape Diamond, below the citadel, at 7:30 p. m., crushing the houses below it and landing upon the houses below. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below.

Victims of Disaster.
The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

A Terrible Landslide.
Two fearful days of rain and flood succeeded a most violent weather filled the crevices of the ice immediately below and beyond the southern extremity of Dufferin street, and the debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Paralyzed by Fear.
Some of those who saw the slide were standing at the doors of their houses, and others were paralyzed by fear. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Deaths Thirty Feet High.
The debris of rock filled up the narrow street to a depth of thirty feet. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Police, Firemen and Military at Work.
The police, firemen and military are at work. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Fire Adds to the Horror.
Fire broke out almost immediately in some of the ruins. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Frantic Cries for Help.
It was at once evident that considerable numbers of people were trapped. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Dead Bodies Taken from the Ruins.
The dead bodies taken from the ruins. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Remains to Leave the League.
Remains to leave the league. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. The extent of the disaster is little short of present indications, to fall but little short of that which occurred on nearly the same spot on the night of 17, 1848, when eight buildings were destroyed and thirty-two persons killed. In 1848 several others were killed half a mile further up the street by a similar avalanche of ice, which the wreckage was carried and persons contained to build and to take up their habitation immediately below the cliff.

Brooklyn Not to Enter the League.
Brooklyn not to enter the league. The debris was piled to a height in some cases of twenty to thirty feet over the houses which were standing below. To build it required the labor of 8,000 men from 1875 till the summer of 1880, when the dock was finished and opened with splendid ceremonies. Railway cars pass over a hand lead and unload at the steamer's side.

The influence of the great strike was felt everywhere. It affected all commodities. The price of wheat and flour was dropped for lack of export, and wheat and flour were scarce. The price of sugar, coal and many other commodities at once advanced. Six thousand tons of coal and millions of pounds of fruit lay rotting in the docks at one time. No intimately are mankind bound together that 30,000 men can thus affect the whole world.

A Great Landlide Descends on Thirty Teneaments.

BOOBS OF PEOPLE CRUSHED.

Seven Dead Bodies Taken from the Ruins.

And Fifty More Unfortunates Are Buried Under Debris.
The Thirty Teneaments on Queen's Highway, New York City, Sept. 19.—The disaster which occurred on the morning of Sept. 18, 1913, was a tragedy of unparalleled proportions. The thirty teneaments, a row of tenement houses built by the late John A. Rand, were completely destroyed, and the lives of many of the occupants were lost.

Seven Dead Bodies Taken from the Ruins.
The bodies of seven persons were recovered from the ruins of the teneaments. The names of the deceased are: John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner.

And Fifty More Unfortunates Are Buried Under Debris.
The bodies of fifty more persons were recovered from the ruins of the teneaments. The names of the deceased are: John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner; John A. Rand, the owner.
