A simple explanation of the Player Piano situation that gives you the correct basis for your investigation

IS IT NOT A FACT THAT PADERWESKI OF ANY OTHER PIANIST PLAYS THE PIANO BY A TOUCHING DOWN ON THE KEY?

EXCEPT THAT WHICH THE HUMAN FINGERS WOULD NATURALLY SEEK?

IT IS A FACT that the Apollo is the only Player Piano in the world in which the pneumatic finger touches down on the piano key just as a pianist plays the piano. (Please give us credit for being blessed with intelligence enough to know that if we expect to sell you an Apollo Piano at the price an Apollo must bring, we must have your confidence. Now we would hardly take a chance of foreseiting that confidence by making the above unqualified statement if there were the least possibility of your subsequently learning that we had in any degree misled you.) We can make it very plain to you why no other manufacturer employs this correct method of construction. This information is bound to better qualify you to use your own judgement in deciding the Player Piano question. Spend ten minutes to get this information, then spend as much time as you like in verifying it.

TO AVOID UNKIND CRITICISM:

Do Nothing.

Be Nothing

PHILIPPINE LAND GRAFTERS.

of the Sugar Trust to grab hundreds of thousands of acres of the best land In the Philippines will be temporarily stayed, the House having passed a bill to investigate the legality of the means employed to acquire title. This barefaced attempt, in connivance with American Republican officials of the Philippine department of the interior, has been bolstered up by the trust Congressmen, to the scandal of their party, for a long time past, and now for Boston and New York with the the Attorney General of the United States comes forward with an opinion | idea of seeing Governor Hughes on that would not be supported by any unprejudiced justice in the country in - the return trip. support of the job.

The lands in question are the "friar lands," which, under the Philippines organic act, were to have been acquired by the United States by condemnademning the lands, however, the administration took them over from the Roman curia by purchase at a price agreed upon, and it is upon this quibble, that the lands were purchased and not acquired by condemnation, that the Attorney General bases his opinion that the United States may now legally sell the same lands to another and a mercenary corporation, the Sugar Trust-which the administration did not want investigated by Congress for the recently discovered frauds in New York because it might expose the men higher up—in areas much exceeding those permitted to be sold to any individual or association of persons under the law. The trust paid politicians surely try to take care of their benefactors.

SENATOR GORE'S CHARGES.

This paper has previously remarked that, though Senator Gore's physical eyesight be dimmed, his mental vision is clear and sound. The Oklahoma statesman has given further evidence of this fact, and of his uncompromising integrity and loyalty to the interests of the plain people by his exposure of a disgraceful plot to exploit Indian lands in Oklahoma. The Senator charges that an attempt was made to bribe him by an offer of \$50,000 to withdraw his opposition to a bill relating to the sale of these lands. One McMurray was interested to the extent of a \$3,000,000 fee in getting the sale throughfinally. Senator Gore declares that it was represented by the parties seeking to bribe him that another Senator and a member of the House are parties | ca is being arranged for President-

In spite of the gravity of the charge, the Senate declined to reconsider tts vote on the proposition, and the bill was laid on the table for the time being. But the high standing and excellent record as a citizen of the blind Benator from Oklahoma and the fact that his noble ideals, adamant honesty and temperance of speech and thought are qualities that his most bitter political opponents concede to him, gives a force to his charges that will make them impossible to ignore. It has long been notorious that the transactions of exploiters of public lands in Oklahoma and elsewhere were honeycombed with fraud. Now that the exposure by Senator Gore has shown the trail of rascality extending to the membership of the National Legislature the people will demand an investigation and punishment of the malefactors. The matter cannot be smothered or allowed to be forgotten.

JOHNSON-JEFFRIES MOTION PICTURES.

As further proof of the fact that it is not and cannot be alone the quesexhibition of pictures of the Reno fight, we now learn that the owners of the films have agreed to exhibit them only at "stag" theaters—in other words where only adults may attend and the demoralizing effect upon the children eliminated. The idea of race riots, as a result of the fight or the use of the pictures, was cast aside immediately after the crowd at Reno dispersed in a quiet and orderly manner The only consideration since that time in relation to the use of the picture films has been in connection with Its effect upon the youth. If it is not worth while to place such safeguards around the youth of the city, then nothing is worth while. It will not be sufficient for the officials to wait until the harm is accomplished before they wake up. An ordinance to forbid the sale of fireworks after the dealers have stocked-up is unfair. An order from the Mayor to forbid the use of the Reno films after the show managers have bought and paid for them will the equally unfair. Now is the time to act. Procrastination in the present matter can only result in great harm to the community.

Let the tariff protectionists cherish the soothing fancy that consumers are becoming reconceiled to the steadily increasing cost of living. The perpetual load of providing means for meeting family expenses is breaking the backs of consumers. But let the protectionists continue to deceive themselves. They are deceiving only themselves. Let the fact go forth that the Rubber Trust since the first of June has advanced the price of men's overshoes from 90 cents to one dollar—women's overshoes from 65 cents to 75 conts—men's rubber boots from \$4.50 to \$4.75. Eight years ago men's boots sold for \$3.50. Another important fact is that the the quality of the best rubber goods is constantly deteriorating. Old rotten materials is melted and going to do about it?

The Congressional investigation of the high cost of living has resulted as it must have under a pro-tariff prejudiced committee—it discloses nothing but a few generalities and disagreeing opinions. Senator Lodge, at the head any way to blame for the exorbitant prices of food. That feature being miliminated the result of the committee's work ecomes worthless. Not until A Democratic Congress gets at this subject can the people expect anything like a true and valuable exposition of the causes which permit their being achied by the robber trusts and other tariff-favored combinations.

The affection and loyalty of the people of Louisiana for the late Senator A Middinery was due to his record as a member of the Confederate army, in which he served with distinction, and not because of the stand he took with Republicans for the high protective tariff. The people of that state, restaide of the sugar interests, which, like all other interests, is selfish, are Assessed to the Aldrich-Payne robber tariff. The stand taken by the late Menator is no way to be taken as representing the feeling or interests of as people of Louisiana. They loved him for his personality, not for his militical principles.
