WOODROW WILSON A WARM FRIEND OF LABOR. HE DECLARES IN LETTER TO LABOR PUBLISHER PRINCETON UNIVERSITY. PRINCETON. N. J.

LMYE, Conn., Aug. 23, 1910. Mr. Edgar Williamson-I warmly appreciate your kind letter of August 18. "The gross misrepresentations of my views with regard to organized labor which some newspapers have contained have given me no concern. They were wilful and deliberate misrepresentations, and such things take care of themselves. The papers that stoop to them will in the end be found out and lose credit altogether, "I was distressed that the New Jersey State Federation of Labor should

-have allowed itself to be imposed upon-not because its members are likely to remain deceived in this matter, but for the opposite reason; because they are sure to discover their mistake and to feel the mortification of having taken unjust and hasty action. I was not hurt, because I knew that no injustice was intended. I was simply sorry. It is a pity to see things i

sons. First, because I knew the whole matter would right itself, and, second, because I have not been seeking the nomination for Governor at the ship who are responsible for the hands of my party, and to argue the matter would seem to be arguing for a conception and execution of the Midmy nomination, but your letter puts a compulsion upon me of an entirely different kind, You urged the federation to inform itself about my views | Summer's Nightmare on Saturday and wait until it could be sure that it was acting justly, and, having fail- I last, are deserving of the greatest ed in that, you turn to me and frankly ask me what I really think, Your | praise for the wonderful success of friendliness and candor leave me no choice but to reply I do so with pleas. What we now need is to take common counsel as to what is for the common benefit. for the our handiness. We need frank, outspoken, friendly opinion. We need criticism which is not intended to damage, but to create a better understanding all around. I have tried in everything that I have said on public questions to contribute to this friendly process of criticism, in order to assist in bringing on better days and a state of opinion in which all mon and all interests shall receive their due. Some of the newest arrivals from Paris just out of their wrappings and shown to a favored few are "suits" so-called consisting of a frock of voile, silk crepe or other dainty material of like nature and a coat to match the dress with its trimmings made of silk, satin, moire or velvet. These fancy coats while designed for only one gown, can, if the wardrobe be wisely selected, go with other dresses as well. In many of the French models the coat is of black which is almost universally adaptable as a contrast. A silk coat should be of fine material and be worn only for dress purposes. For general runabout use, suits of the sort described are totally inappropriate. The fancy coats are, for the most part, cut half long or much shorte and are apt to dip a little at the back. Many of the fronts have a decidedly ered corn, or of handsome braid and crochet buttons or frogs. Like many of the severely tailored models they aften have deep "Sailor" colors, or odd square reveres of ample proportions and the sleeves are in some instances very elaborately made and cut off just below the elbow. September

The September Special Sale—Autumn's premier trade event—began Monday and will continue with added attractions until closing time next Saturday night. Our buyers were instructed two months ago to prepare for this sale, and every cog of our vast purchasing machine has been revolving steadily, rapidly—ever since. We propose making this the most conspicuous September trade effort in the history of our store, and if you will watch our advertisements for the remainder of the week you will be liberally rewarded. Practically every dollar's worth of merchandise involved is fresh and new, and every value is clean cut and decisive.

Inauguration of a New Motor Section For Men and Women

Between 20,000 and 25,000 New York citizens, we are told, own automobiles, and use them for pleasure, for business and for health. This is about half of the total number of cars for which licenses have been issued in New

It is not strange, with the rapid growth of this new means of locomotion, that many new classes of articles have become a necessity of modern life. Fishes that necessity eyes have them, fishes that do not need eyes develop new inventive means of swimming without running upon the rocks. Men and women of today have developed a need of motor things-motor wearing apparel and motor accessories and manufacturers are inventing rapidly new comforts for their use.

Close study of all these facts has led to our equippin and opening a new Motor Section at the Wanamaker Store for both men and women, which is inaugurated today. It is a step inside the automobile entrance on Ninth Streetthe most convenient place possible for a motorist to slip in and supply a want.

A simple explanation of the Player Piano situation that gives you the correct basis for your investigation

IS IT NOT A FACT THAT PADERWESKI OR ANY OTHER PIANST PLAYS THE PIANO BY A

EXCEPT THAT WHICH THE HUMAN FINGERS WOULD NATURALLY SPEK?

IT IS A FACT that the Apollo is the only Player Piano in the world in which the pneumatic finger touches down on the piano key just as a pianist plays the piano. (Please give us credit for being blessed with intelligence enough to know that if we expect to sell you an Apollo Piano at the price an Apollo must bring, we must have your confidence. Now we would hardly take a chance of foreseiting that confidence by making the above unqualified statement if there were the least possibility of your subsequently learning that we had in any degree misled you.) We can make it very plain to you why no other manufacturer employs this correct method of construction. This information is bound to better qualify you to use your own judgement in deciding the Player Plane question.
