The haborer in the average industry of today is as much a slave of the employers as ever were the blackmen before the war, with the difference that the employees have no personal interest in the welfare of their workmen. If they play out from abuse, others are imported without restriction to replace them, without loss to the employer. For selfish reasons th stars owner conserved the health and welfare of his challels, as the loss o a slave meant the joss of a thousand dollars' worth of property. What does the loss of a miner or a steel mill operative mean to the corporation emploving him? He is immediately replaced and the appalling death rate spes right along, as ever. What has the Republican party done except to strengthen the corporations in their grasp on every means of subsistence?
