A Dream Come True. How ELECTRICITY

But now comes the time when the takes account of both pressure and exchange in our big Philadelphia nevfriends of the principle of guaranquantity; that is, it multiplies the er looked so good as that simple litteed bank deposits can do a little volts by the amperes and gives the tle wall set in the farmer's dininglaughing. It is their turn to laugh
bedguise; the supreme court of the amperes give watts, just as poundstimes feet give horsepower, provided minutes i was talking with the doctor

unty laws enacted in Nebraska, Kan done in a second, or minute, or hour, for shipment of my by the great lawyers, but which principle has now been sustained by the cost has been so much for such and live there always."

It is a name very dear to the common people of the world, but par
kilowatts furnished light or power for motor car, and has had a rapid de-

er, and so he is, but the splendid lamp consumes energy at the rate of of wires, and new extensions are cona court from which there is no ap- sure exerted by the generator is about | The fact that a great many pro-Bryan has won many great victories half of an ampere to flow through it. This is three and one-half watts to a candle power. Madza lamps use about one and one-half watts to a candle power. One hundred and ten muitiplied by a half gives fifty-five, the humber of watts, or as the engineer often says, "joules per second."

In rolly say: "He is a good men but amount of energy or work exactly ingly say: "He is a good man, but amount of energy or work exactly leadership in statecraft as well as in power, differing only in stating the politics. A great authority has said time in which a certain work is done. that the duties of a leader of man it makes a big difference whether in the world of thought and politics work is done in an hour or a week, are to foresee and foretell. Bryan and of course we wish to pay for work foresaw the necessity of guaranted actually performed. This the wattmebank deposits would some day become ter really keeps track of, and, wheth-a fixed principle in America, and now er we use one light or a hundred, this an's dream in favor of the protection of the amount used. Perhaps the un-of depositors in the banks is now an thinking person who carelessly leaves

which the great law builders rejected would be more careful if he rememhas now become the headstone in the bers that the generator has to actualcorner of the temple of common ly exert one-fourteenth of a horsepower to keep that single light going, even though the cost is but half a cont my poor man?" queried the kind-hearted farmer's wife, as she handed have really model salcons. They

MODEL BALOONS.

Twenty years ago a young man circle, know how that mysterious aerfrom a western state began sugges vant, electricity, is measured. We only
like that the best way to protect the know that the regular monthly hill
meney which the people deposited in calls for "1567—1548—34 kw-hr. for
the banks would be to have the state which please remit, \$2.40." Many of
the banks would be to have the state which please remit, \$2.40." Many of
the banks would be to have the state which please remit, \$2.40." Many of
the banks would be to have the state which please remit, \$2.40." Many of
the successful to the factors
game of auxiliating distance: ind banks would be to have the state which please remit, where many or legislatures enact a law to provide a us have gone down ceilar, or up in motor car ever assembled.

An automobilist, caught willout his miles away by using his telephone in tools on a stretch of bad road far the than it would take the that thus benking interests quite ter with its incomprehensible dials had cause to thank the rural telestary up his car. The manner in

that time healting interests quite be with its incomprehensible dials superally ridiculed the proposition, and unreadable figures only to won- and the great majority of newspaper of the wat it was all about.

The fact is that electricity, or strict beighters. The young man did not by speaking, electric energy, it means that deep guaranteed deposits whenever hour is practically the same as one in the question of surranteed aposits whenever hour is practically the same as one in the question of surranteed bank power, it is a rate of work just as a horse this quaranteed aposits into the companies have the other tails how hard a horse that and finally in several states how have the organic has the pagines, quite generally into the Dem.

The measurement of electric power in the pagines, quite generally into the Dem.

The measurement of electric power is a rate of work to produce the pagines, quite generally into the Dem.

The measurement of electric power is a rate of work in a single more time of the polition.

The measurement of electric power is a rate of work in the corract power is a rate of work in the corract power is a state platforms of the polition.

The measurement of electric power is a rate of work in a single more time of the polition passes through a small motor, or arm hand deposits into the pagines, quite generally into the Dem.

The measurement of electric power is a rate of work in a small motor of the polition passes through a small motor, or arm hand deposits against loss. What The moving peri of the motor, or arm hand deposits in the great bank. Store is a connected to an ordinary or the manurement of the motor or arm hand deposits in the connected to an ordinary or the manurement of the motor or arm hand deposits in the connected to an ordinary or the manurement of the motor or arm hand deposits in the connected to an ordinary or arm the motor of the motor or arm the motor of the motor of the motor or th

hank deposition against loss, what The moving part of the motor, or arm a howl went up from the great bank, ature, is connected to an ordinary ing interests and their subsidised country, such as used on bloycles, gas newspapers! How the great lawyers meters and automobiles. This system of the country laughed at the man of toothed wheels is arranged to count who was recognised as the foremost the number of watt hours of electrically champion of the idea guaranteeing ity. A thousand watt hours is called bank deposits! They admitted that a kilowatt hour. The prefix "kilo" the most abominable read of my was service.

So I trusted to Providence and was well rewarded.

"For the next ten miles I was in a most unhappy frame of mind. Suddenly a farmer woman stepped before me and wildly waved her arms. I was a last the foreign that is desired in horsepower hours, it is delired that the courts would kill is desired in horsepower hours, it is a last the foreign that a last thought then was which any only necessary to remember that a last that it is desired in horsepower hours, it is last to be a last the most abominable read of my was service.

The prefere and winds was well rewarded.

We are trying to make it an object for the people of this from a large circular. I much take a territory to trade in Rahway.

146-148 MAIN STREET, RAHWAY, N. J. "THE DRUG STORE"

A vig business is a steamship bound for a port called Success. It takes a large force of men to operate his boat. Eternal vigilance is not only the price of liberty, but it is the price of every other good thing, inluding steamboating.
To keep this steamship moving, the hundreds of people who have a singleness of aim-one purpose-a desire to

BIG BUSINESS

do the right thing and the best thing in order that the ship shall move steadily, surely and safely on her Curiously enough, there are men constantly fal'ing overboard. These folk who fall overboard are always cautioned to keep away from dangerous places, still there are those who delight in taking risks. Those individuals who fall off, and cling to floating spars, or are picked up by passing craft, usually declare that they were 'discharged'-they say the Captain or the Mate or their comrades had it in S

was ever "discharged" from a suc-

constul concern—he discharges himoiling the engine or scrubbing the lank and leans over the side calling outsiders, explaining what a bum boat he is aboard of, how had the food is and what a fool there is for a Captain, he gradually loosens his hold until he falls into the yeasty deep. Now, & there is no one to blame but himself.

even to his heart the formula, " wasn't hired to do that," he is standing upon a greased plank that inclines toward the sea. When the plank is tilted to a proper angle, he goes to this: The man takes more interest in
