Try to Force Sale of a Paper That Never Has and Never Will Tell the Full Truth About Its Actions. Council Prefers "Let Alone Policy. The Elizabeth Journal says: "Boycotting is a crime which ma be severely punished. It is a pecu listly low form of conspiracy and is rightfully barred in every fair fight. Under the circumstances it would seem, therefore, that some persons in Rahway are on several counts in an exceedingly delicate position. S car Mr. Furber must, in the eyes of the outside public, occupy decidedly the most advantageous position." That the depraved and irrespon ble element of the Volunteer Fire Department should undertake to accom plish by a boycott what it could not hope to accomplish in an open, fair fight was not surprising to some who are familiar with the character of the men. That Common Council should attempt to prevent the turning of God's clear sunshine on its acts by undertaking a boycott of the NEWS HERALD is quite another thins Had Council taken its Tuesday night action upon the elevation ordinan at some previous meeting the public could have been prepared for any thing, but no one has thought it would lower itself so decidedly as to try what the Journal calls "a low form of conspiracy" to counteract the ef-

and the future of the city itself by passing a Track Elevation Ordinance to suit the Pennsylvania Railroad Company and ignoring the wishes of the people of Rahway.

These are the men who ignored the pleadings of the citizens of Rahway, whose interests they are sworn to protect, and voted to the Pennsylvania Railroad Company the most valuable franchise that this city ever had or ever will have.

Of these nine men, three are employes of the Pennsylvania Railroad, one is the son of an employe of the Pennsylvania Railroad, and still another in close business relations with the company. Of another it is reported he has been promised a lot of business by the Pennsylvania Railroad if the ordinance went through as they wanted it.

These are the men who ignorantly believe that they are far greater than all the other citizens of Rahway combined, and in their ignorance have saddled themselves with a responsibility that the man of average civic intelligence would shudder at. It may be that in the near future they will awaken with a jolt.

The Coronation Special Exhibition on our Fifth Floor

We have secured, at great expense, two exquisitely sculptured and remarkably lifelike figures of the King and Queen of Bugland in full Coronation regalia. No pains have been spared to secure exact likenesses of their Majesties, while the robes, crowns and acconterments, as well as the dais upon which the figures stand, are historically correct. These figures are now on free exhibition on our fifth floor, and we extend a cordial invitation to every one to come and see them. They constitute a remarkable display.

fine little white frocks I made the baby. They are literally eaten through by the strong stuff my washwoman puts in the water to bleach the clothes." Anty Drudge-"Have your washing done at home with Fels-Naptha soap, and you need have no fear of the daintiest, sheerest articles being spoiled. And they will be pure and white, too."

Save the clothes by using Fels-Naptha

Half the life of clothes goes in the washtub under old-sashioned washday methods. It is hard rubbing that wears out the fabric.
Just as acusing on the sloor makes holes in the youngster's stockings, the friction of the washboard wears out the clothes. The week's darning shows you the effect on the boy's stockings. The wear of the washboard is not so easy to detect. But it is just as certain.

Why waste your strength wearing out the week's wash? Think how Fels-Naptha soap saves the clothes. The wash is soaked in cool or lukewarm water for 30 minutes while Fels-Naptha loosens every particle of dirt. Light rubbing and rinsing make the clothes clean, and sweet and white. Follow directions on the red and green wrapper.

Why Not Use Which Science Has Given You

15c and 25c

HB great chemists of Germany have produced a washing powder that contains Oxygen. Do you realize what this means?

It means that Oxygen — the wonderful element that is the basis of all life — can be used to help you do up your weekly wash. An Oxygen Washing Compound is not just a new washing powder. It is the final, ultimate discovery. It is the last word of science - a powerful, effective, but absolutely harmless, cleanser.

The name of this Oxygen Washing Compound is PERSIL. Look Here What PERSIL Will Do

PERSIL will wash clothes without rubbing - delicate laces or greasy overalls are all the same to PERSIL. You don't have to rub. because your hands can't work as hard or as fast as Oxygen. PERSIL removes any kind of stains, grease, dirt, in a few minutes, and positively will not, can not injure any fabric. Oxygen is Nature's Enemy to Dirt, but it is as gentle to the clothes as cold water.

PERSIL will get your washing done in less thanhalf time. This is a fact, and whatever your wash-PERSIL will bring out your white clothes whiter than you ever now these before—not a shiny,

PERSIL will save your clothes. You can wash a garment again and again. You can wear it out in time, but PERSIL will never harm it.

PERSIL is just three years old. It was discovered in Germany, and Thirty Million Pennds of PERSIL were seld in Germany last year—more than a pound for every matron, maid and girl baby in the entire German Empire. Now PRESIL has come to America, and this is one of the first cities where it is offered for sale.
