A Great Output

The Sordsis factories are among the largest in the world, having a floor space of several acres and facilities for a daily output of more than six thousand pairs of shoes—the range of their output being from the tiniest soft moccasin for a baby's foot and fancy ball slippers to sturdy hunting and riding boots for both men and women. world. Every kind of machine necessary to fine shoemaking

is here in use, and, in charge of intelligent operatives, these machines, supplemented wherever needful by handwork, turn out a product of absolute uniformity in its high standard of excellence—a product which in general style and finish no ordinary factory can approach, and superior in these respects to the most expensive custom work.
