Extra road hugging weight is just one of the reasons this year's Ford can make any road feel better. The ingenious way Ford engineers have isolated the passengers from the bumps is another. All Fords are total performance Before you buy any new car... cars which means they are versatile—great for turnpike driving, great for city driving, great for your kind of driving. For example: In a total performance car you hold the curves better. You accelerate more quickly. And you can expect your Ford to hold up better (and thus hold onto its value longer). All your Ford Dealer asks you to do is test-drive one of his 46 models. See how the old roads have changed.

A new type face, Corona, is being used for the news columns of this week's Rahway News-Record. The type face, nine-point size in comparison to the eight-point the News-Record easier.

The Rahway News-Record feels that the change is an improvement in that the new type will give the newspaper a modern, clean and bright look.

Another improvement to be made in a week or so

will be the use of a type face known as Spartan Book for the classified advertisements. The type face will improve the readability of the "ads." We would like to point out that the use of the new whe for the news columns will decrease the amount of pace available for news but that this change will be all. We hope to compensate for loss of the space due to the larger type size by "tighter" editing. It may also be necessary at times to limit the amount of space given to any one organization. We might suggest that new items to the New-Record promptly after meetings or as early as possible in the world. or as early as possible in the week to avoid disappoint nent. So what is it really - this G. O. P. Elephant which emerged from last week's Republican convention? Same of our wise men would have us believe it is a wall of defense against our declared enemies; others that it is the snake of subversion; others that it is the flourishing and growing tree of liberty; others that it is a rope for hanging civilization as we know it. Still others tell us it is the spearhead of peace and their foes declare it to be a fan to blow up the flames of racial strife. Perhaps only time can remove the blinders of emotionalism and political fervor and let us see the whole Elephant as he really is - a trumpeting power of destruction or a disciplined and courageous force, ready and waiting to help in the construction of a better world. We wait hopefully.
