which would permit him to construct seven one-family dwellings in a tract off of Madison Hill Road. The variance application was rejected by the Council it its June 14 meeting by a 5-4 vote. The variance was required because the houses would be erected on lots with lot depths less than the required 100 feet, according to the plans submitted with the application. The governing body voted to grant the variance after Mr. Cerami agreed to an amendment of the plans. The amendment concerned raising the grade of the street to be constructed from feet. A Way to Establish Taste

Freedom requires maturity and taste--somethin which, we are affaid is possessed by a declining number of people, it was H. L. Mencken who once observed that he never heard of a person who went broke hy underestimating the intelligence of the American people. While acrid, the remark does point out there are always enough people around giving good taste a bad name. Consider for a moment the vast increase in the number of people profitably engaged in the pornography business. It isn't bad enough that they have answered a "calling" for the lowest common denominator, but they aggravate a despicable status by invading the privacy of individuals through the mails who definitely do not want to be assaulted with their filth. In today's issue of the paper, Postmaster Warren G. Moulton re-emphasized a program whereby those in Rahway and Clark who do not wish to receive pornography can inform the Rahway Postal Service of their wishes and after 30 days, if any salacious material is received by them, the mailer can be subject to both criminal and civil action.
