A Fowl Case of Libel

Just imagine that you were forced to trot through life with the wrong name! That would probably make you feel, pretty dumb, too. This has been the plight of the melbagris gallopavo, a bird that the earliest settlers in the New World misnamed turkey. A clear case of fowl play, because these early

ravelers confused this unique variety of bird with the Old World's African Guinea fowl. Even the name "turkey" assigned to this American species was a misnomer. The call of the African bird is "turk - turk," while everyone knows the bird which graces our festive tables has a quite

Although the turkey is considered to be of lower than average intelligence (bird-vise), it has managed to survive on this continent for the last 40,000,000 years. The turkey has also managed to hatch several colorful out not always complimentary slang idioms. For example, that represented easy profits." A few years later, turkey had the slang definition of "someone easily fooled, dumb

or unsuspecting."
However, in 1890, the turkey idiom soared with the expression talk turkey, meaning "talk sense, or get down to business." This favorable reference came from the fact the turkey was the featured course of a Christmas dinner again in 1920 when a turkey in show business jargon, was "theatrical flop." By 1970 turkey took on the additional disparaging sense of "a person who is inept or

ndesirable.
