

Special opportunities now in those immense overstuffed pieces whose vogue has survived the passing of countless generations. The value is greater than the reductions show, as the cost of upholstery has gone up considerably since these goods were made. No duplicate orders can be taken on any of this furniture at the reduced prices. The mastery of these masterpieces can only be realized by personal inspection. Settees measuring between 7 ft and 8 ft wide, cavernous arm-chairs, rockers and wing chairs to match. Vast billowy depths of loose cushions filled with softest down and covered with the choice figured velours in royal tones. Here is the very acme of comfort combined with sumptuous luxury.

These are but a few examples taken at random. Stroll around our main floor and you will find equal and perhaps better values in a variety of other living-room suites, including furniture covered with silk mohair, also a large line of leather-covered suites at all prices, less the July Sale discount. Handsome living-room suites as low as \$50. Also large assortments of Mahogany Chairs and Rockers, Bookcases, Mirrors, Lamps, Clocks, Serving-Carts, Piano Benches, Music Cabinets, Candle-stands, Trays, Tables, Sewing Cabinets and other pieces that are usually in place in the living-room.

No More Winding by Hand.

THE SHELTON ELECTRIC MOTOR

DOES IT FOR YOU

THE Shelton Phonograph Electric Motor will electrify your Talking Machine—no more winding up by hand. You may now get the greatest possible enjoyment out of your Talking Machine.

The Shelton Electric Phonograph Motor is indeed simple; just connect the ten-foot cord to any convenient electric light socket, place the electric motor against turntable of Phonograph and push the electric button, and then promptly dismiss the winding from your mind.

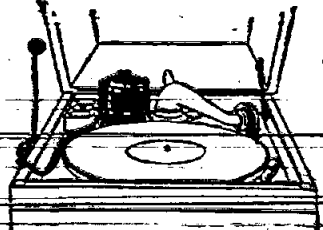

The speed of the turntable is controlled by the speed regulator or governor already on phonograph.

Shelton Electric Motor not being attached to the cabinet can be moved a fraction of an inch away from the turntable, then you can insert crank handle and wind the machine in the usual way should you at any time wish to play the Phonograph where electric light socket is not convenient

This much-called for means of talking machine drive was developed and perfected by W. Center Shelton the inventor of Shelton Vibrators, Dental Engines, Electric Therapeutic Appliances, etc., all recognized and acknowledged leaders in their line.

FOR SALE BY
JAMES McCOLLUM

114-120 Main St.

A detailed line drawing of a vintage phonograph. The turntable is in the center, with a tonearm and stylus resting on it. A hand is shown operating a crank handle on the side of the motor assembly. The entire unit is mounted on a wooden cabinet with decorative legs.

QUESTIONS FOR SCHOOL BOARD

(Continued from Page One)

Furber, Karl Heisenberg and W. A. Johnson seeking for an explanation of the reason why the contract for the schoolhouse was not awarded to Mr. F. Maslin, who was the lowest bidder.

The papers were served on the board of education, and also on the contractor to whom the bid was awarded, - Amos Terrill, William Corradin, and J. A. Compton.

The board of education will be held at the Supreme Court in Newark, on Monday, July 31, before Judge Wren is in session. Service of papers is in accordance with the provisions of the act, and Attorney John Lentin Hughes of Newark will represent the applicants in the case.

An injunction on the work of painting the schoolhouse is being sought in order to go on progress in the various schools in a comparatively short time as service in the suit.

The committee representing the board of education is asserted, on the part of the board, that discrimination was made against Maslin, and at the recent meeting of the board of education.

At the meeting of the Board of Education at which the bids for painting and other repairs were received, an allocation whatever, members of the Board of Education who were present was made of the nationality of Mr. Maslin, but they were not on the board decided, according to the lowest responsible bidder in each transaction.

The board of education, although according to the text of the legal advertisement, the board had no authority to whom the bid was given, Mr. Maslin's bids were ignored, for the reason, expressed as the board was not a body of persons who employ labor, and that thereby there was a possibility that the work on the school buildings might be tied up.

The board of education, yet proceeded to make a bid, and the board, during the meeting, in the absence of president H. M. Jardine, Others were present, including Mr. J. H. Girvan, Clarence P. Lamphear and Rev. L. V. Graham and secretary Guy M. Howard.

They ignore blood makes a muddy picture of the schoolhouse.

Investigation. This blood makes very muddy picture of the schoolhouse and sound disposition, see Burdock Book Co.

REPORT MADE ON MOTOR ENGINE

(Continued from Page One)

by city engineer Franklin Marsh, and approved by the state board of health, and the city board of health, for accommodation for a house in Rutherford street, near Milford avenue, and also for the purpose of the city board of health to consider all these before the next regular meeting of the committee.

The bids for the construction of new sewers in Essex, Lafayette, Montgomery, and Newark, in the section of the city were opened in the city hall, and the bids were immediately referred to the drainage committee for further investigation, and for the purpose of the city board of health to consider all these before the next regular meeting of the committee.

There were three bidders - Foster Calhoun of 3 Broad street, Elizabeth, Louis Schackling of 222 Bank N. J., and Matthew Wade & Son of Elizabeth. The bids varied considerably.

The Calhoun bid was \$125,000 for the sewer, at \$155 per foot, and \$76 for steel of \$168 per foot, this firm's bid on manholes was \$1103, and for gutters and cast iron pipes, \$100,000.

The Schackling firm bid at \$50,000.

WHI Alaska Property Company.
The damage done to trees throughout the area was estimated at \$100,000. This was discussed at some length. The Shadze Tree Commission, it was stated, had been organized in 1946 for the orderly management of the trees. It was represented by the state, and the commission was made up of three members, but at that time had not much of the sidewalk where the trees had been blown down. There had been \$1500 to meet this expense. The street commissioner and his assistant had been asked to make a list of the trees, and this expense was charged against the Shadze Tree Commission. The street commissioner, Mr. Chaffee stated that the street commissioner was, and had been, ready to take care of the sidewalk, but that ultimately this money would be returned, as it would, be assembled from the various sources. The street commissioner's final action was that \$35,000 was advanced to the Shadze Tree Commission from the contingent fund, and the street commissioner was to make the amount between the estimate of the amount of damage done to sidewalks and the amount advanced to the Shadze Tree Commission.

There was a question as to the connection with the clearance work done after the storm were made by street commissioner, rather, and for the street commissioner to make a list of the trees. C. Shocrell.

will find this a pleasant store to visit and to shop in during the summertime. The roomy, spacious aisles that prevent jostling and crowding, the low "trims," new, fresh, fairly-priced merchandise and spirit of hospitality that pervades the store make shopping more of a pleasure than a task. You can spend an entire day here without once going out—free check rooms for hand parcels and luggage, United States postal sub-station, rest and waiting rooms on the balconies, where you can meet friends, rest, read and write letters; a cool, delightful luncheon in the restaurant. Welcome to come and go as you please, whether you buy or not.

An illustration of a large sack of 'FINE PEAS' and a bowl of peas. The sack is standing upright, with its top open, and a small bowl filled with peas sits in front of its base. The sack has the words 'FINE PEAS' printed on it in a stylized font. The entire illustration is enclosed within a circular frame.

Avoids Breakfast Cooking--

New Post Toasties are ready to eat direct from the package. They have a fine new flavor—self-devel-

The proof of this superior flavour is found by eating some from the package dry. They're deliciously good that way, but of course are usually served

with cream or good milk.

Examining the New Petal Milk. The quick, fierce heat of the new process of manufacture, not only raises the distinguishing little bubbles on each flask, but gives a body and firmness that makes the New Petal Milk a more substantial food than ordinary milk.

New Post-Testers do not "chaff" or crumble in the package, and they don't melt down when cream is added. They come to you untouched by hand, and in moisture-proof packages that preserve their delightful oven-crispness until served at your table.

Well worth trying—these

New Post Toasties

Important Matters Brought to

Public Attention By In-

terested Residents

Editor of The Record.—It would be

difficult to find a better illustration

of the failure of the present system

than the exhibition on Tuesday eve-

ning at the Commission proceedings

when it was shown that the delay in

clearing away the ruins of the city

was caused by a misman-

agement of the funds of the

Commission and the Street Com-

mission.

For the efficiency of the present

system it is always the citizens who

suffer. The interested property own-

ers on Millin avenue were told that

the rebuilding of the street was

delayed by the mismanagement of

the funds of the Commission and the

Street Commission.
