PROGRESS REPORT ON LAND ACQUISITION

In the 1800's when Henry David Thoreau wrote, "In wildness is the preservation of the world," little notice was taken of his statement. At that time Sanibel Island was undeveloped, was isolated from the mainland by an expanse of open water, and was virtually uninhabited except for an abundant population of wildlife. Then, rare and unusual seashells were all that littered the island's beaches, and a trip to Sanibel was an adventure to a far-off island paradise.

The early days of Sanibel can never be recalled except in the minds of men and in such historical records they leave. But marsh, mangrove, beach, and upland essential to our purposes can be saved if the minds of men grasp the problem with a positive attitude. This must be done without delay. The bulldozer, the concrete mixer, and the dragline are no longer waiting in the wings. They are actively at work on the Sanibel stage. An undisturbed habitat that was cherished by a last year's visitor is at this very minute being leveled for a cottage or a road. And once destroyed, the spot is unlikely to be reclaimed or allowed to revert to its original condition. Once plentiful deer, panther, and bobcat can no longer be found on Sanibel. Many rare and endangered species such as the bald eagle, osprey, mangrove cuckoo, brown pelican, and the American alligator can still be seen on the island but their living space is shrinking constantly, and more rapidly than we like to contemplate.

Realization that Sanibel could become just another residential area or a Coney

GIFTS FOR THE GIVERS

Anyone who will give a check to be divided between the Humane Society and Meals for Millions may have a vacuum cleaner (with all the parts) or a dehumidifier, brand new.

You can help the poor doggies and cats and you can help poor little children throughout the world pitifully sick and hungry through Meals for Millions. Phone GR 2-3943.

To date Pirate Playhouse, this season has collected a tidy sum for Meals for Millions, the last, a present from their wonderful actors which bought a piece of machinery badly needed in Equador for making Multiple Purpose food.

BATTERS BOX

Water Way Estates on Monday, May 25 was the setting where the Sanibel-Captiva Softball team dumped Hugh's Supply 15-8.

Concrete Seawall sneaked by us at the Wednesday night game with a resulting score of 11-7. Roger Tabor and Al Nave hit a triple each, and Chuck Nave hit a double.

P.S. - Congratulations to the new groom, Roger Tabor.

COPE MEETING

"Living it Up" is the topic chosen by Mr. Leon Krumbholz, registered Physical Therapist, for the next meeting of COPE (Community Organization for Patients with Emphysema) Wednesday evening, June 10, 1970 at 7:30 p.m. The meeting will be held at the TB and RD Association of Southwest Florida Office, 3643 Palm Beach Blvd. in Fort Myers.

Mr. Krumbholz graduated from the University of Michigan with a degree in Physical Education and then received his certificate in Physical Therapy. He is a member of the American Physical Therapy Association.

Refreshments will be served and anyone interested is welcome.

THREE CHEERS

Hats off time is here again! This time to Ross Mayer, a kind, compassionate gentleman whom we are all proud to have with us on Sanibel Island.

REAL ESTATE NEWS

Priscilla Murphy, Realtor reports the following sales:

Stanley McCaul of Sarasota, Florida, house in Captiva Island to David W. Davenport of Cleveland, Ohio.

Ann Konrad of Sanibel Island, lot to Ellsworth E. Sanders of Birmingham, Mich., in Chateaux Sur Mer.

LETTERS TO THE EDITOR

To The Islander:

The following letters were sent to the Islander for publication:
Dr. Joseph W. Lawrence, Director
Lee County Health Department
Post Office Box 1226
Fort Myers, Fla.

Dear Dr. Lawrence:

Representative of Jamestown-Beachview, Inc. on two occasions during the last four months have agreed:

- (1) to preserve the fresh water system on Sanibel
- (2) to lower the Sanibel Slough in the area where construction of the new golf course subdivision is under way, but not below 16 inches
- (3) to prevent salt water incursion into the Slough
- (4) to restore the fresh water level on the completion of construction (in about 18 months) to previous optimum level of 24-30 inches for this area.

Copy of letter from Dr. Maurice W. Provost, Director, Entomological Research Center, Vero Beach, Fla. presents evidence that this construction work is turning the Sanibel Slough into a salt water canal and is resulting in serious salt damage to the entire area East of Casa Ybel.

This fresh water resource does not belong to one developer, to any one land owner -- it belongs to the entire island community. Further, many other organizations have a great stake in the maintenance of Sanibel's fresh water system, including particularly the U. S. Department of the Interior. It has been clearly established that the fresh water system is essential to the preservation of the J. N. "Ding" Darling National Wildlife Refuge, The Nature Conservancy and the National Audubon Society have a vital interest in the Sanibel Slough also. And, property owners dependent upon the fresh water supply in the area in question (even for drinking purposes) are being damaged.

We urge your office in cooperation with other concerned County officials to take the steps recommended by Dr. Provost forthwith. Thanking you for your cooperation, I am,

/s/ Roy E. Bazire, Chairman

Mr. Roy Bazire
Sanibel-Captiva Conservation
Foundation
Sanibel, Fla. 33957

Re: Salt-water intrusion on Sanibel Island; inspection of 5/14-15/70

Dear Mr. Bazire:

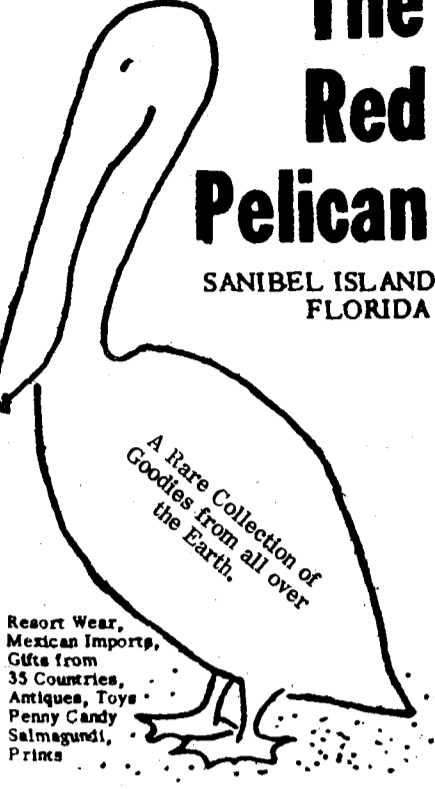

The water being pumped out of the large and deep borrow pit at the Gulf end of Periwinkle Way tested out at 79% ocean salinity. This, as you know, is being pumped up and into the interior Sanibel Slough waterway system. Under-ground water is entering this deep pit from under the dunes along the Gulf beach, which by now must be exhausted of whatever fresh-water lens once existed, so essentially Gulf-of-Mexico water is being pumped into the once fresh interior slough system. The fact that this water was not closer to full ocean salinity undoubtedly reflects the fact that a smaller fraction of the seepage is from the interior sloughs -- this water by now being still a little fresh.

At low tide, about 10 to 15 gallons per minute of water was flowing through the pipe under Bailey road and into the tide-water system to the east. This water tested out at 67% ocean salinity, indicating that the water being pumped into the interior sloughs, as above mentioned, was still being diluted by a little fresh water. At the Casa Ybel Road, water on the east side was at 12% ocean salinity, proof that the infusion of Gulf water earlier described reached at least that far westward. As you know the Casa Ybel Road culvert is blocked solidly so that essentially a dam exists at this point. On the west side of the road, the impounded water tested out at only 5% ocean salinity, not very different from what it was a few miles farther west at Akers Pond where it was 4% of ocean salinity. With water levels as low as they are now, ground water of 4 to 5 percent ocean salinity is to be expected. This water is still usable for lawn and landscape water, especially since on higher land, where homes are being built, the salinity of the underground water will be considerably less.

But there is no doubt that the underground water east of Casa Ybel Road is being seriously salt-damaged. In my estimation the developers should be forced to either (1) discharge the water out of their deep borrow pits into the Gulf, which would lessen but not eliminate the fresh-water problem in the interior, or (2) resort to hydraulic dredging, which would be better still since it would merely recycle the interior fresh underground waters.

/s/ Maurice W. Provost, Ph.D.
Director, E. R. C.

35 ACRES SOLD ON SANIBEL

A 35 acre parcel on Sanibel Island was purchased by Jamestown-Beachview Inc. for \$75,000.

The property adjacent to other Jamestown-Beachview holdings, was bought from Kenneth P. McCoy and Gail Logan of Louisa, Iowa.

Jamestown-Beachview probably will subdivide the parcel and place it back on the market.

Realtor Houston L. Pewett handled the details of the Jamestown-Beachview purchase.

DEFENSELESS BIRDS

Division of Health scientists have discovered that while some birds will violently defend themselves from mosquitoes, other species cannot or will not. At night they silently endure attacking mosquitoes by the thousands.

THE ISLAND GARDENER

The hot summer weather brings on heavy infestations of red spider and other mites on ornamentals according to the Florida Nurserymen and Growers Association (FNGA). When the plants are sold to you they may be bug free, but spider mites and other insects from your neighbors' plants pounce upon your green and succulent plants that you have recently purchased. A good spray program will discourage those neighbors' bugs. For spider mites there are several materials available: Kelthane, Ethion, Chlorobenzilate, and Tedion. The last two are used commercially but are still suitable for use around the home. Repeat the sprays at least once a week until control has been gained.

The typical symptoms of mite damage on citrus is a yellowing of the leaves along the mid vein of the leaf. If the leaf is turned over you can see what appears to be a graying of the underneath side. Excessive feeding of the mites will cause a leaf drop. Sometimes mite damage is mistaken as a deficiency, so if you are unsure consult with your local FNGA member.

In the summer months the height you cut your grass is very important. It is desirable to set your mower to a height of 2 1/2 to 3 inches for St. Augustine and Bahia, Centipede one inch, and Zoysia and Bermuda 1/2 to one inch. The reason for this is to give the grass greater vigor and to prevent loss of moisture from the soil. A higher cut will also prevent weed invasion to some degree.

Summer vines are important in the landscape, and here are a few good ones suggested by the FNGA: Mexican flame vine - this is a vigorous growing, light green vine with a brilliant orange flower. It can be propagated from a very small cutting in early spring to become a complete living screen by fall. It is a continuous bloomer with few insects or diseases. You can obtain this from most nurserymen; Gloriosa Lily -- most nurserymen carry and offer for sale gloriosa lilies. This is a peculiar lily in that it vines and climbs by curling the ends of its leaves around string, fences, shrubs, or other structures. It is grown from a tuber which needs no care except a little water and fertilizer. You need not have to dig the tubers. One caution - all parts of the plant are poisonous, but don't fail to plant it for this reason. Its beauty is almost unsurpassed in the hot summer months; Moon Vine - the moon vine is an excellent summer, morning-glory type vine. It blooms in late evening and closes in the morning. Treat it as you would morning glories.

GOLDEN SANDS RESTAURANT"

PROGRESS REPORT ON LAND ACQUISITION

continued from front page

Island led to the formation of the Sanibel-Captiva Conservation Foundation, Inc. It has worked through the years to preserve some of the primitive atmosphere of the Island. The goals of this organization closely parallel the objective of the J. N. "Ding" Darling National Wildlife Refuge. The Sanibel-Captiva Conservation Foundation, Inc., the J. N. "Ding" Darling Foundation, and the state of Florida have cooperated closely with the Bureau of Sport Fisheries and Wildlife in making the refuge a workable unit of our National Wildlife Refuge system. Few areas can claim such a dedicated citizenry and few national wildlife refuges are endowed with such spirited backing.

A continued cooperative push is needed by private, State, and Federal organizations to insure the preservation of the environment on and around Sanibel Island. Interior wetlands, unspoiled shoreline, natural uplands, unpolluted bays, and primitive mangrove swamps remain to be brought under protection. A sense of urgency prevails. The acquisition program which we have begun must continue without delay.

Getting to the point of my brief presentation, we are making very good progress in our acquisition program for the J. N. "Ding" Darling National Wildlife Refuge. The land exchange with the State of Florida, we are advised, will be completed in the very near future. This transaction will give us clear title to over 3,000 acres of mangrove and waterbottoms within the refuge boundary.

At your 1969 conference here on Sanibel, our Director John S. Gottschalk, said that the Bureau of Sport Fisheries and Wildlife would, insofar as possible under available funding, move forward to purchase all private lands within the refuge. A good start has been made. In June 1969, we sought and received approval of the Migratory Bird Conservation Commission to use "Duck Stamp Funds" to make these purchases. Negotiations were begun in earnest with private landowners.

From mid-1969 to the present, a little over six months, we have acquired or optioned 16 acres in 23 private ownerships. Almost \$300,000 in "Duck Stamp Funds" has been used. However, there are yet to be acquired approximately 675 acres of private lands before the acquisition phase is finished. These remaining tracts are, by virtue of access, elevation, and locational features, the most susceptible of development, most expensive, and most difficult to acquire in the project.

At a later session of this conference, Mr. William C. Ashe, Associate Regional Supervisor of our Realty Division, will speak to you in more detail regarding our acquisition plans. You will note, however, that substantial gains have been made in the year that has elapsed since our last visit.

I promised to be brief and beyond that I am a strong believer in the philosophy that the mind can absorb only as much as the seat can tolerate. Many thanks for your patience.

(The above was presented by C. Edward Carlson, Regional Director, Bureau of Sport Fisheries and Wildlife, at the Third Annual Sanibel-Captiva Conservation Conference, January 22, 1970.)

TOO LATE TO CLASSIFY

by russell kay

A group of disgruntled women, organized under the name "National Organization of Women" (NOW), have protested to officials of the National Hurricane Center in Miami against the use of girls names to designate hurricanes.

The contend that the practice is derogatory in that it gives women a bad image comparing them to destroyers of life and property, wild and irresponsible to be hated and feared.

The Weather Bureau, while expressing sympathy with the protestors, explained that it was too late in the season to make any change this year since female names have already been assigned, but agreed to pass the question on to Washington for consideration.

When news of the protest reached the public the Hurricane Bureau was immediately flooded with phone calls from Miami area women who stated they did not object, in fact, some felt it an honor and urged the practice be continued.

Roxie Bolton, who as vice president of the women's organization, who filed the complaint with Dr. Robert Simpson head of the Hurricane Center in Miami, suggested that men's names be submitted.

I doubt if many men would view such action with any degree of alarm but I can conceive another group of women arising in their wrath to complain that women were being discriminated against.

Maybe we should ignore both men and women and name our hurricanes after dogs like Airedale, Bloodhound, Chow, Dachshund, English Setter, Fox

Terrior, etc. But if we did it probably wouldn't be long before we would be confronted by another protest group, the Disgruntled Order of Dogs (DOD) sponsored by Dog Lovers of America (DLA) who would put the bite on the Hurricane Center.

Assuming that most of the members of the National Organization of Women (NOW) are over 30 years of age, I would not be a bit surprised to hear of a vigorous protest from members of the NOW generation. Who do these old dames think they are trying to steal our name? We are the original NOW crowd and we don't appreciate a lot of unhappy old women trying to horn in on the act. We do our own thing, baby. Why can't they mind their own business and do theirs instead of giving NOW a bad name?

Of course, we might try naming hurricanes after flowers like Aster, Buttercup, Camellia, Daisy, etc. or we might turn to vegetables like Asparagus, Beet, Carrot, Dasheen, Endive, etc. Or we might try birds such as Albatros, Butcher Bird, Canary, Dove, Egret, etc. But in either case we would probably have the farmers and bird lovers to contend with.

Even if they were to assign boy's names to hurricanes I doubt if there ever would be a Russell Hurricane because R is the 18th letter in the alphabet and I don't think we have ever had 18 hurricanes in one season. But I'll bet if we ever did have a Russell it would be a hum-dinger.

LEONARD A. MAGNUSON

Leonard A. Magnuson will be a regular contributor to the Islander.

His column will be known as "Wisps O' Wisdom." His columns for other papers have been known as "Wisps O' Wisdom", "L.A.M. Chops" and "Len Magnuson's Corner." Several years ago he published a sprightly magazine called the Newsette.

Mr. Magnuson, always active in sales work, was president of the Jamestown, N.Y. Advertising and Sales Club, which became one of the larger clubs as an affiliate of the International Sales and Advertising Affiliation through his efforts. This organization was one of the oldest of such affiliations in the United States, with member clubs in the United States and Canada. Subsequently, he became a director, vice president, and finally president of the International Sales and Advertising Affiliation at a general convention at Hamilton, Ontario in 1953.

He is an active member of the Jamestown Rotary Club, and served as director, vice president and served as president in 1959-1960. He is a member of the Conewango Club of Warren, Pa.

wisps o' wisdom

by len magnuson

The greatest truths are the simplest. No brain is stronger than its weakest think.

Courtship causes a man to spoon; marriage to fork over.

It is so easy to do right when sin ceases to be a pleasure.

Happiness comes to those who work for it - not wish for it.

A woman's guess is much more accurate than a man's certainty.

A true friend is one who likes us in spite of our achievements.

If a man could have half his wishes, he'd double his troubles.

Enough would satisfy us - if our neighbors didn't have any more.

Life is like a camel; you can make it do anything but back up.

Trash belongs in a rubbish heap. Don't clutter up your mind with it.

If you want to hear the whole truth about yourself, anger a neighbor.

Light may disclose a jewel, but it takes darkness to disclose a star.

A critic is a man whose watch is five minutes ahead of other peoples.

THE ISLAND CHIEF

SHRIMP CHOP SUEY

- 1 1/2 pounds deveined shelled raw shrimps
- 2 cups thinly sliced celery
- 1 clove of garlic, minced
- 2 Tbsp. vegetable oil
- 1 can (5 oz.) water chestnuts, drained and sliced
- 1 can (5 oz.) sliced bamboo shoots, drained
- 1 package (7 oz.) frozen Chinese pea pods
- 2 1/2 cups water
- 2 Tbsp. soy sauce
- 2 tsp. granulated vegetable bouillon
- 1 1/2 tsp. salt
- 3 Tbsp. cornstarch
- 4 cups cooked rice

Cook shrimps, drain. Saute celery and garlic in vegetable oil until soft in a large frying pan. Stir in shrimps, water chestnuts, and bamboo shoots; place pea pods on top, cover. Heat just until pea pods are thawed.

Stir in 2 cups of the water, soy sauce, vegetable bouillon, and salt; heat to boiling. Mix cornstarch with remaining 1/2 cup water until smooth in a cup; stir into mixture in frying pan. Cook, stirring constantly, until mixture thickens and boils 3 minutes. Serve over rice.

KING FISH STEAK WITH EGGPLANT & TOMATO SAUCE

- 1 2-pound king fish steak
- 1 large green pepper
- 1 large onion
- Small eggplant
- 1/3 cup salad oil
- 2 8-oz. cans tomato sauce
- 1/2 cup dry white wine
- 1 garlic clove, minced
- 1 bay leaf
- 1/4 cup butter or margarine
- 2 Tbsp. lemon juice
- Salt and pepper

About 30 minutes before serving: Cut green pepper into 1/2 inch strips. Peel and slice onion. Peel eggplant and cut in 1/2 inch cubes.

For sauce: In large skillet over medium-high heat, in hot salad oil, cook green pepper and onion until tender; add eggplant, tomato sauce, wine, garlic and bay leaf; simmer 15 minutes.

Meanwhile, preheat broiler if manufacturer directs. In small saucepan over low heat, melt butter or margarine with lemon juice, 1/2 teaspoon salt and 1/4 teaspoon pepper.

Place fish in broiling pan and brush generously with butter mixture. Broil 5 minutes; turn and brush with butter mixture. Broil 5 minutes longer or until fish flakes easily when tested with a fork. Serve fish with sauce. Makes 6 servings.

SEAFOOD CURRY

- 1 large coconut
- 3 cups milk
- 1/4 cup butter or margarine
- 1 medium onion, peeled and chopped
- 1 medium apple, peeled and diced
- 1 tsp. curry powder
- 1/3 cup flour
- 1 tsp. fresh-ginger juice or 1/2 tsp. ground ginger
- 1 tsp. grated lemon rind
- Salt and white pepper to taste
- 2 cups diced cooked lobster meat, cooked cleaned shrimps or crab meat
- 1 cup uncooked rice

Chopped parsley

Grate coconut and reserve liquid for other use. Add 3 cups coconut to milk and scald. Cool to room temperature and squeeze through several thicknesses of cheesecloth; discard coconut. Melt butter in top part of double boiler. Add onion, apple and curry powder and cook, stirring occasionally, over simmering water 30 minutes. Blend in flour. Add milk and cook, stirring, until smooth and thickened. Add remaining ingredients, except last 2, and heat well. Cook and drain rice, put in serving dish and cover with curry mixture. Sprinkle with any remaining coconut and with parsley. Serves 5.

OPEN SUNDAY

len magnuson

Husband: "If a man ever steals he'll always live to regret it." Wife: "How about those kisses you stole from me before we were married?" Husband: "..... like I said....."

I have a husband who is rich-- He adds much to my life, He buys me everything I want-- But please don't tell his wife.

The world hasn't been inherited by the meek, but it is being largely supported by them.

The trouble is that all the world believes that doing harm to the enemy is more useful than doing good to yourself.
